Library—1 story and base, brick, \$10,000, Upland, San Bernardino Co., Cal. Architect, Homer W. Glidden, Wright and Callender Bldg., L. A. Owners, City of Upland. The building has been designed in the classic style, and will be 10x60 feet. There will be the general reading room, office, public room and stack rooms. There will be oak floors. The exterior of the building will be faced with pressed brick. The plans are complete and the architect will call for figures at once.

Synagogue—1 and 2 story and base, cement block construction. Cost not stated. Tropic, Los Angeles Co., Cal. Architect, Walter Webb, Ferguson Bldg., L. A. Owner, Dr. Dana B. Beckwith. The building will cover an area of approximately 100 feet square. There will be 30 rooms, 8 bath rooms and a completely equipped kitchen. The interior of the building will be finished in pine with maple floors throughout. There will be steam heat. The exterior will be of cement blocks. The plans will be completed at once and the work will be done by Day Labor.

Hospital—2 story and base, semi-fire proof construction. Cost not stated. Oxnard, Ventura Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. The building details have not been fully decided upon and the architect is now preparing sketches which are to be submitted to the owners for approval. The same architect has just awarded a contract to Thomas Carroll of Oxnard for the construction of a temporary bungalow style hospital for the Sisters of Mercy, which is to be put to use until the completion of their permanent structure.

Stores and Laths—7 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Elson & Son, Wilcox Bldg., L. A. Owner, Emil Olovich. The plans thus far prepared have only been a tentative. The building is to have a frontage of 25 feet. The upper floors will be arranged for lifts. There will be steam heat and elevator service. A tenant is negotiating for

the building and as soon as final arrangements are perfected the work will proceed.

School—1 story and base, brick, \$12,000, Newport Beach, Orange Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Newport Beach School District. The building will contain four class rooms and an auditorium with a seating capacity of 300. The plans have been approved by the School Board and bids are now being called.

School—2 story and base, brick. Cost not stated. Redondo Beach, Los Angeles Co., Cal. Architect, L. E. Pemberton, Auditorium Bldg., L. A. Owners, City of Redondo Beach. The building will cover an area of 73x105 feet. There will be 15 standard sized class rooms and an auditorium seating 600 people. The exterior of the school will be faced with pressed brick. The plans are complete and bids for the general construction are now being taken. Separate bids will be considered for the heating and ventilating. Bids will be opened on May 17th. Plans may be secured from the architect.

School—2, 2 story and base, brick and concrete construction. Los Angeles, Cal. Architects as follows. Owners, City of Los Angeles. Architect Frank G. Krueker, Ferguson Bldg., L. A., commissioned to prepare plans for a 16-room school to be erected at McKinley and 52nd Sts., to cost \$50,000, and Architect George F. Osterman, California Bldg., L. A., commissioned to prepare plans for a 12-room school to be erected at Wadsworth and 38th Sts., to cost \$10,000. Plans for both buildings, which are to be of semi-fire proof construction, will be prepared at once.

Pumping Plant—1 story and base, reinforced concrete. Cost not stated. Orange, Orange Co., Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, City of Orange. The building will be 100x60 feet and 20 feet high. The interior will be arranged for the machinery and will be finished in pine and tile. The exterior of the building will be faced with cement plaster. The plans are being prepared.

Contracts Awarded.

School—2 story and base, frame and concrete, \$35,000, Lodi, Merced Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owners, La Grande School District. Contractor, John Hoffman, Madera. Contract price, \$25,000.

School—2 story and base, brick and concrete. Cost not stated. Van Nuys, Los Angeles Co., Cal. Architect, A. C. Smith, 397 So. Broadway, L. A. Owners, Van Nuys School District. Bids for the general construction were opened as follows: Geo. C. Parsons, Van Nuys, bid for the building complete, except plastering of rear wall, \$15,650; Ye Flamy, L. A., bid for the building complete, providing seventeen changes were made in the specifications, \$17,500; W. S. Rubenspeck bid \$11,500 for the building complete, except the plumbing, heating and painting in the second floor is left unfinished deduct \$1,500. The Kling Co. bid \$48,877 for the building complete.

Editorial Comment.

If all great things that have been planned for California and San Francisco are carried out the next few years ought to witness an amount of development work never before recorded in the history of the state and in the west. To begin with there is the Exposition with its many millions to be spent. There is the great highway to be constructed, the harbor improvement for ten millions; the Key route, pier and docks at Oakland costing some fifteen millions; and now comes the project of an engineer to bridge the bay at a cost of twenty millions or more.

Added to this there are hydro-electric schemes and reclamation projects throughout the state to the extent of a hundred millions or more. In the city itself there are numerous tunnel projects that require the outlay of several millions. The Civic Center and City Hall project is already far on its way. With all these there is every day something new started that tends to outdo some other similar project. On the whole there ought to be busy times for the next ten years at least.

Reports in the daily papers state signs of trouble have made their appearance in the cement work of the new tunnels of the Lackawanna and Hudson and Manhattan railways in New York. The cause of the failure is not yet known, but it is supposed to be due in some measure at least to electrolytic action. The exact circumstances under which such action becomes apparent is at present little known but there is little doubt that some of the causes of cement disintegration is due to this source.

Stray currents from conductors carrying heavy currents are probable and possible causes of premature decay. Just as the rusting of iron and steel is now supposed to be due to local surface currents set up by chemical action or electrolysis so is the chemical action in the cement supposed to come from electrolytic action.

Cement has come into a very very wide use in building construction in a very short time. There are many problems relating to it that are as yet incompletely solved. So in this case a commission has been appointed to investigate the condition and the report will be given out in the course of a few weeks time. The report will not only be awaited with much interest, not only on account of its own importance, but also in view of its bearing on the general question of the disintegration of cement construction under the action of electrolytic and possibly other causes.

Hundreds of millions of American capital are invested in flesh in mines and in the transportation, railways and lands of various descriptions. That fact no doubt has a great deal to do with the attitude of this government toward the southern republic.

So also it influences a fertile field for the politician and trouble maker and a place where the land will thrive. Modern no doubt has his hands full. Under present conditions it would take a strong military force to maintain order in that country no matter what might be his statement or the justice of his policies.

Meanwhile the Hearst papers are making the most of sensations as usual, and thus a good deal to cause apprehension and alarm over Japanese aggressions and possible equities of territory to be to the Japanese.

This country can claim to interfere there unless there be some very imminent danger and a very grave crisis. And then only as a last resort. It were better to uphold the hands of the government already existing if that government be just and administered with any degree of wisdom. Will street should not be allowed to force this nation into a war with a weaker nation to protect or advance its own interests unless there be ample or just reasons for the nation's action.

The motor driven steamship Selandia has made its first successful voyage and the result of its trip is said to be highly satisfactory. In addition to its increased carrying capacity the fuel consumption was very slight and oil proved to be a very economical source of energy. The report made on its first trip is as follows:

Indicator diagrams taken during the first voyage show that the mean effective pressure was 91 pounds per square inch at 129 revolutions per minute. This gives the indicated horse power for the eight cylinders as 1190, or, assuming 84 per cent mechanical efficiency as obtained on the test bed at the works this would give 1000 brake horse-power. Fuel consumption was about 0.15 pound per brake horse-power per hour. The cargo-carrying capacity, owing to the absence of coal bunkers and boiler rooms, has been increased by 1000 tons, and only two engine-room officers are required on each watch.

As this effects economies in two ways, in the amount of fuel consumed and increased carrying capacity, it is certainly something to take notice of in the marine navigation. The motor used in her engine rooms was the Diesel engine which has proved itself to be so effective and simple.

Pottery Making In England and America. A Comparison In Methods In One Of The Oldest Arts.

It is sometimes a matter of inquiry how it has come to pass that, inasmuch as American potters derived their prime knowledge almost exclusively from England, the practice should have become so radically different. It can, however, be shown that the changes which have been made are almost wholly those which have arisen out of the exigency of cost. Labor in England is cheap, absurdly cheap, when judged by American standards. In this country the high cost of labor has led to necessary economies in this direction and these, in turn, have enforced radical changes. These points will be made clear in a review of the methods in vogue in both countries.

The differences will be found to be not so much in the actual making of the wares as in the preparation of the materials, or, in other words, in the organization and methods of slip-house.

At the time when English wares were being evolved from the product of the crude natural clay to the more or less complicated mixture which now obtains, there was little or no machinery in the slip-house. The blungers were rectangular tanks set below the level of the floor and lined with heavy slabs of slate. One of these was set apart for each brand of clay, usually one ball clay and one china clay. The tank was half filled with water and the clay was shoveled in, only a slight regard being paid to quantity. After a reasonable time for soaking the slip-makers attacked this with long-handled hoes which were worked up and down after the manner of a dasher churn. The hoe made a hollow sound as it entered the fluid and this doubtless originated the term "blunging." After an hour's strenuous work the clay was worked up sufficiently to form slip. Meanwhile the flint and cornwall stone spar is but little used in England) have been ground in water at the mill. The larger factories run their own mills, the smaller ones buy from centrally located establishments. Of late years the cylinder mills have been largely adopted, but in the time under consideration the paved bath mill was the only one used. The material was fed to the mill pan in small pieces and the grinding continued until the clay was considered fine enough. It was then run down into a "wash tub," a circular vat half filled with water, and after stirring was allowed to settle. The clear water was then allowed to run away and the suspended material, flint or stone, was drawn off to within six inches of the bottom of the vat. All the settlings were returned to the mill with the next charge. Thus only the ground material which was fine enough to remain in suspension was used in the mix. Before the era of pumping, this "slap," as it was, and is, called, was conveyed to the slip-house in buckets. Later it was considered a marvelous improvement to have a long wooden trough into which the slap was poured, to flow by gravity into the slip-house. If the material

was ground outside the pottery it was commonly delivered in large tin cans resembling those now used for the transportation of milk.

All was now ready for the mixing, which was always performed by measure. The modern method differs from this only in the use of machinery. The clays are still blunged separately, but this is now done in closed iron tanks or in large open containers of wood. In either case the motion is supplied by one or more shafts propelled by power. pumps are used almost exclusively for conveying the liquid materials from place to place.

The mixing process has not changed in any appreciable degree, probably because the English potter has not found any improved method. When the foreman enters the slip-house to make the body mix, he finds a large square tank or "ark" for the mixing, and beneath the floor are similar arks each containing a separate material in the slip condition. Each has been carefully lawned or screened and it is certain that every bit of the material is fit to enter the mix. The slip-maker now brings a jug filled with one of the fluid clays and the foreman weighs a pint of this with great care. He may either have the material brought to a predetermined weight or he may ascertain the actual weight and by means of calculated tables, can ascertain the necessary volume of fluid which is necessary. For example a pint of ball clay should weigh twenty-four ounces. His recipe may call for fifteen inches of this. But if it weighs less he must use more and vice versa. The necessary quantity of the first material is then pumped into the mixing ark, the depth being gauged with great accuracy. This method is then followed with one material after another until the mix is completed. The whole mass is then stirred by a revolving paddle for an hour and finally the finished slip is strained through two or three decks of lawn into the receptacle provided, which is called the "finished ark."

The filter-press is a comparatively modern invention. In the olden time, slip was made into clay on the slip kiln. This was a line of open, shallow tanks built of brick, under which there passed a series of flues. A fire was kept burning day and night and the excess of water was slowly evaporated. The process was slow and not over cleanly but the potter of the old days will affirm that the clay made on the kiln worked far better than that made on the filter press. Of course, the "good old days" are proverbially the best, but in this case there is good reason for the opinion, because the clay became partly "aged" on the kiln. The first filter presses were made of wood with large leaves. In fact, there are many even now who would not use iron filter presses because of the danger of staining the clay with rust and iron specks. The pug-mill is an even later invention. There are many old potters, even in this country, who

remember the "clay hole" in the pottery shop, with the "scedding block" beside it. Perhaps conditions have altered quite lately, but we remember the percentage charged the potters for "pugging" making the introduction of the pug-mill after the prices had been settled. The pug-mill is not an entirely satisfactory tool. It has been found that a short, dry clay is made worse by being pugged and in some places the French rolling table has been introduced as an improvement. This device undoubtedly secures a better working clay, but its output is quite limited.

The English method will be seen to have certain important advantages. Each material is cleaned separately and irregularities in the mix are avoided. The factor of varying moisture is eliminated. All the materials are used wet and it does not matter if a clay has contained five or fifteen per cent moisture. The ground materials, being fluted, are in a proper state of fineness, a point which is vital to the construction of a good body clay.

The disadvantages of the method are time and cost. It takes far longer to make a ton of clay by this process than it does by the American plan, moreover, it demands the presence of an expensive foreman for a good share of his time. It is no uncommon occurrence for the foreman to spend a whole forenoon in the slip-house, to the necessary neglect of other duties.

The American methods are quite different. The materials are received at the plant in a dry or nominally dry condition. The flint and spar have been ground dry by the miller and are expected to serve without further preparation. The slip-house is provided with platform scales, having a number of weighing arms. These can be set at any desired point and the whole locked behind a shutter which conceals the position of the weights but allows the levers to move. A tally board is provided which calls for so many weighings of No. 1, so many of No. 2 and so forth. The materials are brought to the scales in barrow loads, each load being adjusted to the proper weight. After weighing the load is wheeled to the blunger and dumped. The whole mix is then blunged at one operation and, of course, the American blunger is of very large size as compared with the English. After a sufficient time for the blunging operation, the mix is run through a series of lawns. The lawn or bolting cloth is often of woven brass wire, sometimes of silk. The mesh varies from 50 to 120 to the linear inch. The mesh used in England is from 100 to 160, according to the grade of ware to be produced. Passing through the lawn the fluid is allowed to fall into a large containing vessel set beneath the floor of the slip-house. This vessel is known as the agitator, because in it the material is kept in constant motion by means of a shaft with attached paddles. The function of the agitator is to receive

the finished slip from the blunger and to hold it in readiness for the filter-press. It is usually large enough to contain more than one complete charge, so that the operation of blunging can go on continuously, even if the filter-press should be temporarily out of use.

Powerful pumps now take up the fluid clay and force it into the chambers of the filter-press. The water escapes through the walls of the cloth lining and the clay, retained within is stiffened to a plastic condition. When this has been attained the press is opened, the cloth unfolded and the solid leaves of clay are fed to the pug-mill. The pug-mill is a vertical cylinder within which is a shaft armed with blades set at an angle. These blades reach nearly to the inner surface of the cylinder, so that the clay is not only kneaded but is subjected to a heavy pressure. At the bottom of the mill is a side opening about eight inches in diameter and through this the clay, now smooth and homogeneous, is forced in the form of a cylinder. This is separated by a cutting wire into sections of convenient length which are either conveyed to a collar for storage and mellowing or are sent at once on an elevator to the potters' shop. The supreme advantage of this plan is speed and consequent economy. When the foreman has set the scales and locked the shutter he has no further concern with the mix except as to a general oversight. The work can be done by the regular slip-house force, supplemented by inexpensive labor in the wheeling and shoveling. The machinery, of course, needs the attention of a skilled mechanic, but this is the case everywhere. The disadvantages are, first, the factor of moisture. In calculating the proportions of the mix, allowance will be made for average moisture, but considerable variations are always occurring, and if these were to be closely watched a good deal of valuable time would be expended. There are some superintendents, doubtless, who give attention to this, but it is a question whether they would not save time by adopting the wet method of England in its entirety. Secondly, there is the matter of lanning the whole mix at once. There must be a certain percentage of refuse which the lanns are intended to reject and do reject, but there are no means of knowing from which of the several materials this refuse has come. It may be from a consignment of short ground flint; it may be from a dirty ball clay, nobody knows. And, thirdly, there is the error and irregularity arising from the use of ground flint and spar. The preparation of this material is beyond the control of the pottery manufacturer and it is quite certain that large variations occur which are unsuspected. This is not a criticism of the miller. He may prepare and sell his material in perfect good faith but he, himself, is in the hands of his workmen, and no workman is infallible. By the English plan of water suspension, error in grinding is almost completely eliminated, because the coal material simply subsides and is sent back to be re-ground. Furthermore, it is certain that material which has been water-ground is more easily worked into the clay mix than that which has been ground dry.

These are the facts as they appear

after a long experience and a close study of methods on both sides of the water. It is not to be expected that American potters will change their plans in favor of the older and more careful process. It may not even be desirable that they should do so. At the same time, it is undoubted that each can learn something from the other. In the preparation of a pottery body there is a marvelously wide margin of safety. If it were not so the many variations which are constantly occurring would assuredly result in disaster. Every now and then, as every potter knows, a disease will appear, become acute, diminish and finally vanish. Like the wind it "blows where it listeth" and, like the wind no man seems to be able to tell where it comes or whether it goes. But there must be a reason, a cause, for every effect, and it is by a careful watch over materials and a more perfect understanding of processes that the practical potter may find that prevention which is proverbially better than a cure.—Charles F. Burns, in *The Clay Worker*.

ROMAN LONDON.

Archaeologists assembled in congress in London recently and their special object being the forming of a chronological survey of London and its antiquities. The remains of Roman London to be found within the square mile of the city were visited. The itinerary was sketched by Mr. Allen S. Walker, acting hon. secretary to the congress. Mr. Walker indicated the course taken by the Roman wall as far as the Tower of London. As to the origin of the city, emphasis was laid on one fact only—the casual studies of London history, and that was that the whole of the British names which remained were associated with water—the Thames, the Fleet, Dowgate, Billingsgate, associated mythically with King Lud, who is supposed to have built it, and Ludgate, or Flood-gate. Extracts were read from old histories, suggesting that after Brutus had finished building the city, which he called New Troy, he made choice of the citizens to inhabit it and provided them with laws for their government, and that if King Lud ever did exist he spent most of his time in London. It was singular that there was more of Roman than of Saxon London. The Saxon finds had been extremely few. There was not a single building that was Saxon in date in the whole of London or in the country. London was not a second Rome. It was a colonial city. Many of the houses were of wood with mosaic pavements. It was a place of distribution of the food over the country and for the troops. London was never the most important city. The remains of the Roman buildings were clumsy and rough, and did not suggest that London could have in any way rivalled the superiority of ancient Rome. The first place visited by the archaeologists was the remains of the Roman wall in the foundations of the General Post Office. The interesting feature of this bastion is that it is the only one that has been found turning a corner where the walls run around. The bastion had no proper connection with the wall; it was simply joined to it. The view was expressed that the

bastion was carried out in later years to a salient angle for the purpose of giving a flank defence, and it was doubted if it went back so far as the Roman period, and it might be Norman. The Post office authorities were congratulated for having preserved this interesting memorial of London, and the hope was expressed that if ever the Post Office buildings were extended beyond their present dimensions the memorial would not be disturbed. Quoted archaeological authorities went to prove that the bastion was of Roman date, since it was filled with nothing but Roman remains, which were preserved in a small case at present in the possession of the Post office authorities. At the Guildhall Museum, the curator indicated the Roman remains in the shape of flint instruments, pottery, the statue of the Roman warrior found in the bastion in Cannon Street, and the tessellated pavement discovered twenty-three feet deep in Bucklersbury in 1869. Another example of the Roman wall was seen at Barber's handed warehouse, Cooper's row, Trinity square. The Roman bath in Strand Lane was visited. Concerning the Roman relic, the theory was advanced that it might be a first or second century bath, and that it was in the house of a man who farmed the lands on the heights of Holborn. This allusion to Roman husbandry led to the suggestion that in the Roman period Britain was the Roman Cerealia, and exported corn to Rome to feed some part of the population there.

The coal strike in England brought up the question of the price of coal in the world's markets and emphasized the fact that sooner or later the coal mines of the British Isles would be exhausted or mined out at an ever increasing cost. Naturally the world must seek for new coal fields if they can be found or find some substitute.

Oil has in a great measure supplanted the solid coal but even that does not supply all the uses for heat and energy nor is it possible it ever will. The known coal fields of the world, developed or undeveloped will therefore have an ever increasing value.

A bill has been introduced into the

House of Representatives that provides for the construction by the federal government to the coal fields in Alaska and there to engage in coal mining on a government reservation to supply the army and navy of the Pacific Coast.

The railroad is to be built like the Panama canal under the supervision of the engineering department of the United States Army. The secretary of the Interior, through the bureau of mines, is directed to proceed to develop and work the deposits of coal on government lands and to provide bunkers for the product at tidewater.

The Alaska coal deposits are said to be the richest in the world. It would be a great thing for the government and for the Pacific Coast in particular to have these mines opened. At present the Navy Department is shipping coal around the Horn to supply the ships of the Pacific fleet and the government would soon make the expense of developing these fields by saving in freight. The bill is said to have the approval of the Secretary of the Interior and should be passed.

Firms desiring news on special classes of buildings such as Banks, Churches, Tenements, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Pierre Ducasse. The building will be 25x83 feet and will contain 12 apartments of two and three rooms each with bath. The interior will be finished in pine with some elm panels. There will be wall beds and gas grates. The exterior of the building will be covered with white cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 8 story and base, brick and steel, \$75,000. Architect, Harry Skidmore, Foxcroft Bldg., S. F. Owners, Burnett Estate. The building will be erected on a corner lot and will cover a ground area of 86x50 feet. There will be stores on the first floor and a large number of two and three room apartments with private baths on the upper floors. There will be steam heat and elevator service. All apartments will be equipped with wall beds. The exterior of the building will be faced with cement plaster. The plans are nearly complete and figures will be taken shortly.

San Francisco—Apartment houses, 2 1/2 story and base, frame, \$7,000 each. Architect, David C. Coleman, Western Metropolitan Bank Bldg., S. F. Owner, William A. McKee. The buildings will each cover an area of 27x68 feet. The interiors will be arranged for ten apartments of two and three rooms and bath each. The interior finish will be of pine and redwood. There will be wall beds in all suites. The exteriors will be covered with brick veneer. The architect is completing the working drawings and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$36,000. Architect, Sidney E. Newsom, Nevada Bank Bldg., S. F. Owner, A. Peterson. The building has been designed with stores on the first floor and apartments above. There will be five stores, 10 2-room apartments and 8 3-room apartments. All of the suites will have connecting baths and wall beds. There will be steam heat. The interior will be finished in pine with some hardwood floors. The exterior of the building will be covered with cement plaster on metal lath. The architect is preparing the plans.

San Francisco—Apartment house, 3 story and base, brick and frame, \$50,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Mary E. Sidal. The building will be erected on a corner lot in the Richmond District. There will be several stores on the first floor and a large number of modern two and three room apartments on the upper floors. All suites will have wall beds, private baths, hot and cold running water, vacuum cleaning system and other modern features. There will be steam heat. The exterior of the building will be faced with cement plaster and brick veneer. The architects are preparing

the plans.

San Francisco—Apartment house, 3 story and base, brick and frame, \$23,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Mary E. Sidal. The building will be erected in the Richmond District, and will adjoin another three-story structure of a similar nature being designed by the same architects. There will be 12 apartments of two and three rooms each and bath. The interior finish will be of pine and hardwood. There will be steam heat and wall beds. The exterior will be covered with cement plaster and brick veneer. The work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$12,000. Architect, none. Owner, J. S. Mallock, 402 Kearny St., S. F. The building will contain twelve modern two and three room apartments. There will be private baths, wall beds and other features. The interior of the building will be finished in pine and redwood. The exterior will be covered with cement plaster on metal lath. The plans are in the hands of the owners and the work will be done by Day Labor.

Oakland, Cal.—Apartment house, 5 story and base, brick and steel, \$75,000. Architect, George W. Patton, 2126 Emerson St., Oakland, Owner, Mrs. E. C. Cross. The building has been designed for an apartment hotel. There will be in the neighborhood of 128 rooms and baths. The interior will be handsomely finished. There will be steam heat and elevator service and wall beds. The exterior of the building will be faced with cement plaster. The plans are in the hands of Mr. Patton who will have complete charge of the work. Preliminary figures are now being taken. It is more than probable that the building will be erected on the percentage basis with Mr. Patton as the contractor.

San Francisco—Apartment house, 3 story and base, frame, \$20,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, E. F. Bernard. The building will be erected on a corner lot and will contain a number of apartments arranged in two, three and four room suites with connecting baths. The interior will be handsomely finished in pine and hardwoods. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. The plans are now being prepared.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hohmann Bldg., L. A. Owner, Paul Ridley. The building will contain 90 rooms arranged in suites of two and three rooms each with connecting baths. There will be a number of special social rooms besides the storage rooms and space for the mechanical equipment. There will be wall beds, steam heat, freight and passenger elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans have been placed in the hands of the owner and the work will be done by Day Labor.

San Diego—Apartment house

and stores, 3 story and base, brick, \$10,000. Architects, Quayle Bros. and Cressy, Stage Theatre Bldg., San Diego. Owner, Frank A. Simmons. The building will be built in the shape of an L with one portion 50x110 feet and the other 50x50 feet. There will be six stores on the first floor and 26 apartments of 2 and 3 rooms on the upper floors. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 5 story and base, steel and reinforced concrete. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owner, P. L. Auten. The structure will cover a ground area of 148x114 feet. There will be 227 rooms exclusive of the baths which will be arranged in suites of two, three and four rooms each. There will be steam heat, elevators, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement. The plans have been revised and are now out for figures.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, J. William Roberts, 2215 West 25th street, L. A. Owner, J. William Roberts. The building will be 50x110 feet. There will be 75 rooms arranged in suites of 2 and 3 rooms each with private baths. There will be steam heat, wall and disappearing beds and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and artificial stone. The architect is preparing the plans.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, Neher and Skilling, Pacific Electric Bldg., L. A. Owner, Washington Sullivan. The building will cover an area of 130x110 feet and will contain seven stores on the first floor and 157 rooms and baths on the upper floors. The suites will be arranged in apartments of 2 and 3 rooms each. There will be steam heat, wall beds, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with artificial granite. The plans are complete and figures are being taken.

Contracts Awarded.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Charles E. Werner, 1116 Elm St., Berkeley. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, \$12,000. Architect, Albert Egan, Piedmont Bldg., S. F. Owner, R. R. Kimball. The dwelling will contain eight rooms and baths. The interior finish will be of pine and hardwood with oak floors in the principal rooms. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Hillsborough, San Mateo Co., Cal.—Residence, 1½ story and base, \$10,000. Architects, Howard and White, Lick Bldg., S. F. Owner, Mr. Hooper. The dwelling has been designed in the bungalow style. There will be in the neighborhood of 8 rooms and baths in the house. The interior will be finished in pine and redwood with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be finished in cement plaster on metal lath. The architects are taking figures on the work.

Alameda, Alameda Co., Cal.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, R. P. Clark, 2241 Santa Clara street, Alameda. The dwelling has been designed for a 6 room house with bath. The interior finish will be of pine throughout. There will be an open fire place in the living room with an attractive tile mantel. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,500. Architect, A. W. Smith, 1910 Broadway, Oakland. Owner, J. Healy. The dwelling will contain 8 rooms and bath. The interior will be finished in pine with some elm panels and oak floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$10,000. Architect, E. A. Schumacher, 45 Kearny street, S. F. Owner, J. A. McLaugh. The dwelling has been designed for an 8 room house with baths. The interior will be handsomely finished in pine, redwood and mahogany. The floors will be of hardwood. There will be furnace heat and open fire places. The mantels will be tile and brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with

cement plaster on metal lath. A garage will be erected in connection with the house. The plans are complete and the work is now being figured.

SCHOOLS

San Francisco.—School, 2 story and base, Class A construction. Cost not stated. City Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the exterior plastering of the new Lowell High School have been completed and bids for the same will be opened by the Board of Public Works on May 15th. Plans and specifications may be obtained from the Architectural Dept.

Livermore, Alameda Co., Cal.—School, 2 story and base, reinforced concrete, \$20,000. Architects, Wicks & Carey, Western Metropolitan Bank Bldg., S. F. Owner, Roman Catholic Arch. Bishop of San Francisco. The building has been mentioned in these columns before when the architects were first selected to prepare the plans. The working drawings have been completed and bids are now being taken. The building will be used as a convent school. The exterior will be faced with cement plaster.

Lodi, San Joaquin Co., Cal.—School, 2 story and base, brick and steel, \$130,000. Architect, Lewis L. Stone, Albany Block, Oakland. Owners, Union High School District of Lodi. The architect has practically completed the working drawings for this building and a call for bids will be published shortly. The building will contain in the neighborhood of 16 class rooms, assembly hall and science departments. There will be a central heating system. The exterior will be faced with pressed brick.

Woodland, Yolo Co., Cal.—School, 2 story and base, brick and steel, \$100,000. Architect, W. H. Weeks, 251 Kearny street, S. F. Owners, Woodland High School District. This work has been mentioned here before. The plans have been out for figures but no contract has been awarded. The architect has notified all bidders and new figures will be called for at once.

Pinuba, Tulare Co., Cal.—School, 1 story and base, brick, \$10,000. Architects, Parker and Kenyon, 214 Kearny street, S. F. Owners, Pinuba School District. The architects have just been commissioned to prepare plans for the building. There will be 8 class rooms and a large assembly hall. The building will be planned in the form of a letter X with the assembly hall in the center. The exterior will be faced with cement plaster. There will be a central heating system. Plans will be complete in about a month.

Contracts Awarded.

Salt Lake City, Utah.—School, 1 story and base, Class A construction, \$500,000. Architects, Eldredge and Chesbro, Salt Lake City. Owners, City of Salt Lake. Contractors, James Stewart Const. Co. Contract price not stated.

Los Angeles, Cal.—School, 2 story and base, brick, \$10,000. Architect, W. J. Rhinier, Laughlin Bldg., L. A. Owners, City of Los Angeles. The building will be erected at Santa Barbara and Western avenues and will contain 9 class rooms and an auditorium. The construction will be of the slow burning type. The exterior of the building will be faced with pressed brick. There will be steam heat and a modern sys-

tem of ventilation. The architect has just been commissioned to prepare the plans.

Pasadena, Los Angeles Co., Cal.—College buildings, reinforced concrete. Cost not stated. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owners, Nazarene University. A total of seven buildings will eventually be erected. The first structure will be the academy. It will be two stories and basement, 80x120 feet, and will contain an auditorium to seat 300 people, physical and chemical laboratories, and seven class rooms. The construction will be of reinforced concrete with tile roof, hollow tile filler walls and interior partitions, pine trim, plumbing, electric wiring, steam heat, etc. It will cost about \$70,000. The second large building to be erected will be the administration building which will cost \$125,000. The university already has several large temporary buildings which are being used for college and dormitory purposes. Fred C. Epperson, Title Insurance building, is chairman of the building committee.

Canby, Ore.—School, 2 story and base, reinforced concrete, \$25,000. Architect, Wayne L. Mills, Portland. Owners, Canby School District. The building will contain 8 class rooms. There will be steam heat and a system of ventilation. The exterior of the building will be faced with cement plaster. The architect has just been commissioned to prepare the plans and bids will not be taken before June 1st.

Contracts Awarded.

Van Nuys, Los Angeles Co., Cal.—School, 2 story and base, brick, \$15,000. Architect, A. C. Smith, 307 South Broadway, Los Angeles. Owners, Van Nuys School District. Contractor, George C. Parsons, Van Nuys. General construction. Contract price \$10,000.

Los Angeles, Cal.—Schools, 3 2-story and base, brick. Cost as follows. Architects as follows. Owners, City of Los Angeles. Auditorium building, brick construction, designed by Architect, C. A. Faithful, Contractors, Mulder and Harnish, Union League Bldg., L. A. Contract price \$16,550. Two story and base, brick school designed by architects Withey and Davis, Story Bldg., L. A. Contractors, Dawson and Daniels, 915 Boston Court, Pasadena. Contract price \$26,255. Two story and base, brick school designed by Architects Eager and Eager, Story Bldg., L. A. Contractor, Alex. Grant, 1201 West 27th street, L. A. Contract price \$22,775.

SEWERS, STREET WORK AND WATER SYSTEMS.

Oakland, Cal.—Fire protection system, extensions. Cost not stated. City Engineer, Oakland. Owners, City of Oakland. Bids will be opened on May 15th for the extensions to the salt water fire protection system of the City of Oakland. The work will consist of the extension of the present system from Market to Washington street. The plans are on file at the City Engineer's office, City Hall Annex, Oakland.

San Rafael, Marin Co., Cal.—Sewer system. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. Bids were recently opened for the construction of a small sewer system at the County Farm. A contract will be awarded at once.

STORE.

Oakland, Cal.—Store, 1 story and base, frame, \$6,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, J. A. McClurg. The building will be 70x65 feet and will contain two modern stores. The interior finish will be of pine. There will be large plate glass display windows. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Oakland, Cal.—Store, 1 story and base, brick, \$12,000. Architect, Hiram K. Lovell, 1809 Euclid avenue, Berkeley. Owner, H. S. Barnes. The store will have large plate glass windows. The interior finish will be of pine. There will be some tile used. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Oakland, Cal.—Stores and offices, 7 story and base, Class A construction, \$200,000. Architects, Reed and Meyer, Oakland Bank of Savings Bldg., Oakland. Owners, Thompson Estate Co. The building will be erected at Broadway and 15th streets. There will be five stores on the main floor and a large number of modern offices on the upper floors. The mechanical equipment will be complete in all details including elevators, vacuum cleaning system and steam heat. The interior will be finished in hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The plans are being prepared.

Lodi, San Joaquin Co., Cal.—Stores and offices, 2 story and base, brick, \$10,000. Architect, Walter Kink, Elks' Bldg., Stockton. Owners, Friedberger and Blodgett, Lodi. There is at present a one story building on the site which will be added to. The first floor will contain four stores, the upper floor 10 offices. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. The architect is taking figures on the work.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.
(Bids close May 20.)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are reported in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House.—3 story and base, frame, \$10,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Pierre Ducasse. The building will be 25x83 feet and will contain 12 apartments of two and three rooms each with bath. The interior will be finished in pine with some elm panels. There will be wall beds and gas grates. The exterior of the building will be covered with white cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Apartment House.—8 story and base, brick and steel, \$75,000. San Francisco. Architect, Harry Skidmore, Foxcroft Bldg., S. F. Owners, Burnett Estate. The building will be erected on a corner lot and will cover a ground area of 85x50 feet. There will be stores on the first floor and a large number of two and three room apartments with private baths on the upper floors. There will be steam heat and elevator service. All apartments will be equipped with wall beds. The exterior of the building will be faced with cement plaster. The plans are nearly complete and figures will be taken shortly.

Apartment House.—Three 3-story and base, frame, \$7,000 each. San Francisco. Architect, David C. Coleman, Western Metropolitan Bank Bldg., S. E. Owner, William A. McKee. The buildings will each cover an area of 27x68 feet. The interiors will be arranged for 10 apartments of two and three rooms and bath each. The interior finish will be of pine or redwood. There will be wall beds in all suites. The exteriors will be covered with brick veneer. The architect is completing the working drawings and the work will be done by Day Labor.

Apartment House.—3 story and base, frame, \$30,000. Architect, Sidney E. Newsom, Nevada Bank Bldg., S. F. Owner, A. Peterson. The building has

been designed with stores on the first floor and apartments above. There will be 5 stores, 10 2-room apartments and 8 3-room apartments. All of the suites will have connecting baths and wall beds. There will be steam heat. The interior will be finished in pine with some hardwood floors. The exterior of the building will be covered with cement plaster on metal lath. The architect is preparing the plans.

Apartment house.—Three story and base, brick and frame, \$30,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Mary E. Sidal. The building will be erected on a corner lot in the Richmond District. There will be several stores on the first floor and a large number of modern two and three room apartments on the upper floors. All suites will have wall beds, private baths, hot and cold running water, vacuum cleaning system and other modern features. There will be steam heat. The exterior of the building will be faced with cement plaster and brick veneer. The architects are preparing the plans.

Apartment House.—3 story and base, brick and frame, \$22,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Mary E. Sidal. The building will be erected in the Richmond District and will adjoin another three story structure of a similar nature being designed by the same architects. There will be 12 apartments of two and three rooms each and bath. The interior finish will be of pine and hardwood. There will be steam heat and wall beds. The exterior will be covered with cement plaster and brick veneer. The work will be done by Day Labor.

Apartment House.—3 story and base, frame, \$12,000. Architect none. Owners, J. S. Mallock, 402 Kearny street, S. F. The building will contain 12 modern two and three room apartments. There will be private baths, wall beds

and other features. The interior of the building will be finished in pine and redwood. The exterior will be covered with cement plaster on metal lath. The plans are in the hands of the owners and the work will be done by Day Labor.

Fire House—3 story and base, brick and steel, \$35,000. Architect, City Architectural Dept., Temporary City Hall, Owners, City and County of San Francisco. The building has been mentioned here before when the plans were first started. The station has been designed to accommodate one company and will be erected on Stockton street. The exterior will be faced with pressed brick and terra cotta. The plans are in the hands of the Board of Public Works and figures will be opened on May 23d.

Flint and Stone—2 story and base, frame, \$6,000. San Francisco Architect, Charles W. McCall associated with S. W. Scott, Central Bank Bldg., Oakland, Owner, Alex J. Levy. The building has been designed for one store on the first floor and a flat of six rooms above. The interior will be finished in pine or redwood. The exterior will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Flint—2 story and base, frame, \$1,000. San Francisco Architect none. Owners, S. F. Nolan, 228 Noe street, S. F. The building will contain 2 modern flats of four and five rooms each with baths. The interior will be finished in pine and redwood. There will be gas-grates with tile mantels. The exterior of the building will be covered with shiplap and rustic. The plans are complete and the work will be done by Day Labor.

Flint—2 story and base, frame, \$3,000. San Francisco Architect none. Owners, Rueger Bros., Pacific Bldg., S. F. The building will be 25'0" wide and will contain four flats of four and five rooms each with baths. The interior of the flats will be trimmed with redwood. There will be gas grates and tile mantels. The exterior of the building will be covered with shiplap and rustic. The plans are in the hands of the owners and the work will be done by Day Labor.

Hotel and Stores—2 story and base, brick and steel, \$40,000. San Francisco Architect, Benj. G. McDonnell, Sheldon Bldg., S. F. Owner, James Irvine. The building will be 137x137 feet. There will be eleven stores on the first floor and a large number of single rooms above. Hot and cold running water has been provided for all rooms. There will be a number of baths. The interior of the building will be finished in pine. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Factories—Built on 5 story and base, brick and steel, cost not stated. San Francisco Architect, Sylvain Schnit-tacher, First National Bank Bldg., S. F. Owners, Standard Bldg. Co. The building will be erected on property adjoining the present plant of the owners. The present building will be raised one story. The new portion will be fitted up for the special uses of the owners. There will be fire proofing. The exterior will be faced with pressed brick. The interior is taking shape on the work.

Hotel—3 story and base reinforced concrete and steel, \$100,000 or more. San Francisco Architect, McDonnell

and Apple-garth, Call Bldg., S. F. Owners, Cliff Estate Co. This work has been mentioned here several times before. The plans have been out for figures but were called in for revision. The building will contain over two hundred rooms with connecting laths and all modern conveniences. There will be steam heat, elevators and vacuum cleaning. The interior will be finished in hardwoods. The construction will be fire-proof. The exterior of the building will be faced with cement plaster. Plans are now being revised.

Residences—Three 2-story and base, frame, \$3,000 to \$4,500 each. San Francisco Architect, E. W. Hyde, Mills Bldg., S. F. Owner, M. A. Lemons. The dwellings have been designed by contract from 7 to 8 rooms each with bath. The interiors will be finished in pine, redwood and white enamel. There will be open fire places and brick mantels. The floors in the principal rooms will be of oak. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Armory Concrete Work, Etc.—Cost not stated. San Francisco Engineer, Lieut.-Col. Thomas Rees, New Customs House Bldg., S. F. Owners, State of California. Plans for gun platforms for a 10-inch rifle and for mortar guns have been completed and figures for the same are now being taken by the engineer. The work will be placed in the new San Francisco Armory. Plans for this work are on file at this office for the convenience of the local builders.

Apartment House—2 story and base, frame, \$20,000. San Francisco Architect, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, E. F. Bernard. The building will be erected on a corner lot and will contain a number of apartments arranged in two, three and four room suites with connecting baths. The interior will be handsomely finished in pine and hardwoods. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. The plans are now being prepared.

Hotel—5 story and base, brick and steel, \$60,000. San Francisco Architect, Henry Sherard, Mills Bldg., S. F. Owner, Mr. Hickie. The building will be erected in the district south of Market street and will contain considerably over 150 rooms. There will be steam heat, elevator service and hot and cold running water will be provided for all of the rooms. The exterior will be faced with pressed brick. The architect has completed the working drawings.

Hotel and Stores—5 story and base, brick and steel, \$80,000. San Francisco Architect, S. Schnit-tacher, First National Bank Bldg., S. F. Owners, Levy Real Estate Co. The building will be arranged for several stores on the first floor and about 150 rooms and baths on the upper floors. There will be steam heat, elevator service and running water in all rooms. The exterior will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken.

School—2 story and base, Class A construction, cost not stated. San Francisco Architect, City Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the exterior plastering of

the new Lowell High School have been completed and bids for the same will be opened by the Board of Public Works on May 15th. Plans and specifications may be obtained from the Architectural Dept.

Contracts Awarded.

School—2 story and base, Class A construction, \$200,000. Salt Lake City, Utah, Architects, Eldridge & Chesbrough, Salt Lake City. Owners, City of Salt Lake. Contractors, James Stewart Constr. Co. Contract price not stated.

complete and the work is now being figured.

Residences—2 story and base, frame, \$3,300 each. Oakland, Cal. Architect, F. S. Forster, 1117 Arch St., Berkeley. Owner, Katharine Havens. The dwellings will each contain five rooms and bath. The interior trim will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The walls will be used in the baths and kitchen. There will be three wall beds. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,600. Berkeley, Alameda Co., Cal. Architect, none. Owner, Charles E. Werner, 2416 10th St., Berkeley. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$12,000. Piedmont, Alameda Co., Cal. Architect, Albert Parr. Foxcroft Bldg. S. F. Owner, E. E. Kimball. The dwelling will contain eight rooms and bath. The interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The walls will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

School—2 story and base, reinforced concrete, \$29,000. Livermore, Alameda Co., Cal. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, Roman Catholic Arch. Bishop of San Francisco. The building has been mentioned in these columns before when the architects were first selected to prepare the plans. The working drawings have been completed and bids are now being taken. The building will be used as a convent school. The exterior will be faced with cement plaster.

Fire Protection System Extensions— Cost not stated. Oakland, Cal. City Engineer, Oakland. Owners, City of Oakland. Bids will be opened on May 15th for the extensions to the salt water fire protection system of the City of Oakland. The work will consist of the extension of the present system from Market to Washington street. The plans are on file at the City Engineer's office, City Hall Annex, Oakland.

Stores—1 story and base, frame, \$3,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, J. A. McClurg. The building will be 70x65 feet and will contain two modern stores. The interior finish will be of pine. There will large plate glass display windows. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Store—1 story and base, brick, \$12,000. Oakland, Cal. Architect, William K. Lovell, 1809 Euclid Ave., Berkeley. Owner, H. S. Barnes. The store will have large plate glass windows. The

interior finish will be of pine. There will be some tile used. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Stores and Offices—7 story and base, Class A construction, \$29,000. Oakland, Cal. Architects, Reed & Meyer, Oakland Bank of Savings Bldg., Oakland. Owners, Thompson Estate Co. The building will be erected at Broadway and 17th streets. There will be five stories on the main floor and a large number of modern offices on the upper floors. The mechanical equipment will be complete in all details including elevators, vacuum cleaning system and steam heat. The interior will be finished in hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The plans are being prepared.

SAN JOSE & SANTA CLARA VALLEY.

Residence—1½ story and base, \$10,000. Hillsborough, San Mateo Co, Cal. Architects, Howard L. Clark & White. Lick Bldg. S. F. Owner, Mr. Hooper. The dwelling has been designed in the bungalow style. There will be in the neighborhood of eight rooms and baths in the house. The interior will be finished in pine and hardwoods with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be finished in cement plaster on metal lath. The architects are taking figures on the work.

Hospital—3 story and base, reinforced concrete, \$100,000. San Mateo Co, Cal. Architect, Lewis P. Hobart. Crocker Bldg. S. F. Owners, Red Cross Hospital. This work has been mentioned here several times before when the announcement was made that funds had been subscribed for the work. The building will be one of the most modern structures in the west. There will be a number of private wards and three public wards. The mechanical equipment will include a number of special new features. The exterior will be faced with cement plaster. The working drawings are nearly complete and bids will be called for very shortly.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

Hotel—8 story and base. Class A construction. \$200,000. Fresno, Fresno Co., Cal. Architects, Parker and Kenyon, 24 Kearny street, S. F. Owners, a syndicate of Fresno capitalists. The building will be erected on a prominent corner at N and Tulare streets. The construction will be class A throughout with a complete steel frame and exterior walls of brick and concrete faced with pressed brick and terra cotta. The interior will be handsomely finished. The mechanical equipment will include steam heat, elevators, vacuum cleaning system and other modern features. The architects are now preparing the working drawings.

School—4 story and base, brick, \$140,000. Dinuba, Tulare Co., Cal. Archi-

teets, Parker & Kenyon, 241 Kearny St., S. F. Owners, Dhulua School District. The architects have just been commissioned to prepare plans for the building. There will be eight class rooms and a large assembly hall. The building will be planned in the form of a letter X with the assembly hall in the center. The exterior will be faced with cement plaster. There will be a central heating system. Plans will be complete in about a month.

Bank—1 story and base, brick, \$20,000. Atwater, Merced Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Bank of Atwater. The building will be 50x100 feet. Besides the banking quarters there will be three modern stores. The interior of the bank will be finished in hardwoods and tile. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Church—Addition—1 story and base, brick, \$10,000. Fowler, Fresno Co., Cal. Architects, Starbuck & Clark, Fresno. Owners, Presbyterian Church of Fowler. The building will provide several Sunday school rooms, an auditorium and living apartments for the pastor. The exterior of the building will be faced with pressed brick or cement plaster. The architects are completing the working drawings.

Hotel and Stores—2 story and base, brick. Cost not stated. Taft, Fresno Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owner, C. A. Fox. The building will be 60x75 feet and will contain several stores on the first floor and in the neighborhood of 75 rooms with baths on the upper floors. Running water will be provided for all rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel—4 story and base, brick and steel, \$80,000. Modesto, Stanislaus Co., Cal. Architect's name not stated. Owner, Thomas F. Griffin, Modesto. The building will be erected at the corner of 11th and H streets. There will be 114 in the neighborhood of 100 guests rooms, a large percentage of which will have connecting baths. There will be steam heat and elevator service. The exterior will be faced with pressed brick. The contract for the foundation work has been awarded to G. R. Shannon, Modesto, and other contracts will be let at once.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Hiernian Bldg., L. A. Owner, Paul Ridley. The building will contain ninety rooms arranged in suites of two and three rooms each with connecting baths. There will be a number of special social rooms besides the storage rooms and space for the mechanical equipment. There will be wall beds, steam heat, freight and passenger elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans have been placed in the hands of the owner and the work will be done by Day Labor.

Apartment House and Stores—3 story and base, brick, \$10,000. San Diego, Cal. Architects, Quayle Bros. & Cressy, Savoy Theatre Bldg., San Diego. Owner, Frank A. Salmons. The building will be built in the shape of an L with one portion 50x140 feet and the other 50x20 feet. There will be six stories on the first floor and 25 apartments on the upper floors. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—5 story and base, steel and reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, P. L. Auten. The structure will cover a ground area of 149x114 feet. There will be 227 rooms exclusive of the baths, which will be arranged in suites of two, three and four rooms each. There will be steam heat, elevators, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The plans have been revised and are now out for figures.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, J. William Roberts, 2215 West 25th St., L. A. Owner, J. William Roberts. The building will be 50x140 feet. There will be 75 rooms arranged in suites of two and three rooms each with private baths. There will be steam heat, wall and disappearing beds and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and artificial stone. The architect is preparing the plans.

Apartment House—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Neher & Skilling, Pacific Electric Bldg., L. A. Owner, Washington Sullivan. The building will cover an area of 120x140 feet and will contain seven stories on the first floor and 157 rooms and baths on the upper floors. The suites will be arranged in apartments of two and three rooms each. There will be steam heat, wall beds, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with artificial granite. The plans are complete and figures are being taken.

Bank and Lodge Hall—2 story and base, Cost not stated. Montebello, Los Angeles Co., Cal. Architects, Needham & Cline, Wright and Callender Bldg., L. A. Owners, Montebello National Bank. The building will be 101x63 feet. There will be the bank and three stores on the first floor and the second

floor will be given over entirely to a lodge hall. There will be tile and cement floors, hardwood trim in the banking rooms and plate glass store fronts. The exterior will be faced with cement plaster. The plans will be turned over to the owners and sub-contractors will be let.

Church—1 story and base, frame and brick, \$20,000. Orange, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Presbyterian Church of Orange. The building will contain a main auditorium with a seating capacity of 500 people, besides several Sunday school rooms, library and social rooms. The exterior will be covered with brick veneer and shingles. The interior will be finished in Oregon pine. The plans are nearly complete and the work will be done by Day Labor.

Church—1 story and base, brick and frame, \$10,000. Van Nuys, Los Angeles Co., Cal. Architects, Walker & Vawter, Hiernian Bldg., L. A. Owners, Presbyterian Church of Van Nuys. The building will contain an auditorium seating 300 people, Sunday school rooms, library and social rooms. The exterior of the building will be covered with glazed brick. The plans are being prepared.

Fire House—2 story and base, brick and steel, \$20,000. Los Angeles, Cal. Architect, J. J. Backus, Chief Building Inspector, Los Angeles. Owners, City of Los Angeles. The building will be 40x50 feet. There will be considerable steel used in the construction. The exterior of the building will be faced with blue brick. The plans are complete and bids will be opened on May 24th.

Garage—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, R. A. Fowler. The building has been designed for a commercial garage and will cover an area of 60x150 feet. There will be a cement floor on the first story. The interior will be arranged for sales rooms, office and repair and storage space. The exterior of the building will be faced with pressed brick. The architects are completing the working drawings.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Hawley, King & Co. The building will cover an area of 100x150 feet. There will be office space, sales rooms and storage room. The floor will be of cement. The exterior of the building will be faced with pressed brick. The architects are preparing the working drawings.

Hotel—1 story and base brick and steel. Cost not stated. Los Angeles, Cal. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, John Lockwood. The building will be 30x80 feet, and will contain in the neighborhood of 50 rooms and several baths. There will be steam heat and running water provided for all rooms. The exterior of the building will be faced with stock brick. The plans are complete and figures are being taken.

Hotel Addition—3 story and base, brick. Cost not stated. Riverside, Riverside Co., Cal. Architects, Krompel & Eikes, Honne Bldg., L. A. Owner, Laura T. Reynolds. The addition will be made to the Hotel Reynolds, and will be 56x100 feet. There will be

a lobby and 30 guest rooms with 13 baths. The addition will be heated by steam. The interior will be handsomely finished in hardwoods. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel—1 story and base, brick and steel. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architect, Thornton Fitts, Pacific Electric Bldg., L. A. Owner, George W. Fox. The building will be 39x112 feet. The first floor will contain the lobby and office besides three stores and a barber shop. The upper floors will be divided into 60 rooms with private baths. The interior will be finished in pine and hardwood with considerable marble used. There will be freight and passenger elevators, steam heat and other modern improvements. The exterior will be faced with enameled brick. The plans are complete and figures are being taken.

Hospital—2 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architect, A. B. Benton, 111 North Spring St., L. A. Owners, University of Southern California. This work has been mentioned here before when the plans were first put out for figures. The building will be 102x102 feet and will contain kitchen, dining room, two operating rooms and six single rooms and two 12-bed wards. There will be the doors and a hot water system of heating. The exterior will be faced with cement plaster. Plans are complete and figures will be opened on May 20th.

Hospital Buildings—2, one 3-story and one 2-story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Larchlin Bldg., L. A. Owners, Children's Hospital. The hospital will have accommodations for about 100 patients. The details of the work can now be obtained at this time. The plans are nearly complete, however, and bids will probably be called for within a week or ten days.

School—2 story and base, brick, \$10,000. Los Angeles, Cal. Architect, W. J. Elmeser, Larchlin Bldg., L. A. Owners, City of Los Angeles. The building will be erected at Santa Barbara and Western avenues, and will contain nine class rooms and an auditorium. The construction will be of the slow-burning type. The exterior of the building will be faced with pressed brick. There will be steam heat and a modern system of ventilation. The architect has just been commissioned to prepare the plans.

College Buildings—Reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Elmore R. Jeter, Citizens' National Bank Bldg., L. A. Owners, Nazarene University. A total of seven buildings will eventually be erected. The first structure will be the academy. It will be two stories and basement, 80x120 feet, and will contain an auditorium to seat 200 people, physical and chemical laboratories, and seven class rooms. The construction will be of reinforced concrete with tile roof, hollow tile filler walls and interior partitions, pine trim, plumbing, electric wiring, steam heat, etc. It will cost about \$50,000. The second large building to be erected will be the administration building which will cost \$125,000. The university already has several large tempo-

SEATTLE AND WASHINGTON.

Dock Repairs and Additions—Wood and concrete construction, \$65,000. Everett, Wash. Engineer, City Engineer, Everett. Owners, City of Everett. The city authorities are about to submit a bond question to the voters calling for \$65,000 with which to make repairs and additions to the City Dock. Preliminary plans for the work have been prepared by the City Engineer.

Dock Repairs—Concrete and frame construction, \$10,000. Seattle, Wash. Engineer's name not given. Owners, Colman Dock Co., Colman Bldg., Seattle. The owners have announced that plans are now being prepared for the repairing of the damage done to the Colman Dock by the steamer Alameda recently. Work will be advertised for bids as soon as the plans can be completed.

Laundry—2 story and base, mill con-

struction, \$10,000. Seattle, Wash. Architect, Charles Haynes, McBurn Bldg., Seattle. Owner's name withheld. The building will be erected in the suburbs of the city, and will cover an area of 41x30 feet. The first floor will contain offices and work rooms and the second floor will be used for the drying and ironing rooms. The exterior of the building will be faced with stock brick. Plans are now being prepared.

City Hall Addition—Brick and steel, \$19,000. Seattle, Wash. Architect, Superintendent of Buildings R. H. Ober, Seattle. Owners, City of Seattle. This work has been mentioned here before. The plans are now complete and bids are being taken. The addition will consist of one story to the present building, and the new portion will be used as a dormitory for the nurses. The exterior will be faced with pressed brick and terra cotta.

Stand Pipe—Steel and concrete construction, \$20,000. Seattle, Wash. City Engineering Dept., Seattle. Owners, City of Seattle. The work will be undertaken as soon as a site can be obtained for the structure. Supt. Young, of the Seattle Water Dept., is handling the matter.

Station—2 story and base. Class A construction, \$100,000. Spokane, Wash. Architect's name withheld. Owners, Oregon-Washington Railroad and Navigation Co. and the Chicago, Milwaukee and Puget Sound R. R. Co. The announcement has just been made that these two railroads have acquired property to the value of \$1,350,000 in Spokane on which will be erected a union depot. None of the details of the transaction have been made public except the estimated cost of the new building which has been placed at \$400,000.

Contracts Awarded.

Association Building—3 story and base, brick, \$25,000. Kalispell, Mont. Architect's name not given. Owners, Young Men's Christian Association. Contractor, C. Haverland, Kalispell. Contract price, \$29,173. Plumbing and heating to the Kalispell Plumbing and Heating Co., Kalispell. Contract price, \$4,413.

Freight Sheds—Frame, \$20,000. Auburn, Wash. Architect's name not given. Owners, Northern Pacific R. R. Co. Contractors, Rounds-Hursen Co., Globe Bldg., Seattle. Contract price, \$20,000.

PORTLAND AND OREGON.

Bridge—Steel construction. Cost not stated. Marshfield, Ore. Engineers, U. S. Government engineer. Owners, U. S. Government. The announcement has just been made that the Government has taken favorable action on the construction of a steel bridge across the bay from Sandy Point to Pony Inlet. Work will be started as soon as plans can be secured.

Warehouse—5 or 10 story and base, steel and concrete. Cost not stated. Portland, Ore. Architect's name not given. Owners, Allied Hill Roads. The property recently purchased on Belmont avenue and the waterfront is to be improved at once by the construction of the above mentioned building. Other improvements will be made in the near future totaling nearly \$3,000,000.

School—2 story and base, reinforced

Index to Advertisers

concrete, \$25,000. Canby, Ore. Architect, Wayne L. Mills, Portland. Owners, Canby School District. The building will contain eight class rooms. There will be steam heat and a system of ventilation. The exterior of the building will be faced with cement plaster. The architect has just been commissioned to prepare the plans and bids will not be taken before June 1st.

Apartment House—6 story and base, reinforced concrete, \$200,000. Portland, Ore. Architects, Williams & Kasmussen, Portland. Owners, syndicate of Portland capitalists. The building will cover an area of 1900x200 feet. The interior has been divided into 390 rooms not including the baths and kitchens. The suites will be arranged in two and three room apartments with connecting baths. The interior will be handsomely finished in hardwoods and tile. The construction will be fire proof throughout. There will be steam, heat, elevator service, wall beds, vacuum cleaning system and built-in refrigerators. The exterior of the building will be faced with pressed brick and terra cotta. Plans for the work will be ready for figures by May 15th.

Church Addition—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, L. A. Pelton, Portland. Owners, Taylor Street Methodist Church. The building will be erected in the rear of the present structure and will be devoted to Sunday school purposes. There will be four class rooms connected to the main portion of the church by arched doorways. The exterior will be faced with cement plaster. The architect has completed the plans and specifications.

Stores and Offices—2 story and base, reinforced concrete. Hillsboro, Ore. Architect, Ernest Krone, Portland. Owners, W. H. Wehrung and associates. The building will be 26x76 feet. There will be four stores on the first floor and eight or nine offices on the upper floor. The interior will be finished in pine. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans will be complete and ready for figures on May 15.

Contracts Awarded.

Freight Sheds—1 story steel, brick and frame. Cost not stated. Portland, Ore. Architectural Dept., S. P. Co., Flood Bldg., S. F. Owners Southern Pacific Railroad. Contractors, Lewis A. Hicks Co., Humboldt Bank Bldg., S. F. and Portland. Contract price not given.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed proposals will be received by the Department of Engineering of the State of California on May 22nd, 1912, for the construction of the grading, excavating and certain foundation work for the San Francisco Armory Building, to be erected in the City of San Francisco in accordance with the plans and specifications for the same as prepared by the Department of Engineering at Sacramento, California, and on file at the office of the Daily Pacific Builder and Building and Industrial News, at 1325 Mission Street, San Francisco, or at the office of the State Engineer at Sacramento.

For further information regarding this work address the State Engineer, Sacramento.

MR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties.

Send for details.

Editorial Comment.

Generally speaking the month of April has been a good one in the building line. From a succession of comparative losses the monthly average has changed to a substantial gain. Reports from 46 cities representing building centers made to the American Contractor show an aggregate gain of 16 per cent over the same month last year. And the gain was pretty consistent throughout, the highest proportionate increase being Nashville with a gain of 124 per cent. Toledo with 108. New Haven 115. Columbus 106 and Los Angeles 61. The great cities showed consistent gains. New York leading with a gain of 24 per cent, Chicago 9, and Philadelphia 23. Of the Pacific Coast cities all show a gain with the exception of Salt Lake City and Spokane. This can be accounted for to some extent by the late spring as they are both mountain towns and the late rains and snow make outdoor work practically impossible. Particulars are to be found in the following table.

City	April 1912.	April 1911.
Atlanta	\$ 1,125,396	\$ 852,763
Baltimore	766,598	1,128,777

Total	\$78,069,852	\$66,022,943

A map and plans of the proposed suspension bridge to be constructed across San Francisco Bay have been filed with the Board of Supervisors. They provide for the construction of a monumental structure that will have a total reach of nine and one-half miles. Of this 4000 feet are to be in the solid earth of that island and 17,810 feet will consist of the suspension spans.

The plans call for a double decked structure that will accommodate eight lines of railway tracks, four for electric and four for steam cars. Besides these there will be roadways for automobiles and horse-drawn vehicles as well as footpaths for pedestrians.

As an engineering feat this would be the greatest work of bridge building the world has ever seen. As to magnitude and length of span it would far eclipse all past undertakings. And for the construction of this vast structure the estimated cost is \$26,000,000. This is the same cost as the Manhattan bridge in New York and is a vastly greater undertaking. The difference in cost is probably due to the expense of acquiring terminal stations in the eastern metropolises compared with the availability of land here to be used for such purposes.

So far as the engineering feat is concerned it seems to be a feasible and practical enterprise. The government has so considered it and every government concession necessary to its construction seems to be forthcoming. The question therefore, resolves itself to one of finance. The proponents of the enterprise claim that provision has been made for financing the enterprise by selling bonds to foreign capitalists and that the only thing necessary to start the construction is to get the consent of the cities interested.

The proposition is said to figure out to be a paying investment. What the basis of calculation is or on what data an income the result is derived are not stated. It is a splendid conception and will no doubt be realized in time. But whether or not it will compete with vested transportation interests to such an extent that they will formidably oppose its passage at this time remains to be seen. It is a big undertaking, something new and comparatively unthought of at the present time and like everything else of such a nature will no doubt have to pass through many vicissitudes before realization.

America's Great Fire Waste. A Comparison Of This Country and Europe.

From the New York Times

Twelve months of fire loss like those in January of the current year would affect the American people, together with the insurance companies doing business in this country, in a manner not pleasant to contemplate. It is said that the percentage of loss to premiums received that month ranged from 80 to 118, compared with a normal in recent years of less than 50 per cent.

For the United States and Canada the estimated loss by fire that month was \$35,653,150, and to multiply that by twelve would give results quite appalling—over \$427,000,000, against an average of \$234,000,000 for 1911 and 1910. On the other hand, there was a difference of less than \$200,000 in the estimated fire loss of the last and the previous year.

This being the fact, there is occasion for hope that the loss for the new year will not be anything like as large as the possibility suggested by the return for the initial month. It ought to be said that the foregoing large total for January includes fires in Canada as well as in the United States, although somewhat less than 19 per cent it is believed belongs to Canada.

Assume that the total losses for the United States in 1912 shall approximate the amount indicated by the January figures and there is no parallel to be found in any past year except in 1905, the year of the earthquake and fire in California, when the footing was \$518,611,800.

So inauspicious a beginning for the current year serves to emphasize the tremendous destruction of property annually by fire in the United States. Mr. Babson contrasts the same with the smaller damage in other countries, indicates some of the causes for so great damage, and the cost of the same to the taxpayers, and suggests remedial agencies.

Losses For Thirty-six Years.

He first submits the following table of losses by fires in the United States for thirty-six years, concluding with 1910, reliable returns for 1911 not being available at this time. For the period mentioned the losses were:

Year	Property Loss.	Property Loss.
1875...	\$78,102,285	1893...\$167,544,370
1876...	64,639,600	1894...140,006,484
1877...	63,265,800	1895...112,110,283
1878...	64,317,500	1896...118,737,429
1879...	57,703,700	1897...116,271,575
1880...	71,620,100	1898...120,292,905
1881...	81,280,300	1899...153,297,820
1882...	81,595,024	1900...160,929,805
1883...	100,119,228	1901...157,147,810
1884...	116,086,611	1902...161,978,049
1885...	102,818,796	1903...145,392,175
1886...	101,924,750	1904...129,198,056
1887...	126,282,055	1905...167,221,670
1888...	110,885,665	1906...158,611,800
1889...	123,046,892	1907...215,084,709
1890...	108,992,792	1908...217,887,850
1891...	133,764,967	1909...188,705,195
1892...	151,516,988	1910...214,003,200

In commenting on these figures Mr. Babson says:

"In the thirty-six years aforementioned the losses by fire in the United States appear, therefore, to have been, in round numbers, about \$1,120,000,000, or an average of about \$142,000,000 a year. This is the direct loss only. Competent authority further estimates an indirect loss to taxpayers for maintenance of Fire Departments and protective agencies fully equal to the direct fire damage, making the estimated total loss for the period in review over \$1,600,000,000.

A few years ago the United States Government, which does not insure its own buildings, had a thorough investigation of fireproof materials and of the broad subject of damage to property by fire in this country, made through the Department of Geologic Survey, the object being to meet the Government's own needs as the greatest consumer of structural materials, and to obtain results likely to be useful to States and municipalities and the people of the whole country.

"Incidentally, it may be said that the General Government is the owner of buildings worth, say, \$400,000,000, and is building at the rate of \$20,000,000 annually.

"It was then worth while for the Government to make this inquiry, and the conclusion of the board making the inquiry, that the indications are that fireproof buildings will be constructed at less expense in the future than in the past, and that the difference in cost between fireproof and inflammable buildings will soon cease to be an encouragement to flimsy construction, is a conclusion at once gratifying and suggestive of good results.

"The board in making its investigations selected a given year, 1907, and the inquiry covered not only the value of the property destroyed by fire, but the cost of maintaining Fire Departments, the amount of insurance premiums paid, less the amounts returned, the cost of protective agencies, the additional cost of water supplied, etc. The discoveries were almost astounding.

"The total cost of fires that year, excluding forest fires and marine losses, but including excess cost of fire protection, due to bad construction and the excess premiums over insurance paid, amounted to about \$450,500,000, an amount exceeding the total value of the gold, silver and petroleum product of the United States in that year, and nearly one-half the cost of new building construction the same year, predestinating the latter upon knowledge that the building construction in 1907, having less than 18,000,000 population, was \$604,000,000.

"For all the country the construction of the year was estimated conservatively at \$1,000,000,000. The actual loss from the destruction of buildings and their contents amounted to \$215,000,000, a per capita loss for the United States of \$2.51, whereas the per capita loss in the cities of the six leading European countries was but 33 cents per inhabitant, or about one-tenth of

the loss in the United States. Furthermore, in addition to the loss of property, 1,119 persons were killed and 5,654 injured by fires.

"It should be said that it was impossible to obtain reports from every town and city of this country, but reports were had from 2,976 cities and villages having a population of 34,000,000, and these reported for the year a fire loss of about \$86,500,000, a per capita loss of \$2.54.

"Postmasters in rural districts reported a loss of about \$3,500,000, a per capita loss of \$2.49, making the total loss for the whole region reported an almost exactly \$90,000,000, which is at the rate of \$2.51 per inhabitant, an index sum that would show a total loss for the country in 1907 of \$215,081,709, distributed as follows: Buildings, \$109,156,894, and contents, \$105,927,815.

Fires in City and Country.

Comparing the losses in cities with those in the country districts, Mr. Babson continued as follows:

"In cities and villages with a population of 1,000 or more, there were in the year studied 6,324 fires that extended beyond the building of origin, with a total exposure loss of \$13,913,694. The loss on fires that were confined to the building of origin in the cities and villages amounted to \$93,179,859.

"The total fire loss in the United States during that year represents a waste of nearly \$600,000 per day for every day of the year and \$2,500 for every hour of the day. Waste is said because that is precisely what it is, for insurance does not bring back the property dissolved into chemical elements and lost in the atmosphere as tangible property; and then all the property is not insured. Estimates differ, as to the proportion of the property destroyed by fire, which the payments by the insurance companies cover from 50 to 80 per cent.

"A public speaker, commenting on fire losses and wishing to impress his hearers, remarked that if the buildings consumed were placed on lots with fifty-five feet frontage they would line both sides of a street extending from New York to Chicago; and if we reckon the killed and injured by fire, a person in journeying along this street of desolation would pass in every thousand feet a ruin from which an injured person was taken, while at every three-quarters of a mile he would encounter the charred remains of a person who had unequalled to the task of depicting the awful sorrow which follows in the pathway of fire or of properly characterizing the act of those who are even innocently or ignorantly responsible for the waste of life and property so frequently chronicled in the fire records of the United States. The 'sin of ignorance' may be or may not be 'winked at' by a higher power, but there should be no excuse for the negligence of an enlightened community

that fails to do all in its power to reduce the waste of life and property to the minimum.

"Prominent underwriters have estimated that 27 per cent of the fire loss comes from fires that extend beyond the buildings in which they originate, owing to the inflammable character of building material.

"It will be noticed that only \$68,000,000 of the loss in the United States for the year specified was on buildings of brick, stone and other slow-burning construction material, whereas the loss on frame buildings was almost exactly twice as much or \$116,000,000.

"It will be further noticed that the loss in cities and villages was almost identical with that in the rural districts or about \$107,000,000 in each, the population being about the same in the two localities, slightly more in the rural districts. It should be remembered that buildings are more thickly located in the cities and large villages than in the country, and their contents are much more in quantity, likewise more valuable. Separating buildings from their contents, it is found that for the year mentioned the building loss in the cities and villages was a little rising \$50,000,000, while in the rural districts it was almost \$50,000,000. The loss on contents in the cities and villages was nearly \$57,000,000, and in the country it was \$19,000,000. The greater efficiency of fire departments in cities is made plain by the foregoing, and by other statistics that might be cited."

Losses by Conflagrations.

A question in regard to the San Francisco disaster led Mr. Babson to speak of America's great conflagrations and he observed:

"Fires entailing a damage of \$500,000 or more each are rated conflagrations, and these entailed a loss of \$18,475,000 in 1907 and \$22,552,000 in 1910. Since 1866 the losses by conflagrations are estimated by the National Board of Fire Underwriters to have been \$1,965,816,165, the most notable having been those at Chicago in 1871, at Boston the next year, at Baltimore in 1901 and at San Francisco in 1906. The fire at Chelsea, Mass., in 1908, carried an estimated loss of but \$8,816,879. The damage by earthquake and fire at San Francisco was estimated at \$250,000,000, or the largest amount for a single disaster in known history.

"It is noteworthy that no other country presents the spectacle of so great conflagrations as the United States. It is recognized that these conflagrations may occur at any time in this country. The Fire Marshal of a Western city, in urging new Building Codes for the two largest cities in his State, Cincinnati and Cleveland, said:

"Either city may at any time suffer a conflagration costing \$300,000,000. The loss at a single Cincinnati fire in 1910 was \$1,750,000. It is probably true that the business people in all American cities are at times apprehensive that a disastrous fire may occur, and they are especially apprehensive in the winter months, when atmospheric conditions are most promotive of combustion. The destructiveness of the fires in the winter just past showed that apprehension was not without foundation. In 1910, the last year of complete published record, there were in the United States 39

fires whose destructiveness was \$300,000 or more each, two of \$1,000,000 each, one of \$1,200,000, one of \$1,500,000, and one of \$1,750,000. The average loss of the 39 fires was \$412,000."

Cost of Fire Protection.

Analyzing the contributory expense connected with fires, Mr. Babson said:

"The incidental or indirect losses by fire include the insurance loss or the difference between the total premiums paid and the amounts paid to the insured, the annual expense of so much of the city water supply as is primarily required to furnish fire protection in excess of the service necessary for domestic consumption, the annual expense of fire department, and the annual expense of private fire protection.

"It is worth remarking, in connection with the foregoing that the fire risks written by the United States companies from 1890 to 1910, inclusive, amounted to \$119,236,033,379, the fire premiums received since 1902 premiums without to \$2,885,631,117, the fire losses paid to \$290,634,884, and that the risks written by the combined domestic and foreign companies, the latter from 1886 only, were \$925,657,817,521, the premiums received \$5,113,529,813, and the losses paid \$2,969,657,582.

"The expense of maintaining the organization for conducting so vast an insurance business some of the consequences of fire and therefore one of the taxes upon the community, although there are, of course, compensating advantages to many members of the community in the conduct of this great business."

Cost of the Water Supply.

Mr. Babson did not care to give a positive answer when questioned on this point, but replied:

"The proportionate part of the cost of water works that should be charged to fire protection is a small question. Necessarily where the consumption of water for domestic uses is large compared with the number of fires occurring, would be larger than in some other localities. Some have contended that the cost should be equally divided, except in the larger cities.

"Taking the country as a whole, the Geological Survey concluded, though upon incomplete data, that less than one-quarter—22 per cent, to be more exact—should be charged for protection against fires of such magnitude, as may be propagated beyond the building of origin.

"Other data were collected by the board mentioned, but they need not be referred to here beyond saying that fire protection was shown to a square 2,000,000 tons of metal piping, etc., worth above \$17,000,000 and 3,000,000 hydrants, valued at some \$500,000."

Capital Invested for Fire Protection. Calling attention to this point, he said:

"Here is a tabulated estimate of the average capital invested by fire protection and annual loss and expense on account of fire in the United States for the past ten years.

(a) The amount paid by insurance companies on account of fire loss was \$111,164,169, and the amount received by them in premiums was \$259,768,831.

(b) This is 22 per cent of the total cost of water system, domestic and fire service combined.

(c) \$215,611,878 cost of water works chargeable to fire service capitalized

at 1 per cent is equal to an annual charge of 2,156,118.767.

(d) \$104,063,418 cost of Fire Departments, capitalized at 1 per cent, is equal to an annual charge of \$1,040,634,519.

(e) Interest on investment, cost of waterworks, etc.

Fire Waste in Europe.

Particular attention was given to this point, and Mr. Babson emphasized very strongly the contrast between conditions in the United States and foreign countries.

"The situation drawn upon to show fire waste in Europe were compiled by the Department of Labor and Commerce, United States, and were unfortunately for many years, but it is pointed out that the variation in Europe is very slight from year to year, so that the data obtained will serve for comparison with the facts in this country.

"Cities in Austria, Belgium, France, Germany, Russia, Norway, Switzerland, and the United Kingdom, with a mapped population of 10,912,265, had a fire loss of \$9,582,310 in eleven years, or at the rate of 18 cents per capita, the greatest loss being that of Russia—\$1.16 per capita. On the same basis as Russia the fire loss in the United States for the 1907 would have been \$99,218,902, or \$116,314,759 less than the record shows it to have been, and if the European rate of 18 cents per capita had obtained the fire waste in this country would have been but \$811,655,725, a decrease of \$114,128,984. Some detail of the fire losses in European cities as gathered by the Department of Labor and Commerce will be found of interest:

Austria	190,387	\$2,355,000.37
Russia	2,673,425	3,190,823.14
United Kingdom	4,219,516	4,705,720.12
Belgium	312,987	178,766.57
Germany	7,116,147	1,882,102.25
Norway	222,373	267,000.33
Switzerland	715,712	192,500.27
France	1,629,116	2,292,711.55

Total \$9,582,310.30 \$9,582,310.30

"Subsequent to the statistics of the foregoing, Statistics the National Board of Fire Underwriters, by permission of the State Department at Washington, sent its own queries to United States Consul in foreign countries, and the answers showed an average loss per capita for a series of years of only 33 cents in six countries. That ratio applied to the United States would entail a nominal loss compared with the actual.

Contemporary drawings of the plans of the "Great Eastern" built more than fifty years ago and the Titanic that so recently met such a tragical fate, show that the ship of 1855 was more strongly built than was the greatest of modern vessels. With the model of the Titanic drawn from it is naturally asked why the naval architect of today has fallen below the standard set so many years ago. It is not because of the ignorance of the designer, but of the demands of the owners for income on the investment. The big attractive ship with room for passengers and cargo is what brings in the dividends. And so long as governments do not step in and demand that certain safeguards of life shall be given in all kinds of construction, human life will continue to be, as it always has been, sacrificed on the altar of the god of gold.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCAL INTERESTS" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 5 story and base, reinforced concrete, \$30,000. Architect, W. G. Hind, Humboldt Bank Bldg. S. F. Owners, Voorhees Estate. Sound Construction and Engineering Co., Seattle, Wash., limestone, \$112,000; sandstone, \$105,000.

Dietz & Wenzel Construction Co., Wichita, Kans., limestone, \$167,310; sandstone, \$160,850.

John Waffin, Tacoma, Wash., telegraphic building, H. H. Gales sand, \$491,500, Bedford sandstone, \$109,981.

—HALLS & SOCIETY BLDGS.

San Francisco—Lodge hall and stores, 2 story and base, brick. Cost not stated. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Taylor Estate. The building, which has been leased by the Loyal Order of Moose, will cover a lot 157x177 feet. There will be several stories on the south half of the first floor, lodge rooms and auditorium, with a completely equipped stage in the north half of the same floor. The upper floor will contain the social rooms, business offices and billiard rooms. The exterior of the building will be faced with pressed brick. The architect has just started the working drawings.

Los Angeles, Cal.—Lodge hall, 2 story and base, brick. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owners, Westlake Lodge F. and A. M. This work has been mentioned here before when the architects first prepared plans. The drawings are now being revised. The building will be 128x2 feet with lodge rooms on the first floor and social rooms above. There will be pine and hardwood trim and central heating system. The exterior of the building will be faced with glazed brick and terra cotta. The plans will shortly be ready for figures.

Bakersfield, Kern Co., Cal.—Club house, 2 story and base, brick and frame, \$10,000. Architect none. Owners, Petroleum Club. Plans for a social club have been completed and bids are now being taken by the management for the various parts of the work. Plans can be secured from the owners.

Contracts Awarded.

Spokane, Wash.—City Hall, 6 story base, Class A construction. Cost not stated. Architect's name not given. Owners, City of Spokane. Contractor, M. C. Murphy, Seattle. Contract price, \$234,880. Note:—This is the low figure, but the authorities are giving favorable consideration to the bid of J. E. Sweatt of Spokane, which amounted to \$275,395. No contract has yet been awarded.

HOSPITALS.

Santa Barbara, Santa Barbara Co., Cal.—Hospital, 3 story and base, reinforced concrete, \$70,000. Architect, E. Russell Ray, Santa Barbara. Owners, Cottage Hospital Association. This building has been described in these columns before. The plans will be complete within a few weeks and the directors of the association will call for figures.

HOTELS.

San Francisco—Hotel and stores, 7 story and base, brick and steel, \$75,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, E. H. Mitchell. The building will be erected in the district south of Market street and will cover an area of 60x75 feet. The first floor will contain three stores besides the main hotel lobby and offices. The upper floors have been arranged for 132 rooms and a number of baths. The building will have steam heat and elevator service. Running water has been provided for all rooms. The exterior of the structure will be faced with pressed brick. The architect is now taking figures on the work.

San Francisco—Hotel, 6 story and base, reinforced concrete. Cost not stated. Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owners, Stanwood and McKinn. The architect is now preparing the working drawings and details of the work can not be given. The structure will be erected on an inside lot in the Fifty Vana District. The equipment will be modern in every respect including elevator service, steam heat and connecting baths. The exterior will be faced with cement plaster. Plans will be completed in the course of the next three weeks.

San Francisco—Hotel, 7 story and base, steel and brick, \$80,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Taylor and Sutter streets, and will contain in the neighborhood of 200 rooms, nearly all of which will have connecting baths. The mechanical equipment will include steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now preparing the plans.

Los Angeles, Cal.—Hotel, 10 story and base, Class A construction, \$200,000. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Los Angeles Cemetery Association. This work was mentioned in these columns when the architects were first commissioned to prepare the plans. The working drawings are now nearly complete and figures will be called for shortly. There will be three store rooms and the main lobby in the first story, and 27 guest rooms with private baths in each of the nine upper stories. There will be a cement plastered exterior, tile floor and marble and seashells work in the lobby. The bath rooms will have tile floors. The interior finish will be of pine, with hollow tile partitions and hollow tile and concrete floors. There will be wire and plate glass windows with metal sash. There will be two elevators, steam heat and a vacuum

cleaning system. The plans have been submitted to the owners for final approval and will probably be figured next week.

Los Angeles, Cal.—Hotel, 1 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. Bornheim. The building, plans for which are in the preliminary stage, will be arranged for stores on the first floor and about 65 rooms and a number of baths on the upper floors. There will be passenger and freight elevators and steam heat. The exterior treatment of the building has not been decided upon. The architects are now working on the final drawings.

Venice, Los Angeles Co., Cal.—Hotel, 8 story and base, reinforced concrete. Cost not stated. Architect, J. I. Perry, Trust and Savings Bldg., L. A. Owners, Venice Hotel Co. Preliminary plans only have been prepared for this work. The arrangement will probably provide for 250 guests rooms about three quarters of which will have private baths. Other details have not been decided upon and can not be given at this time. **Los Angeles, Cal.**—Hotel, 4 story and base, brick. Cost not stated. Architect, Henry G. Klum, 106 So. Virgil Ave., L. A. Owner, Dr. Charles C. Heller. The building will cover an area of 100x100 feet and will contain 52 rooms with 12 baths. There will be steam heat and elevator service. Running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Hotel, 12 story and base, Class A construction. Cost not stated. Architect, C. E. Apponyi, L. A. Owner, John Brockman, Security Bldg., L. A. The building will cover an area of 67x125 feet. There will be three stories beside the lobby and office on the first floor. The upper floors will be divided into 229 rooms and 165 baths. There will be steam heat, elevator service, hot and cold running water in all rooms, vacuum cleaning system and other mechanical conveniences. The construction will be fire proof throughout. There will be a complete steel frame with exterior walls of concrete and brick faced with glazed terra cotta. The interior will be handsomely finished in hardwoods, marble and ornamental plaster. The plans are complete and separate. Contracts will be let very shortly on all parts of the work.

Fresno, Fresno Co., Cal.—Hotel and stores, 2 story and base, brick. Cost not stated. Architect, E. Mathewson, Fresno, Owner, T. C. White. The building will have a street frontage of 100 feet. There will be five stories on the first floor and a number of single rooms on the upper floors. Running water has been provided for in all rooms. The exterior of the building will be faced with pressed brick. The architect is now preparing the plans.

Contracts Awarded.

Oakland, Cal.—Hotel, 6 story and base, brick and steel, \$35,000. Architect, Clay N. Burrell, Central Bank Bldg., Oakland. Owners, Morris and Muller, Contractors, Morris and Muller. The building will be erected on an inside lot and will contain in the neighborhood of sixty rooms and a number of baths. There will be steam heat and elevator service. The exterior

of the building will be faced with pressed brick. The architect is now completing the working drawings.

Riverside, Riverside Co., Cal.—Hotel addition, 3 story and base, brick. Cost not stated. Architects, Krenpel and Erkes, Henne Bldg., L. A. Owner, Mrs. Laura T. Reynolds, Contractors, Cresmer Mfg. Co., Riverside. Contract price \$37,290.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Seattle, Wash.—Freight sheds, 1 story and base, steel and concrete, \$50,000. Engineering Dept., Northern Pacific R. R. Co., St. Paul. Owners, Northern Pacific R. R. Co. The announcement has been made from headquarters that the plans for this work are complete and will be forwarded to the west within a few days for figures.

Tucson, Ariz.—Depot, freight sheds and engine house, brick construction, \$75,000. Architects, Engineering Dept., El Paso & Southwestern R. R. Co., El Paso, Tex. Owners, El Paso & Southwestern R. R. Co. Bids for this work will be received by the Engineer of Maintenance of Way of the El Paso & Southwestern R. R. Co. at El Paso, Tex. for above work. Separate bids must be filed for each of the buildings mentioned. Full particulars can be secured from H. J. Simmons, Gen. Manager.

Contracts Awarded.

Plummer, Idaho to Bell, Wash.—Railroad construction, \$1,000,000. Engineering Dept. Chicago, Milwaukee and Puget Sound R. R. Co. Owners, Chicago, Milwaukee and Puget Sound R. R. Co. Contractor, H. C. Henry, Henry Bldg., Spokane. Contract price \$1,000,000.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, \$17,000. Architects, Shea & Lofquist, 550 Montgomery St., S. F. Owner, Dr. George Lee Eaton. The dwelling has been designed for a nine-room house with baths. A garage will also be erected on the lot. The interior of the dwelling will be finished in red gum, cedar and pine. There will be open fire places with tile and brick mantels. The floors will be of oak in the principal rooms. There will be furnace heat. Tile and white mosaic will be used extensively. Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, Karl N. Nickel, Realty Syndicate Bldg., Oakland. Owner, Zach Souther. The dwelling will contain five rooms and bath. The interior will be finished in pine and redwood. There will be open fire places and brick or tile mantels. The exterior will be covered with rustic and shingles. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, J. C. Kincaid, 5601 Dana St., Oakland. Owner, I. T. Grainger. The dwelling will contain six rooms and bath. The interior of the house will be finished in pine with some hardwood floors. There will be open fire places and tile

mantels. The exterior of the residence will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, John Galen Howard, 604 Mission St., S. F. Owner, Warren Gregory. The dwelling will contain seven rooms and baths. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$3,000. Architect, F. W. Krelle, Omaha National Bank Bldg., Omaha, Neb. Owner, W. Fred Krelle, 1943 Berkeley Way, Berkeley. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with rustic. The plans are in the hands of the owner and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, E. B. Norton. The dwelling will contain eight rooms and bath. The interior finish will be of pine with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick and tile. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, B. R. Dexter, 2212 Grove St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine. There will be some hardwood floors. There will be open fire places and brick mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$4,800. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Mark Anthony. The dwelling has been designed for a seven-room house with bath. The interior finish will be largely of pine and redwood. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Robert Styler. The dwelling will be erected on a large lot, and there will be a frame garage built in the rear. The dwelling will contain seven-rooms and bath. The interior will be finished in pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, Donald H. McOckle, 2710 Woodley St., Berkeley. The dwelling has been designed for a six-room house with bath. There will be pine and redwood interior finish and some hardwood floors. There will be open fire places and tile mantels. The exterior of the building will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, K. M. Sheridan, 1916 1st Ave., Oakland. The dwelling has been designed for an eight-room house with baths. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect, David C. Chaman, Western Metropolitan Bank Bldg., S. F. Owner, J. G. Bernade. The dwelling has been designed to contain eight rooms and bath. The interior finish will be of pine and gum. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the baths and kitchen. The exterior will be covered with shiplap and rustic. The plans are complete and the work is now being figured.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,500. Architects, McCall & Wythe, Central Bank Bldg., Oakland. Owner, George S. Hill. The dwelling has been designed for a nine-room house with baths. The interior finish will be of pine and redwood. The sum of \$200 has been allowed for oak floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used extensively. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, Mathew Hunter. The dwelling will contain about eight rooms and bath. There will be pine and redwood interior finish with oak floors in the principal rooms. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,500. Architects, Hermann Bros., 2245 Grove St., Berkeley. Owner, Mrs. E. A. Casbolt. The dwelling has been designed for an eight-room house with bath. The interior trim will be largely of pine with some hardwood floors. There will be furnace heat and open fire places. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster and redwood shingles. The plans are now out for figures.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$2,500.

Architect, A. W. Smith, 1040 Broadway, Oakland. Owner's name withheld. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places with brick mantels. The exterior of the house will be covered with cement plaster. The plans are complete and figures are now being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, M. L. Newsom, 812 Broadway, Oakland. Owners, Higgins Bros. The dwelling will contain seven rooms and bath. The interior will be finished with pine. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster. The plans are in the hands of the owners and they are taking figures for the work.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, Morgenson Bros., 551 62nd St., Oakland. The dwelling will be similar in design to a number of others covered by the same owners and will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. The exterior will be finished in rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 1 story and base, concrete, \$2,500. Architect, H. E. Gregory, 2527 Persimmon St., Fruitvale. Owners, Cement Products Company. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the building will be faced with brick and cement. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, W. A. Ferris, 16 Monte Vista Ave., Oakland. The bungalow will contain six rooms and bath. The interior will be finished in pine throughout. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Theodore Penn, 749 61st St., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,000. Architect, John Hinson Thomas, First National Bank Bldg., Berkeley. Owner, C. A. Ferrin. The dwelling has been designed for an eight-room house with bath. The interior will be finished in pine and white cedar. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath.

The plans are complete and figures are being taken.

Alameda, Alameda Co., Cal.—Bungalows, 1, 1 story and base, frame, \$2,000 each. Architect, none. Owner, Hugo Larber, 51 21st Ave., S. F. Each of the dwellings will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. The exteriors of the cottages will be covered with shingles. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,800. Architect, Paul J. Marcelli, 2020 1/2 Steiner St., S. F. Owner, Ulderico Marcelli. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine and redwood with some oak floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with rustic and shingles. The plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, \$4,000. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. The dwelling has been designed for an eight-room house with bath. The interior trim will be of pine, redwood and gum. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The floors in the principal rooms will be of oak. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The two houses have been designed to contain seven rooms and bath each. There will be pine and redwood trim, oak floors, furnace heat and open fire places. The mantels will be of brick and tile. The exteriors will be covered with rustic and shingles. The plans are complete and the work will be done by Day Labor.

Redwood City, San Mateo Co., Cal.—Residence, 1 1/2 story and base, frame. Cost not stated. Architects, Bakewell & Brown, 117 Montgomery St., S. F. Owner, Selah Chamberlain. The dwelling will contain about twelve rooms and baths. The interior will be handsomely finished in pine, redwood and hardwoods. The floors will be of oak and tile. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures will be taken at once.

Contracts Awarded.

Oakland, Cal.—Residence, 2 story and base, frame, \$20,000. Architect, George Anderson, 5156 College Ave., Oakland. Owner, J. S. Marshall. Contractor, J. A. Marshall, Oakland. Contract price, \$20,000.

SCHOOLS.

San Francisco—Finish hardware for school. Cost not stated. City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids for the finish

hardware for the Girls' High School will be opened by the Board of Public Works on May 29th.

Woodland, Yolo Co., Cal.—School, 2 story and base, brick and concrete, \$100,000. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, Woodland School District. This work has been mentioned here a number of times before. The figures to date have been rejected and new figures will be taken at once. There is no revision to be made in the plans and specifications.

Berkeley, Alameda Co., Cal.—Seats and lighting fixtures. Cost not stated. Mission St., S. F. Owners, Regents of the University of California. Bids will be opened by the Regents of the University of California for furnishing seats for the Chemistry Auditorium and for lighting fixtures for the Agriculture Hall on June 3rd.

Turlock, Stanislaus Co., Cal.—School, 1 story and base, concrete, \$25,000. Architect, Thomas R. Wiseman, Producers National Bank Bldg., Eakersfield. Owner, Turlock School District. The building will be designed in the Mission style. There will be six class rooms, offices and an auditorium. The exterior of the building will be faced with cement plaster. The roof will be of tile. The plans will be complete and ready for figures by June 1st.

Baldwin Park, Los Angeles Co., Cal.—School, 1 story and base, reinforced concrete, \$13,000. Architects, Tuttle and Hopkins, Delta Bldg., L. A. Owners, Vineland School District. The building will be 18x36 feet and will contain four class rooms and an auditorium seating 300 people. There will be domestic science rooms, mechanical equipment and play rooms for the boys. The exterior of the building will be faced with blue pressed brick and cement plaster. The architects are preparing the working drawings.

Los Angeles, Cal.—School auditorium, 1 story and base, brick, \$100,000. Architects, Train and Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. The building will be erected at the Mary Street School and will cover an area of 41x96 feet. There will be a large auditorium, gymnasium and two reading rooms. The exterior of the building will be faced with stock brick. The plans are being prepared.

Newport Beach, Orange Co., Cal.—School, 1 story and base, reinforced concrete, \$14,000. Architects, Tuttle and Hopkins, Delta Bldg., L. A. Owners, Newport Beach School District. The building will contain four class rooms and an auditorium seating 300 people. There will be a hot air heating system. The exterior of the building will be faced with cement plaster and blue brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—School, 2 story and base, brick, \$25,000. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, City of Los Angeles. The building has been mentioned here before and is to be known as the Santa Fe Avenue School. Bids for the work were recently opened and found to be in excess of the appropriation. The plans will be revised and new figures will be called for.

SEWERS STREET WORK AND WATER SYSTEMS.

Oakland, Cal.—Street work, paving, gutters and curbs. Cost not stated.

City Engineer of Oakland, City Hall Annex, Oakland, Owners, City of Oakland. Bids will be opened on May 27th for considerable street work, including paving, gutters and curbing. Bids will be taken on three separate contracts.

Oakland, Cal.—Sewers. Cost not stated. Engineer, City Engineer, City Hall Annex, Oakland, Owners, City of Oakland. Plans for an 8-inch vitrified ironstone pipe sewer have been completed and bids are now being called for on the construction. The bids will be opened on May 27th. Plans can be secured from the City Clerk, City Hall Annex.

San Francisco—Power house, 2 story and base, steel and concrete, \$75,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, Union Iron Works. The building is to be the first of a number of large improvements to be undertaken by the company. The structure will cover a large ground area and will have a complete steel frame. The exterior walls will be of reinforced concrete faced with cement plaster. The floors will also be of reinforced concrete. The architect is now preparing the plans.

Los Angeles, Plumas Co., Cal.—Shift houses, dormitory etc., frame construction, \$30,000. Architect, Ralph Werner Hart, Humboldt Bank Bldg., S. F. Owners, Great Western Power Co., Shreve Bldg., S. F. The plans for a club house, dormitory and three shift houses have been completed. The work will be a part of a large power development work to be undertaken by the company at this point. Bids are now being taken for the construction of the above mentioned buildings.

Contracts Awarded.

Oakland, Cal.—Fire protection extension, \$12,000. Engineer, City Engineer of Oakland, Owners, City of Oakland. Contractor, William Henney, Oakland. Contract price, \$11,465.35.

Man-uchi, Ore.—Power plant construction, \$100,000. Engineer's name not given. Owners, C. A. Smith Lumber and Mfg. Co., Contractors, C. C. Moore and Co., Mutual Life Bldg., Seattle. Contract price, \$100,000.

STORES AND OFFICES.

San Francisco—Stores, 1 story and base, brick, \$12,000. Architect, Charles E. Mau, MacDonald Bldg., Oakland. Owners, James Eva Estate. The building will be erected in the south line of Market street west of 8th street, and will contain two stores. There will be large display windows. The exterior will be faced with pressed brick. Side walk doors will be used. The plans are complete and figures are being taken.

Los Angeles, Cal.—Stores and offices, 12 story and base, reinforced concrete. Cost not stated. Architect, Fred R. Dorn, Douglas Bldg., L. A. Owners, Robert Marsh and Frank R. Strong. The building will be 50x118 feet. There will be a bank and four stores on the first floor while the upper floors will contain 198 offices, each with a private lavatory. The mechanical equipment will include elevators, steam heat, vacuum cleaning system and all other modern improvements. The exterior of the building will be faced with terra cotta. The excavating is now under way and figures for the balance of the work are now being taken.

Seattle, Wash.—Stores and offices, 3 story and base, brick, \$25,000. Architect, V. W. Voorhees, Etzel Bldg., Seattle. Owner, Louis Anderson. The building will contain one large store on the first floor and 16 offices on the upper floors. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Contracts Awarded.

Los Angeles, Cal.—Lofts, 3 story and base, reinforced concrete, \$30,000. Architects none. Owner, P. R. Feltshans, Contractors, Richards-Neustadt Co., Wright and Calendar Bldg., L. A. Contract price \$30,000. Note—The building has been designed heavy enough for a ten story structure, the additional stories of which will be erected later.

Wase, Kern Co., Cal.—Stores and rooms, 3 story and base, brick, \$12,000. Architect, Thomas E. Wiseman, Producers' National Bank Bldg., Bakersfield. Owner, John P. Green. Contractor, O. C. Shutz, 1841 Orange street, Bakersfield. Contract price \$12,000.

SEALED PROPOSAL.

PROPOSALS FOR SEWERS.

(Bids close May 27.)

Pursuant to Statute and to Resolution No. 2430 N. S., of the Council of the City of Oakland, passed May 12th, 1912, directing this notice said Council invites sealed proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file.

That an eight (8) inch sewer be constructed along the center line, and its production where necessary, of each of the following streets or avenues, to wit: Maple avenue from the center line, produced northwesterly, of that portion of Georgia street that lies between Maple avenue and Laurel avenue to the center line, produced northwesterly, of that portion of Hopkins street that lies between Maple avenue and Laurel avenue; Laurel avenue from the center line of Florida street to a point distant one hundred sixty-four (164) feet northwesterly from the center line of Kansas street; Middle avenue from the center line of Hopkins street to a point distant three hundred seventy-five (375) feet northwesterly from the center line of Wisconsin street; School street from the southwestern production of the center line of Laurel avenue to a point distant one hundred fifty (150) feet southeasterly therefrom; Maine street between points distant, respectively, three hundred ninety (290) feet northwesterly and seven hundred thirty (730) feet southeasterly from the center line of Laurel avenue.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City and Clerk of said City Council at a meeting of said Council to be held in Council Chamber, City Hall, in said City of Oakland, on May 27th, 1.12, between the hours of 11 o'clock a. m. and 12 o'clock m.

PROPOSALS FOR STREET WORK.

(Bids close May 27.)

Pursuant to Statute and to Resolutions No. 2020 N. S. and 2418 N. S., of the Council of the City of Oakland, passed April 2nd, 1912 and May 13th, 1912, respectively, directing this notice, said Council invites sealed proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file.

(1) That the following avenues be graded, curbed with sidewalk, paved with an asphalt macadam pavement and guttered with a broken rock gutter three (3) feet in width, to wit: Brooklyn avenue in said city, from the eastern line of Lake Shore boulevard to the western line of that portion of Newton avenue that was formerly East Lake street; Wesley avenue, from the eastern line, produced southerly, of that portion of Lake Shore boulevard that lies between the said Wesley avenue and Brooklyn avenue, to a straight line drawn between the point of intersection of the northwestern line of said Wesley avenue with the western line of that portion of Newton avenue that was formerly East Lake street and the point of intersection of the southeastern line of said Wesley avenue with the western line of that portion of Newton avenue that lies southerly of Brooklyn avenue; and such portions of Brooklyn, Newton and Wesley avenues as are contained within the territory bounded on the north by the northern line of said Brooklyn avenue, on the west by the western line of the aforesaid portion of Newton avenue that was formerly East Lake street, on the east by a straight line drawn between the point of intersection of the northern line of Brooklyn avenue with the southeastern line of Wesley avenue and the point of intersection of the southern line of said Brooklyn avenue with the eastern line of that portion of Newton avenue that lies southerly of said Brooklyn avenue, and on the south by a line drawn from the last described point of intersection to the eastern line of Wesley avenue and the western line of the aforesaid portion of Newton avenue; that lies southerly of Brooklyn avenue; thence to the point of intersection of the north-

western line of that portion of New-ton avenue that was formerly East Lake street.

(2) That East Fourteenth street, from the northeastern production of the center line of Sixty-sixth avenue to the southwestern production of the center line of that portion of Sixty-first avenue that lies northeasterly of East Fourteenth street be severed along a line parallel to and distant eighty-two (82) feet northeasterly from the southwestern line of East Fourteenth street, with sewers having the following dimensions, to wit: From the northeastern production of the center line of Sixty-sixth avenue to the southwestern production of the center line of that portion of Sixty-second avenue that lies northeasterly of East Fourteenth street, twelve (12) inches; from the aforesaid southeastern production of the center line of Sixty-second avenue to the aforesaid southeastern production of the center line of Sixty-first avenue eight (8) inches.

(3) That Ocean View Drive (formerly known as Bay View Avenue) in said City from the western line of Broadway to a line parallel to and distant seven hundred seventeen (1717) feet easterly from the eastern line of McMillan avenue, be graded, curbed with redwood, paved with an oil macadam pavement, and guttered with a broken hock gutter three (3) feet in width.

Also the construction of a culvert of corrugated iron and concrete between the northern and southern gutters of said Ocean View Drive, the center line of said culvert to lie along a line drawn at right angles to the southern line of Ocean View Drive at the intersection with the western line of Broadway.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in said City of Oakland, on May 27th, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m. At the expiration of said hour, the Council will open, examine and publicly declare all bids received.

NOTICE TO CONTRACTORS.

(Bids close June 3.)

SEALED bids will be received at the office of the Comptroller, University of California, Berkeley, at 9 a. m. Monday, June 3rd, on each of the two contracts as follows: (1) Seats for Chemistry Auditorium; (2) Lighting fixtures for Agricultural Hall; as per plans and specifications on file at said office.

No bids will be received unless accompanied by a certified check or bond equal to 10 per cent of the bid to secure execution of the contract by the successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

PROPOSALS FOR HARDWARE.

(Bids close May 29.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 29th day of May, 1912, for furnishing and delivering the following material:

The necessary hardware for the Girls High School Building.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all thoroughly classified as to location. These same items are reported in the top part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—5 story and base, reinforced concrete, \$30,000. San Francisco, Architect, W. G. Hind, Humboldt Bank Bldg., S. F. Owners, Voorhees Estate. The building will be erected on a corner lot, and will contain in the neighborhood of 100 rooms arranged in suites of two and three rooms each with private baths. There will be steam heat and elevator service and wall beds. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Apartment House and Stores—3 story and base, frame, \$30,000. San Francisco, Architect, Sidney E. Newman, Nevada Bank Bldg., S. F. Owner, A. Peterson. This work has been mentioned here before when the architect first started the working drawings. The building will contain five stores and ten two-rooms apartments and eight three-room apartments. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Flats—2 story and base, frame, \$5,000. San Francisco, Architects, McDougall Bros., Russ Bldg., S. F. Owner, A. E. Buckingham. The building has been designed to contain four modern flats of five and six rooms each with bath. The interior finish will be of pine and hardwood. There will be open fire places. The exterior of the building will be covered with shiplap and rustic. The plans are complete and figures are being taken.

Flats—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owner, O. E. Anderson, 2276 Fulton St., S. F. The building will be 25x60 feet, and will contain four flats of five and six rooms each with bath. The interior of the flats will be finished in pine and redwood. There will be gas grates. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Hotel and Stores—7 story and base, brick and steel \$75,000. San Francisco, Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, E. H. Mitchell. The building will be erected in the district south of Market street and will cover an area of 6875 feet. The first floor will contain three stores besides the main hotel lobby and offices. The upper floors have been arranged for 132 rooms and a number of baths. The building will have steam heat and elevator service. Running water has been provided for all rooms. The exterior of the structure will be faced with pressed brick. The architect is now taking figures on the work.

Hotel—5 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, Ralph Werner Hart, Humboldt Bank Bldg., S. F. Owners, Stanwood and McKinnis. The architect is now preparing the working drawings and details of the work can not be given. The structure will be

erected on an inside lot in the Fifty Vara District. The equipment will be modern in every respect, including elevator service, steam heat and connecting baths. The exterior will be faced with cement plaster. Plans will be completed in the course of the next three weeks.

Hotel—7 story and base, steel and brick, \$80,000. San Francisco, Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Taylor and Sutter streets, and will contain in the neighborhood of 200 rooms, nearly all of which will have connecting bathrooms. The mechanical equipment will include steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now preparing the plans.

Lodge Hall and Stores—2 story and base, brick. Cost not stated. San Francisco, Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Taylor Estate. The building, which has been leased by the Loyal Order of Moose, will cover a lot 137x137 feet. There will be several stores in the south half of the first floor, lodge rooms and auditorium, with a completely equipped stage in the north half of the same floor. The upper floor will contain the social rooms, business offices and billiard rooms. The exterior of the building will be faced with pressed brick. The architect has just started the working drawings.

Residence—2 story and base, frame, \$17,000. San Francisco, Architects, Shea & Loftquist, 550 Montgomery St., S. F. Owner, Dr. George Lee Eaton. The dwelling has been designed for a nine room house with baths. A garage will also be erected on the lot. The interior of the dwelling will be finished in red gum, cedar and pine. There will be open fire places with tile and brick mantels. The floors will be of oak in the principal rooms. There will be furnace heat. Tile and white mosaic will be used extensively. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,800. San Francisco, Architect, Paul J. Marcell, 2030 1/2 Steiner St., S. F. Owner, Uderiso Marcell. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine and redwood with open oak floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with rustic and shingles. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$1,000. San Francisco, Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. The dwelling has been designed for an eight-room house with bath. The interior trim will be of pine, redwood and red gum. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and

kitchen. The floors in the principal rooms will be of oak. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residences—2, 2 story and base, frame, \$3,000, each. San Francisco. Architect, Leonard Phelan Bldg., S. F. Owners, Urban Realty Co. The two houses have been designed to contain seven rooms and bath each. There will be pine and redwood interior trim, oak floors, furnace heat and open fireplaces. The mantels will be of brick and tile. The exteriors will be covered with rustic and shingles. The plans are complete and the work will be done by Day Labor.

School—Finish hardware. Cost not stated. San Francisco. City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids for the finish hardware for the Girls' High School will be opened by the Board of Public Works on May 29th.

Flats—2 story and base, frame, \$6,000. San Francisco. Cal. Architect, none. Owner, Mrs. Emma O. Dahl, 1017 Cole street, S. F. The building has been designed to contain three modern flats of five and six rooms each with bath. The interiors will be finished in pine and redwood with some hardwood floors. The exterior of the building will be covered with brick veneer and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, \$4,500. San Francisco. Architects, Rhodes and Marisch, 3372 16th street, S. F. Owners, J. M. O'Connor and J. Cronan. The building will be 2½x1½ feet and will contain three flats of four and six rooms each with bath. The interior will be finished in pine with elm panels. There will be gas grates. The exterior will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, \$6,200. San Francisco. Architect none. Owner, F. Tarrigino, 538 Green street, S. F. The building will contain three large flats. A second building, two stories in height will be erected in the rear of the same lot. The interior of both buildings will be finished in pine. The exteriors will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Power House—2 story and base, steel and concrete \$75,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, Union Iron Works. The building is to be the first of a number of large improvements to be undertaken by the company. The structure will cover a large ground area and will have a complete steel frame. The exterior walls will be of reinforced concrete faced with cement plaster. The floor will also be of reinforced concrete. The architect is now preparing the plans.

Stores—1 story and base, brick \$12,000. San Francisco. Architect, Charles F. Mau, Macdonough Bldg., Oakland. Owners, James Eva Estate. The building will be erected in the south line of Market street west of 8th street and will contain two stores.

There will be large display windows. The floors will be faced with pressed brick. Sub-walk doors will be used. The plans are complete and figures are being taken.

OAKLAND AND ALAMEDA COUNTY.

Bungalow—1 story and base, frame, \$2,000. Oakland, Cal. Architect, Karl N. Nickel. Realty Syndicate Bldg., Oakland. Owner, Zach Southern. The dwelling will contain five rooms and bath. The interior will be finished in pine and redwood. There will be open fire places and brick or tile mantels. The exterior will be covered with rustic tile and shingles. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,000. Oakland, Cal. Architect, J. C. Kincaid, 6601 Dana St., Oakland.

Owner, J. L. Grainger. The dwelling will contain six rooms and bath. The interior of the house will be finished in pine with some hardwood floors. There will be open fire places and tile mantels. The exterior of the residence will be covered with rustic tile. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 601 Mission St., S. F. Owner, Warren Gregory. The dwelling will contain seven rooms and bath. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 1/2 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, F. W. Kiehl, Omaha National Bank Bldg., Omaha, Neb. Owner, W. Wood Kiehl, 1943 Berkeley Way, Berkeley. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with rustic tile. The plans are in the hands of the owner and figures are being taken.

Residence—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, E. B. Norton. The dwelling will contain eight rooms and bath. The interior finish will be of pine with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick and tile. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, B. R. Dexter, 2212 Grove St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine, bath. The exterior of the house will be some hardwood floors. There will be open fire places and brick mantels. The exterior of the house will be covered with rustic tile. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$4,800. Oakland, Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Mark Anthony. The dwelling has been designed for a seven-room house with bath. The interior finish will be largely of pine and redwood. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Robert Styler. The dwelling will be erected on a large lot and there will be a frame garage built in the rear. The dwelling will contain seven rooms and bath. The interior will be finished in pine with hardwood floors in the principal rooms. There will be furnace heat and open fire

places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,100. Berkeley, Alameda Co., Cal. Architect, none. Owner, Donald H. Metockle, 2719 Woolsey St., Berkeley. The dwelling has been designed for a six-room house with bath. There will be pine and redwood interior finish and some hardwood floors. There will be open fire places and tile mantels. The exterior of the building will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, K. M. Sheridan, 1916 41st Ave., Oakland. The dwelling has been designed for an eight-room house with bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,500. Berkeley, Alameda Co., Cal. Architect, David C. Coleman, Western Metropolitan Bank Bldg., S. F. Owner, J. G. Berube. The dwelling has been designed to contain eight rooms and bath. The interior finish will be of pine and gum. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the baths and kitchen. The exterior will be covered with shiplap and rustic. The plans are complete and the work is now being figured.

Residence—2 story and base, frame, \$5,500. Oakland, Cal. Architects, McCull & Wythe, Central Bank Bldg., Oakland. Owner, George S. Hill. The dwelling has been designed for a nine-room house with bath. The interior finish will be of pine and redwood. The sum of \$200 has been allowed for oak floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used extensively. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, Mathew Hunter. The dwelling will contain about eight rooms and bath. There will be pine and redwood interior finish with oak floors in the principal rooms. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$5,500. Berkeley, Alameda Co., Cal. Architects, Hermann Bros., 2245 Grove St., Berkeley. Owner, Mrs. E. A. Casbolt. The dwelling has been designed for an eight-room house with bath. The interior trim will be largely of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile. Tile will be used in the bath and kitchen. The exterior of the dwelling

will be covered with cement plaster and redwood shakes. The plans are now out for figures.

Residence—2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner's name withheld. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places with brick mantels. The exterior of the house will be covered with cement plaster. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,000. Oakland, Cal. Architect, M. L. Newsom, 812 Broadway, Oakland. Owners, Higgins Bros. The dwelling will contain seven rooms and bath. The interior will be finished with pine. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster. The plans are in the hands of the owners and they are taking figures for the work.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owners, Morgensen Bros, 554 43rd st., Oakland. The dwelling will be similar in design to a number of others erected by the same owners, and will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. The exterior will be finished in rustic. The plans are complete and the work will be done by Day Labor.

Residence—1 story and base, concrete, \$2,500. Oakland, Cal. Architect, H. E. Gregory, 2527 Persimmon St., Fruitvale. Owners, Cement Products Co. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the building will be faced with brick and concrete. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, W. A. Farris, 16 Monte Vista Ave., Oakland. The bungalow will contain six rooms and bath. The interior will be finished in pine throughout. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, Theodore Fenn, 719 61st St., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$8,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, C. A. Ferrin. The dwelling has been designed for an eight-room house with baths. The interior will be finished in pine and white cedar. The floors in the principal rooms will

be of oak. There will be furnace heat and open fire places. The tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalows—1, 1 story and base, frame, \$2,000 each. Alameda, Alameda Co., Cal. Architect, none. Owner, Hugo Laiber, 51 21st Ave., S. F. Each of the dwellings will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. The exteriors of the cottages will be covered with shingles. The plans are in the hands of the owner and the work will be done by Day Labor.

Seats and Lighting Fixtures—Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 604 Mission street, S. F. Owners, Regents of the University of California. Bids will be opened by the Regents of the University of California, for furnishing seats for the Chemistry Auditorium and for lighting fixtures for the Agriculture Hall on June 24.

Street Work—Paving, gutters and curbs. Cost not stated. Oakland, Cal. City Engineer of Oakland, City Hall Annex, Oakland. Owners, City of Oakland. Bids will be opened on May 27th for considerable street work including paving, gutters and curbing. Bids will be taken on three separate contracts.

Sewers—Cost not stated. Oakland, Cal. Engineer, City Engineer, City Hall Annex, Oakland. Owners, City of Oakland. Plans for an 8 inch vitrified iron stone pipe sewer have been completed and bids are now being called for on the construction. The bids will be opened on May 27th. Plans can be secured from the City Clerk, City Hall Annex.

Church—2 story and base, frame, \$3,000. Oakland, Cal. Architect, Ephraim Pilsch, 3rd near Shattuck, Berkeley. Owners, Bethany Gospel Hall, E. 14th and 23rd Ave., Oakland. The building will be in the nature of a large meeting hall. The interior will be finished in pine. The exterior of the building will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Contracts Awarded.

Hotel—6 story and base, brick and steel, \$25,000. Oakland, Cal. Architect, C. W. Burrell, Central Bank Bldg., Oakland. Owners, Morris and Muller, Contractors, Morris and Muller. The building will be erected on an inside lot, and will contain in the neighborhood of 80 rooms and a number of baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The architect is now completing the working drawings.

Residence—2 story and base, frame, \$20,000. Oakland, Cal. Architect, George Anderson, 5156 College avenue, Oakland. Owner, J. S. Kimball. Contractor, J. A. Marshall, Oakland. Contract price \$20,000.

Fire Protection—Extension, \$12,000. Oakland, Cal. Engineer, City Engineer of Oakland. Owners, City of Oakland. Contractor, William Healey, Oakland. Contractors price \$11,165.35.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Plats—2 story and base, frame, \$8,600. Stockton, San Joaquin Co., Cal. Architect, R. P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, E. Dortman. The building has been designed to contain four large modern flats of five, six and seven rooms each. There will be modern plumbing throughout, open fire places with brick mantels and combination water heaters. The interior finish will be of pine and redwood with some hard-

wood floors. The exterior of the building will be covered with rustic. The architect is now preparing the working drawings.

School—2 story and base, brick and concrete, \$12,000. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 251 Kearny street, S. F. Owners, Woodland School District. This work has been mentioned here a number of times before. The figures recently presented by the contractors have been rejected and new figures will be taken at once. There is no revision to be made in the plans or specifications.

Shift Houses—Dormitory and etc., frame construction, \$26,000. Los Plumas Plumas Co., Cal. Architect, Ralph Werner Hart, Humboldt Bank Bldg., S. F. Owners, Great Western Power Co., Shreve Bldg., S. F. The plans for a club house, dormitory and three shift houses have been completed. The work will be a part of a large power development work to be undertaken by the company at this point. Bids are now being taken for the construction of the above mentioned buildings.

Contracts Awarded.

FRESNO, MODESTO, STANIS-
LAUS AND CENTRAL
CALIFORNIA.

Apartment House and Stores—3
story and base, brick, \$20,000. Bak-
ersfield, Kern Co. Cal. Architect,
Thomas B. Wiseman, Producers' Na-
tional Bank Bldg, Bakersfield. Own-
er, Capt. F. W. Scofield. The building
will be 55,100 feet. There will be
three stories stores on the first floor
and 35 rooms arranged in two and
three room apartments on the upper
floors. There will be wall beds. The
exterior of the building will be faced
with pressed brick. The architect is
preparing the working drawings.

Bank—2 story and base, reinforced
concrete, \$25,000. Merced, Merced Co.
Cal. Architect, Thomas B. Wiseman,
Producers' National Bank Bldg, Bak-
ersfield. Owners, Security Savings
Bank of Merced. The building will
have reinforced concrete floors and
vanits. The roof will be of tile. The
first floor will be occupied by the bank
and the upper floor will contain 12
modern offices. The interior finish
of the bank will be of marble, tile and
hardwoods. The exterior of the build-
ing will be faced with cement plaster.
The plans are now being figured.

Hotel and Stores—3 story and base,
brick. Cost not stated. Fresno. Fres-
no Co. Cal. Architect, E. Mathewson,
Fresno. Owner, T. C. White. The
building will have a street frontage
of 100 feet. There will be five stories
on the first floor and a number of
single rooms on the upper floors. Run-
ning water has been provided for all
rooms. The exterior of the building
will be faced with pressed brick. The
architect is now preparing the plans.

Club House—2 story and base, brick
and frame \$10,000. Bakersfield, Kern
Co. Cal. Architect, none. Owners,
Petroleum Club. Plans for a social
club have been completed and bids are
now being taken by the management
for the various parts of the work.
Plans can be secured from the owners.

School—1 story and base, concrete,
\$25,000. Turlock, Stanislaus Co. Cal.
Architect, Thomas B. Wiseman, Pro-
ducers' National Bank Bldg, Bakers-

field. Owners, Turlock School Dis-
trict. The building will be designed in
the Mission style. There will be
six class rooms, offices and an audi-
torium. The exterior of the building
will be faced with cement plaster. The
roof will be of tile. The plans will be
complete and ready for figures by
June 1st.

LOS ANGELES AND SOUTH
ERN CALIFORNIA.

Church—1 story and towers, brick
construction, \$20,000. Los Angeles,
Cal. Architect, A. C. Martin, Higgins
Bldg. L. A. Owners, Holy Cross Ro-
man Catholic Church. The building
will be 12,100 feet. The design is in
the Gothic style with two steel frame
towers. The interior will be finished
in oak and unadorned plaster. The
exterior of the building will be faced
with blue brick. The architect has
completed the working drawings and
figures are being taken.

Hotel—10 story and base. Class A
construction, \$200,000. Los Angeles,
Cal. Architects, Noonan & Kysor,
Weight and Cullender Bldg. L. A.
Owners, Los Angeles Cemetery Asso-
ciation. This work was mentioned in
these columns when the architects
were first commissioned to prepare
the plans. The working drawings
are now nearly complete and figures
will be called for shortly. There will
be three store rooms and the main
lobby in the first story and 27 guest
rooms with private baths in each of
the nine upper stories. There will be
a cement plastered exterior, the floor
and marble and scagliola work in the
lobby. The bath rooms will have tile
floors. The interior finish will be of
pine, with hollow tile partitions and
hollow tile and concrete floors. There
will be wire and plate glass windows
with metal sash. There will be two
elevators, steam heat and a vacuum
cleaning system. The plans have been
submitted to the owners for final ap-
proval and will probably be figured
next week.

Stores and Offices—12 story and base,
reinforced concrete. Cost not stated.
Los Angeles, Cal. Architect, Fred R.
Dorn, Douglas Bldg. L. A. Owners,
Robert Marsh and Frank R. Strong.
The building will be 50,118 feet. There
will be a bank and four stores on the
first floor with the upper floors will
contain 120 offices, each with a private
bathroom. The mechanical equipment
will include elevators, steam heat,
vacuum cleaning system and all other

modern improvements. The exterior of the building will be faced with terra cotta. The excavating is now under way and figures for the balance of the work are now being taken.

School—1 story and base, reinforced concrete, \$12,000. Newport Beach, Orange Co., Cal. Architects Tuttle and Hopkins, Delta Bldg., L. A. Owners, Newport Beach School District. The building will contain four class rooms and an auditorium seating 300 people. There will be a hot air heating system. The exterior of the building will be faced with cement plaster and blue brick. The plans are complete and figures are being taken.

School—2 story and base, brick, \$37,000. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, City of Los Angeles. The building has been mentioned here before and is to be known as the Santa Fe Avenue School. Bids for the work were recently opened and found to be in excess of the appropriation. The plans will be revised and new figures will be called for.

Lots—3 story and base, reinforced concrete, \$30,000. Los Angeles, Cal. Architects none. Owner, F. R. Peitshans. Contractor, Richards-Neustadt Co., Wright and Callender Bldg., L. A. Contract price \$30,000. Note—The building has been designed heavy enough for a ten story structure, the additional stories of which will be erected later.

Stores and Rooms—3 story and base, brick, \$15,000. Wasco, Kern Co., Cal. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owner, John P. Green. Contractor, O. C. Slatz, 1804 Orange street,

Bakersfield. Contract price, \$15,000.

Apartment House—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Jacob Morris. The building will be erected on a corner lot, and will contain in the neighborhood of 100 rooms, which will be arranged in suites of two and three rooms each with connecting baths. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The architects are preparing the plans.

Apartment House—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Robert A. Fowler. The building has been mentioned here before. The structure will cover an area of 46x118 feet, and will contain 107 rooms arranged in suites of from three to five rooms each with baths. There will be steam heat and elevator service. The exterior of the building will be faced with ruffled brick and artificial stone. The plans are being figured.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, Mrs. Ray Colenson. The building will be 10x95 feet and will contain 51 rooms, arranged in two-room suites. There will be 21 baths. There will be steam heat and wall beds. The exterior of the building will be covered with cement plaster. The plans are complete and figures are being taken.

Apartment House and Stores—2

story and base, brick. Cost not stated. Los Angeles, Cal. Architect, William J. Ellinger, Laughlin Bldg., L. A. Owner, George T. Fourke. The building will be 57x60 feet. There will be four stores on the first floor and four four-room apartments on the second floor. There will be wall beds and steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, brick, \$25,000. Long Beach, Los Angeles Co., Cal. Architects, Austin & Sedgwick, 18 Locust Ave., Long Beach. Owner, Roselle Boyd. The building will be 46x90 feet and will contain in the neighborhood of 70 rooms and baths. There will be wall beds, and steam heat. The exterior of the building will be faced with pressed brick. The architects are preparing the working drawings.

Pier—Reinforced concrete. Cost not stated. San Diego, Cal. Engineer, City Engineer E. M. Canips, San Diego. Owners, City of San Diego. This work has been mentioned here before when the plans were first started. The working drawings are complete and bids will be opened by the City Council on June 10th. The city reserves the right to purchase the cement. Separate figures will be taken for pier property, for the dredging of the bay and for reinforced concrete and steel bulkhead.

Bridge—Steel and concrete. Cost not stated. Santa Ana, Orange Co., Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A., associated with Thomas & Post, Hilberland Bldg., L. A. Owners, Orange County. The plans for this bridge, which is to be constructed will be opened by the Board of Supervisors of Orange County on May 25th.

Bridge—Reinforced concrete. Cost not stated. Ventura, Ventura Co., Cal. Engineer, County Surveyor E. E. Everett, Ventura. Consulting Engineers Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Ventura County. Bids for the construction of a reinforced concrete bridge over the Ventura River were rejected and the plans will be revised. The lowest figure presented called for an expenditure of \$12,390.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Hawley, King & Co. Contractor, Geo. L. Hillwig, 3222 Princeton Ave., L. A. Contract price not stated.

Hotel—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. Iernhelm. The building, plans for which are in the preliminary stage, will be arranged for stores on the first floor and about 65 rooms and a number of baths on the upper floors. There will be passenger and freight elevators and steam heat. The exterior treatment of the building has not been decided upon. The architects are now working on the final drawings.

Hotel—5 story and base, reinforced concrete. Cost not stated. Venice, Los Angeles Co., Cal. Architect, J. I. Frary, Trust and Savings Bldg., L. A. Owners, Venice Hotel Co. Preliminary plans only have been prepared for this work. The arrangement will probably

Index to Advertisers

provide for 250 guest rooms about three-quarters of which will have private baths. Other details have not been decided upon and cannot be given at this time.

Hotel—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect Henry G. Klung, 106 So. Virgil Ave., L. A. Owner, Dr. Charles C. Heller. The building will cover an area of 40x100 feet, and will contain 52 rooms with 12 baths. There will be steam heat and elevator service. Running water has been provided for all rooms. The exterior of the building will be faced with brick. The plans are complete and the work will be done by Day Labor.

Hotel—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, C. E. Apponyi, L. A. Owner, John Brockman, Security Bldg., L. A. The building will cover an area of 67x126 feet. There will be three stores besides the lobby and office on the first floor. The upper floors will be divided into 229 rooms and 165 baths. There will be steam heat, elevator service, hot and cold running water in all rooms, vacuum cleaning system and other mechanical conveniences. The construction will be fire proof throughout. There will be a complete steel frame with exterior walls of concrete and brick faced with glazed terra cotta. The interior will be handsomely finished in hardwoods, marble and ornamental plaster. The plans are complete and separate contracts will be let very shortly on all parts of the work.

Lodge Hall—2 story and base. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Westlake Lodge F. and A. M. This work has been mentioned here before when the architects first prepared plans. The drawings are now being revised. The building will be 42x92 feet with lodge rooms on the first floor and social rooms above. There will be pine and hardwood trim and a central heating system. The exterior of the building will be faced with a glazed brick and terra cotta. The plans will shortly be ready for figures.

Hospital—3 story and base, reinforced concrete, \$70,000. Santa Barbara, Santa Barbara Co., Cal. Architect, E. Russell Ray, Santa Barbara. Owners, Cottage Hospital Association. This building has been described in these columns before. The plans will be complete within a few weeks and the directors of the association will call for figures.

Depot, Freight Sheds and Engine House—Brick construction, \$75,000. Tucson, Ariz. Architects, Engineering Dept. El Paso & Southwestern R. R. Co., El Paso, Texas. Owners, El Paso & Southwestern R. R. Co. Bids for this work will be received by the Engineer of Maintenance of Way of the El Paso and Southwestern R. R. Co., at El Paso, Tex., for the above work. Separate bids must be filed for each of the buildings mentioned. Full particulars can be secured from H. J. Simmons, Gen. Mgr.

Contracts Awarded.

Hotel Addition—3 story and base, brick. Cost not stated. Riverside, Riverside Co., Cal. Architects Krempel & McKee, Home Bldg., L. A. Owner, Mrs. Laura T. Reynolds. Contractors, Cresmer Co., Riverside. Contract price, \$27,390.

MR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties.

Send for details.

Editorial Comment.

What the Industrial Workers of The World expect to accomplish by their methods of violence, an iconoclasm is hard to see. It is doubtful if any of them have a definite idea of what they want to accomplish or just how they are going to accomplish it.

Iconoclasm is sometimes a good thing to break up existing conditions when they become unbearable, to smash outworn idols when they become oppressive. They furnish a basis on which to build a new superstructure unumbered by the traditions and oppressions of the past. But these malcontents and disturbers of the peace seem to have no ideas of constructive statesmanship, no utopian dreams of an ideal state where all would be happy and have equal opportunity. All they seem to be bent on doing is to smash up things generally and confiscate property when the time comes.

It would seem that ordinary horse sense would teach them that to even effect their purpose, which is purely destructive, they must have organization, no matter what their numbers may be. And to have organization they must have government. And government brings about conditions where property and personal rights must be respected and protected or the whole fabric will incontinently topple and fall.

Social conditions and industrial conditions may not be altogether just and right. It will perhaps be a long time till they are so. Some men seek to gain power to oppress their fellows. But the way to proceed to effect some measure of reform is along an intelligent and organized plan to effect some good, to construct on some ground of possible success where ultimate good may be derived.

The I. W. W. seems to be a sort of collective term for every hobo and misfit member of society, every wild-eyed anarchist and crank that strays around the world. Like the militant suffragettes of England they cause trouble where they congregate and it is a serious question how best to deal with them. So long as they do not interfere with the property of people or disturb the peace they are within their rights but when they interfere with things wherein they have no concern they have transgressed their proper bounds and the government should step in and compel them to keep within their rights.

Just as the people of the country generally are demanding that the government step in and curb the aggressions of wealth and privilege and compel every one to be equal before the law, so should it be in the case of those malcontents compel them to

respect the rights of all people in property and their persons under the law.

The San Francisco Call takes occasion to criticize the state administration for what it claims to be its attitude toward the Panama Exposition and quotes President Moore's assertion that because of the governor's attitude it has been necessary to curtail the plans of the exposition. It is natural that the Call should take any opportunity it may find to criticize the Governor for it has always done so. And as far as President Moore's assertion that the governor's attitude has caused the necessity of curtailment of plans, if it be true, is due solely to the action of the president and board of directors of the Exposition.

The trouble with Moore and the directors is that they want to use star chamber methods in dealing with the people and the people's money. They have attempted to do politics for President Taft and have tried to place Governor Johnson in the attitude of being unfriendly to the exposition because he had the backbone to come out for the people. The campaign slogan before the primaries was for Taft, the friend of San Francisco. So they have tried to place everyone who does not support the president in a false attitude and have endeavored to use coercive tactics to secure results.

As the governor well stated, the question of national politics should not in any sense be decided on any such local issues. He repeatedly said that the question should not be brought into the campaign. And when Moore and the exposition men made it an issue he rightly criticizes them. If any body is to blame it is Moore and his associates. The state funds appropriated for the purpose are forthcoming. The governor has appointed men of the highest integrity to handle the funds. They have the confidence of the people of the state. The trouble with the exposition people is that they employ the same methods in the matter of the exposition that they do in politics, they proceed as if they alone are entitled to know what is being done, they distrust the people, and naturally the people distrust them. No more ardent champion of the exposition and all it stands for exists than Governor Johnson. Neither the Directors nor President Moore have any right to assume that they are the whole show in the exposition. They brought the matter into the political campaign where it never should have been brought, and now when the Governor criticizes them they howl that he is an enemy to the Exposition. Let them deal openly and fairly with the people and manage the Exposition as an Exposition and there will be no criticism of their methods.

America's Great Fire Waste. A Comparison Of This Country and Europe.

From the New York Times

(Continued from last issue.)

Waste of Natural Resources.

When asked to state more fully how fire loss is related to conservation, Mr. Babson answered:

"Among the losses from fire loss is that arising from the waste of natural resources, for not only are forests destroyed by fire within their boundaries, but the destruction of so much lumber in wooden buildings is a serious matter. It is calculated that the available supply of timber in the United States will, unless its destruction is restricted or reforestation occurs, become exhausted in about a quarter of a century.

"Then apprehension is expressed lest the supply of high-grade iron ore in the country shall become depleted. The known supplies are less than 5,000,000,000 tons, while those of low grade are estimated at 75,000,000,000 tons. Non-production, of course, has always been a subject of constant interest to merchants and manufacturers in every line, and few of the weekly barometers which my organization compiles for business men are more carefully studied.

"Of stone, sand, gravel and cement, lime, slate, etc., there is an inexhaustible supply, which can be substituted for wood and iron in the construction of buildings. Improvement in the preparation of raw materials for construction uses is rapidly diminishing the difference in cost between different classes of materials and use of the more permanent materials is urged.

"The difference in cost between fireproof and other classes of buildings is considerably smaller than is supposed. Within a few years remarkable strides have been made in the substitution of iron and steel for wood as the result of careful investigations of their properties by engineers, physicists, and chemists, and a great amount of attention paid to their fabrication by manufacturers and architects. Only second to this is the attention given to concrete construction."

Additional consideration is given to this subject further on in this interview.

Causes of Fire Losses.

You have mentioned results. What are the causes? was the question next put to Mr. Babson, to which he returned:

"Among the causes of fires incendiary is more prominent than it ought to be. The Committee of Incendiarism and Arson of the National Board of Fire Underwriters reported that for the year ended with April 1, 1911, seventy-one rewards were offered, amounting to \$21,850, making 6,016 rewards offered since 1873, the amount of the same being \$2,004,975. The seventy-one rewards offered in the long period payment was made in 275 cases, the total payments being \$14,119. There were 391 convictions, or 161 per cent of the total number. In 1910-11 the convictions were only two. The com-

mittee declares itself unable to conclude that there is any decrease in incendiary fires.

"Carelessness is one of the most prolific causes of fire, and in instances it is hardly other morally, if not legally, criminal, as in the dropping of a lighted cigarette butt in a lot of flimsy material at the Ash Building in New York upon the 24th of March, 1911, when 113 work girls lost their lives."

"The moral side of fire waste, Mr. Babson urges, is as unmistakable as the economic, and he cited the need for a more definite placing of responsibility:

"That certain fires are the result of criminal carelessness should be obvious without the saying. This fact was long ago recognized in European countries and is now being recognized on this side of the Atlantic. At a late meeting the National Board of Fire Underwriters the following preamble and resolution were offered for consideration:

"Whereas, A vast number of fires are annually caused by gross carelessness, resulting frequently in disasters attended with appalling loss of life; and

"Whereas Present laws are absolutely inadequate to protect the community from reckless property owners and criminally careless individuals, who are indifferent to the appalling fire waste of the country, so long as they are protected by fire insurance; therefore be it

"Resolved, That we favor the enactment of legislation similar to that of enlightened nations abroad, by which every individual shall be held responsible for loss of life and property caused by gross carelessness and neglect."

"The mover of the resolution remarked, when offering the same: 'The general notion seems to be that when a man has an insurance policy on his property that all responsibility for its preservation ceases, so far as he is concerned. If it burns, he is insured. We want to get the foreign idea adopted here, which has resulted in an enormous saving of life and property on the other side, where they hold every man responsible when he causes through gross neglect or carelessness, a fire. A might spread yellow fever, smallpox or measles, or spit in a car, and he would be arrested and put in jail, because it is dangerous to the community. But the same man takes a lighted cigarette butt and throws it in a basket of waste and burns 116 people to death, and there is no law on the statute books to put him where he belongs.

In Germany, France, and other countries that would be punished; there every fire is regarded as a crime against the community, and it is investigated. That is exactly the sentiment that we want to develop here, and that can best be done by the adoption of resolutions not only once but a hundred times if necessary, whenever we gather together in annual meeting,

in any insurance organization whatever. They adopted this resolution in Chicago some time ago, and it was published in the newspapers, and undoubtedly that helped. The utmost we can do is so very little, because we have got 100,000,000 people to educate on this subject, and very few to help, so that we must make missionaries of everybody, and particularly of our own members, at every meeting of this kind, to help in this great work.

"The resolution was adopted and likewise a similar one aimed at the 'criminal match, and which read:

"Whereas, The poisonous and dangerous parlor match is responsible annually for thousands of fires, with great loss of life and property; therefore, be it

"Resolved, That we recommend the enactment of legislation for the protection of the public making the manufacture and sale of parlor matches a criminal offense, and requiring the universal use of safety matches;

"Resolved, further, That pending the enactment of such legislation we earnestly recommend every household and business man to abandon the use of dangerous matches in homes and business establishments.

To Reduce Fire Losses.

Mr. Babson was asked for an opinion as to the possibility of reducing fire waste:

"The problem of reducing the loss by fire is receiving the constant attention of thoughtful men, and ought to be in the mind of everybody. The members of my own organization, whose business is to aid merchants and manufacturers in increasing their efficiency are especially interested in this work. The government body before referred to made these suggestions relative to possible reduction of fire waste:

"(1) By tests and investigations made to determine the relative fire resistance of building materials and the relative rates of heat conductivity of such materials, and by the development of systems of construction which will offer the maximum of resistance to fire. The tests should have in view the classification of building materials in the order of merit and the possibility of cheapening the cost of construction by using those best suited to the purpose, inasmuch as the cheaper materials are now often not employed through lack of knowledge of their availability.

"(2) By dissemination of information regarding the more non-inflammable building materials, their strength and durability, the methods of utilizing them in construction and the availability of the most suitable of these materials at places near the location at which they are wanted.

"(3) By the enactment and enforcing of building codes with a view to insuring more fire-resistant and more nearly fireproof construction. In many European cities the erection of wooden buildings is prohibited, and the oversight of brick, stone, steel

and cement construction is such as to diminish the danger from fire due to defective tubes, poor electric wiring, and other faults of construction, and to make it unlikely for fire to spread beyond the building in which it originates."

Movement in Boston.

In response to a question, Mr. Edson gave the following outline:

"In the autumn of last year the Committee on Fire Protection of the Boston Chamber of Commerce submitted a report on 'The Prevention of Fire in Boston,' which is of concern beyond the confines of that city. It is startling, for example, to read in the description of existing conditions that the loss of property due to fire in this country equals about \$2.50 per inhabitant each year, or seven times the per capita loss in European countries.

"Not less remarkable," adds the committee, "is the comparison with which the public views this destruction. * * * Fire waste is a real and irretrievable loss, the destruction of property reducing by just so much the aggregate wealth of the community. This loss falls upon every member of the community in the form of increased taxes, increased insurance rates, increased cost of building materials, increased rent, and sooner or later, may fall upon any one in the more obvious form of direct personal loss due to a fire in his own home or place of business.

"Furthermore, the money loss by no means represents the real cost of fire. The consequential loss due to sacrifice of lives, damage to business and homes, interruption of employment for many persons, and to general derangement of civic functions is so large that one dare not try to estimate it. It surely represents several times the actual property loss, thus carrying the total cost of fire into the billions."

Investigation of foreign conditions as compared with those in this country led the committee to conclude that:

"The building construction is much better on the average and in some cities practically all buildings are of fireproof construction.

"Building laws are more rigidly enforced and frequent inspections are made.

"A well-organized Fire Marshal system exists in practically every city, and the causes of all fires are investigated. A fire is considered a crime and the guilty punished, resulting in much greater individual responsibility.

"The Fire Departments in foreign countries are certainly no better than ours, and probably, on the average, not as good. The preventive measures mentioned above are the fundamental reasons for freedom from fire waste.

"In foreign countries conflagrations are practically unknown, while in this country they are very common. The reason for this condition is, of course, the large amount of wood construction used in this country. Even in our large cities, where fireproof buildings have become general, there are still in existence groups of buildings which, on the interior, are largely constructed of wood. These so-called second class buildings make possible a conflagration at any time. Such a catastrophe as has been experienced by Elizabeth, Chelsea, Baltimore, San

Francisco, Portland and Bangor may be expected in Boston at any time.

"The number of deaths due to fire is also out of all reasonable proportion in this country, over 6,000 people having lost their lives in one year. The loss of life in foreign countries is small. All rules and regulations which tend toward the reduction of fire waste will, of course, reduce the loss of life. Recent experiences in this country, particularly the fire of April 7, 1911, New York City, show an utter disregard for law and reasonable conditions of safety.

"Further, it is important to realize that in this country in manufacturing buildings which are insured in the mutual companies preventive measures have been introduced most successfully, and that the loss by fire in this field is reduced to a remarkably low point. This is a very important consideration, since it is practically conclusive proof that fire waste in this country can be reduced, provided the proper regulations are enforced."

Mutual System Reduces Fires.

The basis of losses in the mutual companies is as follows:

"Each person who insures property in certain rules and regulations, and accepts his insurance at a certain fixed rate. At the end of the year a rate is given from this rate, depending upon the extent of the loss, which have occurred. If there have been few fires, a large rebate is made. The reason for insuring in the mutual companies is to obtain a low rate of insurance and also freedom from fires. The mutual companies, however, insist upon certain rules and regulations regarding construction, protection, and maintenance of equipment, which are in accordance with the best-known methods of fire protection. The fundamental principle of the mutual companies protection is the use of automatic sprinklers. A careful system of inspection is maintained to see that all regulations are carried out at all times.

"The buildings which are insured in mutual companies are not, in general, fireproof, but are of what is termed 'half construction'; that is, brick walls with wooden interior, the wooden construction, however, being in accordance with certain rules. From year to year the fire losses in the mutual companies have become smaller and smaller, and at the present time the loss was reduced to about one and one-half cents for each \$100 covered for the year 1909 in the Boston Manufacturers Company. Compare this with the average loss for the stock companies, cents for each \$100 covered.

"It is, of course, not practicable to apply the methods of the associated companies to all buildings in the country, but an application of these principles at least can be made with tremendous advantage. From such figures as are obtainable from the stock companies it appears that the average loss in buildings which are sprinkled runs as low as 1.25 per cent \$100 covered. This illustration is cited merely as indicating the possibility that may be obtained from protection.

Recommendations of Committee.

"The recommendation of the Chamber of Commerce Committee were these:

I.

To Reduce the Construction Hazard.

"(a) The enactment of city ordinances which shall prohibit the construction of any third-class building within the city limits.

"(b) The enactment of a law prohibiting the construction of any but fireproof buildings within the congested business district of the city.

"(c) The passage of a law requiring all second or third class buildings now existing within the congested business district of the city to be equipped with sprinkler service, except that houses for habitation not used in any portion for any other purpose need not be so equipped, and that hotels and lodging houses need be so equipped only in the basement, first story, public halls, dining rooms, or assembly rooms.

To Prevent Carelessness or Deliberate Mismanagement.

"(a) The passage of a law creating a Fire Bureau empowered to examine into every fire and make a published report thereon, giving in detail the cause of the fire and locating the exact responsibility in such the same manner as the Coroner's jury investigates a crime.

"(b) The passage of a law regulating the issuing of fire insurance covering any building previous to approval by formal act of said Fire Bureau.

To Improve the Efficiency of the Fire Fighting System.

"(a) The installation of a high-pressure fire service carried through the streets of the congested portion of the city.

"(b) Doing away, as rapidly as conditions will permit, with the obsolete and cumbersome system of portable engines and machinery operated by horses and the substitution of self-propelled fire apparatus.

Comparative Building Costs.

"According to the building law, a first-class building is one wholly of fireproof construction; a second-class building is one of which the exterior is wholly of non-combustible material, constructed within and without or wholly or in part of wood.

"The committee advocated that the prohibitive district in Boston for wooden buildings should include the whole city; and to meet the objections of builders of cheap wooden houses that their cost would be materially enhanced and the rental necessarily increased, the committee made a special investigation of the costs of second-class buildings and arrived at the conclusion that owners of these could well afford to leave them at the same rental as the cheaper buildings because of the saving in the cost of maintenance and repairs.

"A set of house plans of a building which has actually been erected was submitted to five different contractors, and their estimates were averaged for comparison. The average estimate for a frame building covered with clapboards was \$6,779.95; and the average increase in cost for other types was: Stone on frame, 2.92 per cent; brick veneer on studwork, 5.83 per cent; stone on hollow block, 6.31 per cent; brick veneer on boarding, 6.95 per cent; ten-inch brick wall, hollow, 9.16 per cent; brick veneer on hollow block, 10.77 per cent.

"The owners of a special form of poured concrete construction stated that by their method a six-room house

has been built at approximately the same cost as the cheapest frame construction, and that the cost is about 15 per cent less than if constructed with brick walls.

"The committee concluded that the cost of a second-class building need not be more than 15 per cent above the cost of a third-class structure. This conclusion was based on expert opinion; and, finally, the committee declared confident belief that the suggested prohibition of third-class buildings in the whole city would entail no real hardship upon owners or lessees of property.

"Furthermore, the committee believed that this departure from established custom would greatly reduce the loss by fire due to exposure, that is the communication of fire from one building to another, which is said to be the cause of more than 25 per cent of the waste from fire.

"Touching the congested district of Boston it was allowed that looked at as a first cost insistence on first-class buildings only would appear expensive, but it was held that the desire of the individual to reap a large return should be subordinated to the rights of the city as a whole, and there was no question that first-class buildings reduced the number and extent of fires. Sprinklers are calculated to lessen damage by fire, and they effect sufficient saving in insurance premiums to pay for themselves in a few years.

"It was calculated that a fire bureau to investigate and report in detail upon every fire would secure desired publicity and lead to valued suggestions in the way of prevention. Moreover, it was felt that all buildings should be approved by the Fire Bureau before they would be eligible for insurance, the same as is required in case of boilers, elevators, etc.

"The City of Boston is now moving for the construction of high-pressure water service for the better protection against fire, and it is constantly improving the fire apparatus. The committee estimated that the adoption of the high pressure system would mean a saving of at least \$100,000 a year in insurance premiums alone. Beyond that it considered the saving problematic, but if by virtue of reduction on the construction hazard the annual fire loss could be reduced to that of Philadelphia, the best average city in America, the saving would be \$2.14 per capita, or \$12,500,000 a year for Boston alone. And if by moving the best endeavors of the Fire Bureau it might be possible to still further reduce the annual fire loss of \$2.60 to even twice the per capita loss of Germany, which is 19 cents, a saving of over \$100,000 would result."

The Appeal to the Pocket.

Mr. Babson was particularly emphatic in driving home the personal side of this great problem of fire waste. He concluded:

"The loudest appeal is not to be that which is directed to the private purse. This appeal can, in this instance, be made immediate and direct through provision for graded taxation by municipalities. The insurance companies favor the property that is likely to be most immune from damage by fire and fire-insurance against other property. If tax assessors were

authorized to follow the same principle in levying upon real estate, builders would learn the advantage of fireproof construction, and there would be less difficulty in persuading a certain class of capitalists to put a different class of structures than they have been accustomed to do.

"It might be said that property must be assessed at a fair market value, and that this two-rate tax plan would involve a new principle, and so it might, perhaps, but the result would be about the same in both cases as relates to the revenue derived. The fireproof structure would still be assessed for its fair market value, and the minimum tax rate be applied. The fire-stay property would be, likewise, assessed for its fair market value, and the maximum rate apply. The difference in the rates being the inducement to construct buildings entitled to receive the lower rate of taxation, and a competent authority being empowered to classify buildings for purposes of taxation.

"If difficulty were found in applying this principle broadly, it might perhaps be applied in certain areas, in cities where there is special fire hazard. In any case this and other ideas which have been found satisfactory abroad are entitled to serious consideration. It ought certainly to be possible to reduce the waste of life and property by fire in a country like our own by at least 50 per cent, and as we are foreign countries in so many ways that are less worthy, will not imitate them in holding more sacred the preservation of life and property from destruction by fire and to every means in our power? It is a question that the existence of a worthy insurance institution should make us indifferent to faults of building construction that are easily capable of remedy.

"Remember, insurance companies do not prevent the loss. They simply distribute it. Remember that the average loss today in the United States is \$2.2 per capita for protection and \$2.61 per capita for damage, a total of \$4.81 per capita, or \$24,000,000 family per year.

"Remember that the cost of fire for Europe are only 19.7 cents per capita, respectively with a total of only \$1.05 per capita, or \$5,250,000 family. Assuming that with European fireproof construction our buildings would be 10 per cent more expensive, and this would make them 5 per cent higher (which is very liberal), fireproof construction would still enable a money saving of over \$10 per year for each American family besides saving thousands of lives, with untold suffering, suffering and inconvenience." Roger W. Babson, in New York Times.

HOTEL REPUBLIC.

The Hotel Republic, under which name a modern four-story and basement brick and steel building is being erected at the northeast corner of Sacramento and Dupont streets, the most important corner in China Town. The various other projects recently purchased, have formed the Hotel Republic Company, which includes a number of the best known Chinese merchants.

The building has been designed by Architects Smith & Stewart as a typically American hotel in both interior

and exterior design. The exterior will be faced with pressed brick. An ornamental marquise will extend over the main entrance.

The first floor will contain three stores with large plate glass windows and marble wainscote. The basement will be subdivided into a barber shop, billiard room and general merchandise store. The basement will be properly ventilated. There will be a number of large sidewalk lights. The entrance to the basement will be on Dupont street, the stairs being of marble and the entrance finished in marble wainscote.

The second floor of the building will be occupied entirely by a large Chinese restaurant, which will be reached from the street by a six-foot stairway, entirely finished in marble. The floor in both the dining room and kitchen will be finished in tile. The tile will also be used in back of all the ranges. The dining room proper will be finished in mahogany with the walls covered with imported oriental tapestries which have been designed especially for the room and are now being made in China. The ceiling will be beamed and decorated with ornamental plaster.

The third and fourth floors of the building will contain about thirty rooms besides the baths. Hot and cold running water has been provided for in all rooms. The interior finish of the upper floors will be of pine.

Work on the building has been started and it is stated that the contract price for the work was \$30,000.

Since Wall Street has found out that it can not nominate, or if it does nominate Mr. Taft, it could not elect him, it has come to the conclusion that neither Taft nor Roosevelt are fit people to be president and it is beginning to think that it could get along with Champ Clark.

Despite the loud assertions that Taft was the greatest president since Lincoln, far more the reactionaries have come to the conclusion that the president is not the person to represent the people in the White House. What the object is the pledges he made to Roosevelt that have come out in the controversy.

The principal objection that progressive people have to Roosevelt is that he made Taft president. And Roosevelt's greatest disappointment has been to find that all the reform policies that he instituted have been effectually checked under his successor.

So the reactionaries find in the present Speaker a man less liable to do effective work in the matter of reform, one who is trained and fixed in the old line of party policies. They profess to see the danger of despotism in the ascendancy of Roosevelt and like another Brutus would save Rome by preventing Caesar from being crowned.

All of which is a whole lot of nonsense and slush. The fear of Caesarism does not come from the intelligent middle classes that are the bone and sinew of any nation. It is a scarecrow erected by those who want a financial oligarchy and who fear any effective reform in existing conditions. The progressive elements are supporting Theodore Roosevelt for president. The opposition will endeavor to combine on the Democratic candidate or try to divide the vote.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "NOTICES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 2 story and base, frame, \$5,000. Architects, Welsh & Casey, Western Metropolis Bldg., S. P. Owner, Sewell Oliver. The building will cover a considerable ground area and will be erected on a corner lot. There will be about 45 rooms which will be arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat and wall beds. The interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, H. H. Meyers, 14A Woodward Ave., S. P. The building has been arranged for 12 two and three room apartments, will cover an area of 41x65 feet. The interior finish will be of pine throughout. The exterior of the building will be covered with ship-lap and brick veneer. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Apartment house, 6 story and base, reinforced concrete. Architect's name not given. Owner, John Pavert, Syndicate Bldg., Oakland. This work has been mentioned here a number of times before. The building is now well advanced and the owner is taking figures for the plastering and electric work on the same.

Berkeley, Alameda Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owner, B. P. Whitton, 2232 Haste St., Berkeley. The building has been designed to contain twenty rooms and baths. The suites will be arranged in two and three room apartments. There will be a central heating system. The interior finish will be of pine with some hardwood floors. The exterior of the building will be finished in cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Chico, Butte Co., Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Chester Cole, Chico. Owner, C. C. Demaris. The building which is to be erected on a corner lot, will contain three stores on the first floor and 25 apartments on the upper floor. The interior will be finished in pine and redwood. The exterior of the building will be faced with cement plaster. The plans are complete and figures will be taken shortly.

Oakland, Cal.—Apartment house, 2 story and base, frame, \$10,000. Architect, none. Owner, Raymond J. O'Connell, 414 Buena St., Oakland. The building has been designed to contain eight three-room apartments with baths. There will be wall beds and hot water heat. The interior trim will be of pine with some hardwood floors. The exterior of the building will be covered with rustic and ship-lap. The plans are in the hands of the owner and he is now taking figures on the various parts of the work.

Oakland, Cal.—Apartment house, 3 story and base, frame, \$12,000. Architect, O. M. Bullock, 120 Broadway. Oakland. Owner, one. The building will contain 12 room apartments in two and three room apartments with connecting baths. The interior trim will be of pine. There will be wall beds and open in place. The marble will be of tile. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 2 story and base, \$10,000. Architect, Whitting Thompson, Douglas Bldg., L. A. Owner, E. Victor. The building will be 45x100 feet. The first floor has been arranged for two stores. The upper floor will be divided into six three-room apartments with baths. There will be wall beds in all apartments. The interior trim will be of pine. The exterior of the building will be faced with cement plaster. The architect is now preparing the plans.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and steel, \$30,000. Architects, Long & La Casse, Central Bldg., L. A. Owner's name withheld. The building will cover an area of 50x175 feet and will contain 108 rooms arranged in 51 apartments of two rooms and bath each. There will be steam heat, wall beds, both passenger and freight elevators and a vacuum cleaning system. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. Considerable marble and tile will be used. The architects have prepared only preliminary plans.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, \$15,000. Architect, H. A. Cole, 621 South Spring St., L. A. Owner, William Bhoeler. The building will be 55x150 feet. The building will contain 74 rooms arranged in two and three room suites. There will be private baths, wall beds, steam heat, elevator service and a vacuum cleaning plant. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The plans are being prepared.

Contract Awarded.

Seattle, Wash.—Apartment house, 3 story and base, brick, \$25,000. Architects, Wilcox & Sayward, Central Bldg., Seattle. Owner, Frank Forrester, Jackson St., Seattle. Contractor, same. Contract price, \$25,000.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, \$55,000. Architect, F. Farmentier, Egan Bldg., L. A. Owner, J. E. Murray. Contractor, John Horning, 650 Hollywood Ave., Hollywood. Contract price, \$55,000.

BANKS.

Greenville, Plumas Co., Cal.—Bank, 2 story and base, reinforced concrete, \$75,000. Architect, J. B. Osborn, Richmond. Owners, Indian Valley Bank. The building will be arranged

for 200 banking rooms on the first floor and a Masonic lodge hall on the upper floor. There will be fireproof vaults. The building will have a central heating system. The interior finish of the banking rooms will be of hardwoods and tile. The exterior of the building will be faced with cement plaster. The plans are now being prepared.

Salem, Ore.—Bank and offices, 5 story and base, reinforced concrete, 1111 1/2. Cost not stated. Architect, Fred L. Portland. Owners, Salem Bank and Trust Co. The work will be in the nature of an addition to the present three story brick structure. The entire first floor will be re-modeled and when complete will be occupied by the bank. The upper floors will be subdivided into modern offices. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and trimmed with terra cotta. The architect states that the plans will be ready for figures by June 1st.

BRIDGES, DAMS AND HARBOR WORK.

Medford, Ore.—Bridge, steel and concrete. Cost not stated. Engineer's name withheld. Owners, Jackson County. Plans for a large steel bridge which is to be erected over Bear Creek have been approved by the County Supervisors and bids will be opened on June 4th.

Twin Falls, Twin Falls Co., Idaho.—Bridges, 2, steel and concrete. Cost not stated. Engineer, County Surveyor, Twin Falls. Owners, Twin Falls County. Plans have been completed and bids are now being taken by Chairman O. G. Zack of the County Supervisors for the construction of two bridges. Bids will be opened on June 17th.

Contracts Awarded.

Bremerton, Wash.—Block frame and concrete construction. Cost not stated. Engineer, City Engineer, Bremerton. Owners, City of Bremerton. Contractors, George C. Dietrich & Co., Globe Bldg., Seattle. Contract price not stated.

CHURCHES.

San Francisco.—Church, Class A construction, \$100,000. Architect, John J. Foley, Monadnock Bldg., S. P. Owners, St. Joseph's Church. This building has been mentioned here before when the plans were being prepared. The architect is now taking figures on several parts of the work and separate contracts will shortly be awarded. There will be a complete steel frame with exterior walls of either stone or terra cotta. The interior finish will be of oak and ornamental plaster.

Crows Landing, Stanislaus Co., Cal.—Church, 1 story and base, frame, \$25,000. Architect, John J. Foley, Monadnock Bldg., S. P. Owners, Crows Landing Catholic Church. The building has been mentioned in these columns before when the architect was commissioned to prepare the drawings. The plans are now out for figures and a general contract will be awarded shortly. The building is designed in the Mission style with the exterior covered with cement plaster on metal lath. The interior will be finished in oak and ornamental plaster. The roof

will be of clay tile.

San Diego, Cal.—Church, 2 story brick or concrete and steel, \$100,000. Architect, Robert H. Orr, State Bank Bldg., Pomona. Owners, First Presbyterian Church of San Diego. The architect has just been commissioned to prepare plans for this work and the details have not been decided on as yet. There will be two separate buildings both of steel and concrete or brick construction. Further particulars will be given as the plans progress.

Orange, Orange Co., Cal.—Church, frame and brick construction, \$15,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, First Presbyterian Church of Orange. The architect states that it has now been decided to erect this building by Day Labor. The work has been fully described in these columns before. The superintendent of the work will be E. W. Edwards of Upland.

Whittier, Los Angeles Co., Cal.—Church, frame and brick construction, \$10,000. Architects, Large & La Casse, Central Bldg., L. A. Owner, St. Mary's Roman Catholic Church. The building will be 54x104 feet and will have a seating capacity of 320 people in the main auditorium. The interior will be finished in pine and redwood. The exterior of the building will be covered with cement plaster. The architects have completed the working drawings and the work will be carried on under the direction of Edward S. Cobb, Central Bldg., L. A.

San Diego, Cal.—Church auditorium, 1 story and base, frame, \$16,000. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, First United Presbyterian Church of San Diego. The building will be in the nature of an addition to the present church and when complete will have a seating capacity of 250 people. The exterior of the structure will be covered with cement plaster on metal lath. The architect is now preparing the plans.

FACTORIES & WAREHOUSES.

Seattle, Wash.—Factory, 1 story and base, reinforced concrete, \$20,000. Architects, Saunders and Lawton, Alaska Bldg., Seattle. Owner, A. C. Zimmerman. The building will cover a ground area of 40x228 feet. The building has been designed for a shoe manufacturing plant. There will be considerable steel used. Plans will be complete by the end of the week.

Seattle, Wash.—Warehouse, 7 story and base, reinforced concrete, \$300,000. Architects, Blackwell and Baker, Northern Bank Bldg., Seattle. Owners, Seavey-Roebuck Co. The building will cover an area of 165x185 feet. The construction will be fireproof throughout. There will be freight and passenger elevators, steam heat, package chutes and other modern conveniences found in this type of buildings. The exterior of the structure will be faced with cement plaster. The plans are now out for figures among eight Seattle contractors.

FIRE HOUSES AND JAILS.

San Antonio, Los Angeles Co., Cal.—Jail alterations, brick and concrete, \$1,000. Architect, Henry Holladay, Majestic Theatre Bldg., L. A. Owners, City of Santa Monica. The building will contain the offices of the depart-

ment heads, four new steel cells and a guard room. There will be a central heating system. The exterior of the building will be faced with pressed brick. The plans will be complete within a week and figures will be called.

FLATS.

San Francisco.—Flats and store, 2 story and base, frame, \$4,000. Architect, Rudolph Patcha, Foxcroft Bldg., S. F. Owner, C. Schawl. The building will contain a store on the first floor and two flats above. The interior trim will be of pine. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

San Francisco.—Flats, 3 story and base, frame, \$5,000. Architect, none. Owner, Henry Scholten, Oakland. The building will cover an area of 30x60 feet and will contain 6 small flats of four and five rooms each with baths. The interior trim will be entirely of pine. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

San Francisco.—Flats and store, 2 story and base, frame, \$3,000. Architect, C. Fantoni, 1 Columbus Ave., S. F. Owner, Camilo Colopharro. The building will be 22x28 feet. There will be a store on the first floor and living apartments on the second floor. The finish throughout will be of pine. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

San Francisco.—Flats, 3 story and base, frame, \$5,000. Architect, none. Owner, Henry Battis, 11 Kendall Place, S. F. The building will be 25x52 feet. It will contain three flats of five and six rooms and bath each. The interior finish will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco.—Flats, 2 story and base, frame, \$1,000. Architect, none. Owner, Leopold Livivasse, 801 Pacific St., S. F. The building has been designed to contain four small flats of four and five rooms each and bath. The interior finish will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap and rustic. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

GARAGES.

Los Angeles, Cal.—Garage, 1 story and base, brick. Cost not stated. Architect, H. A. Cole, L. A. Owner, H. F. Vollmer. The building will be erected on a corner lot and has been designed for a commercial garage with waiting room, repair department and storage space. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Garage, 2 story and base, reinforced concrete. Cost not stated. Architects, Morgan-Walls and Morgan, Story Bldg., L. A. Owner, Mrs. S. H. Van Nuys. The building, which has been mentioned here before

will cover a ground area of 150x155 feet. There will be large display rooms, storage and office space and a repair department on the first floor. The second floor will also be utilized for storage and display purposes. The construction will be fire proof throughout. The interior of the office will be handsomely finished in hardwood and tile. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

GOVERNMENT WORK

The following executive order has been issued in reference to the purchase of Portland cement by all branches of the Government:

"It is hereby ordered that all Portland cement that may hereafter be purchased by any department, bureau, office, or independent establishment of the Government, or that may be used in construction work connected with any of the aforesaid branches of the Government service, shall conform in every respect to the specification for Portland cement adopted by the departmental conference at the meeting held at the bureau of standards on February 13, 1912, and approved by the heads of the several departments (to be known as the United States Government Specification for Portland Cement): Provided, however, that such specification may be modified from time to time by any similar departmental conference with the approval of the heads of the several departments. WM. H. TAFT."

The Constructing Quartermaster's office at Fort Mason, California, is now conducting the most exhaustive tests of the modern oil burners in the connection with the preparation of plans for the changing over the entire heating plants of all buildings in both the Presidio and Fort Winfield Scott from coal burning to oil burning. The new system will be the largest oil burning system in the State, and will include the laying of about 15,000 feet of six, four and three inch pipe, the removal of two large tanks from the 1915 Fair Site, the gravity system of distributing will be used. The work will probably cost \$20,000. Bids will be called for by the end of fiscal year which ends next month. Plans are now being considered which in have in view the changing of all buildings at Fort Mason with the exception of one present officer's quarters into store houses for use in connection with the Transport warehouse. This will result in the removal from the Down Town district of a large number of Government departments.

Bids opened by the Construction Quartermaster's Department at Fort Mason, California, for the brick addition to the pumping plant at Fort Winfield Scott, show Francis Spoke of the Builders' Exchange low on the general contract of \$3,712; James Fletcher low at \$300 for the plumbing, and John G. Sutton Co., low for the sewer work and lighting fixtures at \$65. John Fletcher was the high bidder for the general construction of the addition at \$55,089. All bidders of San Francisco.

The following awards have been

made for the work at the kitchen of the general hospital at the Presidio of San Francisco, and notification has been sent the bidders by the Construction Quartermasters' Department at Fort Mason: Kitchen equipment to Holbrook, Merrill & Stetson, \$5,250; plumbing to the Burnham Plumbing Co., S. F., \$2,955; electric fixtures to the Burnham Plumbing Co., S. F., \$197; electric wiring to the Rutte Engineering Co., S. F., \$392; heating to F. C. Walsh, S. F., \$377. The items of an electric lift and oil burning apparatus have not been temporarily omitted owing to lack of funds.

HALLS & SOCIETY BLDGS

Fresno, Fresno Co., Cal.—Lodge Hall, 3 story and base, brick. Cost not stated. Architect, Henry Starbuck, Fresno. Owners, Woodmen of The World. This work has been mentioned here before when the architect was first selected to prepare the plans for the building. The working drawings are now complete and the architect states that figures will be called for by June 1st.

San Francisco—Armory, 4 story and base. Class A construction, \$500,000. Architect, State Engineering Department, Sacramento. Owners, State of California. The following bids were opened in State Engineer McClure's office at Sacramento on May 23rd for the excavating and grading, pile and foundation work for the San Francisco Armory building, which is to be erected at Mission and 14th streets. (1), total; (2), excavating and grading; (3), pile and foundation work; (4), extra piles per foot; (5), deduction, Lindgren Co., Menadnock Bldg., S. F., (\$1,000); (2), —; (3), \$26,000; (4), \$1.25 per foot; (5), —. Locke Construction Co., Crocker Bldg., S. F., (1), —; (2), —; (3), \$23.19; (4), \$1.00 per foot; (5), —. John J. Leonard, Sheldon Bldg., S. F., (No check). Ross Construction Co., Forum Bldg., Sacramento, (1), \$83,220; (2), \$56,290; (3), 26,820; (4), \$1.00 per foot; (5), \$9.70. Rickson-Ehrhart Engineering and Construction Co., 1859 Geary St., S. F., (1), —; (2), \$36,185; (3), —; (4), \$1.00 per foot; (5), \$9.50. Grant Fee, 2410 16th St., S. F., (1), \$85,000; (2), —; (3), —; (4), \$9.90; (5), —. James L. McLaughlin, S. F., (1), \$69,040; (2), \$38,000; (3), \$24,461; (4), \$1.00 per foot; (5), —. State Construction Co., Sacramento, (1), —; (2), —; (3), \$29,700; (4), \$1.50 per foot; (5), —. Portland Concrete Pipe Co., Portland, Ore., (1), —; (2), Mercer & Healy-Thibbets Construction Co., 9 Main St., S. F., (\$3,726); (2), \$29,129; (3), \$25,522; (4), \$1.75 per foot; (5), —. E. M. Hute Co., Menadnock Bldg., S. F., (1), —; (2), \$35,000; (3), —; (4), —; (5), —. Foster-Vogt Co., Hearst Bldg., S. F., (1), \$51,897; (2), —; (3), —; (4), \$0.85 per foot; (5), —. F. Roland, 550 Montgomery St., S. F., (\$69,690; (2), \$44,411; (3), \$27,572; (4), \$2.50 per foot; (5), —. The bids are now under advisement in the office of the State Engineer and no award has been made as yet.

Contracts Awarded.

Spokane, Wash.—City hall, 6 story and base. Class A construction. Cost not stated. Architect's name not given. Owners, City of Spokane. Contractor, M. C. Murphy, Spokane. Contract price \$242,739.68. Note: The contract was mentioned here last week at which time the figures of the low bid, a Seattle contractor were given.

HOSPITALS.

Bakersfield, Kern Co., Cal.—Hospital, 2 story and base, brick and concrete, \$100,000. Architect, C. L. Clark, Brower Bldg., Bakersfield. Owners, Sisters of Mercy. The work has been mentioned here a number of times before. The architect has now completed the working drawings and will call for figures shortly. The building will be of fireproof construction. There will be a number of private wards and two public wards. The equipment will be modern in every respect.

Pasadena, Los Angeles Co., Cal.—Hospital, 2 story and base, brick and concrete. Cost not stated. Architect, W. E. Edwards, Inceon Bldg., Pasadena. Owners, Marcano Hospital Association. The city authorities have rendered a decision favorable to the association and they will proceed at once with the construction of their new building. The architect is preparing the working drawings and complete details will be given in these columns later.

HOTELS.

San Francisco—Hotel, 2 story and base, brick, \$100,000. Architects, Fabre & Beardsall, Western Metropolitan Bank Bldg., S. F. Owners, W. H. Turpey. The building will be arranged for an office and several rooms on the first floor and about sixteen rooms and two baths on the upper floor. The trim will be of pine throughout. The exterior of the building will be faced with stock brick. Plans for the work are now out for figures.

San Francisco—Hotel and stores, 3 story and base, brick, \$30,000. Architect, Albert Pissis, Flood Bldg., S. F. Owner, J. E. Walsh. The building has been designed for several stores on the first floor and about 30 rooms on the upper floors. There will be four bath rooms. The interior trim will be of pine throughout. The exterior of the building will be faced with pressed brick. The plans are now complete and in the hands of the contractors for figures.

San Francisco—Hotel addition, 3 story, brick, \$10,000. Architect, C. A. Mendenloffer, Humboldt Bank Bldg., S. F. Owner, William Rhodes. The work will consist of the addition of three stories to the present one-story building. The first floor is now occupied by stores. The addition will contain in the neighborhood of sixty rooms and a number of baths. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans for the work will be completed at once.

Berkeley, Alameda Co., Cal.—Hotel work, 4 story and base, frame, \$3,000. Architect, J. Cather Newsom, Menadnock Bldg., S. F. Owners, Berkeley Inn Co. This work has been mentioned here before. The building is now well under construction, and the architect

is taking figures for all parts of the work except the carpentry and brick work.

Stockton, San Joaquin Co., Cal.—Hotel, 5 story and base, brick and steel, \$100,000. Architect, Allen Allen, 1236 Golden Gate Ave., S. F. Owners, Clark Hotel. The work will be in the nature of an addition to the present hotel building. There will be about 150 rooms added besides a spacious lobby and dining room. The addition will contain steam heat and elevator service and other modern improvements. The work has been mentioned here before. The plans are now complete and figures are being taken.

San Fernando, Los Angeles Co., Cal.—Hotel, 2 story and base, brick. Cost not stated. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owners, Mission Land Co. The building will be 200x125 feet and will contain a bank, hotel office, dining room and 12 stores on the first floor. The second floor will be subdivided into 66 guest rooms and 20 baths. The interior of the bank will be finished in marble, hardwood and plate glass. The hotel dining room, office and lobby will also be handsomely finished. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Contracts Awarded.

Los Angeles, Cal.—Hotel, 3 story and base, brick. Cost not stated. Architect name, Owner, W. M. Garland. Contractor, Joseph H. Rhodes, Central Bldg., L. A. Contract price not stated.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

San Francisco—Car barns, 2 story and base, reinforced concrete, Cost not stated. Architect, City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. The plans for a car barn and quarters for the men, which is to be used in connection with the Geary Street Municipal Road, are now complete and figures are being taken by the Board of Public Works. There are two methods of treatment under consideration. Bids will be opened on June 1th.

Berkeley, Alameda Co., Cal.—Passenger station, concrete and frame, \$9,000. Architect, none. Owners, Berkeley Improvement Co., Shattuck Ave., and Addison Way, Berkeley. The work will be done in the Northbrae District. The design for the building is in the Mission style. The roof will be of clay tile. There will be a fountain in the yard. The plans for the work are complete and figures are being taken.

Modesto, Stanislaus Co., Cal.—Passenger station, 1½ story and base, brick and concrete, \$15,000. Architectural Dept. S. P. Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The building will contain two waiting rooms, office, baggage and express rooms. The interior finish will be of plywood and oak. The exterior of the building will be of brick. The plans are now being prepared. Plans are also being prepared in the company's offices for a similar structure which is to be erected at Turlock. Construction on both buildings will be undertaken this year.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, J. Karn, 1181A 24th St., S. F. The dwelling will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places with tile or brick mantels. The exterior of the house will be covered with shiplap. The plans are complete and will be in the hands of the owner. The work will be done by Day Labor.

San Francisco—Residence, 2 story, attic and basement, frame, \$11,500. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owners, S. A. Born Bldg. Co. The building will be similar in the main to two other houses erected by the same company from plans by Architects McNally & McCaw. There will be in the neighborhood of twelve rooms and three baths. The interior will be finished in pine and hardwoods. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. As soon as the plans are complete, the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, H. G. Noeff, 450 Broderick St., S. F. Owner, F. W. Lemmerman. The dwelling has been designed for a six-room house with bath. The interior finish will be largely of pine. There will be open fire places with tile or brick mantels. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Residences, 16, 2 story and base, frame, \$75,000. Architects, Ross & Burgen, 310 California St., S. F. Owners, Greenwich Terrace Householders' Association. The association has recently purchased the entire corner of Greenwich and Leavenworth streets, and will erect thereon a number of terrace dwellings. The dwellings will be built around an open court and have been designed in the Spanish style. There will be a central heating plant for the entire group. The exteriors of the houses will be covered with cement plaster on metal lath. The interiors will be handsomely finished in pine, redwoods and hardwoods. The architects are now preparing the working drawings.

San Francisco—Residence, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, Louis Hellmann, 1234 Jones St., S. F. Each of the houses has been designed for an eight-room dwelling with bath. The interior trim will be of pine and redwood with some hardwood floors. There will be open fire places and brick mantels. Tile will be used in the baths and kitchens. The exteriors of the houses will be covered with cement plaster on metal lath and brick veneer. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$3,500. Architect, Thomas M. Edwards, 45 Kearny St., S. F. Owner's name withheld. The dwelling will contain five rooms and bath. The interior will be finished in pine with some hardwood floors. There will be furnace heat and open fire places. The exterior of the house will be covered with cement plaster

on metal lath. The plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, \$1,000. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for a six-room house with bath. The interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Bungalows, 1, 1½ story and base, frame, \$2,000 each. Architect, none. Owners, MacArthur Bros., 1560 Fell St., S. F. Each of the bungalows will contain six rooms and bath. The interiors will be finished in pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the bungalows will be covered with shingles and shiplap. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, W. P. Jones, 1110 Spruce St., Berkeley. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine and redwood with some hardwood floors. There will be open fire places and brick mantels. The exterior of the house will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,100. Architect, none. Owner, Edward Larmer, 631 Palmer St., Oakland. The dwelling will contain five rooms and bath. The interior finish will be of pine throughout. There will be an open fire place in the living room. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$1,000. Architect, D. T. Blithwell, 1734 Milver St., Berkeley. Owner, Peal Building Co. The dwelling has been designed for a six-room house with bath. The interior of the dwelling will be finished in pine and redwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Cottage, 1 story and base, frame. Cost not stated. Architect, none. Owners, Conservative Realty Co., 68 Post St., San Francisco. The building will contain six rooms and bath. The interior trim will be of pine and redwood. There will be an open fire place in the living room with an attractive tile mantel. The exterior of the house will be covered with shingles. The plans are in the hands of the owners and they are taking figures on the work.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,000. Architect, George Anderson, 5150 College Ave., Berkeley. Owner, L. C. Hindel. The dwelling has been designed for a 7-room house with bath. The interior finish will be of pine and redwood

with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Meyer Streuther, 516 Alston Way, Berkeley. The cottage will contain five rooms and bath. The interior finish will be of pine throughout. There will be a large open fire place in the living room with a brick mantel. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owners, Peake-Munroe Co., 2625 Shattuck Ave., Berkeley. The dwelling will contain five rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and brick mantels. The exterior of the house will be covered with rustic and shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$3,500. Architect, none. Owners, Peake-Munroe Co., 2625 Shattuck Ave., Berkeley. The dwelling will contain 7 rooms and bath. The interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,500. Architect, Edna Deakin, 3100 Telegraph Ave., Berkeley. Owner, C. L. Huggins. The dwelling has been designed for a seven-room house with bath. There will be pine and redwood interior finish, tile or brick mantels, open fire places and furnace heat. The floors of the principal rooms will be of oak. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,500. Architect, Sydney B. Newsum, Nevada Bank Bldg., S. F. Owner, Dr. Frank Ench. The dwelling has been designed for an 8-room house with bath. A garage will also be erected on the lot. The interior finish of the house will be carried out in pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, J. S. Koford, Oakland Bank of Savings Bldg., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine throughout with some hardwood floors. There will be an open fire place in the living room with a brick

mantel. The exterior of the house will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, none. Owners, Conservative Realty Co., 68 Post St., S. E. The dwelling has been designed for an 8-room house with baths. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with shakes. The plans are in the hands of the owners and they are taking figures for the various parts of the work.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Mark T. Cole, Syndicate Bldg., Oakland. The bungalow will contain six rooms and bath. The interior finish will be of pine throughout. The mantels will be of brick. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,500. Architect, I. W. Button, 594½ Telegraph Ave., Oakland. The dwelling will contain seven rooms and bath. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath. The interior trim will be of pine with oak floors in the principal rooms. The exterior of the dwelling will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Belvedere, Marin Co., Cal.—Residence, 2 story and base, frame, \$7,500. Architect, Paul Grothkop, 523 Sacramento St., S. E. Owners, Belvedere Land Co. The dwelling will be erected on a lot 60x80 feet and will contain eight rooms and baths. The interior finish will be of pine, redwood and hardwood with hardwood floors throughout the first story. There will be furnace heat and open fire places. The mantels will be of brick. There will be considerable tile used in the baths and kitchen. The exterior of the dwelling will be covered with shingles and shiplap. The plans are complete and figures are being taken.

Exeter, Tulare Co., Cal.—Residence, 2 story and base, frame, \$8,000. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner, C. T. Balaban. The dwelling has been designed for a twelve-room house with baths. The interior finish will be of pine and redwood. There will be some oak floors. There will be open fire places with brick mantels. The exterior of the house will be covered with stone and shingles. A garage will be erected on the rear of the lot. The plans are now being prepared.

Oakland, Cal.—Residence, 2 story and base, frame, \$10,000. Architect, E. A. Schumacher, 45 Kearny St., S. E. Owner, C. W. Perkins. The dwelling has been designed for an eight-room house with baths. The interior finish will be of pine and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and

base, frame, \$2,500. Architect, none. Owner, E. R. Eaker, 250 Coronado Ave., Oakland. The dwelling has been designed for a two-room house with bath. The interior finish will be of pine and redwood with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the bungalow will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$1,000. Architect, none. Owners, Drake-Munroe Co., 2077 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Richmond, Contra Costa Co., Cal.—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owner, C. A. Hatwick, Richmond. The dwelling will contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and the mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Burlingame, San Mateo Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, Leo S. Rodgers, 1542 Broadway, Oakland. Owner, Pacific Coast Building Co. The dwelling will contain five rooms, laundry and sleeping porch. The interior finish will be of pine throughout. There will be an open fire place in the living room. The mantel will be of brick. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures are being taken.

SCHOOLS

Niles, Alameda Co., Cal.—School, 1 story and base, frame, \$27,000. Architect, Alfred Griffin, Centerville. Owners' name withheld. The building will contain five class rooms and an assembly hall. There will be furnace heat. The interior will be finished in pine with maple floors. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Santa Ana, Orange Co., Cal.—School, 1 story and base, brick and concrete, \$25,000. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Santa Ana School District. The building will be 14x11½ feet and will contain 8 class rooms, auditorium, principal's offices and teachers' rooms. There will be maple floors and pine trim and a central heating plant. The exterior of the building will be faced with cement plaster. The work has been delayed owing to a question raised over the bonds voted. The issue from which the building is to be constructed provided \$225,000. The sum of \$200,000 will be used in the construction of a polytechnic high school and \$25,000 in the above mentioned work. The same architect is preparing plans for both buildings.

STORES & OFFICE BUILDINGS.

San Francisco.—Stores, 1 story and base, reinforced concrete, \$29,000. Architect, E. P. Antonovich, 333 Kearny St., S. E. Owner, P. A. Hihn. The building will be erected at the corner of Bush and Kearny streets and will cover a large ground area. There will be several stores fronting each of the streets. There will be a cement floor. There will be large display windows with plate glass and hardwood finish. Tile and marble will be used extensively. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Oakland, Cal.—Stores and offices, 10 or 12 story and base, Class A construction. Cost not stated. Architect's name withheld for the present. Owners, Surety Mortgage and Building Co., John Puvert, President, Syndicate Bldg., Oakland. The building will be erected at the corner of 17th and Broadway. The details of the construction cannot be given at this time as no working drawings have been made. As soon as Mr. Puvert returns a more complete account of the work can be published.

Patterson, Stanislaus Co., Cal.—Stores, 1 story and base, frame, \$6,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner's name withheld. The building will be erected on the main street and will contain three stores. There will be large plate glass display windows. The exterior of the building will be covered with cement plaster. The plans are complete and figures are being taken.

Oakland, Cal.—Department store, 4 story and base, Class A construction. Cost not stated. Architect, C. W. Dickey, Oakland. Bank of Savings Bldg., Oakland. Owners, Kahn Bros., Oakland. This work, the excavation for which is now under way, has been mentioned here several times before. Mr. Ziemer, representing Kahn Bros., states that the steel has been awarded to Milliken Bros. and that figures are now being taken for the concrete work. All parts of the work are to be segregated and figures will be called for shortly on other parts of the work.

Seattle, Wash.—Stores and offices, 2 story and base, reinforced concrete. Cost not stated. Architects, Thompson and Thompson, Maynard Bldg., Seattle. Owner, Hans Fedelson. The building will cover an area of 100x120 feet. A concrete floor will be used on the first floor. There will be a large freight and passenger elevator. The building will be heated by steam. The exterior will be faced with cement plaster. The plans are complete and figures will be taken at once.

Los Angeles, Cal.—Stores, 1 story and base, brick. Cost not stated. Architects, Morgan, Walls and Morgan, Story Bldg., L. A. Owner, Van Nuys Estate. The building will be 60x145 feet and has been arranged for one large store and a one smaller store. The interior will be finished in pine and hardwood. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

THEATRES.

San Francisco.—Theatre and stores, 2 story and base, Class A construction, \$70,000. Architect, William H.

Crim, 425 Kearny St., S. F. Owner, Wigwam Theatre Co. This work has been mentioned here a number of times before. The plans have been completed and the architect will take figures on the work at once. The building will have a complete steel frame with the exterior walls faced with cement plaster. There will be a modern system of heating and ventilation. A general contract will probably be let.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING.

(Bids close June 5.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 5th day of June, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of a reinforced concrete building on City property located at the northwesterly corner of Geary street and Presidio avenue, to be used as a car barn, office and substation for the Geary Street Municipal Railway.

(Bids close June 15.)

PAVING.—Sealed proposals, indorsed "Proposals for Concrete Sidewalk on Burwell Avenue," will be received at the bureau of yards and docks, Navy Department, Washington, until 11 o'clock a. m., June 15, 1912, and then and there publicly opened for concrete sidewalk on Burwell avenue, city of Bremerton, Wash. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard, United States, Bremerton, Wash. H. R. STANFORD, chief of bureau.

PROPOSALS FOR WATER SYSTEM.

(Bids close June 20.)

DEPOT QUARTERMASTER'S OFFICE, 1068 North Point street, San Francisco, Cal.—Sealed proposals will be received here until 10 a. m., June 20, 1912, for construction of a water system and lavatory at San Francisco National Cemetery. Information furnished on application, JNO. T. KNIGHT, Depot Quartermaster.

PROPOSALS FOR BUILDING MATERIALS.

(Bids close June 11.)

OFFICE of the Quartermaster, Honolulu, H. T.—Bids will be received until 10 a. m., Friday, June 14, 1912, and then publicly opened, for Flooring, Wire Screening, Mill Work, Roofing and Hardware. Proposed blanks plans and full information can be obtained from the constructing quartermaster, Honolulu, H. T. Envelopes should be marked "Proposals for Building Material, Hawaiian Islands," and addressed to MAJOR H. P. CHEATHAM, Quartermaster, Honolulu, H. T.

PROPOSALS FOR WATER CLOSETS.

(Bids close June 22.)

WATER CLOSETS.—Sealed proposals indorsed "Proposals for Water Closets for Yard Workmen Buildings S2 and 159," will be received at the bureau of yards and docks, Navy De-

BUILDING AND INDUSTRIAL NEWS

partment, Washington, D. C., until 11 o'clock a. m., June 22, 1912, and then and there publicly opened, for water closets for yard workmen buildings S2 and 159, at the navy yard, Puget Sound, Bremerton, Wash. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named, H. R. STANFORD, chief of bureau.

PROPOSALS FOR PIPE LINE.

(Bids close June 12.)

OFFICE of the Constructing Quartermaster, Fort Huachuca, Arizona.—Sealed proposals will be received here until 10 a. m., June 12, 1912, and then publicly opened for the construction complete of an eight-inch steel water pipe line approximately eight and one-half miles long. Deposit of \$10 required to insure return of plans and specification. Information on application, J. L. JORDAN, Capt. and Quartermaster, U. S. A.

PROPOSALS FOR ROADS AND GUTTERS.

(Bids close June 8.)

ROADS AND GUTTERS.—Office of Constructing Quartermaster, Fort Mason, Cal.—Sealed proposals, in triplicate, for constructing extension to road gutters and drains at Fort Winfield Scott, Cal., will be received here until 11 a. m., June 8, 1912, and then opened. Plans, specifications, blank forms, and necessary information can be obtained here. Deposit of \$10 required to insure return of plans, etc. Envelopes containing proposals to be marked "Proposals for Roads, Etc., Fort Winfield Scott, Cal.," and addressed to Lieutenant Colonel GEO. M. K. WILLIAMSON, deputy quartermaster general, U. S. A.

PROPOSALS FOR CANAL SUPPLIES.

(Bids close June 10.)

CANAL SUPPLIES.—Office of Proposals for Structural Steel, Iron, etc., Wrought Pipe, Cast Iron Pipe, Sheet Lead, Concrete, Glassware, Mess Kit Cups, Cash Tank, Bakery Sheets, Trusspans, Fish Hooks, and Water Towels.—Sealed proposals will be received at the office of the general purchasing officer, 1818 Union Canal Commission, Washington, D. C., until 10:30 a. m., June 10, 1912, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 712) may be obtained from this office or the offices of the assistant purchasing agent, 1904 North Point street, San Francisco, Cal., also from the U. S. engineering offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; P. O. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR COMPOSITION FLOORS.

(Bids close June 3.)

OFFICE of the Constructing Quartermaster, Fort McDowell, Calif.—Sealed proposals, in triplicate, will be received here until 11:30 a. m., June 3, 1912, for finished floors in Hospital building at this post. The United States reserves the right to reject any or all bids. Information and proposal blanks furnished on application. Envelopes containing proposals should be indorsed "Proposals for Finished Floors" addressed to Capt EDWIN

BELL, Constructing Quartermaster, (Telephone, Sutter 2780.)

PROPOSALS FOR BUILDING.

(Bids close June 11.)

OFFICE of the Constructing Quartermaster, Honolulu, H. T.—Sealed proposals, in triplicate, will be received in this office until 12 o'clock m., June 11, 1912, and then be opened for construction, including plumbing, electric wiring and fixtures, of an addition to hospital building at Fort Shafter, Honolulu, H. T. Plans and specifications can be seen and full information obtained either at this office or at the office of the Constructing Quartermaster, Fort Mason, San Francisco, Cal. Bids will be opened only in the office of the Constructing Quartermaster, Honolulu, H. T. FRANK B. EDWARDS, Constructing Q. M.

PROPOSALS FOR SEWERS.

(Bids close June 3.)

PURSUANT to Statute and to Resolution No. 718, adopted May 20th, 1912, by the Board of Trustees of the City of Fresno, directing this notice, the undersigned invites and will receive at his office in the City Hall, up to 5 o'clock p. m., of the 3rd day of June, A. D. 1912, sealed proposals or bids for the following street work to be done, according to the specifications for said work posted and on file in the office of the City Clerk of said City, or as contained in its Resolution of Intention No. 826, to wit:

That a six-inch sewer be constructed from a manhole on Abby street, opposite the alley in block 10, Belmont addition, through the center of the alley in said block 10, to a point within ten feet of the east line of said block 10, with a four-inch or six-inch Y at each twenty-five feet frontage on said block, on said alley, the four-inch branch to be capped with an earthen cap; a six-inch inspection hole to be constructed at the upper end of the sewer, equipped with a cast-iron cover, as provided for in the specifications; the cap of the inspection hole to be even with the grade of the alley. Together with brick manholes and all other necessary appurtenances.

PROPOSALS FOR SEWERS.

(Bids close June 3.)

PURSUANT to Statute and to Resolution No. 721, adopted May 20th, 1912, by the Board of Trustees of the City of Fresno, directing this notice, the undersigned invites and will receive at his office in the City Hall, up to 5 o'clock p. m., of the 3rd day of June, A. D. 1912, sealed proposals or bids for the following street work to be done, according to the specifications for said work posted and on file in the office of the City Clerk of said City, or as contained in its Resolution of Intention No. 829, to wit:

That an 8-inch vitrified ironstone pipe sewer be constructed from a manhole on Angus street opposite the alley in Roselawn addition to Fresno on file and of record in the office of the County Recorder of the County of Fresno, State of California, thence northerly along the center of Angus street, to a point opposite the center of the alley in the Monroe tract, as per plat of said tract on file and of record in the office of the County Recorder of the County of Fresno, State of California. That an 8-inch vitrified ironstone

pipe sewer be constructed from a point in the center of Grant avenue, where the same is intersected by the above described 8-inch sewer line; thence easterly along the center of said Grant avenue, to the center of Orchard street; thence northerly, along the center of said Orchard street to a point opposite the center of the alley in block 1 of Bartlett Heights, as per

plat of Bartlett Heights, adjoining the Town of Fresno, on the one end and in the office of the County Recorder of the County of Fresno, State of California. And one other 8-inch sewer together with 3 and 6 inch sewers of similar construction, all with brick manholes and other appurtenances.

Items desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the (ore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—2 story and base, frame, \$35,000. San Francisco. Architects, Welsh & Carey, Western Metropolitan Bank Bldg., S. F. Owner, Sewell Oliver. The building will cover a considerable ground area and will be erected on a corner lot. There will be about 15 rooms which will be arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat and wall beds. The interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, J. H. Myers, 414 Woodward Ave., S. F. The building has been arranged for twelve-two and three room apartments and will cover an area of 41x65 feet. The interior finish will be of pine throughout. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

Theatre and Store—2 story and base, Class A construction, \$70,000. San Francisco. Architect, William H. Crim, 125 Kearny St., S. F. Owners, Wigwam Theatre Co. This work has been mentioned here a number of times before. The plans have been completed and the architect will take figures on the work at once. The building will have a complete steel frame with the exterior walls faced with cement plaster. There will be a modern system of heating and ventilation. A general contract will probably be let.

Residence—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, J. K. Karn, 41814 24th St., S. F. The dwelling will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places with tile or brick mantels. The exterior of the house will be covered with shiplap. The plans are complete and in the hands of the owner. The work will be done by Day Labor.

Residence—2 story, attic and basement, frame, \$11,500. San Francisco. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owners, S. A. Born Bldg. Co. The building will be similar in the main to two other houses now being erected by the same company from plans by Architects McNally & McCaw. There will be in the neighborhood of twelve rooms and three baths. The interior will be finished in pine and hardwoods. There will be furnace heat and open

fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. As soon as the plans are complete the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. San Francisco. Architect, H. G. Noepf, 150 Broderick St., S. F. Owner, F. W. Lemmerman. The dwelling has been designed for a six-room house with bath. The interior finish will be largely of pine. There will be open fire places with tile or brick mantels. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Residences—16, 2 story and base, frame, \$75,000. San Francisco. Architects, Ross & Bergren, 310 California St., S. F. Owners, Greenwich Terrace Homeholders' Association. The association has recently purchased the entire corner of Greenwich and Leavenworth streets and will erect thereon a number of terrace dwellings. The dwellings will be built around an open court and have been designed in the Spanish style. There will be a central heating plant for the entire group. The exteriors of the houses will be covered with cement plaster on metal lath. The interiors will be handsomely finished in pine, redwood and hardwoods. The architects are now preparing the working drawings.

Residences—1, 2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, Louis Hellmann, 1234 Jones St., S. F. Each of the houses has been designed for an eight-room dwelling with bath. The interior trim will be of pine and redwood with some hardwood floors. There will be open fire places and brick mantels. The exteriors of the houses will be covered with cement plaster on metal lath and brick veneer. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. San Francisco. Architect, Thomas M. Edwards, 45 Kearny St., S. F. Owner's name withheld. The dwelling will contain five rooms and bath. The interior will be finished in pine with some hardwood floors. There will be furnace heat and open fire places. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$1,000. San Francisco. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for a six-room house

ished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Bungalows—1, 1½ story and base, frame, \$2,000 each. San Francisco. Architect, none. Owners, MacArthur Bros., 1564 Bell St., S. F. Each of the bungalows will contain six rooms and bath. The interiors will be finished in pine and redwood. There will be open fire places and tile or brick mantels. The exteriors of the bungalows will be covered with shingles and shiplap. The plans are complete and the work will be done by Day Labor.

Church—Class A construction, \$100,000. San Francisco. Architect, John J. Foley, Monahan Bldg., S. F. Owners, St. Joseph's Church. This building has been mentioned here before when the plans were being prepared. The architect is now taking figures on several parts of the work and separate contracts will be shortly be awarded. There will be a complete steel frame with exterior walls of either stone or terra cotta. The interior finish will be of oak and ornamental plaster.

Flats and Store—2 story and base, frame, \$4,000. San Francisco. Architect, Rudolph Patcha, Foxcroft Bldg., S. F. Owner, C. Shawl. The building will contain a store on the first floor and two flats above. The interior trim will be of pine. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Oscar W. Thunberg, 678 9th Ave., S. F. The building will be 25x62 feet and will contain two modern flats of five and six rooms each. The interior finish will be of pine throughout. There will be some hardwood floors. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Henry Scholten, Oakland. The building will cover an area of 30x60 feet and will contain six small flats of four and five rooms each with bath. The interior trim will be entirely of pine. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Flats and Store—2 story and base, frame, \$3,000. San Francisco. Architect, C. Fontana, 4 Columbus Ave., S. F. Owner, Camillo Colombo-Bar. The building will be 22x28 feet. There will be a store on the first floor and living apartments on the second floor. The finish throughout will be of pine. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Flats—3 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Henry Ratto, 41 Bondall Place, S. F. The building will be 25x52 feet and will contain three flats of five and six rooms and bath each. The interior finish will be of pine and redwood.

There will be gas grates. The exterior of the building will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Plats—2 story and base, frame, \$11,000. San Francisco. Architect, none. Owner, Leopold Lavayesse, 101 Pacific St., S. F. The building has been designed to contain four small flats of four and five rooms each and bath. The interior finish will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap and rustic. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

Hotel—2 story and base, brick, \$10,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolitan Bank Bldg., S. F. Owner, W. H. Torrey. The building will be arranged for an office and several rooms on the first floor and about sixteen rooms and two baths on the upper floor. The trim will be of pine throughout. The exterior of the building will be faced with stock brick. Plans for the work are now out for figures.

Hotel and Stores—3 story and base, brick, \$20,000. San Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owner, J. E. Walsh. The building has been designed for several stores on the first floor and about fifty rooms on the upper floors. There will be four bath rooms. The interior trim will be of pine throughout. The exterior of the building will be faced with pressed brick. The plans are now complete and in the hands of the contractors for figures.

Hotel Addition—3 story, brick, \$10,000. San Francisco. Architect, C. A. Meussdorfer, Humboldt Bank Bldg., S. F. Owner, William Dooly. The work will consist of the addition of three stories to the present one-story building. The first floor is now occupied by stores. The addition will contain in the neighborhood of sixty rooms and a number of baths. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans for the work will be completed at once.

Car Barns—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, City Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. The plans for a car barn and quarters for the men, which is to be used in connection with the Geary Street Municipal Road are now complete and figures are being taken by the Board of Public Works. There are two methods of treatment under consideration. Bids will be opened on June 5th.

Stores—1 story and base, reinforced concrete, \$20,000. San Francisco. Architect, E. P. Antonovich, 333 Kearny St., S. F. Owner, P. A. Hahn. The building will be erected at the corner of Bush and Kearny streets and will cover a large ground area. There will be several stores facing each of the streets. There will be a cement floor. There will be large display windows with plate glass and hardwood muntins. Tile and marble will be used extensively. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Hotel—2 story and base, brick. Cost

not stated. San Fernando, Los Angeles Co., Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owners, Mission Land Co. The building will be 200x125 feet, and will contain a bank, hotel office, dining room and 12 stores on the first floor. The second floor will be subdivided into 66 guest rooms and 20 baths. The interior of the bank will be finished in marble, hardwood and plate glass. The hotel dining room, office and lobby will also be handsomely finished. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

The interior finish will be of pine throughout with some hardwood floors. There will be an open fire place in the living room with a brick mantel. The exterior of the house will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, cost not stated. Oakland, Cal. Architect, none. Owners, Conservative Realty Co., 68 Post St., S. F. The dwelling has been designed for an eight-room house with baths. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with shingles. The plans are in the hands of the owners and they are taking figures for the various parts of the work.

Bungalow—1 story and base, frame, \$2,000. Alameda, Alameda Co., Cal. Architect, none. Owner, Mark T. Cole, Syndicate Bldg., Oakland. The bungalow will contain six rooms and bath. The interior finish will be of pine throughout. There will be a large open fire place in the living room. The mantel will be of brick. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,500. Oakland, Cal. Architect, none. Owner, I. W. Button, 5915 Telegraph Ave., Oakland. The dwelling will contain seven rooms and bath. There will be furnace heat. The interior trim will be of pine with oak floors in the principal rooms. The exterior of the dwelling will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Apartment House—2 story and base, frame, \$10,000. Oakland, Cal. Architect, none. Owner, Raymond J. O'Connell, 411 Dana St., Oakland. The building has been designed to contain eight three-room apartments with baths. There will be wall beds and hot water heat. The interior trim will be of pine with some hardwood floors. The exterior of the building will be covered with rustic and shiplap. The plans are in the hands of the owner and he is now taking figures on the various parts of the work.

Apartment House—2 story and base, frame, \$12,000. Oakland, Cal. Architect, O. M. Bullock, 1420 Broadway, Oakland. Owner, same. The building will contain 35 rooms arranged in 15 two and three room apartments with connecting baths. The interior finish will be of pine. There will be wall beds and open fire places. The mantels will be of tile. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$10,000. Oakland, Cal. Architect, E. A. Schumacher, 15 Kearny St., S. F. Owner, C. W. Perkins. The dwelling has been designed for an eight-room house with baths. The interior finish will be of pine and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. The work will be done in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, E. R. Baker, 250 Coronado Ave., Oakland. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine and redwood with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the bungalow will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Prake-Munroe Co., 2025 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine and redwood with some hardwood floors.

There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Hotel Work—1 story and base, frame, \$35,000. Berkeley, Alameda Co., Cal. Architect, J. Cather Newson, Monachuel Bldg., S. F. Owners, Berkeley Inn Co. This work has been mentioned here before. The building is now well under construction and the architect is taking figures for all parts of the work except the carpentry and brick work.

Passenger Station—Concrete and frame, \$9,000. Berkeley, Alameda Co., Cal. Owners, Berkeley Improvement Co., Shattuck Ave. and Addison Way, Berkeley. The work will be done in the Northbrae District. The design for the building is in the Mission style. The roof will be of clay tile. There will be a fountain in the yard. The plans for the work are complete and figures are being taken.

School—1 story and base, frame, \$25,000. Niles, Alameda Co., Cal. Architect, Alfred Griffin, Centerville. Owner's name withheld. The building will contain two class rooms and an assembly hall. There will be furnace heat. The interior will be finished in pine with maple floors. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Stores and Offices—10 or 12 story and base, Class A construction. Cost not stated. Oakland, Cal. Architect's name withheld for the present. Owners Surety Mortgage and Building Co., John Pavert, President, Syndicate Bldg., Oakland. The building will be erected at the corner of 17th and Broadway. The details of the construction cannot be given at this time as no working drawings have been made. As soon as Mr. Pavert returns a more complete account of the work will be published.

Department Store—1 story and base, Class A construction. Cost not stated. Oakland, Cal. Architect, T. W. Ducky. Oakland Bank of Savings Bldg., Oakland. Owners, Kahn Bros., Oakland. This work, the excavation for which is now under way, has been mentioned here several times before. Mr. Ziemer, representing Kahn Bros., states that the steel has been awarded to Miliken Bros., and that figures are now being taken for the concrete work. All parts of the work are to be segregated, and figures will be called for shortly on other parts of the work.

May, 1912	1,000.00

It is not so important during a political campaign to be a poster, it is essential to be elected and the best way of doing this is to present the voters with a carefully considered and well thought out programme of three guinea pig trials.

Dr. Robert C. D. H. Burnham, the author of *China and City-Planer Leads*, is a leader of the new awakening and is a student of the traditional lines thus combined. He arrived during the last year of the second decade. Before the 1911 revolution, but little or no attention was given to architectural setting or planning in China and prior to that time was limited to an opportunity to express his ideas or to become a faithful slave of constructing a building according to beauty and architectural harmony and proportion. Since 1911, there have been rapid strides toward their realization.

200 world-wide advances have there been in such things as these lines that in the world-wide competition that has been held, system plans have been made for a federal city in the commonwealth of Australia that the first prize has not been awarded to Australia, Germany, an architect of

in the interests of the world people. And completing the fact that the only practical realization of the concept of a community started by the community in Moscow in 1923 is the creation of an American architect in this competition is a notable event.

Jan. 1, 1912, should mark the beginning of some active work on the exposition. As it is nothing of note so far as the public knows is being done further than some work on filling in a part of the basin at North Beach. It would be a good thing if the Board of Directors had a publicity committee that would give out to stockholders and the public generally a statement of what was being done each month. When a fellow subscribes for stock he parts with an roll of his money but if he gets a report of just what is being done all the time he feels that he at least is getting a fair shake.

Half of 1912 is already gone. Two years and a half yet remain till 1915. In that time all of the work must be done and the fair completely built. No big exposition has ever been completed on time. It looks like the San Francisco Exposition will be no exception to the rule.

Primitive Dwelling Of Mankind. Clay As A Building Material Used From Earliest Times.

It is human nature to be interested in the homes of our fellow men, for a man's character may be judged largely by his home and surroundings and the degree of civilization of a country can readily be judged by its homes and its inhabitants' modes of living.

The earliest human habitation was a cave; next came a rude hut of boughs, then came a more pretentious wooden structure and later a system of molding clay into brick and baking them in the sun's rays was devised and the result was the first fireproof home.

Throughout the ages brick in various forms has been used and while the earlier varieties were sun-baked, brick made in Nineveh in Bible days, were frequently burned in a kiln. They were about 13 inches square by 3 inches thick, some being in triangular shapes for corners of walls and others wedge-shaped for arches. They were variously colored, mostly red, yellow, and blue though green, black and white brick were not uncommon. The preservation of these early-day brick for over 3,000 years is probably due to the warm, dry atmosphere of Egypt, Assyria and Babylonia, rather than to the perfection attained in their manufacture, though the ancients devoted much time to the perfection of the art of brick and pottery manufacturing.

In Mexico, Southern California, New Mexico and Texas are to be found many examples of homes built of adobe brick. These brick are usually about 14x9x2 1/2 inches made on the building site or not far away. The earth is dug out and put in pits, where it is wet and thoroughly mixed by the bare feet of the laborers. Straw and other fibers are added and the mixture is pressed into wooden moulds, which have first been dipped into water, and the top is made smooth with the hand. After being dried in the sun the brick are then stacked up loosely where they continue to dry and harden until ready for use. When they are thoroughly dry, they are hard and smooth and "ring" when struck almost like a burned brick. These brick are successfully used in dry and sunless countries, but should a heavy rain occur while they are in process of making, in a few moments they become reduced to the original state of mud. After being thoroughly dried and placed in the wall, they will withstand a considerable amount of rain without injury and they may easily be repaired by applying more mud. The walls are made one or two feet thick, the adobe brick being laid up with soft-mud or mortar, carried to the masons on the tender's head in a hod that looks very much like a wooden chopping bowl.

When finished the walls are plastered both inside and out with lime plaster. The first coat is thrown on the rough wall with a trowel, which leaves the surface very rough, the second coat is troweled on and made as smooth as we make our hard finish. The Mexicans are good plasterers and some of their cornice decorations

are exceedingly artistic. All partitions are made of adobe and are not less than 12 inches in thickness. The dirt on the floor is leveled off and in the case of the poor man's home, affords the only flooring. In the houses of the better class, concrete floors are laid, which are frequently covered with glazed tile 8 or 10 inches square. Owing to frequent earthquake shocks, the ceilings in Mexico are not plastered, but are covered with canvas, put up in a manner which leaves it free from wrinkles. In the ceiling round brass plates about 3 inches in diameter are inserted in the canvas to provide ventilation and prevent the rotting of the joists. These ceilings are painted and often decorated beautifully, the native painters using considerable taste in their work.

The Mexican home has no chimney and the poor people do their cooking on the dirt floors of their houses, using a charcoal fire in a small vessel. The smoke is allowed to escape as it will and as a consequence, the plaster over the doors and windows is usually black. The better class have small square stoves made of brick. There are holes in the masonry to hold the charcoal but no chimney is provided. The Mexican houses of the poorer class have no windows, a wide door being the only means of ingress and egress and at night the entire family, including the dogs and frequently the goats and huts, sleep in the one room, one can well imagine the state of the atmosphere with the door closed to keep out intruders.

The houses of the better class are constructed around a central patio, or court, which is open to the sky and frequently contains flowers and fountains and serves as an open air living room. The rooms open into this court and a roof projects over the patio far enough to make a covered passageway all around. All houses are built facing directly on the walk and have no front or back yards. Double doors and double French windows are the only kind used and the windows are all heavily barred owing to the frequent insurrections and uprisings in that country. The door keys are of immense size and are inserted upside down, at least it seems so to an American. In the Mexican cities many fine residences other than the kind described, are occupied by Americans and Europeans.

There are in existence in Utah some interesting specimens of old adobe buildings. Fantastic hierarchies adorn the buildings, which without doubt were full of significance to the early dwellers in that region. In direct contrast to these is the splendid brick high school building at Tacoma, Wash., a type of the school buildings which are being erected throughout the country, showing the decidedly progressive spirit of the age.

Since Panama is very much before the public eye at the present time it is interesting to note the primitive type of residence common there in the jun-

gles. It is built of crude sun-dried brick, laid upon tier, with a strip of wattling between, made of sticks and twigs. The roof is of thatch tied on with withes of swamp grass. In the old Spanish settlements, instead of brick a lathe-work of adobe plaster-coated is a common method of wall construction.

By far the most interesting specimens of fireproof dwellings in America today are the remains of the cliff dwellers found in Colorado and Northwest Mexico. These homes, formerly inhabited by men and women of whom very little is known, are seemingly cut out of the solid rock, rising row upon row, perched on the side of a canyon hundreds of feet from the bottom, with a narrow ledge in front. The rooms are low, separated by walls of rough stones plastered with mud and TWO B & I NEWS 5-30 HOYT

there are no windows. Access from the outer world is by steps cut in the steep face of the cliff.

The civilized white man of today has become a "cliff-dweller" in very truth and rears buildings almost touching the clouds in order to live within convenient distance to his business centers. The modern apartment house, which is "the last word" in building construction, with its elevators, telephones, electric lights, vacuum cleaners, and other luxurious conveniences, is a far cry from the honey-combed cliffs of Colorado, which afforded a rude shelter and however humble, was still a home, no doubt as dear to the heart of its occupant, as the marble palaces occupied by our multi-millionaires.

On another page of today's issue will be found a half-tone illustration of what is known as Scheme B for the construction of the City Hall on the Civic Center. Under this scheme the City Hall will be located on Van Ness avenue with an open square or park on the old site with the public library and auditorium and other buildings grouped around the center. This plan provides for the City Hall front on the broad avenue and a broad vista from Market street looking on the open square to the public buildings.

There is no question as to merit of the plan. Not only is it better from an artistic standpoint but it possesses better ground for building foundation and the building itself will form protection to the square against the west winds.

If the plans for the building on Scheme A can be super-imposed on the plan of Scheme B the substitution of Scheme B for Scheme A will be fair to the competing architects. If not it will not be fair for those who have already gone to the expense and labor of preparing plans for the competition. It is presumed that the architectural commission have considered this and that any change that will be made will be absolutely fair to all concerned.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "SPECIAL ADVERTISEMENTS" in the last part of our news department.

—APARTMENT HOUSES—

San Francisco—Apartment house, 3 story and base, brick and steel, cost not stated. Architects, MacDonald & Applearth, 1114 Bldg., S. F. Owner, Charles Crocker. This work has been mentioned here before when the plans were first being prepared. The building will cover an area of 75x123 feet. The first floor will contain five stores and the entrance to the apartments. The upper floors will be arranged in 62 apartments of two and three rooms each with connecting bath. There will be steam heat, elevator service, wall tele and other conveniences. The exterior of the building will be faced with cement plaster. The architects are now taking figures on the work.

Los Angeles, Cal.—Apartment house, 2 story and base, frame, cost not stated. Architects, Noonan & Kisor, Wright and Callender Bldg., L. A. Owner, Mrs. L. Barton Brown. The building will be 50x100 feet. The interior will be arranged for suites of two and three rooms each with baths. There will be wall tele and steam heat. The exterior of the building will be faced with cement plaster on metal lath. The architects are preparing the plans.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and steel, cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, A. Anderson. The building will cover a site 70 feet square. There will be four stories on the first floor and 42 rooms and 16 baths on the upper floors. There will be wall tele and private gas water heaters. The interior of the building will be finished in pine with some hardwood floors. The exterior will be faced with pressed brick. The architects are completing the working drawings.

Contracts Awarded.

San Francisco—Apartment house, 3 story and base, brick and steel, \$90,000. Architects, Reid Bros., Call Bldg., S. F. Owner, Mrs. Emma C. Butler. Contractors, Stockholm & Allen, Mainadreck Bldg., S. F. Contract price, \$90,000.

—BANKS—

Greenville, Plumas Co., Cal.—Bank and lodge rooms, 2 story and base, reinforced concrete, \$15,000. Architect, J. B. Ogden, Macdonough Ave., Richmond. Owners, Indian Valley Bank. This work was mentioned here last week. The plans have now been completed and the architect is taking figures on the work. The interior of the banking rooms will be finished in oak and marble. There will be a Mason hall on the upper floor. The exterior of the building will be faced with cement plaster.

BRIDGES AND DAMS.

Port Townsend, Wash.—Tie pile and concrete construction, \$60,000. Engineers, Engineering Dept., Standard Oil Co., Sheldon Bldg., S. F. Owners,

Standard Oil Co. The company has purchased property on the waterfront and will start construction of a wharf and other structures. The plans are now being prepared.

CHURCHES

San Francisco—Church, brick and steel, \$100,000. Architects, S. C. & L. French, 204 Montgomery St., S. F. Owner, Mission Home, Richmond Bldg., S. F. The new edifice will be erected at the corner of Broadway and Dubois streets. The present old Mission will be preserved in its entirety. The new building will have a complete steel frame and exterior walls of stone or brick. The interior will be finished in oak and ornamental plaster. The main auditorium will have a seating capacity of 900 people. The architects are completing the working drawings and have awarded a contract for the excavating.

Oakland, Cal.—Church, steel and brick construction, \$100,000. Architect, Norman T. Maier, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. The building, base line mentioned here several times before when the architect was first commissioned to prepare the plans. The working drawings have now been placed in the hands of the Commission of the Building Committee, M. Maier, Oakland Bldg. are now being taken from six or seven San Francisco and Oakland contractors and a final contract will be let shortly.

Los Angeles, Santa Clara Co., Cal.—In addition to some construction \$8000. Architect, W. L. McCall, Central Bank Bldg., Oakland. Owners, Los Angeles Methodist Church. The addition will contain a guild hall, Sunday school rooms, parlor, library and study. The exterior of the building will be covered with rubble. The plans are complete and figures are being taken by the architect.

FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Factory, 1 story and base, reinforced concrete, cost not stated. Architect, E. Petersen, 55 Bergstrom, Security Bldg., L. A. Owners, Ford Motor Co., B. L. Hayes. Los Angeles, representatives. The work has been mentioned here before when the architects were first commissioned to prepare the plans. The building will be 170x220 feet. The construction will be free pressed brick with metal doors and 8x8x16 beams. There will be both freight and passenger elevators. The exterior of the building will be faced with cement plaster. The working drawings will be completed within four or five days.

FLATS.

San Francisco—Flat, 1 and 2 story and base, frame, \$1,000 each. Architects, none. Owners, C. J. and W. J. Koenig, 700 West St. Each of the buildings will be 28x75 feet and will contain two flats of five and six rooms each.

Each \$1,000 will be finished in pine and redwood with some hardwood floors. There will be open fire places, water tank and tile mantels. The exterior of the buildings will be covered with shingle and rustle. The plans are in the hands of the owners and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame, \$2,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mr. Strieder. The building will contain a number of large residence flats with garages in the basement. The interior finish will be of oak redwood and hardwood with oak floors in the principal rooms. There will be a central heating plant. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Flats, 2 story and base, frame, \$2,000. Architect, none. Owner, S. J. Johnson, 3201 West St., Oakland. The building will contain nine rooms arranged in two flats, one of four and one of five rooms and bath each. The interior finish will be of pine and redwood. There will be open fire places with the mantels. The exterior of the building will be covered with rustic and shingle. The plans are complete and the work will be done by Day Labor.

GOVERNMENT WORK AND SUPPLIES.

The Secretary of the Interior has awarded a contract to Bartlett & Kling, of Cedar Rapids, Iowa, whose bid of \$461,375 was the lowest received by the Reclamation Service for the construction of an earth dam and auxiliary works on the North Platte irrigation project, Nebraska. The works involves the handling of about 810,000 cubic yards of material and the placing of 250,000 pounds of reinforcing steel. The contract calls for completion of the work within two years after signing.

Bids were received by the Commissioner of Indian Affairs, Washington, D. C., on May 15th for the erection of a frame school house and frame quarters and installation of water and sewer extension at the Tohatch Indian School as follows:

Good—Harvard Co., Chicago, Ill., water and sewer system, \$1,115; school house, \$9,000; employees quarters, including the \$5,800, without fuel, \$5,800; time, 210 days.

M. M. Smith, First Los Vegas, N. M., school house, \$11,488, using concrete foundations \$11,748, omitting heating system \$10,258; employees quarters, \$5,000; with concrete foundation, \$9,112.50, omitting heating system, \$8,599; quarters reduced to 12x25, \$8,222; water and sewer system, \$1,581.50. Will accept all or none on the building, time, 120 days.

W. D. Ladd, Minneapolis, Minn., water and sewer system, \$1,500; employees quarters, \$5,000; school house, \$9,200; for heating plant in employees quarters add \$400; for heating plant by school house add \$1,200.

Gallop Lumber Co., Gallup, N. M., sewer system, \$1,150; school house with stone foundation, \$10,920; school house with concrete foundation, \$2,500; heating for school house, \$1,200; employees quarters with stone foundation, \$9,212. With concrete foundation, \$9,712; building reduced in size 42x85

delict \$870, heating for employees quarters, \$910, time, 120 days.

T. W. Hall, Farmington, N. M. water and sewer system, \$13,250, school, including heating plant, \$10,200, without heating plant, \$9,950, using stone foundations, \$8,695; employees quarters, including heating plant, \$6,540; without heating plant, \$5,987; using stone foundations, \$5,787.

Carter & Young, Lawrence, Kan., school house, \$9,600, heating plant add \$1,600, employees quarters, \$8,800; heating plant add \$800, water and sewer system, \$2,000.

HALLS & SOCIETY BLDGS

Fresno, Fresno Co., Cal.—Lodge hall, 4 story and base, brick, \$10,000, Architect Henry Starbuck, Fresno. Owners, Woodmen of the World. This building was described in last week's issue of the Building and Industrial News, at which time it was stated the plans would be out for figures by June 1st. Plans and specifications may be obtained from the architect.

Contracts Awarded.

Seattle, Wash.—Association building, 3 story and base, Class A construction. Cost not stated. Architect's name not given. Owners, Young Women's Christian Association. Contractor, M. J. Whitson, Henry Bldg., Seattle. Contract price not given. Note: This contract has been taken on the percentage basis.

HOSPITALS.

Santa Barbara, Santa Barbara Co., Cal.—Hospital, 2 story and base, reinforced concrete, \$75,000. Architect, E. Russell Ray, Howard-Candlish Bldg., Santa Barbara. Owners, Cottage Hospital Association. This work has been mentioned here a number of times before. The Building Committee has approved the final plans and the architect has been instructed to secure figures for the construction.

Los Angeles, Cal.—Hospital group, reinforced concrete buildings. Cost not stated. Architect is Hunt & Burns, Laughlin Bldg., L. A. Owners, Children's Hospital. The plans for four of the main buildings of this group have been completed and will be placed in the hands of the contractors by June very shortly. The construction of all the buildings with the exception of the Nurses' Home will be of reinforced concrete. The administration building, main ward building and the power house will be erected first.

HOTELS.

San Francisco—Hotel addition, 3 story, brick construction, \$20,000. Architect, C. A. Meussdorff, Humboldt Bank Bldg., S. F. Owner, William Dooley. This work has been mentioned here a number of times before. The addition will contain in the neighborhood of sixty rooms. There will be a story on the first floor. The building will have steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

San Francisco—Hotel, 5 story and base, brick and steel, \$35,000. Architect, D. C. Coleman, Western Metropolitan Bank Bldg., S. F. Owners, Thomas F. Egan and A. Mellett, 1027 Fell

St., S. F. The building will be erected on a corner lot. There will be several stories on the first floor and in the neighborhood of 100 rooms and baths on the upper floors. There will be steam heat and elevator service. The interior will be finished in redwood. The exterior of the building will be faced with pressed brick. The plans are complete and steel is being placed. The work will be carried on under the superintendence of William Helbing.

San Francisco—Hotel, 6 story and base, reinforced concrete. Cost not stated. Architect, Ralph Warner Hurt, Humboldt Bank Bldg., S. F. Owner, Mrs. Stanwood. The building will cover an area of 20x60 feet. There will be one store on the first floor and 10 rooms and three baths to the floor above. There will be an electric elevator and steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

San Francisco—Hotel, 9 story and base, reinforced concrete, \$100,000. Architects, Macdonald & Applegarth, Call Bldg., S. F. Owner, W. F. Nelson. The building will be erected on a corner lot. The first floor will contain stores. The upper floors will be subdivided for hotel purposes and will contain about 200 rooms, a large percentage of which will have connecting baths. There will be steam heat and elevator service. The interior finish will be of pine and hardwoods. The exterior of the building will be faced with cement plaster. The work has been mentioned here before. The plans are complete and figures are being taken.

Richmond, Contra Costa Co., Cal.—Hotel and stores, 2 story and base, brick and steel, \$30,000. Architect, C. O. Hansen, Phelan Bldg., S. F. Owner, Ralph Tcherassy. The building will be erected on a triangular site having two street frontages. The lot is 118x26x100 feet. The basement will be used for a bowling alley and billiard hall. There will be a moving picture theatre and several stores on the first floor. The upper floor will be arranged for 32 rooms with several baths. There will be hot and cold running water in all rooms. The interior will be finished in pine. The exterior walls will be faced with pressed brick. The architect is now preparing the plans.

Sacramento, Sacramento Co., Cal.—Hotel, 6 story and base, Class A construction, \$300,000. Architect, E. C. Himmings, Sacramento. Cost not stated. The new structure will be located at the southwest corner of 5th and J streets and will cover an area of 80x150 feet. There will be seven stories besides the hotel office, lobby and dining room on the first floor. The upper five floors will be subdivided into 225 rooms and 120 baths. The basement will be fitted up for a barber shop, cafe, billiard room and will also contain the mechanical equipment. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The interior will be handsomely finished. The exterior will be faced with pressed brick and terra cotta. The owners are understood to be a company of Sacramento capitalists with one of the largest banks in the city behind the enterprise. The architect has started the working drawings and construction will probably be undertaken this fall.

Ocean Park, Los Angeles Co., Cal.—

Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, George W. Fox. The building will be 35x112 feet. There will be two stores and a barber shop on the first floor besides the main lobby and office of the hotel. The upper floors will contain 60 rooms with private baths. There will be steam heat, elevators and a vacuum cleaning system. The interior will be handsomely finished in hardwoods and marble. The exterior will be faced with enameled brick. The architect has completed the plans and is now taking figures on the work.

RESIDENCES.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$1,500. Architect H. C. Kidder, 2025 Addison St., Berkeley. Owner, Mrs. Dungan. The dwelling will contain seven rooms, sleeping porch, laundry and bath. The interior finish will be of pine with some elm panels and oak floors. There will be hot water heating. The mantels will be of tile. Tile will also be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, E. W. Kindlespire. The dwelling will contain eight rooms, two baths and a sleeping porch. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. A garage will be erected on the rear of the lot. The plans are complete and figures are being taken by the architect.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,000. Architect, name. Owner, John T. Smith, Palace Hotel, S. F. The dwelling will contain seven rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shiplap and rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, John Carson, Carson Bldg., Oakland. Owner, E. J. Lloyd. The dwelling has been designed for a seven-room house. The interior finish will be of pine with some oak floors. There will be furnace heat, which will be included in a separate contract. The living room and den will have open fire places with tile mantels. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architects, William C. Cullett & Son, Phelan Bldg., S. F. Owner, Mrs. Jeanette Jost. The dwelling has been designed for an eight-room house with sleeping porches, baths, and laundry. The interior will be finished in pine and redwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the

bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. HOGGS, major, corps engineers, U. S. A., general purchasing officer.

Firms dealing, news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will hold all such items, commencing on this page, and carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—5 story and base, brick and steel. Cost not stated. San Francisco, Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Charles Crocker. This work has been mentioned here before when the plans were first being prepared. The building will cover an area of 75x124 feet. The first floor will contain five stores and the entrance to the apartments. The upper floors will be arranged in 62 apartments of two and three rooms each with connecting baths. There will be steam heat, elevator service, wall beds and other modern conveniences. The exterior of the building will be faced with cement plaster. The architects are now taking figures on the work.

Flms—1, 2 story and base, frame, \$1,000 each. San Francisco, Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St. Each of the buildings will be 25x57 feet and will contain two flats of five and six rooms each. The interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places with brick and tile mantels. The exteriors of the buildings will be covered with shiplap and rustic. The plans are in the hands of the owners and the work will be done by Day Labor.

Church—Class A construction, \$150,000. San Francisco, Architects, Shea & Lofquist, 550 Montgomery St., S. F. Owner, Mission Dolores Roman Catholic Church. The new edifice will be erected at the corner of 16th and Dolores streets. The present old historic Mission will be preserved in its entirety. The new building will have a complete steel frame and exterior walls of stone or brick. The interior will be finished in oak and ornamental plaster. The main auditorium will have a seating capacity of 800 people. The architects are completing the working drawings and have awarded a contract for the excavating.

Flat—2 story, attic and base, frame, \$25,000. San Francisco, Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, M. Schroeder. The building will contain a number of large residence flats with garages in the basement. The interior finish will be of pine, redwood and hardwood with oak floors in the principal rooms. There will be a central heating plant. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Hotel Addition—3 story, brick construction, \$20,000. San Francisco, Architect, C. A. Neussdorfer, Humboldt Bank Bldg., S. F. Owner, William Dooley. This work has been mentioned here a number of times before. The addition will contain in the neighborhood of 60 rooms. There will be a store on the first floor. The building will have steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Hotel—5 story and base, brick and steel, \$25,000. San Francisco, Archi-

tect, D. C. Coleman, Ave. in Metropolis Bank Bldg., S. F. Owner, Thomas F. Bauman and A. McElroy, 1957 8th St., S. F. The building will be erected on a corner lot. There will be several stores on the first floor and in the neighborhood of 100 rooms and baths on the upper floors. There will be steam heat and elevator service. The interior will be finished in redwood. The exterior of the building will be faced with pressed brick. The plans are complete and steel is being placed. The work will be carried on under the supervision of William Hebling.

Hotel—6 story and base, reinforced concrete. Cost not stated. San Francisco, Architects, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owner, Mrs. Standwood. The building will cover an area of 4,500 feet. There will be one store on the first floor and 40 rooms and three flats to the floor above. There will be an electric elevator and stair head. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Hotel—5 story and base, reinforced concrete, \$100,000. San Francisco, Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, W. E. Nelson. The building will be erected on a corner lot. The first floor will contain stores. The upper floors will be subdivided for hotel purposes and will contain about 200 rooms, a large percentage of which will have connecting baths. There will be steam heat and elevator service. The interior finish will be of pine and hardwood. The exterior of the building will be faced with cement plaster. The work has been mentioned here before. The plans are complete and figures are being taken.

Stores and Lofts—1 story and base, brick 8,000. San Francisco, Architect, W. H. Weeks, 211 E. Main St., S. F. Owner, H. P. Felt. The building will be erected for several stores on the first floor and three high lofts above. There will be elevator service. The exterior of the building will be faced with pressed brick. The plans are complete and the working drawings have been completed.

Stores and Lofts—6 story and base, brick and steel, \$100,000. San Francisco, Architect, Leo J. Devlin, Pacific Bldg., S. F. Owner, George W. Brooks. The building will be erected on lower Mission street and has been designed for stores on the first floor and lofts above. There will be a freight and passenger elevator service. The exterior of the structure will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken.

Stores—2 story and base, frame, \$10,000. San Francisco, Architect, A. W. Smith, 1419 Broadway, Oakland. Owner, L. M. Taylor. The building will contain several small stores on the first floor and four apartments on the upper floor. The interior will be finished in pine. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

Offices—2 story and base, frame and

steel. Cost not stated. San Francisco, Architects, Architectural Dept., Panama-Pacific Exposition Co., Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition Co. This is the first of the Fair buildings to be erected and has been designed for a general service building. The structure will cover an area of 150x200 feet. The interior will be subdivided into offices for the various departments. The exterior will be covered with cement plaster or metal lath. Plans are complete and figures will be called for shortly.

Offices—12 or 16 story and base, class A construction, \$500,000. San Francisco, Architects, Willis Tink & Co., Merchants Exchange Bldg., S. F. Owners, Insurance Exchange. The architects have just been selected for this building and complete details of the work cannot be given at this time. The structure will be erected at the southeast corner of California and Lombard streets. The construction will be class A in every respect. The exterior facing will be of stone and terra cotta. The interior will be handsomely finished. The architects will start on the working drawings at once and it is hoped will have the construction under way by fall.

Contracts Awarded.

Apartment House—2 story and base, brick and steel, \$90,000. San Francisco, Architects, Reid Bros., Call Bldg., S. F. Owner, Mrs. Emma C. Butler. Contractors, Stockholm and Allen, Broadway Bldg., S. F. Contract price, \$39,000.

OAKLAND AND ALAMEDA COUNTY.

Church.—Steel and brick construction, \$100,000. Oakland, Cal. Architect, Norman P. Marsh, Broadway Central Bldg., L. A. Owners First Methodist Church of Oakland. The building has been mentioned here several times before when the architect was first commissioned to prepare the plans. The working drawings have now been placed in the hands of the Chairman of the Building Committee, Mr. Morton, Oakland. Bids are now being taken from six or seven San Francisco and Oakland contractors, and a general contract will be let shortly.

Flats.—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, S. J. Johnson, 3201 West St., Oakland. The building will contain nine rooms arranged in two flats, one of four and one of five rooms and baths each. The interior finish will be of pine and redwood. There will be open fire places with tile mantels. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the work will be done by Day Labor.

Residence.—2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, H. C. Kuder, 2025 Addison St., Berkeley. Owner, Mrs. Dungan. The interior finish will be of pine with some elm panels and oak floors. There will be hot water heating. The mantels will be of tile. Tile will also be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence.—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, W. E. Kundsleire. The dwelling will contain eight rooms, two baths and a sleeping porch. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. A garage will be erected on the rear of the lot. The plans are complete and figures are being taken by the architect.

Residence.—2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, John T. Smith, Palace Hotel, S. F. The dwelling will contain seven rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shiplap and rustic. The plans are complete and the work will be done by Day Labor.

Residence.—2 story and base, frame, \$3,000. Oakland, Cal. Architect, John Carson, Elcom Bldg., Oakland. Owner, E. J. Lloyd. The dwelling has been designed for a seven-room house. The interior finish will be of pine with some oak floors. There will be furnace heat, which will be included in a separate contract. The living room and den will have open fire places with tile mantels. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Residence.—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal.

Architects, William Carlett & Son, Phelan Bldg., S. F. Owner, Mrs. Jeanette Jost. The dwelling has been designed for an eight-room house with sleeping porches, baths and laundry. The interior will be finished in pine and redwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Earle Saxton, 4225 Terrace St., Oakland. The dwelling will contain five rooms and bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,600. Oakland, Cal. Architect, none. Owner, C. Hansen, 452 62nd St., Oakland. The dwelling will contain five rooms and bath. The interior will be finished in pine throughout. There will be open fire places and tile mantels. The exterior of the bungalow will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, James McGinness, 1115 Broadway, Oakland. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine and redwood with some oak floors. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, W. E. McCheney, 2605 Elina St., Berkeley. The dwelling will be arranged for six rooms and bath. There will be pine and redwood interior finish, open fire places with tile mantels, oak floors in the principal rooms and tile in the bath. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, I. W. Button, 5918 Telegraph Ave., Oakland. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine and redwood with oak floors in the principal rooms. There will be an open fire place in the living room. The mantel will be of brick. The exterior of the house will be covered with cement plaster. The plans are in the hands of the owner and the work will be done by Day Labor.

Bungalows—2, 1 story and base, frame, \$2,000 each. Oakland, Cal. Architects, Haar & Davis, Syndicate Bldg., Oakland. Owner, C. E. Burks. Each of the bungalows will contain five rooms and bath. The interior finish will be of pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. The exteriors of the bungalows will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$7,000. Oakland, Cal. Architect, none. Owner, C. J. Pfarr, 4547 Claremont Ave., Oakland. The dwelling has been designed for a ten-room house with two baths and sleeping porches. The interior finish will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owners, Conservative Building and Investment Co., 68 Post St., S. F. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, Mrs. R. Fittin, 1316 18th Ave., Oakland. The dwelling will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,250. Oakland, Cal. Architect, none. Owner, H. M. Swalley, 5591 College Ave., Oakland. The dwelling will contain seven rooms, two baths and a sleeping porch. The interior finish will be of pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will also be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Residence—2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. W. Plabon, 2556 Hillside Ave., Oakland. The dwelling will contain seven rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster. The plans are in the hands of the owner and the work will be done by Day Labor.

Store—1 story and base, brick and steel. Cost not stated. Oakland, Cal. Architects, Bakewell & Brown, 417 Montgomery St., S. F. Owner, Walter Lambert. The building will contain one large store. The construction will be nearly Class A with a steel frame and exterior walls of terra cotta. The plans for the steel are out for figures and a contract will be awarded at once. Plans for the balance of the work will be completed within a few days.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Book and Lodge Rooms—2 story and base, reinforced concrete, \$15,000. Greenville, Plumas Co., Cal. Architect, J. B. Osborn 611 Macdonough Ave., Richmond. Owners, Indian Valley Park. This work was mentioned here last week. The plans have now been

completed and the architect is taking figures on the work. The interior of the banking rooms will be finished in oak and marble. There will be a Masonic Hall on the upper floor. The exterior of the building will be faced with cement plaster.

Hotel—2 story and base, Class A construction, \$300,000, Sacramento, Sacramento Co., Cal. Architect, E. C. Hennings, Sacramento. Owner's name withheld. The new structure will be located at the southwest corner of 5th and J streets and will cover an area of 80x160 feet. There will be seven stores besides the hotel office lobby and dining room on the first floor. The upper five floors will be subdivided into 225 rooms and 120 baths. The basement will be fitted up for a barber shop, cafe, billiard room and will also contain the mechanical equipment. There will be steam heat, elevator service, wall beds, and a vacuum cleaning system. The interior will be handsomely finished. The exterior will be faced with pressed brick and terra cotta. The owners are understood to be a company of the largest banks in the city behind the enterprise. The architect has started the working drawings and construction will probably be undertaken this fall.

Apartment House—2 story and base, brick. Cost not stated. Chico, Butte Co., Cal. Architect, Chester Cole, Chico. Owner, C. V. Demarias. The building, which is to be erected on a corner lot, will contain three stores on the first floor and 25 apartments on the upper floor. The interior will be finished in pine and redwood. The exterior of the building will be faced with cement plaster. The plans are complete and figures will be taken shortly.

Hotel—3 story and base, brick and steel, \$100,000. Stockton, San Joaquin Co., Cal. Architect, Glen Allen, 1394 Golden Gate Ave. S. P. Owners, Clark Hotel. The work will be in the nature of an addition to the present hotel building. There will be about 150 rooms added besides a spacious lobby and dining room. The addition will contain steam heat and other modern improvements. The work has been mentioned here before. The plans are now complete and figures are being taken.

Bank—2 story and base, reinforced concrete, \$150,000. Greenville, Plumas Co., Cal. Architect, J. B. Oghorn, Richmond. Owners, Indian Valley Bank. The building will be arranged for the banking rooms on the first floor and a Masonic lodge hall on the upper floor. There will be fire proof vaults. The building will have a central heating system. The interior finish of the banking rooms will be of hardwoods and tile. The exterior of the building will be faced with cement plaster. The plans are now being prepared.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

Lodge Hall—3 story and base, brick, \$20,000. Fresno, Fresno Co. Cal. Architect, Henry Starbuck. Fresno

owners, Woodmen of the World. This building was described in last week's issue of the Building and Industrial News at which time it was stated that the plans would be out for figures by June 1st. Plans and specifications may be obtained from the architect.

Store and Offices—2 story and base, brick, \$20,000. Turlock, Stanislaus Co. Cal. Architect, William Dufour, 2323 Santa Clara St., Alameda. Owner, B. W. Scott. The building will contain three stories on the first floor and a large bedroom room on the second floor. The exterior of the building will be faced with pressed brick. The plans are complete and the owner is taking measures for the work.

Stores and Rooms—3 story and base, reinforced concrete, \$20,000. Bakersfield, Kern Co. Cal. Architect, Thomas F. W. Weman, Producers' National Bank Bldg., Bakersfield. Owner, F. N. Scott. The building, figures for which are now being taken, will contain stores on the first floor and about 60 rooms on the upper two floors. The exterior will be faced with pressed brick.

Residence—2 story and base, frame, \$8,000. Exeter, Tulare Co. Cal. Architect, A. Merrill Fowler, 1907 Broadway, Oakland. Owner, C. T. Balaban. The dwelling has been designed for a twelve-room house with baths. The interior finish will be of pine and redwood. There will be some oak floors. There will be open fire places with brick mantels. The exterior of the house will be covered with stone and shakes. A garage will be erected on the rear of the lot. The plans are now being prepared.

Church—1 story and base, frame, \$25,000. Crocus Landing, Stanislaus Co. Cal. Architect, John J. Foley, Modesto Bldg., S. F. Owners, Crocus Landing Catholic Church. The building has been mentioned in these columns before when the architect was commissioned to prepare the drawings. The plans are now out for figures and a general contract will be awarded shortly. The building is designed in the Mission style with the exterior covered with cement plaster on metal lath. The interior will be finished in oak and ornamental plaster. The roof will be of clay tile.

Passenger Station—1/2 story and base, brick and concrete, \$15,000. Modesto, Stanislaus Co. Cal. Architectural Dept. S. F. Co. Flood Bldg., S. F. Owners, Southern Pacific Co. The building will contain two waiting rooms, office, baggage and express rooms. The interior finish will be of redwood and oak. The exterior of the building will be of brick. The plans are now being prepared. Plans are also being prepared in the company's office for a similar structure which is to be erected at Turlock. Construction of both buildings will be undertaken this year.

Stores—1 story and base, frame, \$6,000. Patterson, Stanislaus Co. Cal. Architect, A. W. Smith, 1910 Broadway, Oakland. Owners name withheld. The building will be erected on the main street and will contain three stories. There will be large plate glass display windows. The exterior of the building will be covered with cement plaster. The plans are complete and figures are being taken.

Lodge Hall—3 story and base, brick, cost not stated. Fresno, Fresno Co.

Cal. Architect, Henry Starbuck, Fresno. Owners, Woodmen of the World. This work has been mentioned here before when the architect was first selected to prepare the plans for the building. The working drawings are now complete and the architect states that figures will be called for by June 1st.

Hospital—2 story and base, brick and concrete, \$10,000. Bakersfield, Kern Co. Cal. Architect, G. L. Clark, Brower Bldg., Bakersfield. Owners, Sisters of Mercy. The work has been mentioned here a number of times before. The architect has now completed the working drawings and will call for figures shortly. The building will be of fire proof construction. There will be a number of private wards and two public wards. The equipment will be modern in every respect.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles, Architects, Noonan & Kyson, Wright & Childen Bldg., L. A. Owner, Mrs. L. Burton Brown. The building will be 50x100 feet. The interior will be arranged for suites of two and three rooms each with baths. There will be wall beds and steam heat. The exterior of the building will be faced with cement plaster on metal lath. The architects are preparing the plans.

Apartment House—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, A. Anderson. The building will cover a site 70 feet square. There will be four stories on the first floor and 42 rooms and 16 baths on the upper floors. There will be wall beds and private gas water heaters. The interior of the building will be finished in pine with some hardwood floors. The exterior will be faced with pressed brick. The architects are completing the working drawings.

Hotel—1 story and base, brick and steel. Cost not stated. Ocean Park, Los Angeles Co. Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, George A. Fox. The building will be 29x112 feet. There will be two stories and a butcher shop on the first floor besides the main lobby and office of the hotel. The upper floors will contain 10 rooms with private baths. There will be steam heat, elevators and a vacuum cleaning system. The interior will be handsomely finished in hardwoods and marble. The exterior will be faced with enameled

brick. The architect has completed the plans and is now taking figures on the work.

Stores and Offices—12 story and base. Class A construction, \$600,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, J. S. Torrance and associates. The building will cover an area of 95x130 feet, and is to be erected at the southwest corner of 3rd and Spring streets. It will contain stores on the ground floor and a cafe in the basement. Each of the upper 12 stories will contain 28 offices. The construction will be of steel with brick curtain walls, glazed pressed brick facing and terra cotta trim, hollow tile and concrete floors, hollow tile partitions, elevators, steam heat, vacuum cleaning, marble and tile lobby and corridors. The architects are preparing the plans.

Factory—1 story and base, reinforced concrete. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, C. I. Motor Car Co., H. L. Graves, Los Angeles. The building, the work of which has been mentioned here before when the architects were first selected to prepare the plans. The building will be 150x220 feet. The construction will be fire proof throughout, metal domes and ash being used. There will be both freight and passenger elevators. The exterior of the building will be faced with cement plaster. The working drawings will be completed within four or five weeks.

Hospital—2 story and base, reinforced concrete, \$75,000. Santa Barbara, Santa Barbara Co., Cal. Architect, E. Russell Ray, Howard-Candell Bldg., Santa Barbara. Owners, Cottage Hospital Association. This work has been mentioned here a number of times before. The Building Committee has approved the final plans. The architect has been instructed to secure figures for the construction.

Hospital Group—Reinforced concrete buildings. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Children's Hospital. The plans for three of the main buildings of this group have been completed and will be placed in the hands of the contractors for figures very shortly. The construction of all the buildings with the exception of the Nurses' Home will be of reinforced concrete. The administration building, main ward building and the power house will be erected first.

School—2 story and base, brick. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner's name withheld. The building is being designed for a Parochial school and will contain ten class rooms. The architect has just started the working drawings and details of the building are not obtainable at this time.

Apartment House—2 story and base, \$10,000. Los Angeles, Cal. Architect, Whiting Thompson, Douglas Bldg., L. A. Owner, E. Victor. The building will be 45x100 feet. The first floor has been arranged for two stores. The upper floor will be divided into six three-room apartments with baths. There will be wall beds in all apartments. The interior trim will be of pine. The exterior of the building will be faced with cement plaster. The architect is now preparing the plans.

Apartment House—5 story and base,

brick and steel, \$80,000. Los Angeles, Cal. Architects, Large & La Casse, Central Bldg., L. A. Owner's name withheld. The building will cover an area of 50x156 feet and will contain 108 rooms arranged in 24 apartments of two rooms and bath each. There will be steam heat, wall beds, both passenger and freight elevators and a vacuum cleaning system. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. Considerable marble and tile will be used. The architects have prepared only preliminary plans.

Apartment House—1 story and base, brick and steel, \$45,000. Los Angeles, Cal. Architect, H. A. Cole, 631 South Spring St., L. A. Owner, William Rhodes. The building will be 55x150 feet. The building will contain 71 rooms arranged in two and three room suites. There will be private baths, wall beds, steam heat, elevator service and a vacuum cleaning plant. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The plans are being prepared.

Church—2 story, brick or concrete and steel, \$100,000. San Diego, Cal. Architect, Robert H. Orr, State Bank Bldg., Pomona. Owners, First Presbyterian Church of San Diego. The architect has just been commissioned to prepare plans for this work and the details have not been decided upon as yet. There will be two separate buildings, both of steel and concrete or brick construction. Further particulars will be given as the plans progress.

Church—Frame and brick construction, \$15,000. Orange, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, First Presbyterian Church of Orange. The architect states that it has now been decided to erect this building by Day Labor. The work has been fully described in these columns before. The superintendent of the work will be F. W. Edwards of Upland.

Church—Frame and brick construction, \$10,000. Whittier, Los Angeles Co., Cal. Architects, Large & La Casse, Central Bank Bldg., L. A. Owner, St. Mary's Roman Catholic Church. The building will be 54x100 feet and will have a seating capacity of 320 people in the main auditorium. The interior will be finished in pine and redwood. The exterior of the building will be covered with cement plaster. The architects have completed the working drawings and the work will be carried on under the direction of Edward S. Cobb, Central Bldg., L. A.

Church Auditorium—1 story and base, frame, \$10,000. San Diego, Cal. Architect, A. Burnside, First National Bldg., L. A. Owners, First United Presbyterian Church of San Diego. The building will be in the nature of an addition to the present church, and when complete will have a seating capacity of 250 people. The exterior of the structure will be covered with cement plaster on metal lath. The architect is now preparing the plans.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, H. A. Cole, L. A. Owner, H. F. Volmer. The building will be erected on a corner lot and has been designed for a commercial garage

with waiting room, repair department and storage space. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Jail Alterations—brick and concrete, \$150,000. Santa Monica, Los Angeles Co., Cal. Architect, Henry Hollwedel, Manette Theatre Bldg., L. A. Owners, City of Santa Monica. The building will contain the offices of the department heads, four new steel cells and a guard room. There will be a central heating system. The exterior of the building will be faced with pressed brick. The plans will be complete within a week and figures will be called.

Garage—2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. S. H. Van Noy. The building, which has been mentioned here before, will cover a ground area of 150x175 feet. There will be large display rooms, storage space and a repair department on the first floor. The second floor will also be utilized for storage and display purposes. The construction will be fire proof throughout. The interior of the office will be handsomely finished in hardwood and tile. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Hospital—2 story and base, brick or concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, W. B. Edwards, Boston Bldg., Pasadena. Owner, Marjorie Hospital Association. The city authorities have rendered a decision favorable to the association, and they will proceed at once with the construction of their new building. The architect is preparing the working drawings, and complete details will be given in these columns later.

School—1 story and base, brick and concrete, \$25,000. Santa Ana, Orange Co., Cal. Architect, A. Burnside, Sturges, Story Bldg., L. A. Owners, Santa Ana School District. The building will be 140x113 feet and will contain eight class rooms, auditorium, principals' offices and teachers' rooms. There will be maple floors and pine trim and a central heating plant. The exterior of the building will be faced with cement plaster. The work has been delayed owing to a question raised over the bond voted. The issue from which the building is to be constructed provided \$225,000. The sum of \$200,000 will be used in the construction of a polytechnic high school and \$25,000 in the above mentioned work. The same architect is preparing plans for both buildings.

Stores—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan Walls & Morgan, Story Bldg., L. A. Owner, Van Noy Estate. The building will be 60x145 feet and has been arranged for one large store and one smaller store. The interior will be finished in pine and hardwood. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Contracts Awarded.

Apartment House—1 story and base, brick and steel, \$55,000. Los Angeles, Cal. Architect, F. Parmentier, Byron Bldg., L. A. Owner, J. E. Murray. Contractor, John Hittinger, 650 Hawthorne Ave., Hollywood. Contract

SEATTLE AND WASHINGTON.

Pier—Pile and concrete construction. \$60,000. Port Townsend, Wash. Engineers, Engineering Dept. Standard Oil Co., Sheldon Bldg., S. F. Owners, Standard Oil Co. The company has purchased property on the water front and will shortly commence the construction of a wharf and oil reservoir. The plans are now being prepared.

Stores and Offices—2 story and base, concrete and brick, \$60,000. Seattle, Wash. Architects, Behl & Menzel, Donnan Bldg., Seattle. Owner, George W. Fisher. The building will cover an area of 50x120 feet. There will be six stories on the first floor and a large number of modern offices on the upper floors. There will be steam heat and elevator service. The exterior walls of the building will be faced with cement plaster. The plans are complete and figures are being taken.

School—2 story and base, brick, \$65,000. Alki Point, Wash. Architect, Edgar Blair, Seattle. Owners, Alki Point School District. The building has been designed for a grammar school and will cover an area of 65x120 feet. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The architect is now revising the basement plans and will be ready to receive figures on the construction within the next week. As soon as a contract has been awarded for this building plans will be put out for a similar structure which is to be erected at Fort Lawton.

Warehouse—1 story and base, reinforced concrete, \$300,000. Seattle, Wash. Architects, Blackwell & Ficker, Northern Bank Bldg., Seattle. Owners, Sears-Roebuck Co. The building will cover an area of 165x185 feet. The construction will be fire proof throughout. There will be freight and passenger elevators, steam heat, package chutes and other modern conveniences found in this type of buildings. The exterior of the structure will be faced with cement plaster. The plans are now out for figures among eight Seattle contractors.

Bridges—2 steel and concrete. Cost not stated. Twin Falls, Twin Falls Co., Idaho. Engineer, County Surveyor. Twin Falls. Owners, Twin Falls County. Plans have been completed and bids are now being taken by Chairman O. G. Zack of the County Supervisors for the construction of

two bridges. Bids will be opened on June 17th.

Factory—1 story and base, reinforced concrete, \$70,000. Seattle, Wash. Architects, Saunders & Layton, Alaskan Commercial Bldg., Seattle. Owner, A. C. Zimmerman. The building will cover a ground area of 10x228 feet. The building has been designed for a shoe manufacturing plant. There will be complete steel work. Plans will be completed by the end of the week.

Stores and Offices—2 story and base, reinforced concrete. Cost not stated. Seattle, Wash. Architects, Thompson Thompson, Maynard Bldg., Seattle. Owner, H. H. Pederson. The building will cover an area of 100x120 feet. A complete floor will be used on the first floor. There will be a large freight and passenger elevator. The building will be heated by steam. The exterior will be faced with cement plaster. The plans are complete and figures will be taken at once.

Contracts Awarded.

Apartment House—3 story and base, brick, \$75,000. Seattle, Wash. Architects, Wilcox & Seward, Central Bldg., Seattle. Owner, Frank Forrestal, Jackson St., Seattle. Contractor, same. Contract price, \$75,000.

Dock—Frame and concrete construction. Cost not stated. Bremerton, Wash. Engineer, City Engineer, Bremerton. Owners, City of Bremerton. Contractors, George C. Dietrich & Co., Globe Bldg., Seattle. Contract price not stated.

City Hall—6 story and base, Class A construction. Cost not stated. Spokane, Wash. Architects name not given. Owners, City of Spokane. Contractor, M. C. Murphy, Spokane. Contract price, \$452,730.68. Note: This contract was mentioned here last week at which time the figures of a Seattle contractor were given as low.

Association Building—8 story and base, Class A construction. Cost not stated. Seattle, Wash. Architects name not given. Owners, Young Women's Christian Association. Contractor, M. J. Whitson, Henry Bldg., Seattle. Contract price not given. Note: This contract has been taken on the percentage basis.

PORTLAND AND OREGON.

Bank and Offices—5 story and base, reinforced concrete and brick. Cost not stated. Salem, Ore. Architect, Fred Legg, Portland. Owners, Salem Bank and Trust Co. The work will be in the nature of an addition to the present five-story brick structure. The entire first floor will be completed and when complete will be occupied by the bank. The upper floors will be subdivided into modern offices. There

will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and trimmed with terra cotta. The architect states that the plans will be ready for figures by June 1st.

Bridge—Steel and concrete. Cost not stated. Medford, Ore. Engineer's name withheld. Owners, Jackson County. Plans for a large steel bridge, which is to be erected over Bear Creek, have been approved by the County Supervisors and bids will be opened on June 4th.

CONSTRUCTION WORK ABROAD.

Concessions and Government Ownership.

Assuming these great undertakings are wanted in Chinese cities, however, the means of obtaining them are not so readily at hand. In general, two methods suggest themselves: One to grant concession to a private company for the establishment and operation of the enterprise; the other to establish and operate it through Government ownership. In the way of Government ownership it is to be noted that the Chinese system of government so far has not been such as to differentiate any city as a distinct municipal corporation or organization. Chinese cities are parts of districts which in turn are parts of provinces.

A Government undertaking in a Chinese city, therefore, is largely an undertaking of the provincial government and it is difficult to move a provincial government in a municipal matter. Nevertheless, almost every city of importance in China has one or more public utility enterprises in hand or under serious consideration, either in the way of a public lighting system, which is the service apparently the most popular in most cities, or a public water system, which perhaps is needed much more, but whose cost and successful introduction is a matter of more serious consideration. In most of the more progressive Chinese cities there is also something of a spirit of improvement shown as to cleaner streets and an effort to widen and improve the streets. In few of them, however, has this movement gone so far as to lead to serious consideration of street paving on a modern basis, tions.

Attitude on Foreign Loans.

There is in all such undertakings the great question of policy of foreign loans or no foreign loans for China's undertakings, one party among the people favoring the placing of loans for such purposes, another, and generally a stronger party, favoring the policy of borrowing no foreign capital for such purposes. However, in one or two cases in South China loans for such purposes have been placed and various public utilities undertaken. In the way of concessions to private concerns Chinese authorities have followed for some time the policy of granting no concessions to foreigners. In some cases concessions are granted to Chinese companies which in fact are to concessions to foreign concerns of such companies.

The general policy of such companies to receive concessions and go about their development in their own way, the raising of money for such undertakings is difficult. There is comparatively little ready money

among the Chinese and such enterprises are new, their policies uncertain, and their management is questionable. Money for such affairs comes slowly and in small amounts and is more in the nature of popular subscription than a business investment in many cases. It must be confessed also, that the experience already had with such companies in China has not been such as to promise much return from investments in public companies of Chinese organization and management, and Chinese business men have yet to prove their ability to handle the affairs of such corporations with success. In the way of public utilities few, if any Chinese, have any experience in the management of any such lines of business, but while they have this lack they are often not disposed to or are not in a position to employ foreigners for the purpose.

Cheap Labor Consideration—National Sentiment

Construction in all lines in China generally will proceed according to other methods than those obtaining in the United States for the presence of so much cheap, though untrained and unskilled labor upsets all calculations based upon American machinery, organization, and means of construction. Hence the practical installation of any of these public utilities in Chinese cities must be considered from a different viewpoint from that common in the United States or Europe. Public utility plants in China for some time to come also will probably be established upon a basis of low cost. There will be exceptions to this rule in cases where plants are planned and established by foreigners for the Chinese, but this reflects the disposition of the Chinese in the matter.

In the organization of such concerns also there is a strong disposition to employ Chinese engineers or, in case foreigners are employed, the engineers resident in Hongkong or Chinese ports—and there is a surprising number of such professional men in the field. In practical work most of such concerns established in South China have been under the engineering control of firms selling the materials for the enterprises. In fact this plan of operations and the course followed by the commercial representatives of some European nations (particularly Germany) in arranging for financing these undertakings may be said to dominate the situation.

Foreign Supervision—Financing Enterprises

There are in the South China field firms prepared to sell complete electric light and power equipment, for example, to a Chinese company buying a lighting concession and to extend payment for the equipment over a long time—a period ordinarily representing a sinking fund or a depreciation fund's operation—and to furnish the technical supervision and skill for the construction of the plant, and even in some cases extending to its operation for a considerable period after its establishment. That such foreign supervision is necessary is evident from the fact that where companies organized by Chinese have done away with foreign help after the establishment of their plants they have almost invariably not prospered. For the lack of effective management the electric light

concern at Swatow, for example, was compelled to reorganize, through supervision and management making a success out of the enterprise after it was under native management alone.

Financing the establishment of such concerns is not only a matter of credit and equity or lack of capital on the part of the concerns, but in much as the interest charged by selling firms on order of payments is as high as about 6 per cent, while the Chinese companies will have no difficulty in having their company bank out at 8 per cent to get interest or even more at times on good security, the companies take advantage of the lower rates or deferred payments to make some money for the foreign company by loaning its funds. In a general case in which such interest aid for such undertakings in the form of interest is not required is extended. It may be added that European clothed and other houses have agents all over China working to secure such business on such a basis. The cost of such a system and the foreign professor is great and it is doubtful if the business is profitable, but such is the present state of things in the business in China. Such a system cannot long endure, for it is essentially vicious from a business standpoint, but at present it controls.

New Methods Are Necessary.

It is probable that before any extensive development of public utilities in China can be had there will have to be a complete change in methods of financing and organizing such undertakings. There must of necessity be a more thorough organization of municipal governments, that various bodies for municipal undertakings can be more properly used and can be assessed in a more perfect manner upon those deriving benefits, and there must be a more perfect organization of Chinese corporate or company enterprises to protect creditors, not only against mismanagement and irresponsible action, but against the positive fraud which has characterized the constitution and operation of some of these organizations.

In general it may be said that the possibilities of immense development of public utilities and other forms of engineering enterprise in China are almost without limit, but development is so slow it is likely to be unprofitable. In any event it must be looked after by men on the ground.

The defense said that President Taft runs up for his failure to secure the votes of the people in the primaries is the old one that the trouble is with the "muckraking" newspapers and magazines that have been "poisoning" the public mind since early in his administration.

So far as these "muckraking" newspapers are concerned they are much in the minority. A large per cent of the newspapers are either owned or controlled by the special interests whose cause he has espoused and they have supported the president at every turn of the road.

The fact is that "early in his administration" the president gave unmistakable evidence that his efforts toward reform were half hearted and insincere. In the selection of his cabinet officials preference was given to those men who had been identified

with the corporations and trusts and the leaders in both houses of congress were at once the most radical representatives of the Special Interests that had ever controlled legislation since the days of the slave oligarchy.

In his election platform he was pledged to a revision of the tariff downward. He called congress in special session. Then, instead of sending it a forceful message urging the faithful redemption of campaign pledges, he dictated a colorless communication of a few sentences.

"I have convened the Congress in this extra session," he said, "in order to enable it to give immediate consideration to the revision of the Dingley Tariff Act. * * * The successful party in the last election is pledged to a revision of the tariff. The prospect of a change in rates of import duties always causes a suspension or halt in business because of the uncertainty as to the changes to be made and their effect. It is therefore of the highest importance that the new bill should be agreed upon and passed with as much speed as possible consistent with its due and thorough consideration. * * * In my inaugural address I stated in a summary way the principles upon which, in my judgment, the revision of the tariff should proceed. It is not necessary for me to repeat what I then said."

There was not a word on revision downward, not a word to indicate that anything more than the old fashioned futile tinkering with the tariff was expected. Nothing was urged except haste—"Get it over with some how" was all that he said and evidently all that he meant. At no time when the bill was before congress, when vigorous action on his part would have been effective, did he even attempt to lift a finger. The affairs of Congress were left to Aldrich and Cannon in whom the president had the utmost confidence.

The result was no revision of the tariff at all, only the merest sham. The appointment of the Attorney for the Guggenheims as Secretary of the Interior had resulted in the resignation of the independent and courageous heads of the forestry and land departments. In fact the President's whole administration has been an apology for his appointments and things he didn't do. The independent newspapers have simply told the truth. With this record of non-achievement behind him is it any wonder that Roosevelt should have called his successor "fuzzwit" and have been disappointed at his failure. The real fact of the matter is that the President's sympathies are entirely with the special interests and he was elected on a platform that called for aggressive action and leadership in behalf of the people. The trouble is not with the independent newspapers or with the progressive voters it is in the President himself.

Plans are out for figures on the first of the Exposition buildings. This is an earnest kind of a start and the something definite is going to be done. Let the good work go on. Two years and a half till the Exposition opening. It is time to get busy and keep busy from now on.

Wilbur Wright is dead. The older of the two brothers whose names are inseparably linked with the achievements in aerial flight in heavier than air machines has passed from the scene of his achievements.

Probably the most distinct innovation that marks the beginning of the twentieth century is perfection of machines for aerial flight. Since man began to invent machines and contrivances for locomotion and travel the air has always appealed to him. Perhaps no single mode of locomotion has had so much time and energy expended upon it. Since the perfection of the gas engine whereby power can be developed without the transportation of a heavy fuel supply and an engine of enormous weight in heavier than air machines became practically assured.

The Wright Brothers were not the only ones who invented practical flying machines nor were they the first perhaps. But they perfected a machine that for reliability and dependence in all weather conditions is the safest of all and they made the practical demonstration of transcontinental flight.

Considering the perils of the pioneers in this science and art of aerial navigation the Wright Brothers have been particularly fortunate. Neither have suffered serious injuries from accidents. While the demonstrators of their machines, the dare devils of the air that have astonished the wondering gaze of the multitude are mostly now food for worms.

Wilbur Wright has left the scene of his triumphs in the ordinary way at an early age. Whatever the future may hold in store for the aviator and avia-

tion his name will always be linked with the first achievements of the conquest of the air and the perfection of a new mode of travel at the beginning of the twentieth century.

The San Francisco Call asks, "Under which banner will you serve, Attorney General Webb?" and then proceeds to outline the course to be adopted by the head of the state law department in the San Diego situation. According to the Call he must either support the citizens or the I. W. W. And by citizens it means those who have been active in the vigilantes committees and acts of violence that have been committed in the southern town.

Possibly the attorney general will act on his own initiative and on his own judgment and that judgment may coincide with neither party. San Diego is in a great measure the creation of John D. Spreckels. The representatives and senators from the southern city are not favorable to the present administration. So it is not to be wondered at that the personal organ of Spreckels should take umbrage at any steps that the governor might take to suppress the lawlessness that has come upon San Diego.

It is natural that the citizens of the southern city should feel indignation at the many lawless and worthless hordes that have descended upon them. But there are lawful methods of dealing with them, and if the police force of the city is inadequate the state can be called upon. If reports are true the police and the authorities counten-

anced and abetted the lawless acts of the citizens' committee. If that be true it is time for the state to take a hand in the matter and find out the cause of the trouble and if these irresponsible people are violating the laws to punish them or put them to work on the rock pile or state highway.

The governor's order to the Attorney General is perfectly clear and to the point. He asks him to see that every man is protected in his rights. And he assures to every man the same protection no matter what his station and explicitly instructs the attorney general in the following language:

"If San Diego wishes the aid of the state, in any just course, most cheerfully will that aid, upon request, be accorded. But just as certainly will the aid of the State be extended to any man, however humble and feeble, whose rights are trampled upon in San Diego, and with exactly the same alacrity will the State endeavor to provide redress for those whose liberty has been wantonly violated.

"Our Constitution and laws provide that the supreme executive power of the State shall be vested in the Governor; and that he shall see that the laws are faithfully executed, and that he shall supervise the official conduct of all executive and ministerial officers.

"It appears that the constitutional rights of certain innocent people in the city of San Diego have been infringed, and in pursuance of the power that is mine, I shall direct the Attorney General of the State to proceed to San Diego that the laws may be enforced; that justice may be done; that a solution of the problem confronting San Diego may be found, and to give us thereafter the benefit of his knowledge and experience, so that other localities and other cities may be protected.

"I wish him, as the chief law officer of the State, so far as he can, to afford redress to any who have suffered wrong, and to mete out equal and exact justice to all."

This is a direct way to deal with the situation. When even justice is handed out the I. W. W. can have no just cause of complaint and the state authorities can deal with them once and for all in any other city the same as San Diego.

Wireless operators are to be in great demand in the near future. After July the first all steamships leaving port with 100 persons aboard, including passengers will have two operators in order that one may be on duty at all times, day or night. New inventions create new demands for labor as well as performing the work that hands formerly performed. Here is an occupation that was not dreamed of some years ago. There is some degree of fascination for the young man to travel at sea, to realize the responsibility that rests upon him, to see the ports of the world and hall the ships at sea. And at any time tidings of startling moment may come out of the sky, some ship in distress, some danger ahead, or some great event that has transpired in some remote part of the world. It is an attractive field in many respects.

Reversible Windows

Without Weights and Cords

Inside View

This window performs all the functions of a double hung window. Perfect ventilation. Each sash works independently. No rattle. Wind and rain proof. Does not interfere with curtains or shades; Reverses perfectly. Send for details and price list.

Here you have a double casement, where each sash is reversible. Can be worked as a single casement just as easily. This is the only single casement with reversible sash.

Construction work on the Great Highway has been ordered at four different points. The construction is to be permanent, a graded road with concrete foundation, and is the beginning of a system of highways which in time to come will grow into roadways similar to the elaborate road systems of Europe.

Roadways are the great disseminators of civilization. No place can be isolated that has ready means of access. The greatest monuments that the Roman emperors left were the roadways that radiated from the Imperial City. By means of them the armies of the emperor were able to hold in subjection the alien races that were a part of the empire and they still stand as monuments of the City's power long after its civilization has died.

If the work of the State Highway be well done it will be an object lesson for local communities in the matter of road construction. Heretofore the road building generally has been by local taxation and all kinds of roads have been built according to the limit of the finances. The present State Highway is by far the most pretentious effort at road building that has ever been attempted in the west. It should give a demonstration of the practical value of the state as a whole going into the business of roadbuilding on a definite plan to unite the roadways of the commonwealth into a definite and comprehensive system.

President Taft said at Jersey City last Friday that if Colonel Roosevelt were allowed to hold a third term, intoxicated as he would be with the sense of power coming from the conferring upon him of an office and an honor that has been denied to all the most illustrious Presidents of the country, the safety of the Republic would be imperiled.

And the San Francisco Chronicle asks, "What guarantee has the Nation that a man with the insatiable lust of power shown by Roosevelt would not endeavor to make the Presidency a life office for himself a perpetual dictator if he were again installed at the White House?"

That question is easily answered. The Nation has the same guarantee that it has that President Taft will not renominate and elect himself. It is certain beyond the shadow of a doubt the reactionaries would renominate and elect Taft if they could whether the people wanted him or not. Yet with the peculiar constitution of the Republican National Convention and the steam roller tactics employed Taft can not even renominate himself. With presidential primaries in every state how could a man become a dictator and usurp the executive power under our present constitution if he did not have a majority of the people with him? Does Taft and the Chronicle and the other reactionary papers expect intelligent people to believe such nonsense? They are palpably insincere or else consider their readers to be a bunch of boneheads!

MR. ARCHITECT:

You are keen for every im-
provement in the building line.
You want to save money for
your client and give him the
best.

You want to protect him from
damage suits.

In window construction you can
save him money by specifying
the Simplex, because it is cheaper
than the common double hung.

No damage suits from window
cleaners, because the Simplex is
reversible.

The common double hung is
out date.

The Simplex is manufactured
in 49 different varieties.

Send for details.

560 Mission, St., San Francisco

The Building and Industrial News has moved into the heart of San Francisco's business district and is now located at 560 Mission St., just east of Second St. The Daily Pacific Builder and the L. A. Larsen Construction Reports, all issued by the same publisher, share the new quarters.

The new Telephone Number is Douglas 2372.

Editorial Comment.

The Greek colony of San Francisco have planned the erection of a temple on Telegraph Hill, which is to be a replica of the Parthenon on the Acropolis. Certainly that would be a fitting ornament for the rocky promontory that overlooks the bay and would be an architectural adornment for the highest elevation of the Latin quarter. There would be expressed the greatest single piece of architecture that the Latin races gave to the world and in its classic simplicity would express the glory that was Greece when Athens ruled the intellectual world.

Many of the pictures of San Francisco taken immediately after the fire remind one of the ruins of the Grecian cities. The hills of San Francisco are not unlike the hills of the Aegean sea, and the skies of California are like the skies of the Mediterranean. A reproduction of the Parthenon on Telegraph Hill would be as fitting an ornament as could surmount that most prominent feature of the city's sky line as seen from the bay.

The prominence that the daily newspapers gives to the deeds of young criminals is not calculated in any degree to lessen crime. Charles Bonner, the misguided youth, who shot the young high school girl the other evening in having his picture published in the papers and a lot of slush published about his mental state and so forth that have no excuse for their appearance in print. He has assumed no importance that such a crime does not warrant. The publication of such stuff only serves to suggest to other insignificant and unbalanced minds crimes which they otherwise might not think of.

He was just an ordinary individual, may be not so good or half as intelligent as millions of other youths of his age. He had no grievance whatsoever. Apparently he was incensed at not being able to have his own way and killed the defenseless girl who spurned his attentions.

He will no doubt pay the penalty for his crime. But that does not bring back the life of the young girl that he has snuffed out or recompense the parents for the loss of their child.

California, like all other western states, has had its mushroom towns and mining camps. Places that were prosperous in the boom days, places that grew up over night, and camps whose inhabitants left as swiftly and silently as Arabs when the pay dirt played out. But its agricultural progress has been of a more permanent nature. No valley has had its boom towns build upon the dream of a real estate man's fancy which vanished like the insubstantial fabric of Prospero's vision and left not a rack behind. The reason is obvious. The climate is fixed and reliable and crops do not depend in a primary degree upon the fickleness of the rainfall or the inconsistency of the seasons. In this respect it is different from the states of the middle west where "boom towns" have been as numerous and shortlived as the season's mush-

rooms on the hills. The Kansas City Star calls attention to the fact that the State of Kansas alone has lost more than two thousand towns from her map.

The same is probably true of many of her sister states. A good season made possible the promotion of all kinds of schemes by the real state boomer. When the dry seasons came and the crops blew out of the ground and vegetation died the town disappeared from the map.

Here in California agriculture is on a surer basis. The irrigation districts that have been formed and are being formed place farming on a business basis and remove the gamble on rains and the fortunes of the seasons.

A movement has been launched to abolish the poll tax of the state by constitutional amendment. It was instituted primarily by the Sacramento Bee and a petition is being circulated to bring the matter before the people at the November election. There is no good reason why the head tax should be in existence. Taxes generally should be derived from property and property incomes and there is properly no reason why a man should pay a tax on his person.

Quite an agitation has been started among the teachers and the school officers of the state in the belief that the abolition of the poll tax would diminish the school revenue. Such a conclusion is erroneous as ample provision is made for the support of the schools in the fundamental law of the state.

Article XIII, Section 14, subdivision e of the State Constitution reads:

"Out of the revenues from the taxes provided for in this section, together with all other State revenues, there shall be first set apart the moneys to be applied by the State to the support of the Public School System and the State University. In the event that the above named revenues are at any time deemed insufficient to meet the annual expenditures of the State, including the above named expenditures for educational purposes, there may be levied, in the manner provided by law, a tax, for State purposes, on all the property in the State, including the classes of property enumerated in this section, sufficient to meet the deficiency."

It will thus be seen that the first provision made is for the support of the educational institutions and the public schools. And in the event of there not being sufficient funds in the general revenues provision is made for the laying of an additional tax for the support of the schools. While the revenue from the poll tax may at the present time be applied to the support of the schools there is no reason why any other revenue should not be so applied or for that matter an additional tax be levied.

In an interview with a representative of the Sacramento Bee, W. J. Bryan when asked concerning the biggest issues won for popular government during the past twelve years said among other things:

"The biggest issue is that of the election of United States Senators by the people—not alone the biggest

issue we have had before us during this generation, but the biggest issue affecting methods of government that has been decided in a century by constitutional agitation.

"I take it for granted the Constitutional Amendment will be ratified as rapidly as the Legislatures of the States convene.

"Next in importance is the Income Tax. That, I believe, still lacks four States, and three of those are practically assured. I have no doubt the remaining one will appear from among those States which have not acted, or from among those which have acted and will change their positions.

"In several of the States one branch of the Legislature has favored ratification. This is the situation in Massachusetts, New Hampshire and New Jersey. Virginia rejected this Constitutional Amendment last year, but her Democratic State Convention recently has demanded ratification.

"We have made progress on the Trust question, although not as much as we should have made.

"Also have we made progress on the Tariff question.

"We have made substantial progress in the regulation of railroads.

"On the Money question we have lived to see the quantitative theory vindicated, although the new supply of money came from an unexpected source.

"We have made progress in the matter of Labor laws."

These Bryan claims to have been won by his party though it has not been in power in national affairs at any time.

The action of a majority of the House of Representatives in opposing the appropriation for the annual increase of our navy by two battleships is illadvised and endangers the security of the United States. It seems to be more of politics or foolish economy indulged in at a time when there is necessity of increasing rather than decreasing the naval strength of the country.

Naval strength is a relative term and depends entirely upon the strength of other nations. If no other nations had battleships or navies it would be money thrown away for us to expend money upon this sort of defense. At present we are in the third position as to our naval rating. The completion of the Panama canal will make it necessary to be better equipped to protect our coasts and commercial interests.

Japan is active in building up her navy. At the same time the battleship Texas was launched a Japanese vessel was launched in England of 500 tons greater capacity and a speed six knots greater than our battleship. This year 3 battle cruisers of the same speed, size and armament are being laid down in Japanese yards.

If the American Navy is not increased the Japanese will soon have a more modern and more powerful navy than the United States. If we are to have a navy at all it should be one of respectable size and one to command the respect of the world. When the country is amply able to protect itself at any and all times it is less liable to be drawn into wars than if by indifference and foolish economy it lets its coast open to attack.

Sir Christopher Wren and St. Paul's Cathedral.

By J. B. Back

Inserted on the unpretentious tomb of an unpretentious but very great man, in the crypt of St. Paul's Cathedral, is an inscription which reads: "If you seek a monument, look about you." The tomb contains the mortal remains of Sir Christopher Wren, the most brilliant architect that the English-speaking race has produced, and one of the greatest geniuses of the Seventeenth Century, and the sublimely eloquent legend directs attention to his crowning work, the noble cathedral edifice itself.

Christopher Wren was born in the year 1632, in the stirring times when Charles the First was King of England. In childhood he was believed to be of frail bodily constitution, though he proved himself to be of versatile and precocious mind, with a strong bent for mechanics and philosophy. At the age of thirteen he had invented an astronomical instrument and a pneumatic machine—the forerunners of a long list of ingenious contrivances which he produced as a sort of by-product to the main work of his exceedingly active life—and entered Oxford University when he was fourteen. The boy's studies were pursued under difficulties enough. His relatives, all royalists, were harried from place to place and imprisoned in the Tower of London by the "Roundheads" who were triumphing under Oliver Cromwell. Notwithstanding the turmoil in which the country was plunged, however, young Wren managed to stick to his work of getting a thorough education, but that he learned more from his own keen and well-directed observation outside the class room than from dusty books is well attested by his success as a practical man in after life. At this time his proficiency in mathematics and astronomy was expressed in a series of remarkable Latin verses and essays, and in 1650 he became one of the founders of the Royal Society—that once ridiculed but soon famous nursery of learning. The charter of incorporation of this society, written by Wren, and his inaugural address in Latin upon his election at twenty-four years of age to the Professorship of Astronomy at Gresham College, London, revealed wonderful mental grasp and attainments. The address, especially, in its English translation, is fascinating reading from the way in which the youthful orator points out the services rendered by astronomy to its sister sciences, and from his engaging modesty in receiving the honor conferred upon him. A catalog of "new theories, inventions, and mechanic improvements" exhibited by him at Oxford included a large number of models of astronomical and mathematical problems, machines for raising water, instruments and munitions of war, musical instruments, methods of fortification and mining, methods of navigation (including submarine navigation), of fishing, writing, printing, weather observing. Christopher Wren was probably the first to make practical use of the barometer, shortly

after its invention by Evangelista Torricelli. He was a member of the Académie des Sciences in Paris, and of the Académie des Sciences et des Lettres in Rome. He was also a member of the Royal Society of London, and of the Royal Society of Sciences in Stockholm. He was a member of the Royal Society of Sciences in Upsala, and of the Royal Society of Sciences in Lund. He was a member of the Royal Society of Sciences in Altdorf, and of the Royal Society of Sciences in Göttingen. He was a member of the Royal Society of Sciences in Halle, and of the Royal Society of Sciences in Berlin. He was a member of the Royal Society of Sciences in Vienna, and of the Royal Society of Sciences in Prague. He was a member of the Royal Society of Sciences in Moscow, and of the Royal Society of Sciences in St. Petersburg. He was a member of the Royal Society of Sciences in Warsaw, and of the Royal Society of Sciences in Cracow. He was a member of the Royal Society of Sciences in Lemberg, and of the Royal Society of Sciences in Odessa. He was a member of the Royal Society of Sciences in Constantinople, and of the Royal Society of Sciences in Cairo. He was a member of the Royal Society of Sciences in Alexandria, and of the Royal Society of Sciences in Smyrna. He was a member of the Royal Society of Sciences in Constantinople, and of the Royal Society of Sciences in Cairo. He was a member of the Royal Society of Sciences in Alexandria, and of the Royal Society of Sciences in Smyrna.

After the Restoration in 1660, Wren's career was marked by a series of brilliant achievements. He was appointed Surveyor-General of the Kingdom, and in this capacity he was responsible for the rebuilding of St. Paul's Cathedral, which had been destroyed by the fire of 1666. He was also responsible for the rebuilding of many other churches and public buildings in London. He was a member of the Royal Society of London, and of the Royal Society of Sciences in Stockholm. He was a member of the Royal Society of Sciences in Upsala, and of the Royal Society of Sciences in Lund. He was a member of the Royal Society of Sciences in Altdorf, and of the Royal Society of Sciences in Göttingen. He was a member of the Royal Society of Sciences in Halle, and of the Royal Society of Sciences in Berlin. He was a member of the Royal Society of Sciences in Vienna, and of the Royal Society of Sciences in Prague. He was a member of the Royal Society of Sciences in Moscow, and of the Royal Society of Sciences in St. Petersburg. He was a member of the Royal Society of Sciences in Warsaw, and of the Royal Society of Sciences in Cracow. He was a member of the Royal Society of Sciences in Lemberg, and of the Royal Society of Sciences in Odessa. He was a member of the Royal Society of Sciences in Constantinople, and of the Royal Society of Sciences in Cairo. He was a member of the Royal Society of Sciences in Alexandria, and of the Royal Society of Sciences in Smyrna.

Wren's career was marked by a series of brilliant achievements. the buildings in advantageous contrast to the narrow streets and lanes, and the ill-constructed and poorly lighted and ventilated houses of the London of the Middle Ages which the fire had unlike, in spirit, the one which was carried out for our own city of Washington nearly a century and a half later—was too far in advance of the times to be accepted by the population, though it received the approval of Government. But the unbounded energy of the new Surveyor-General found scope enough in the rebuilding of St. Paul's in the design and erection of over fifty churches and other buildings which sprang up in the burned area with a rapidity which surprised continental Europe, of a monument commemorating the Great Fire, and of Temple Bar (the gate of "the City" of London, pulled down during the last decades of the Nineteenth Century).

The rearing of St. Paul's alone was a sufficiently difficult problem. The cathedral was over forty years in building, and from the very start the work drew liberally upon Wren's talents. Even the two year's work of demolishing the ruins of the old structure (left by the Fire, which he supervised, called out the great architect's full resourcefulness. He used gunpowder most skillfully to bring down the old walls, but a frightful explosion having resulted from the bungling of one of his foremen one day, in Wren's absence, the latter was obliged to see up the use of powder, and turned to the battering ram with equal success. It is recorded that he set thirty men at work swinging a heavy, iron-shod mast against one of the walls. The men complained of what they thought was a foolish endeavor—but on the second day the wall gave way! The finally accepted design for the new cathedral, the outcome of no less than three successive drafts, called for a splendid dome; and it is of interest that the noble excellence of the design as it stands today was due largely to the practice that Wren obtained in the erection of some of his other churches, six of which had domes. Even a brief account of the Wren churches in London—many of which are still standing—would make a story by itself. To the architect every one of them is a valuable study in planning, especially in adapting a beautiful structure to a difficult site, and in securing a given result. Then there are the other important churches in London and in England which he was commissioned to build as his reputation grew apace. But the great Cathedral must here suffice to show the inexhaustible fertility of invention combined with good natural taste and profound knowledge of the principles of art. Wren's architecture is the perfection of that modern style which adapts forms and models essentially Gothic to the orders and ornaments of classical antiquity. The pictures of the exterior and interior tell their own story of the dignity and splendor of this magnificent pile on the banks of Thames, which has aptly been compared, as a mighty work of art, to Milton's poem, "Paradise Lost." On a ground plan of the long or Latin cross rise the walls of Portland stone, without visible buttresses, supporting a roof which is so flattened as to be almost invisible from the outside and

above which rise the delicately beautiful ribs of bell towers, and the majestic dome surmounted by its stone lantern and cross 365 feet above the ground. A study of the construction of St. Paul's is a comprehensive lesson in architecture, and the dome is by itself a masterpiece. This structure consists of the vast but delicately beautiful exterior dome which so dominates the Londoner's view from all directions, the intermediate brickwork cone, which, though visible neither from without nor from within the edifice, yet serves to support the lantern and its accessories of 700 tons weight, and the interior shell, also of brick, with its top fifty or sixty feet below the top of the outer dome.

Although the dome of St. Paul's was not finished till 1710, most of Wren's active labors seem to have been over five years earlier, at which time his work on Greenwich Hospital, another worthy monument of his genius, was completed. The latter years of his life were embittered by the petty annoyances of inferior men, malicious attacks and innuendoes aimed at his towering reputation and his envied position under the Government, but from his eighty-sixth year, after holding the office of Surveyor-General for nearly half a century, he retired to his residence at Hampton Court and busied himself with these mathematical and scientific problems with which, as we have seen, he early made his reputation. At the end of February, 1723, he quietly fell asleep in his chair; and a few days later his remains were interred in the church which stands as his greatest memorial.

Sir Christopher Wren's life teaches a valuable and encouraging lesson of the possibilities of achievement by the determination to give only one's best, and to make that best better by incessant study and practice. His genius was based on "an infinite capacity for taking pains" as well as extraordinary natural gifts. These things are indeed a broad and deep foundation for a life-work, and if he had not taken up architecture he would undoubtedly have secured a scientific position higher than any of the men of his time, barring only Sir Isaac Newton. That the motives of his vast achievements were not mere human will-power or selfish ambition is amply proved by the fact that he remained simple and honest throughout his long career, unspoiled by praise and unmoved by Court favor or popular applause and equally dignified and unmoved under the assaults of enemies. Thus it was eminently characteristic that the sum he stipulated as his remuneration for the arduous labor of supervising the construction of St. Paul's was only 294 pounds a year!—If ever a man "earned more than he was paid for" it was Sir Christopher Wren. It was well said of him early in his career that "the divine felicity of his genius was beautifully matched by a sweet humanity of disposition; and he was truly one of those greater men that sojourn on earth to show the Maker's likeness to the ages. Such a man it is that Kipling must have in mind when he writes:

If you can talk with crowds and keep your virtue,
Or walk with Kings—nor lose the common touch,

If neither foes nor loving friends can hurt you,
If all men count with you, but none too much;
If you can fill the unforbearing minute
With sixty seconds' worth of distance run,
Yours is the Earth, and everything that's in it,
And—which is more—you'll be a Man, my son!

Charles C. Moore, President of the Panama Pacific Exposition, has sent a letter to all the Supervisors of the various counties asking them to be present at a meeting to be held at the St. Francis Hotel on June the 20th, to consider the proposition of erecting a State Building wherein all the counties of the State will be represented. It is proposed to make the building a prominent feature of the Exposition Architecture. And in pursuance of this idea the President states that as the State is to entertain its guests the proposal is made to display the products of the state under one imposing roof. In further detail he states:

"The proposal has been made to provide a great central state building, which shall be used for the purpose of receiving and entertaining those who will be the guests of California and for the exhibition of those things which will not only interest the visitor to the exposition, but will enable him to gain quickly information regarding any section of the state, its products and resources, concerning which he may desire to inquire.

One feature of this building which has been considered is a great hall, which can be used not only for receptions and meetings, but for banquets or as a lounging room when not otherwise in use—this hall to be the main feature and to endow it with a character to attract the attention of every visitor.

Adjoining this it is proposed to erect around a great patio a structure whose architecture will be both superb and attractive, so that no one coming to the exposition can fail to have his interest excited.

The spaces within the building around the patio are to be subdivided for the use of the counties. What is the best way to secure this building?

That is the question which the supervisors will have to take up and thresh out in a wise and liberal way."

This is an admirable plan and evidently feasible. California will welcome the world to her shores in 1915, in the first notable demonstration of the kind it has ever made. A proper and imposing building should be erected to display the marvelous versatility and wealth of her resources. To do this will require a structure of vast dimensions and it should at the same time architecturally express the wealth, the beauty and the dignity of the Golden State.

A NEW MANUFACTURING COMPANY ON THIS COAST.

The Western Blind Company, Inc., of Pasadena, Cal., is the only company west of Chicago manufacturing Venetian Blinds. They are doing a good business making a specialty of school houses, office buildings and banks. The Los Angeles Trust and Savings Office Building, 11 stories, is being equipped with their blinds.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 6 story and base, reinforced concrete, \$30,000. Architect, Charles F. Whittier, Pacific Bldg., S. F. Owner, P. A. Meyers. The building will be erected on a corner site and will contain stores on the first floor and a large number of two, three and four room apartments on the upper floors. All apartments will have connecting baths and wall beds. There will be steam heat, a vacuum cleaning system and elevator service. The interior of the building will be handsomely finished in pine and hardwoods. The exterior will be faced with cement plaster. The architect is now taking figures for the construction.

Oakland, Cal.—Apartment house, 2 story and base, frame, \$1,000. Architect, none. Owner, F. Rogers, Bacon Bldg., S. F. The building will contain stores on the first floor and three three-room apartments on the upper floor. The interior finish will be of pine. The exterior will be finished in shiplap. The plans are complete and the work will be done by Day Labor.

Santa Barbara, Santa Barbara Co., Cal.—Apartment house, 3 story and base, brick, \$65,000. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, Solano and Chapala. The building is designed in the shape of a shallow "U" and will contain 124 rooms arranged in 48 apartments and seven single rooms. There will be a lobby, 25x28 feet, parlor, 36x28 feet and billiard room and ball room, 25x19 in the third story. The trunk room, laundry and store rooms will be located in the basement. The first story will be of brick, and the remainder of the exterior will be covered with shingles and a shingle roof. The interior will be finished in pine and hardwoods and hardwood floors. There will be private bath rooms with composition floors and lockers. There will be a freight elevator, steam heat and vacuum cleaning system, telephone, electric light wiring and modern plumbing. Each apartment will have a private balcony. The architect is ready for figures on the work.

Berkeley, Alameda Co., Cal.—Apartment house, 2 story and base, frame, \$8,000. Architect, none. Owner, George W. Kraft, 2136 McKinley Ave., Berkeley. The building has been designed to contain eight small two-room apartments with baths. The interior finish will be of pine. There will be open fire places. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 5 story and base, brick and steel, \$20,000. Architects, Large and La Casse, Central Bldg., L. A. Owner, J. B. Dawson. The building will cover an area of 50x156 feet and will contain 101 rooms arranged in 52 suites of two rooms and bath each. There will be steam heat, elevator service and wall beds. The interior will be finished in pine and hardwoods. The exterior

of the building will be of brick and pressed brick. The architect is preparing the working drawings.

Los Angeles, Cal.—Apartment house, 1 story and base, brick and steel, not stated. Architects, Moore in Wall and Morgan, Moore Bldg., L. A. Owner, Mrs. F. F. Sabinson. The building will be 50x110 feet. There will be three stories on the two street corners and about 60 rooms arranged in two and three room apartments with connecting baths on the upper floors. There will be wall beds and steam heat. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

Los Angeles, Cal.—Apartment house, 5 story and base, brick and steel, not stated. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Joseph G. D. Burt. The building will contain 167 rooms arranged in suites of two and three rooms each with connecting bath. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Los Angeles, Cal.—Apartment house, 1 story and base, brick and steel, not stated. Architects, Pison and Son, Wilcox Bldg., L. A. Owner, Mrs. Anna M. Moore. The building will contain about 70 rooms arranged in suites of two and three rooms each with private bath. There will be elevator service, wall beds, steam heat and a vacuum cleaning system. The exterior will be faced with pressed brick. The architect is working on the detail drawings.

Los Angeles, Cal.—Apartment house, 1 story and base, brick and steel, not stated. Architect, S. T. Henson, 814 Title Insurance Bldg., L. A. Owner, Henry F. Mannheim. The building will be 50x100 feet and will contain 70 rooms. The suites will consist of two to three rooms and bath each. There will be elevator service, steam heat and wall beds. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, brick and steel, not stated. Architect, S. H. Quinn, 814 St. Bldg., L. A. Owner, W. H. Edwards. The building will contain 100 apartments of two and three rooms each with bath. There will be a vacuum heating system, wall beds and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 2 story and base, brick, cost not stated. Architects, C. C. Rillenhous, Wilcox Bldg., L. A. Owner, F. R. Bogue. The building will contain 60 rooms arranged in suites of two and three rooms each with connecting baths. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Los Angeles, Cal.—Apartment house

1 story and base, brick, cost not stated. Architects, C. C. Rillenhous, Wilcox Bldg., L. A. Owner, H. Stansbury. The building will be 50x100 feet. There will be in the basement a lot of 42 rooms arranged in one and three room suites with connecting baths. There will be steam heat, wall beds and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Contracts Awarded.

San Francisco—Apartment house, 6 story and base, brick and steel, \$60,000. Architect, Edward J. Garden, Pacific Bldg., S. F. Owner, E. A. Wasserman. Contractors, Frank M. Gaden & Co., 24 Kearny St., S. F. Contract price, \$60,000.

Los Angeles, Cal.—Apartment house, 1 story and base, brick, \$50,000. Architects, Temple and Erbes, Home Bldg., L. A. Owner, Richard Matthews, Contractor, A. L. Girdling, 3329 North Santa Avenue, L. A. Contract price, \$76,000.

BRIDGES DAMS AND HARBOR WORK.

San Francisco—Steel, wood and concrete. Port and pier. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. F. Owners, State of California. The engineer has completed the working drawings for pier No. 28, which will be similar in design to piers 20 and 22. The State Board of Harbor Commissioners will open bids for the construction of this work on June 27th. The official proposal for the work appears in another column of this issue.

Oakland, Cal.—Masonry dam, reinforced concrete, \$1,000,000. Engineer, City Engineer Seattle, Owens City of Seattle. The Board of Public Works has approved the plans for the Cedar River Dam and bids for the construction will shortly be called. The following is a synopsis of the Engineer's report:

Excavation, dry, 1,500 yds.	\$ 7,750
Excavation, wet, 8,000 yds.	15,000
Rock excavation, 13,875 yds.	13,875
Rock excavation, wet, 25,041 yds.	8,950
Concrete, 125,150 yds.	7,090
Drillings, ground, 101,000 ft.	30,000
Gate, concrete, with pipe line	21,000
Shoring, timber and concrete	8,775
Controlling tunnel, etc.	56,800
Engine, and incidentals	99,375

Total \$1,092,450

Contracts Awarded

San Francisco—Piers, reinforced concrete and wood \$1,000,000. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. F. Owners, State of California. Contractor, Robert Wakefield, 16 California St., S. F. Note: This contract has been mentioned here before. The contractor has been mentioned here before. The contract has just opened offices at the above mentioned address and within the next week will let a number of subcontracts.

CHURCHES.

Los Angeles, Cal.—Church, brick and concrete construction, \$78,000. Architect, Thos. Geo. Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist, Contractor, M. J. Cook, Chamber of Commerce Bldg., L. A. Contract price, \$77,000.

Contracts Awarded.

Los Angeles, Cal.—Church, 1 story and base, frame, \$10,000. Architects, Walker and Vawter, Hibernian Bldg., L. A. Owners, Church of the Redeemer. Contractor, J. A. Winget, 221 Manhattan Place, L. A. Contract price, \$9,949.

COURT HOUSES.

Ventura, Ventura Co., Cal.—Court house, 3 story and base, reinforced concrete and stone, \$150,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. The architect states that plans for the marble and tile work, ornamental iron, vacuum cleaning system, two vault doors and vault lining are ready for figures. Bids for this work will be opened by the Board of Supervisors on July 5th.

FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Laundry addition, 3 story and base, brick. Cost not stated. Architects, Garrett and Bixby, Currier Bldg., L. A. Owners, White Star Laundry. The building has been designed for three stories but at present only one story will be erected. The structure covers a ground area of 60x140 feet. The architects are now completing the working drawings and figures will be called for at once.

Contracts Awarded.

Seattle, Wash.—Factory, 2 story and base, reinforced concrete, \$20,000. Architects, Saunders and Lawton, Alaska Bldg., Seattle. Owners, Zimmerman-Degen Shoe Co. Contractor Matt Branigan, 412 10th avenue, Seattle. Contract price \$20,000.

Los Angeles, Cal.—Warehouse, 2 story and base, reinforced concrete, \$16,000. Architects, Train and Williams, Exchange Bldg., L. A. Owners, California National Supply Co. Contractors, Carl Leonardt Co., H. W. Heilmann Bldg., L. A. Contract price \$16,000.

FLATS.

San Francisco.—Flats, 2 story and base, frame, \$2,000. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will contain two residential flats of seven and eight rooms each with baths. The first floor of the building will be given over to a garage. The interiors of the flats will be handsomely finished in hardwoods and pine and white enamel. There will be a central heating system. There will be open fire places and tile or brick mantels in the living room of each of the flats. The exterior of the building will be covered with pressed brick veneer and cement plaster. The plans are complete and the architects are taking figures on the work.

Oakland, Cal.—Flats, 2 story and base, frame, \$5,000. Architect none. Owner, Mrs. C. P. Remond, 311 East 12th St., Oakland. The building has been designed to contain two modern flats of five and six rooms each with baths. The interior finish will be of pine and redwood with hardwood floors in the living rooms. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

GARAGES.

Los Angeles, Cal.—Garage, 1 story and base, brick and concrete. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Haas, Baruch and Co. The building will cover an area of 50x120 and has been designed to accommodate the trucks operated by the owners. There will be a cement floor. The exterior of the building will be faced with repressed red brick. The plans are being prepared.

Los Angeles, Cal.—Garage, 1 and 2 story and base, brick and concrete, \$16,000. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owner, Ralph C. Hamlin. The building has been designed for a commercial garage and will cover an area of 55x155 feet. There will be a main office, sales rooms, machine shop and storage space. The first floor will be of cement. The exterior of the building will be faced with pressed brick and cement plaster. The architects are preparing the plans.

GOVERNMENT WORK AND SUPPLIES.**Boise Power Plant.**

The power plant at the Boise dam, about 12 miles from Boise, Idaho, has been thoroughly tried out and the engineers in charge have submitted a very favorable report to the Washington office of the Reclamation Service. The generator units were first started up on April 20, and the plant was put in commission, practically ready for steady operation, on May 3. All the apparatus was dried out, adjusted, and placed in operation, and no appreciable trouble occurred in any part of the plant. The butterfly gates which admit water to the turbine pits have proven very satisfactory. They can be successfully operated by two men and can be opened and closed very quickly. About 2,000 horsepower will be developed at this plant and transmitted electrically to the Arrowrock dam site, a distance of about 20 miles, where it will be used for construction purposes. The operation of the governors at Arrowrock was tested by producing the most violent fluctuation of load possible with the two cableways and other apparatus in operation. The results indicated that the governors will be able to handle this exceedingly variable load with entire satisfaction.

Hydroelectric Station Equipment.

The Isthmian Canal Commission will issue with a few days an advertisement calling for bids for the material required to complete the installation of machinery in the Gatun hydroelectric station. This equipment will include switchboards, switching group, transformers, batteries, as well as an air compressor and the necessary crane equipment. This material will complete the purchase previously made under canal circular 648, bids for which were opened October 9, 1911.

Reclamation Work Authorized.

The Secretary of the Interior has authorized the Reclamation Service to proceed with the construction of the pumping plant, distribution system and transmission line for the western extension of the Minidoka irrigation project, Idaho. The extension will

cover an area of 2,200 acres of high land lying about six miles northwest of Barley. Water for irrigation will be pumped by power generated at Minidoka dam and transmitted electrically down the valley. The estimated cost of the work is \$72,500.

Portland Cement.

The Secretary of the Interior has awarded contract for 10,000 barrels of cement to the Iola Portland Cement Co. and for 10,000 barrels of cement to the Ash Grove Lime and Portland Cement Co., both of Kansas City, Mo., at 70 cents per barrel f. o. b. works. This cement is to be used in connection with the construction work now going forward on the Salt River irrigation project, Ariz.

Bridge Abutments.

The Secretary of the Interior has accepted a bid of the Midwest Engineering Co., of Omaha, Neb., in the sum of \$16,380.30 for the construction of drop, chute, and bridge abutments on the Indian Creek and Trail Hollow diversion canals, Strawberry Valley irrigation project, Utah.

Santa Cruz, Cal., Vault Shelving.

Bids were received May 23 by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at Santa Cruz, Cal., as follows:

Keyless Lock Co., Indianapolis, Ind., \$250.

Berger Mfg. Co., Canton, O., \$259.75. Canton Art Metal Co., Canton, Ohio, \$294.

Art Metal Construction Co., Jamestown, N. Y., \$360.

Concrete Intakes and Bridges.

The Secretary of the Interior has accepted a bid of W. O. Morrison, of Denver, Colo., in the sum of \$13,805.75 for the construction of concrete intakes and bridges on the Indian Creek and Trail Hollow diversion canals, Strawberry Valley irrigation project, Utah.

Navajo Indian School.

The contract for the construction of a stone school house at the Navajo Indian school, Ariz., has been awarded to W. D. Lovell, Minneapolis, Minn., at \$16,800.

Colorado River Indian School.

The following bids were received by the Commissioner of Indian Affairs, Washington, D. C., on May 24 for the construction of a frame building and sewer extensions at the Colorado River Indian School, Ariz.:

Item 1, sewer system; 2, frame employees quarters; 3, frame officers' quarters.

W. D. Lovell, Minneapolis, Minn., item 1, \$1,100; 2, \$1,100; 3, \$4,200, time, 180 days; all or none.

George Hinchliff Co., Chicago, Ill., item 1, \$1,010; 2, \$3,900; 3, \$4,650; time, 190 days.

John Plato, Hemet, Cal., item 1, \$850; 2, \$3,925; 3, \$4,310; for all work, \$9,685; time to complete, 120 days.

HALLS AND SOCIETY BUILDINGS.

Walla Walla, Wash.—Lodge hall, 5 story and base, brick and steel, \$75,000. Architect, Richard H. Ulrich,

Palmer Block, Seattle associated with Carl L. Linde, Portland, Owners, Walla Walla Elks' Hall Association. This work has been mentioned a number of times before in these columns. Bids have been received by Chairman William Metz of Walla Walla and T. J. McKinney, Sec'y of the Elks will announce the awards shortly.

Seattle, Wash.—Auditorium, 1 story and base, brick, \$50,000. Architects, Howells and Stokes, Henry Bldg., Seattle. Owners, Metropolitan Building Co. The building will cover a large area and will contain a modern heating and ventilating system, hardwood floors and special lighting effects. The lease has been signed and the owners will erect the building by Day Labor. They report that the structure will be complete by July 1st.

HOSPITALS.

Placerville, El Dorado Co., Cal.—Hospital, 1 story and base, frame. Cost not stated. Architect, Clarence L. Stiles, Willows, Owens, El Dorado County. The building will cover an area of 7352 feet. A smaller structure adjoining the hospital will contain a steam heating system for the main building. There will be a concrete foundation and exterior walls covered with rustic or shiplap. The roof will be of metal tile. The interior of the building will be finished in pine and redwood. Plans have been completed and are now in the hands of the County Surveyor. Bids will be opened on July 2nd, as per proposal which appears in another column of this issue.

HOTELS.

San Francisco—Hotel and stores, 15 story and base. Class A construction. Cost not stated. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Mr. Levy. The building will be erected on Geary street near Mason. The construction will be fireproof throughout. There will be in the neighborhood of 300 rooms all with connecting baths. The mechanical equipment will include steam heat, wall beds, elevator service and a vacuum cleaning system. The interior trim will be of metal and hardwoods. The exterior treatment of the building has not been fully decided upon. The architects are now engaged on the working drawings.

San Francisco—Hotel and stores, 5 story and base, brick and steel, \$70,000. Architect, Henry S. Starnard, Mills Bldg., S. F. Owner, Mr. Bickel. This work has been mentioned here before. The excavating is now well advanced and a contract for the concrete foundations has been awarded. Bids on the balance of the work are now being taken. The building will be one of the most modern structures erected in the district south of Market street since the fire.

San Francisco—Hotel and stores, 3 story and base, frame, \$24,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, E. A. Hammersmith. The building will be erected on Harrison street and will contain a number of stores on the first floor and in the neighborhood of 52 rooms, a large percentage of which will have connecting baths. The interior finish will be of pine throughout. Running water has been provided for all rooms. The ex-

terior of the building will be covered with shiplap. The plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel and stores, 1 story and base, brick and steel, \$50,000. Architect, Morgan Wall and Morgan, Story Bldg., Los Angeles. Owner, A. Berendson. The building has been mentioned in these columns before when the plans were first started. The working drawings have been completed and figures are being taken. The building will contain stores on the first floor and 60 rooms, room and 30 baths on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel addition, 1 story and base, brick, \$25,000. Architects, Austin and Russell, Wright and Callender Bldg., L. A. Owners, W. S. Crane and George A. Langdon. The building will have a street frontage of 250 feet and will extend through from street to street. There will be in the neighborhood of 180 rooms and 120 baths. The interior will be handsomely finished. There will be steam heat, elevators and all other modern conveniences. The exterior of the building will be faced with cement plaster. There will be a complete steel frame. The plans are being prepared.

San Francisco—Hotel and steel, 6 story and base, brick and steel, \$30,000. Architects, Schfield & Kitching, Chase Bldg., S. F. Owner, Mrs. Emily Flood. This work has been mentioned here before when the plans were first out for figures. Certain revisions have been made and new figures are now being taken. The building will be erected at O'Farrell and Taylor streets and will be modern in all its appointments. The exterior will be faced with pressed brick.

San Francisco—Hotel, 2 story and base, brick. Cost not stated. Architects, Fabre & Bearwald, Western Metropolitan Bank Bldg., S. F. Owner's name withheld. The building will cover a ground area of 1849 feet, and will contain in the neighborhood of 200 rooms and baths. The interior will be finished in pine. There will be hot and cold running water in all rooms. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

San Francisco—Hotel and stores, 4 story and base, brick \$40,000. Architect, Joseph Cohen 1540 ave. S. F. Owner, L. Rosenberg. The building is being designed for a store on the first floor and a number of single rooms on the upper floors. There will be 80 rooms and baths. The interior trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Hotel and stores, 7 story and base, brick and steel, \$75,000. Architect, C. A. Messendorfer, Humboldt Bank Bldg., S. F. Owner, Edward H. Mitchell. This work has been mentioned here before when the plans were first preparing the plans. The building will be modern in all particulars. The first floor will contain several stores besides the hotel lobby and general offices. There will be in the neighborhood of 250 rooms and a large number of baths on the upper floors. There will be steam heat, elevator service and other modern con-

veniences. The exterior will be faced with pressed brick and cement plaster. Plans are complete and a segregated contract will be awarded.

Oakland, Cal.—Hotel and stores, 7 story and base, brick and steel, \$75,000. Architect, Geo. A. Russell, Central Hotel Bldg., Oakland. Owners, Arthur A. Miller. This work was mentioned here when the building was ordered. It is considered a three-story structure. The plan has been altered and two more stories will be erected. The plans are complete and the owners will let several sub-contracts.

Los Angeles, Cal.—Hotel 4 story and base, brick and steel. Cost not stated. Architects, A. R. Bolton, 141 North Spring St. L. A. Owner, Edward F. R. Vail. The building will be 78x150 feet with an L. 10 feet square. There will be five stories on the first floor beside the main lobby. The upper floors will contain 120 rooms and baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The architect is now preparing the plans.

LIBRARY.

Oregon City, Ore.—Library, 1 story and base, brick. Cost not stated. Architect, E. C. McCarthy, Portland. Owners, Oregon City Library Trustees. The selection of an architect for this building has just been made. The design is in the classic style with the exterior of the building faced with pressed brick. The structure will cover an area of 6578 feet and will contain the usual public rooms, reading room and offices for the librarian and assistants. There will be a hot water heating system. Plans for the work will be completed as rapidly as possible and a full or announcement of bids will be published in these columns.

Los Angeles, Cal.—Library, 1 story and base, brick, steel. Cost not stated. Architects, Hunt and Burns, Langdon Bldg., L. A. Owners, City of Los Angeles. This work has been mentioned here before when the architects were first commissioned to prepare plans for the building. The drawings are now complete and bids will be opened by the construction on June 15th. Bids are being taken by E. R. Perry, Clerk of the Board of Library Trustees, Hamburger Bldg., L. A.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Portland, Ore.—Car barns, 1 story and base, cement, brick and steel, \$25,000. Architectural Dept., Portland Railroad, Light and Power Co. Portland. Owners, Portland Railroad, Light and Power Co. The company's architect has complete working drawings for a large brick and steel structure which is to replace the old frame buildings. The old buildings are now being wrecked and bids for the new work will be called for shortly.

Contracts Awarded

Chenab, Wash.—Passenger station, 1 and 2 story and base, brick and steel, \$15,000. Architect, Engineering Dept., Northern Pacific R. R. Co. Owners, Northern Pacific R. R. Co. Contractors, Rounds-Hurson Co., Globe Bldg., Seattle. Contract price \$15,000.

Vancouver, B. C.—Passenger station, class A construction, \$1,300,000. Architect's name not given. Owners, Canadian Pacific R. Co. Contractors, Westinghouse-Church-Kerr Co., New York City. Contract price \$1,400,000.

RESIDENCES.

San Francisco—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, Louis Heilmann, 1234 Jones St., S. F. The dwellings have been designed for seven-room houses with baths. The interior finish will be of pine with some hardwood floors. There will be both coal and gas grates. The mantels will be of tile. The tile will also be used in the baths. The exteriors of the dwellings will be covered with cement plaster on metal lath and shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, H. Fauth, 29 Alma St., S. F. The dwelling will contain six rooms and bath. The interior finish will be of pine. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Residences, 3, 2 story and base, frame, \$1,000 to \$6,000 each. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwellings will range from six to eight rooms and baths. The interior trim will be of pine and redwood with oak floors in the principal rooms of all three houses. The eight-room house will have furnace heat. There will be open fire places and brick or tile mantels. Tile will also be used in the baths and kitchens. The exteriors of the dwellings will be covered with cement plaster on metal lath and brick veneer. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$5,500. Architect, none. Owner, W. W. Rednal, 2500 Filbert St., S. F. The dwelling has been designed for an eight-room house with baths. The interior will be finished in pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile wainscot in the bath. The exterior will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residences, 5, 2 story and base, frame, \$2,750 each. Architect, none. Owner, P. Nelson, 39 Presidio Terrace, S. F. The dwellings will be erected for sale on a large tract in the Richmond District. Each house will contain six rooms and bath. The interior trim will be of pine and redwood. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic and shingles. The plans are in the hands of the owner and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$6,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, P. B. Cornwall. The dwelling will contain eight rooms, laundry, bath and sleeping porch. The interior finish will be of pine, redwood and hardwoods with oak floors in the principal

rooms. There will be furnace heat and open fire places. The mantels will be of tile. Tile will also be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The roof will be of terra cotta tile. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect none. Owners, Morgans Bros., 554 630 St., Oakland. The dwelling will contain 5 rooms and bath. The interior will be finished in pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$3,500. Architect none. Owner, C. J. Pfirang, 4587 Claremont avenue, Oakland. The dwelling has been designed for a five room house with bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, Clyde H. Brewer, 1738 35th avenue, Oakland. Owner, William E. Neary. The dwelling has been designed for a five room house with bath. The interior finish will be of pine with some oak floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$6,000. Architect, Geo. Anderson, 5455 College avenue, Berkeley. Owner, E. W. Fuss. The dwelling will contain 10 rooms and baths. The interior will be finished in pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile and brick. The exterior of the house will be of cement plaster on metal lath. The plans are complete and the work is now out for figures.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$6,500. Architect, William H. Ratcliff, First National Bank Bldg., Berkeley. Owners, Claremont Land Co. The dwelling has been designed for an eight room house with baths and all modern conveniences. The interior finish will be of redwood and oak with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The roof will be of terra cotta tile. The tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, M. W. Anthony. The dwelling has been mentioned here before. There will be seven rooms and bath. The interior trim will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with ce-

ment plaster on metal lath. The architect has completed the working drawings and the building will be erected by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,300. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, W. J. Wythe. Oakland, Cal.—Bungalow, 1½ story and base, frame, \$3,000. Architect, Ivan C. Satterlee, 470 13th street, Oakland. Owner, C. M. MacGregor. The dwelling will contain 8 rooms and bath. The interior trim will be of pine with some elm panels. There will be oak floors. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Colfax, Placer Co., Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, Allen D. Fellows, East Auburn. Owner, E. Franklin, Colfax. The dwelling will be erected five miles out of Colfax and has been designed as a country home. The interior finish will be of pine and redwood with some hardwood floors. There will be a large open fire place in the living room with an attractive brick mantel. Tile will be used in the bath. The exterior of the dwelling will be covered with shingles. The architect has completed the plans and specifications and the work is now being done by Day Labor.

SCHOOLS.

Oakland, Cal.—School work, grading etc. Cost not stated. Architect's name not given. Owners, City of Oakland. Bids will be opened on June 12th for the grading, including the removal of certain concrete work at the Fremont High School. Plans may be secured from the Clerk of the School Board, Oakland.

Krafton, Los Angeles Co., Cal.—College building, reinforced concrete and frame, \$500,000 to \$1,000,000. Architect, Arthur S. Heinemann, San Fernando Bldg. L. A. Owners, Theosophical Society. The architect is now completing the working drawings for the administration building, which is to be the first of the group to be erected. This structure will be of fire-proof construction, 50x118 feet and three stories in height. The plans for the balance of the work are still in the preliminary stage and no details can be given.

Vinehall, Los Angeles Co., Cal.—School, 1 story and base, brick and concrete, \$12,000. Architects, Tuttle and Hopkins, Delta Bldg. L. A. Owners, Vinehall School District. The building will be 66x118 feet and will contain four standard class rooms and an auditorium seating 300 people. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with cement plaster. The bids for the construction will be opened by the School Trustees on June 15th.

Sawtelle, Los Angeles Co., Cal.—School, 1 story and base, brick, \$20,000. Architects, Tuttle and Hopkins, Delta Bldg. L. A. Owners, Sawtelle School District. The new building will be 100x71 feet and will contain 8 class rooms, only four of which will be finished at this time. The architects are also preparing plans for alterations to the present frame building, the cost of which is included in the \$20,000. The exterior of the new structure will be faced with blue brick. Plans are being prepared.

Contract Awarded.

Port Angeles, Wash.—School, 2 story and base, brick, \$50,000. Architects, C. Lewis Wilson and Co., Northern Bank Bldg., Seattle. Owners, Port Angeles District. Contractor, Christ Koppler, 1309 Seventh avenue, Seattle. Contract price \$50,000.

SEWERS, STREET WORK AND WATER SYSTEMS.

Alameda, Alameda Co., Cal.—Power house, 1 story and base, reinforced concrete and steel, \$150,000. Engineer, Joseph E. Kahn, Supt. Electric Dept., Alameda. Owners, City of Alameda. The plans for a new power station to replace the old frame structure now in use are being prepared. Bonds to the amount of \$150,000 have been sold and construction will be started as soon as the plans can be completed. The building will be fireproof throughout. The exterior will be faced with cement plaster.

Rio Vista, Solano Co., Cal.—Sewers and storage tank, \$25,000. Engineer, E. N. Eager, Fairfield. Owners, City of Rio Vista. Bonds for \$25,000 are now being sold, the proceeds of which will be used in the construction of a new sewer system and a large water

storage tank. The engineer has plans well advanced for the work and bids will be called for shortly.

STORES & OFFICE BUILDINGS.

San Francisco, Cal.—Stores and lofts, 1 story and base, brick and steel, \$10,000. Architect, W. H. Weeks, 251 Kearny street, S. F. Owner, H. B. Fisher. The building will be erected on Mission street and will contain stores on the first floor and lofts on the upper floors. There will be elevator service. The exterior of the building will be faced with pressed brick. The architect is taking preliminary figures to establish the exact cost of the work.

San Francisco, Cal.—Stores, 1 story and base, brick, \$10,000. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Seoble. The building will cover an area of 60x67 feet. There will be a number of small stores with large plate glass display windows. The interiors will be finished in pine. The exterior of the building will be faced with cement plaster. Considerable structural steel will be used. The plans are complete and the work will be done by Day Labor.

San Francisco, Cal.—Stores, 1 story and base, frame, \$5,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Skaller Realty Co. The building will be erected on Mission street near 23d street. There will be two stores. The interiors will be finished in pine. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor, work starting about July 1st.

San Francisco, Cal.—Stores and lofts, 6 story and base, reinforced concrete and steel, \$70,000. Architects, Frye and Schastey, Monadnock Bldg., S. F. Engineer, A. E. Hornell, Pacific Bldg., S. F. Owners, H. S. Crocker Co. The building will be erected on lower Market street and will be occupied largely by the owners. There will be several stores on the first floors, the upper floors being arranged for lofts. There will be both freight and passenger elevators, steam heat and an automatic sprinkler system. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Contracts Awarded.

Oakland, Cal.—Store, 1 story and base, Class A construction. Cost not stated. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Kahn Bros. Contractor, P. J. Walker, Monadnock Bldg., S. F. Note—This work has been taken on the percentage basis and no contract price is stated.

Seattle, Wash.—Stores and offices, height not given, reinforced concrete, \$200,000. Architects, Blackwell and Baker, Northern Bank Bldg., Seattle. Owners, Sears-Roebuck Co. Contractors, Brandt Construction Co., Lyon Bldg., Seattle. Contract price \$200,000.

Los Angeles, Cal.—Stores and offices, 1 story and base, class A. Cost not stated. Architect, Fred R. Horn, Douglas Bldg., L. A. Owners, Robert Marsh and Frank R. Strong, Contractors, Alta Planing Mill Co., 820 McGarry street, L. A. Contract for reinforced concrete work, hollow tile partitions, plastering and brick work. Contract price \$75,000.

THEATRES.

San Bernardino. San Bernardino Theat. Co. Theatre alterations, brick and concrete. Cost not stated. Architect: W. J. Saunders, Walnut and Calender Bldg. L. A. Owners: San Bernardino Opera House Co. The work above mentioned will practically include the rebuilding of the present structure and the addition of a space 14x172 feet. There will be entire new decorations and furniture. The plans are being prepared and figures will be called in shortly.

San Pedro, Los Angeles, Cal. Theatre, 2 story and base, brick, \$20,000. Architect: A. Lawrence V. B. Union Oil Bldg. L. A. Owner: Luke Kelly. The building has been designed for a moving picture theatre and lodge hall on the second floor. The interior of the theatre will be finished in ornamental plaster. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

Engine, Ore. Theatre, 2 story and base, brick and steel, \$35,000. Architects: Lewis and Lewis, Portland, Ore. The Eugene Theatre Co. Contractor: O. Heikart. Eugene, general contract, price not stated. C. S. Frank Eugene, brick and stone work. Contract price not stated.

SEALED PROPOSALS.

C., until 10 o'clock a. m., June 18, 1912, and publicly opened immediately thereafter, to furnish at the Navy Yard, Mare Island, Cal., a quantity of material supplies, as follows: Sch. 1578. Gas, gas-burning apparatus. Sch. 1579. Electric spot welding machine. Sch. 1583. Pumps in oils, etc. Sch. 1584. Rubber fire hose, ship's fishing seines, fish twine. Sch. 1585. Flexible machinery, steel bolts and nuts. Sch. 1586. Salt water and fresh water laundry soap. Sch. 1587. Leather belting. Sch. 1588. Portland cement. Applications for proposals should designate the schedules desired by number. Blank proposals will be furnished upon application to the Navy Pay Office, San Francisco, Cal., or to the Bureau, T. J. COWIE, Paymaster-General, U. S. N.

PROPOSALS FOR CEMENT.

(Bids close June 13.)

CEMENT. U. S. Engineers Office Seattle, Wash.—Sealed proposals for furnishing 20,000 barrels of Portland cement will be received here until 12 m. July 1, 1912, and then publicly opened. Information on application. J. B. CAVANAUGH, major, engineers.

PROPOSALS FOR SAND AND GRAVEL.

(Bids close June 28.)

SAND AND GRAVEL.—U. S. Engineer Office, Seattle, Wash.—Sealed proposals for furnishing sand and gravel will be received here until 12 m. June 28, 1912, and then publicly opened. Information on application. J. B. CAVANAUGH, major, engineers.

NOTICE TO CONTRACTORS.

(Bids close June 12.)

NOTICE is hereby given that the

High School Board of the City of Oakland and of Oakland High School District of Alameda County, State of California, hereby calls for bids for the doing and performing of the following work, that is to say, for the grading, including the removal of concrete work of portions of the Fremont High School site, located at Foothill Boulevard and Forty-sixth avenue, Oakland, in accordance with the specifications thereof adopted for such piece of work by the High School Board on the 27th day of May, 1912 which are now on file in the office of the Clerk of the High School Board, to which specifications reference is hereby made for a detailed description of the work to be done, and the supplies to be furnished. Copies of said specifications are on distribution at the office of the Clerk of the High School Board, located in the City Hall Annex, 1728 Broadway, Oakland, California.

All bids must be accompanied by a certified check for at least 10 per cent of the amount of the bid, said check to be made payable to the order of J. W. McClymonds, Clerk of the High School Board. All bids must be made on blank forms furnished by the Clerk of said High School Board. All bids must be delivered at the office of the High School Board, located at above stated, prior to the hour of 5 p. m. on the 12th day of June, 1912. All bids will be opened by said High School Board at 5 p. m. on the 12th day of June, 1912, at the office of said Board, located as above stated.

The High School Board reserves the right to reject any or all bids.

By order of the High School Board,
J. W. McCLYMONDS,
Clerk.

PROPOSALS FOR PIER.

(Bids close June 27.)

OFFICE of the State Board of Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal.

Sealed proposals or bids will be received at this office at or prior to 11 o'clock a. m. on Thursday, June 27, 1912, for furnishing material and constructing Pier No. 28, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board April 16, 1912, and on file in this office, to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of fresh cut, close grained, best class Douglas yellow fir plies, merchantable yellow fir lumber, redwood lumber, Portland cement, gravel, reinforcing materials, castings, structural steel, rods, bolts, spikes, car springs, rails and fastenings, asphalt paving, roofing and painters' materials, glass, window frames, etc. All material used in the structures will be subjected to a rigid examination and test, and if found defective, under size, unsuitable or not as specified will be condemned and must be removed from the work by the Contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal (proposal No. 2 on bidding

blank); said check to be made payable to the order of the Secretary of the Board as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid and the award of the contract, enter into a written contract to do said work, according to the plans and specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate, with two or more sureties, to be approved by said Board, and conditions for the faithful performance by the Contractor of all the terms and conditions of said contract, nor will said bid be considered by the Board unless delivered to the Secretary, or to the Assistant Secretary, at the office of the Secretary at or prior to 11 o'clock a. m. on Thursday, June 27, 1912, at which time and place the bids will be opened. The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids. Plans and specifications of this work to be had at Room No. 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid, "Bid for Pier No. 28."

J. J. DWYER,

GEORGE A. HULL,

THOMAS S. WILLIAMS,

Board of State Harbor Commissioners.

A. V. SAPH,

Assistant State Engineer.

PROPOSALS FOR BUILDING.

(Bids close July 2.)

OFFICE of the Clerk of the Board of Supervisors of the County of El Dorado, State of California.

Pursuant to an order of the Board of Supervisors of the County of El Dorado, State of California, made and entered of record on the 23d day of May, A. D. 1912, and in accordance with law in such case made and provided:

Notice is hereby given that sealed bids will be received by the undersigned up to and not later than the hour of 2 o'clock p. m. of the 2nd day of July, 1912, at the office of the said Board in the rooms of the said Board in the Bennett Building so-called, in the City of Placerville, County of El Dorado, State of California, for the furnishing of all labor, materials and mechanical workmanship necessary for the building, construction and completion of a new County Hospital including the furnishing and installation of steam heating plant and all heating apparatus and fixtures, complete, in the City of Placerville aforesaid, situate on the grounds of the said County, and clearing the said grounds for the reception of said building, in accordance with the plans and specifications heretofore prepared and made and by the said Board of Supervisors adopted therefor; which said plans and specifications may be seen and examined during office hours by intending bidders at the office of the said Clerk of the said Board in the City of Placerville.

All bids must be submitted on blank forms furnished by the Clerk of the said Board and must be accompanied with a certified check on some solvent bank in a sum equal to ten (10) per

cent of the amount of such bid.

The said Board of Supervisors reserves the right to reject any and all bids and to waive any informality in any bid received.

TED F. ATWOOD,
County Clerk.

PROPOSALS FOR STEEL, CONCRETE AND WOOD.

(Bids close June 24.)

UNITED STATES. Engineer's Office, Customs House Building, San Francisco, Cal.—Sealed proposals for the construction of various constructions of steel, concrete, tile and wood, to accommodate the Coast Artillery equipment of the Armory Building to be erected in San Francisco, Cal., for the California State Militia, National Guard, including electric wiring, etc., will be received at this office until 12 o'clock, noon, Thursday, June, 20th, 1912, and then publicly opened. Information will be furnished on application to this office. THOMAS H. REES, Lieut. Col., Corps of Engineers, U. S. A.

PROPOSALS FOR STREET WORKS.

(Bids close June 19.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 19th day of June, 1912, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

(1) That the crossing of Bosworth and Cuyler streets be improved by constructing granite curbs and artificial stone sidewalks on the angular corners thereof, and by paving the roadway thereof with an asphalt pavement, consisting of a six (6) inch concrete foundation and a two (2) inch asphaltic wearing surface, excepting on that portion thereof required by law to be kept in repair by the railroad company having tracks thereon.

(2) That the crossing of Lawton street and Forty-sixth avenue be improved by grading to official line and grade, constructing redwood curbs and broken brick sidewalks on the angular corners thereof, and by paving the roadway thereof with a broken rock pavement.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) days and completed within ninety (90) days from the date of the contract to be made and entered into therefor.

(3) That the intersection of Sickles avenue and Sears street be improved by constructing granite curbs and artificial stone sidewalks on the angular corners thereof, by paving the roadway thereof with an asphalt pavement, consisting of a six (6) inch concrete foundation and a two (2) inch asphaltic wearing surface; and by constructing a brick cesspool (catch-basin) with cast iron frame, grating and trap and ten (10) inch vitrified, salt glazed, ironstone pipe culvert on the easterly corner thereof.

PROPOSALS FOR SEWERS.

(Bids close June 19.)

OFFICE of the Board of Public Works of the City and County of San

Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 19th day of June, 1912, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

That the following vitrified, salt-glazed, ironstone pipe sewers and appurtenances be constructed:

An eighteen (18) inch with one (1)

brick manhole with cast-iron frame and cover and galvanized wrought-iron steps along the center line of Twentieth avenue, between the easterly and center lines of Balboa street; an eight (8) inch along the center line of Twentieth avenue, between the center and southerly lines of Balboa street, and an eight (8) inch along the center line of Balboa street, between the easterly and westerly lines of Twentieth avenue.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—6 story and base, reinforced concrete, \$80,000. San Francisco, Architect, Charles E. Whittlesey, Pacific Bldg., S. F. Owner, E. A. Meyers. The building will be erected on a corner site and will contain stores on the first floor and a large number of two, three and four room apartments on the upper floors. All apartments will have connecting baths and wall beds. There will be steam heat, a vacuum cleaning system and elevator service. The interior of the building will be handsomely finished in pine and hardwoods. The exterior will be faced with cement plaster. The architect is now taking figures for the construction.

Pier—Wood and concrete. Cost not stated. San Francisco, Engineer, Assistant State Engineer Saph. Ferry Bldg., S. F. Owners, State of California. The engineer has completed the working drawings for pier No. 28, which will be similar in design to piers 36 and 32. The State Board of Harbor Commissioners will open bids for the construction of this work on June 25th. The official proposal for the work appears in another column of this issue.

Flats—2 story and base, frame, \$12,000. San Francisco, Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will contain two residential flats of seven and eight rooms each with baths. The first floor of the building will be given over to a garage. The interiors of the flats will be handsomely finished in hardwoods and pine and white enamel. There will be a open fire places and tile or brick mantels in the living room of each of the flats. The exterior of the building will be covered with pressed brick veneer and cement plaster. The plans are complete and the architects are taking figures on the work.

Hotel and Stores—15 story and base, Class A construction. Cost not stated. San Francisco, Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Mr. Levy. The building will be erected on Geary street near Mason. The construction will be fire proof throughout. There will be in the neighborhood of 300 rooms all with connecting baths. The mechanical equipment will include steam heat, wall beds, elevator service and a vacuum cleaning system. The interior trim will be of metal and hardwoods. The exterior treatment of the building has not been fully decided upon. The architects are now

engaged on the working drawings.

Hotel and Stores—2 story and base, brick and steel, \$70,000. San Francisco, Architect, Henry Sherrmund, Mills Bldg., S. F. Owner, Mr. Bickel. This work has been mentioned here before. The excavating is now well advanced and a contract for the concrete foundations has been awarded. Bids on the balance of the work are now being taken. The building will be one of the most modern structures erected in the district south of Market street since the fire.

Hotel and Stores—5 story and base, frame, \$20,000. San Francisco, Architect, Edward T. Foulkes, Cracker Bldg., S. F. Owner, F. A. Hammer-Smith. The building will be erected on lower Harrison street and will contain a number of stores on the first floor and in the neighborhood of 52 rooms, a large percentage of which will have connecting baths. The interior finish will be of pine throughout. Running water has been provided for all rooms. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

Hotel and Stores—6 story and base, brick and steel, \$50,000. San Francisco, Architects, Salfeld & Kohlberg, Clinic Bldg., S. F. Owner, Mrs. Emily Flood. This work has been mentioned here before when the plans were first out for figures. Certain revisions have been made and new figures are now being taken. The building will be erected at O'Farrell and Taylor streets and will be modern in all its appointments. The exterior will be faced with pressed brick.

Hotel—2 story and base, brick. Cost not stated. San Francisco, Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will cover a ground area of 48x19 feet and will contain in the neighborhood of 20 rooms and the neighborhood of 12 bathrooms and baths. The interior will be finished in pine. There will be hot and cold running water in all rooms. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Hotel and Store—3 story and base, brick, \$10,000. San Francisco, Architect, Joseph Cohen, 45 Kearny St., S. F. Owner, I. Rosenberg. The building has been designed for a store on the first floor and a number of single rooms on the upper floors. There will be several baths. The interior trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel and Stores—7 story and base,

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, F. Rogers Rich 1942, Oakland. The building will contain stores on the first floor and three three-room apartments on the upper floor. The interior finish will be of pine. The exterior will be finished in shiplap. The plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame, \$25,000. Oakland, Cal. Architect, none. Owner, Mrs. C. E. Renard, 311 East 19th St., Oakland. The building has been designed to contain two modern flats of five and six rooms each with baths. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be open fire places and tile mantels in the living rooms. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Hotel and Stores—2 story and base, brick and steel, \$75,000. Oakland, Cal. Architect, Clay N. Farrell, Central Bank Bldg., Oakland. Owners, Morris and Muller. This work was mentioned here when the building was only considered as a five story structure. The plans have been altered and two more stories will be erected. The plans are

complete and the owners will let several subcontractors.

Apartment House—2 story and base, frame, \$8,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, George W. Kraft, 2136 M Kimb. Ave., Berkeley. The building has been designed to contain eight small two-room apartments with baths. The interior finish will be of pine. There will be open fire places. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—1 story and base, frame, \$500. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, F. E. Cornwall. The dwelling will contain eight rooms, laundry, bath and sleeping porch. The interior finish will be of pine, redwoods and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the building will be covered with cement plaster on metal lath. The roof will be of terra cotta tile. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owners, Morgan Bros, 551 43rd St., Oakland. The dwelling will contain five rooms and bath. The interior will be finished in pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, J. J. Pittman, 1487 Claremont Ave., Oakland. The dwelling has been designed for a five room house with bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, Clyde H. Brewer, 1738 35th Ave., Oakland. Owner, William F. Neary. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine with some oak floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with 8 inches. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, George Anderson, 5456 College Ave., Berkeley. Owner, F. W. Frost. The dwelling will contain ten rooms and bath. The interior will be finished in pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work is now out of hand.

Residence—2 story and base, frame, \$6,500. Berkeley, Alameda Co., Cal. Architect, William H. Rathbun, First National Bank Bldg., Berkeley. Owners, Claremont Land Co. The dwelling has been designed for an eight-room

house with baths and all modern conveniences. The interior finish will be of redwood and oak with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The roof will be of terra cotta tile. The tile will also be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,000. Oakland, Cal. Architect, Sidney E. Newson, Nevada Bank Bldg., S. F. Owner, M. W. Anthony. The dwelling has been mentioned here before. There will be seven rooms and bath. The interior trim will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. The architect has completed the working drawings and the building will be erected by Day Labor.

Residence—2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, W. J. Wythe. The house will contain seven rooms, laundry and two sleeping porches. The interior finish will be of redwood with some oak floors. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, D. J. Pfong, 4547 Claremont Ave., Oakland. The dwelling will contain five rooms and bath. The interior finish will be entirely of pine. There will be some oak floors and open fire places. The mantels will be of tile. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,800. Oakland, Cal. Architect, none. Owners, Price Bros, 498 Alcatraz Ave., Oakland. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are in the hands of the owners and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, A. T. Foster, 618 61st St., Oakland. The dwelling will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,400. Berkeley, Alameda Co., Cal. Architect, none. Owner, R. H. Van Sant, First National Bank Bldg., Oakland. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal

lath. The plans are complete and the work will be done by Day Labor.

Residence—3 story and base, frame, \$8,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, John Fay. The dwelling will contain eight rooms and baths. The interior finish will be of pine, redwood and oak with some ornamental iron grilles and hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1½ story and base, frame, \$3,200. Oakland, Cal. Architect, none. Owner, W. A. Farrie, 16 Monte Vista Ave., Oakland. The dwelling has been arranged for a six-room house with bath. The interior trim will be of pine and redwood with some oak floors. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with rustic and shingles. The plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$2,250. Oakland, Cal. Architect, O. E. Evans, 2567 Mission St. S. E. Owner, J. P. Flood. The dwelling will contain five rooms and bath. The interior finish will be entirely of pine. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,300. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, C. M. MacGregor. The dwelling will contain seven rooms and bath. The interior finish will be of pine with oak floors in the principal rooms. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,900. Berkeley, Alameda Co., Cal. Architect, none. Owners, Schmidt and Peichel, 1626 Josephine St., Berkeley. The dwelling will contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shingles. The plans are in the hands of the owners and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,500. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, Mary R. Schuyler. The dwelling will contain seven rooms, bath and laundry. The interior trim will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. There will be some tile in the bath. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1½ story and base, frame, \$3,000. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, C. M. MacGregor. The dwelling will contain eight rooms and bath. The interior trim will be of pine with some elm panels. There will be oak floors. The exterior will be open fire places and brick mantels. The

exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

School Work, Grading, Etc.—Cost not stated. Oakland, Cal. Architect's name not given. Owners, City of Oakland. Bids will be opened on June 12th for the grading, including the removal of certain concrete work at the Mont High School. Plans may be secured from the Clerk of the School Board.

Power Houses—1 story and base, reinforced concrete and steel, \$15,000. Alameda, Alameda Co., Cal. Architect, Joseph B. Kahn, Superintendent Electric Dept., Alameda. Owners, City of Alameda. The plans for a new power station to replace the old frame structure now in use are being prepared. Bonds to the amount of \$15,000 have been sold and construction will be started as soon as plans can be completed. The building will be fireproof throughout. The exterior will be faced with cement plaster.

Contracts Awarded.
Store—1 story and base, Class A construction. Cost not stated. Oakland, Cal. Architect, C. W. Duckey, Central Bank Bldg., Oakland. Owners, Kahn Bros. Contractor, P. J. Walker, Monadnock Bldg., S. E. Note. This work has been taken on the percentage basis and no contract price is stated.

Apartment House—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, Mrs. Anna M. Moore. The building will contain about seventy rooms arranged in suites of two and three rooms each with private baths. There will be elevator service, wall beds, steam heat and a vacuum cleaning system. The exterior will be faced with pressed brick. The architects are working on the detail drawings.

Apartment House—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, S. Tibben Norton, Title Insurance Bldg., L. A. Owner, Harry P. Malenbergh. The building will be 50x100 feet and will contain seventy rooms. The suites will range from two to three rooms and between. There will be elevator service, steam heat and wall beds. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Scott Quintin, Story Bldg., L. A. Owner, W. H. Griswold. The building will contain sixty apartments of two and three rooms each with bath. There will be a central heating system, wall beds and vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, F. R. Bogue. The building will contain 66 rooms arranged in suites of two and three rooms each with connecting baths. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Apartment House—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, H. Stanley Benedict. The building will be 50x128 feet. There will be in the neighborhood of 63 rooms arranged in two and three room suites with connecting baths. There will be steam heat, wall beds and elevator service. The exterior of the building will be faced with pressed brick. The plans are now being prepared.

Conrt House—3 story and base, reinforced concrete and stone, \$150,000. Ventura, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. The architects states that plans for the marble and tile work, ornamental iron, vacuum cleaning system, two vault doors and vault lining are ready for figures. Bids for this work will be opened by the Board of Supervisors on July 9th.

Laundry Addition—2 story and base, Cost not stated. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owners, White Star Laundry. The building has been designed for three stories, but at present only one story will be erected. The structure covers a ground area of 60x110 feet. The architects are now completing the working drawings and figures will be called for at once.

Garage—1 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners,

Hans, Barnich & Co. The building will cover an area of 50x120 and has been designed to accommodate the trucks operated by the owners. There will be a cement floor. The exterior of the building will be faced with repressed red brick. The plans are being prepared.

Garage—1 and 2 story and base, brick and concrete. \$16,000. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owner, Ralph C. Hamlin. The building has been designed for a commercial garage and will cover an area of 8x115 feet. There will be a main office, sales rooms, machine shop and storage space. The first floor will be of cement. The exterior of the building will be faced with pressed brick and cement plaster. The architects are preparing the plans.

Laboratory—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, City of Los Angeles. This work has been mentioned here before when the architects were first commissioned to prepare plans for the building. The drawings are now complete and bids will be opened for the construction on June 15th. Bids are being taken by E. R. Perry, Clerk of the Board of Laboratory Trustees, Hamburger Bldg., L. A.

Hotel and Stores—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, J. A. Gorman. The building has been mentioned in these columns before when the plans were first started. The working drawings have been completed and figures are being taken. The building will contain stores on the first floor and 66 guest rooms and 20 baths on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Hotel Addition—1 story and base, \$220,000. Los Angeles, Cal. Architects, Austin & Pennell, Wright & Callender Bldg., L. A. Owners, W. S. Crane and George A. Leighton. The building will have a street frontage of 220 feet and will extend through from street to street. There will be in the neighborhood of 180 rooms and 120 baths. The interior will be handsomely finished. There will be steam heat, elevators and all other modern conveniences. The exterior of the building will be faced with cement plaster. There will be a complete steel frame. The plans are being prepared.

College Building—Reinforced concrete and frame, \$500,000 to \$1,000,000. Kratona, Los Angeles Co., Cal. Architect, Arthur S. Heinenman, San Fernando Bldg., L. A. Owners, Theosophical Society. The architect is now completing the working drawings for the administration building, which is to be the first of the group to be erected. This structure will be of fire proof construction, 50x100 feet, and three stories in height. The plans for the balance of the work are still in the preliminary stage and no details can be given.

School—1 story and base, brick and concrete, \$12,000. Vineland, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Vineland School District. The building

will be 60x115 feet and will contain four standard class rooms and an auditorium seating 300 people. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with cement plaster. The bids for the construction will be opened by the School Trustees on June 15th.

School—1 story and base, brick, \$20,000. Somerville, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Somerville School District. The new building will be 60x121 feet and will contain eight class rooms, only four of which will be finished at this time. The architects are also preparing plans for alterations to the present frame building, the cost of which is included in the \$20,000. The exterior of the new structure will be faced with blue brick. Plans are being prepared.

Theatre Alterations—Brick and concrete. Cost not stated. San Bernardino, San Bernardino Co., Cal. Architect, W. J. Samuels, Wright and Callender Bldg., L. A. Owners, San Bernardino Opera House Co. The work above mentioned will practically include the rebuilding of the present structure and the addition of a stage 74x142 feet. There will be entire new decorations and furniture. The plans are being prepared and figures will be called for shortly.

Theatre—2 story and base, brick, \$60,000. San Pedro, Los Angeles Co., Cal. Architect, A. Lawrence Volk, Union Oil Bldg., L. A. Owner, Luke Kelly. The building has been designed for a moving picture theatre and lodge hall on the second floor. The interior of the theatre will be finished in ornamental plaster. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

Auditorium—1 story and base, brick, \$50,000. Seattle, Wash. Architects, Howells & Stokes, Henry Bldg., Seattle, owners, Metropolitan Building Co. The building will cover a large area and will contain a modern heating and ventilating system, hardwood floors and special lighting effects. The lease has been signed and the owners will erect the building by Day Labor. They report that the structure will be completed by July 1st.

Lodge Hall—5 story and base, brick

and steel, \$75,000. Walla Walla, Wash. Architect, Richard H. Ulrich, Pacific Block, Seattle, associated with Carl L. Linde, Portland. Owners, Walla Walla Elks' Hall Association. This work has been mentioned a number of times before in these columns. Bids have been received by Chairman William Metz of Walla Walla and T. McKinney, Secretary of the Elks, will announce the awards shortly.

Contracts Awarded.

Factory—2 story and base, reinforced concrete, \$20,000. Seattle, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Zimmerman-Iegan Shoe Co. Contractor, Matt Branigan, 412 10th Ave., Seattle. Contract price, \$20,000.

Passenger Station—1 and 2 story and base, brick and steel, \$35,000. Chehalis, Wash. Architect, Engineering Dept., Northern Pacific R. R. Co. Owners, Northern Pacific R. R. Co. Contractors, Rounds-Hurson Co., Globe Bldg., Seattle. Contract price, \$35,000.

Passenger Station—Class A construction, \$1,500,000. Vancouver, B. C. Architect's name not given. Owners, Canadian Pacific R. R. Co. Contractors, Westinghouse-Church-Kerr Co., New York City. Contract price, \$1,000,000.

Stores and Offices—Height not given, reinforced concrete, \$200,000. Seattle, Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Sears-Roebuck Co. Contractors, Randt Construction Co., Lyon Bldg., Seattle. Contract price, \$200,000.

PORTLAND AND OREGON.

Library—1 story and base, brick. Cost not stated. Oregon City, Ore. Architect, E. E. McClaran, Portland. Owners, Oregon City Library Trustees. The selection of an architect for this building has just been made. The design is in the classic style with the exterior of the building faced with pressed brick. The structure will cover an area of 62x58 feet and will contain the usual public rooms, rack room and offices for the librarian and assistants. There will be a hot water heating system. Plans for the work will be completed as rapidly as possible and a further announcement of bids will be published in these columns.

Car Barns—1 story and part basement, brick and steel, \$50,000. Portland, Ore. Architectural Dept., Portland Railroad, Light and Power Co., Portland. Owners, Portland Railroad, Light and Power Co. The company's architect has completed working drawings for a large brick and steel structure which is to replace the old frame buildings. The old buildings are now being wrecked and bids for the new work will be called for shortly.

Theatre—2 story and base, brick and steel, \$35,000. Eugene, Ore. Architects, Lewis & Lewis, Portland. Owners, The Eugene Theatre Co. Contractor, O. Heckart, Eugene, general contract, price not stated. C. S. Frank, Eugene, brick and stucco work. Contract price not stated.

OAKLAND EXCHANGE OCCUPIES NEW HOME.

Builders Now Have Commodious and Convenient Quarters on Franklin Street.

Two Floors To Be Used for Assembly Hall, Offices, and Figuring Booths.

The Builders' Exchange of Oakland has moved from the old quarters at 550 18th street to their new building, 1011 Franklin street. Their lease covers the first and second floors, and gives much more convenient and commodious quarters than they were able to have at the old stand. The first floor will be used for daily meetings, and contains besides the large assembly hall, figuring booths, private offices and phone booths connected by a private exchange. On the second floor there is a large assembly hall and offices which will be occupied by the Material Dealers' Association of Alameda County, and other Associations of Contractors.

The Assembly hall on the second floor is handsomely finished in slash grain Oregon pine panels five feet high, and is well lighted.

It is the aim of all the Associations connected with the building industry of Alameda County to make this building their headquarters and thus bring all lines of the industry to a central point. This will greatly facilitate the transaction of business, and will be of great value to all connected with the building industry, whether they be material dealer, contractor or architect.

GREAT WESTERN POWER EXTENDS TO OREGON.

The Northwestern Electric Company,

Reversible Windows

Without Weights and Cords

Inside View

This window performs all the functions of a double hung window. Perfect ventilation. Each sash works independently. No rattle. Wind and rain proof. Does not interfere with curtains or shades; Reverses perfectly. Send for details and price list.

Here you have a double casement, where each sash is reversible. Can be worked as a single casement just as easily. This is the only single casement with reversible sash.

which has been organized by the Fleischacker combine of financiers backing the Great Western Power Company, the Central California Traction Company and the Nevada Transit Company, is making improvements and developments which seem to indicate not only the extension of its power service through Northern California, but Oregon as well.

The Company will develop a hydro-electric proposition on White Salmon river, near Portland, Ore., and has let contracts for construction. A dam 150 feet high, to cost about \$500,000, will be built in the White Salmon river. Stone & Webster will do the engineering and construction work on this, while the equipment for the power station is to be furnished and installed by the General Electric Company. Herbert and Mortimer Fleischacker and William H. Crocker are the prime movers in the corporation. The company has already applied for a franchise to do power and lighting business in Portland, and thus will become a competitor of the Portland Railway and Light Company, should a franchise be granted.

The operations of the Northwestern Electric are especially interesting among power men here, owing to the recent activities of the Great Western Power Company in Central and Northern California. The great Western, before the public utilities law went into effect, quietly arranged for extending its power lines through Sonoma, Sonoma, Marin and other trans-bay counties.

OCEAN SHORE PLANS EXTENSIONS.

Earnings for this year of the Ocean Shore Railroad exceed those of any previous year, and it is believed by the directors that when the earnings are presented, together with proof that the road owes nothing to a group of financiers that it will be possible to raise \$250,000 for improvement.

With a line through to Santa Cruz, its officials believe that the troubles of the road will be ended.

The railroad applied to the state railroad commission Monday for permission to issue \$700,000 of bonds, which are to be deposited with the Union Trust company as security for the \$250,000 loan.

Crops have been good along the route and the number of summer travelers has been larger than ever. Last year was the best, from the standpoint of earnings, but the first five months of this year have far exceeded 1911's record during the same months, and the summer travel to the beaches has not yet fairly started.

The company operates 38 miles of line south from this city and 16 miles north from Santa Cruz.

NEW GOVERNMENT PUBLICATION.

Senate document 338, which contains the "Report of the Employers' Liability and Workman's Compensation Commission, is for sale by the Superintendent of Documents, Government Printing Office, Washington, D. C., in two volumes. Volume 1 consists of 214 pages, and contains the message of President Taft and report of commission with index analysis, price, 15 cents. Volume 2, 1,495 pages, contains hearings and briefs with tables of cases and general index, price \$1.

Considering the sources from which these laments for "humiliation to his office" come, it may be shrewdly suspected that the tears would not have flowed so fast if the President had received harder blows and the former President had hit weaker ones. Our so-called molly-coddles are not at all so kind when Mr. Baifour, former premier of Mr. Asquith, premier (former president) and "president" of Great Britain get out on the stump and hammer one another.—Kansas City Star

The Esthetic Value And Practical Economy Of Modern Brick.

Ruskin, whose wonderful eye for the good and beautiful often saw "looks in running brooks, ferns in stone and good in everything," once declared:

"Our fields of good clay were never given us to be made into oblong morsels of one size. They were given us that we might play with them and that men that could not handle a chisel, might knead out of them some expression of human thought. In the ancient architecture of the clay districts of Italy, every possible adaptation of the material is found exemplified; from coarsest and most brittle kinds used in the mass of the structure to bricks for arches and pilasters, cast in the most perfect curves and of almost every size, strength and hardness; and moulded bricks wrought into flower work and tracery as fine as raised patterns upon china. And just as many of the finest works of the Italian sculptors were executed in porcelain, many of the best thoughts of their architects are expressed in brick, or in the softer material of terra cotta; and if this were so in Italy, where there is not one city from whose towers we may not descry the blue outline of Alp or Apennine, everlasting quarries of granite or marble, how much ought it to be so among the fields of England! I believe that the best academy for her architects, for some half century to come would be the brick fields, for of this they may rest assured, that till they know how to use clay, they will never know how to use marble."

And the sculptors and architects who are still alive to beauty in spite of the great utilitarian demands of the times, have proved worthy this advice as the recent Chicago display of the "clay workers" art amply revealed.

Probably nothing was more striking in this great exposition, which we may take as highly characteristic of the modern uses of clay, than the great variety of color and texture of the brick of today.

Aesthetic Values of Brick.

Charles M. Price declares that while it may seem true today to say that values of the greatest aesthetic significance may be obtained in brick work, twenty years ago this statement would have excited the derision of every architect and builder in the land.

The later 19th century idea of brick work as we can recall it in the long rows of newly built western cities or in green shuttered Philadelphia was one vast expanse of monotony.

The vogue, as this writer put it, being for "absolute smoothness and unending evenness," made possible that unspeakable monotony of walls painted in a blinding red, with evenly spaced brick courses marked out in white lines. The logical structure of the material was deliberately ignored, treated as though the builder were ashamed of his material, for even the red mortar joints were not followed in the painted parody over them, which might as well have been done on a board fence. The truly fastidious

builder indulged in painting his honest red bricks a sallow yellow color, with brown joints, or if he desired a very tasteful effect, he used a weird viridian green with black or pure white joints overpainted.

"This was not brick work—it was a travesty, a deliberate negation of all the value of brick work, and it was no less stupid than many architectural fallacies obtaining at the time it was certainly more utterly hideous than most of them."

It is to the late Stanford White, whose daring originality was based on such wonderful correct knowledge of "values," as the painters express it, that our emancipation from this thrall of monotony is largely due.

Just as John La Farge discovered the beauties of iridescent glass and revolutionized the stained glass processes by an accident of the sick room, astonishing and old glass maker by asking him to save all his old scraps of glass, so Stanford White, "in delving among the oldest buildings at Cambridge, perceived that one of the most significant charms of these old Harvard buildings lay in the texture of the brick work occasioned by the random introduction of burnt, or slightly discolored, bricks in the wall. He subsequently amazed a brick dealer by definitely specifying and personally selecting a large percentage of the bricks for his building in hand of the sort usually thrown out as seconds."

The facade of the Colony Club in New York was the first visual expression of White's discovery. He threw all precedent to the wind, scandalizing the conservative and delighting the aesthetic by using brick, both plain and burnt, in the nature of tile or tile or mosaic for purely decorative purposes. The entire front of the building was laid with only the ends of the bricks showing, some of the natural red and some in burnt gray, purple or dark green, and the whole diversified with panels and sinkages. The joints were all in line, like a checkerboard, and the whole was so subversive to all established ideas of brick work, that it created a storm of controversy in the architectural press throughout the country. From the hub of approbation and condemnation finally arose the acceptance of this amazing "tour de force," and its adoption by progressive architects was universal and as productive of happy burnt bricks.

Thus the old traditions were broken down and we were at once amazed at what could be accomplished by modern brick in aesthetic treatment.

"With these departures from the old traditions in brick work firmly established, says the above quoted writer in *Contract Record*, "it was not long before the manufacturers rendered further developments possible. The setting of regular two-inch by four-inch by eight-inch bricks in ingenious and aesthetic ways was practiced in infinite variations, with the structural joints forcefully expressed and the

material used frankly employed.

"One manufacturer, firmly convinced that the idea of expressing texture in brick work was a great aesthetic discovery, bent his energies to the production of various bricks which should allow the architect a wide range in color, shape and texture.

Effects from Skillful Grouping.

"Beginning with new shapes, wider, flatter and longer than ordinary bricks, the various shapes were cast in certain groups of soft coloring, which if properly blended in selection may, in an interior, be found to reflect the rich values of an Oriental rug, and be admirably set by dark wood work. These possibilities may readily be realized by a consideration of colors and shades which may be commanded from the various groups. Thus the 'red group' includes not only varying shades of red, but a certain proportion of coppers, olive greens, purple, browns and blues. The 'gray group' includes various shades of brownish gray, running into cream and coffee and deep russets. The 'golden group' includes shades from a soft, delicate chamais to a deep golden brown. The full range of either group may be used in a single fire place or facade with a delicately harmonious result, or the solid colors may be used for greater mass effect. In exterior treatments, blank wall spaces or the frieze under the eaves may be richly diversified with decorative panels, using colored bricks as a tile mosaic, which, though structurally bonded into the wall, will possess the value of applied faience treatment.

"The way has been opened for infinite possibilities in brick building, and architects are making the most of the discovery of the importance of 'texture,' 'local color,' and 'incidental interest' in brick surfaces.

"It is indeed the day of the brick, and so beautiful and interesting are the results now obtained in color and texture that it is absolutely impossible that a return to the days of stupid monotony and dead inertia in brick building could ever be effected."

The result of all this was not only plainly visible at Chicago, but it is evident in every city and hamlet of the land. The present day manufacturers are turning out brick in every variety of texture and color, white to black, pink, through every shade of red to dark crimson and brown, all shades of yellow, grey, green, mottled, iron spots, etc., and in a great variety of sizes from a small "pony" brick 6 inches by 3 inches by 1 inch to brick measuring 18 inches by 6 inches by 2 1/4 inches and from a very smooth to an exceedingly rough surface. The architect having at his disposal an almost unlimited range of color, instead of having a building with the walls of one uniform shade, is using a great range of color as can be obtained from the one clay—in reds using the kiln run from light red to brick that is almost, if not altogether black; in greys from a light mouse

grey, shading off to dark grey brown; and at other times using a combination of various colors as well as shades.

Tapestry Brick.

In many of the brick a variegation of color is obtained from the natural clay or mixtures of different clays, while with other clays iron ore, manganese, iron oxides and other substances, are added to and used with the clays and burnt into the brick, giving an architect an endless variety to choose from.

Diaper work in brick has also taken a firm hold on the imagination of architect and manufacturer. The word of course takes its meaning from linen cloth woven in geometric pattern; a simple figure repeated.

As some one has pointed out this pattern should never be too insistent so as to interfere with other features of the building.

That there is still much room for improvement in the manufacture of brick no one who has learned the possibilities of really well made brick can doubt.

The age is utilitarian and commercial. It is only men like Stanford White who can make the almighty dollar mark lend its curves to really beautiful lines and force the owner to adopt that method of production which will please the eye as well as producing a profit.

Nor is the manufacturer alone to blame for unless the contractor himself has the desire to be something more than a "Jerry builder" and in a his brick with a little conscience mixed in his mortar, neither architect or contractor can obtain proper results.

However severely plain a building may be, says a modern authority, some form of detail or ornament can be introduced which will give interest to it, and many simple forms can be used that always prove effective, and at the same time need not be added on account of the plea of additional expense. What an effective form of ornament, for example is, found in countersunk or projecting string or belt courses? Such a course between two floors will transform a flatly plain and unimpressive building into one of interest. In old buildings frequently is to be seen, with good effect, round arches above corbel windows, the tympanum (the part enclosed by the curved top) of the arch being sunk several inches. Another simple form of ornamentation is to be found in the groins or often met with on buildings of Georgian and Colonial date. Their interlocking appearance imparts an air of solidity and strength to a building.

Tapestry Brick.

So expert have some manufacturers become, however, that the tapestry brick now obtainable contains all the delicate tones of a fine Persian rug. The peculiar rough texture is a marked feature of the best of these products for they catch the wonderful glints of light and shade best rivaling in their beauty of a Royal Persian rug, varying only from the tapestry in the rough mortar joints.

Our Colonial forebears had this knack and we have recently discovered that the Colonial brick work owes its beauty of color and texture to this same roughness of surface.

As another authority says, strangely enough, this awakening to the ancient beauties of some of the Colonial brick has been coincident with the development of rough textures in many works of man. As highly finished broadcloth with its flat color, is no longer popular for men's clothing, the smooth, shiny, varnished surface has largely disappeared from our furniture, well paper has taken on a rough texture. The rough, stained shingle is superseding the painted clapboard, and even in men's hats, the rough textured mink is rapidly displacing the smooth felt of a year ago. Everywhere man is discovering that rough texture means softness in effect, therefore restfulness to the eye - therefore good art.

We have traced its ancient lineage from almost the dawn of civilization to the present day. We have noted its claim to durability and those lasting qualities which we like to find in our friendships as well as in our dwellings. We have now noted its aesthetic possibilities, its capacity to artistic treatment and we may later add a word as to its economic values.

STATE INDUSTRIAL INSURANCE.

We are inclined, probably too much so, to sneer at Socialism. As set forth by its apostles and anticipated by its prophets Socialism is largely, almost entirely impracticable, yet that it contains something that is right and practical no candid and observing man will deny. As a matter of fact our system of government, our very liberal and progressive government on earth for that matter, executes many functions that are included in the general scheme of Socialism. We have free hospitals for the care of the sick and injured, asylums for the blind and incurable, the insane, the indigent and numerous other classes of unfortunate, including within recent years, those afflicted with the "white plague." We provide free education in a broad and liberal way and extend this to a point where it qualifies the young to enter the hard-winning callings and professions.

That this broad, humane and wise policy is included in the propaganda of Socialism is nothing against it, and no one American in a thousand advocates its abrogation or restriction, indeed, popular sentiment is now distinctly in favor of widening its already broad field. Not only should the State insure justice and liberty to the people, but it should protect them in every reasonable way and care for those not in a position to protect and provide for themselves. And this suggests the propriety of the state, under certain conditions, furnishing insurance for those engaged in industrial pursuits, when unavoidable accidents, indirect serious injuries or cause death.

The laws of some of our States impose liabilities upon employers of labor that may well become a menace to business and cause financial ruin.

Suppose the case of a man operating a small manufacturing plant and employing a small force of men, by means of which he keeps up the establishment, pays the weekly wage and secures a livelihood and perhaps something more for himself. Although he has taken every precaution for safety in the way of safety devices, fire protection, fire escapes, sanitation and the

like, an accident, absolutely unavoidable so far at least as he is concerned, may kill or maim some of his employees. Under the law in some States he might well be made in damages that would take away all his available means, including his business. The abrogation or modification in some States of the fellow-citizen contributory negligence doctrine of the common law has worked a great hardship and rendered the investment of capital in manufacturing lines a hazardous undertaking.

When an employer has done everything in his power to prevent accidents, and installed all safety devices required by law, he should not be held liable in damages. This proposition is so reasonable, so just and so equitable that it is scarcely open to discussion. In the meantime the unfortunate sufferer should not be dumped into the great human scrap pile. "The laborer is worthy of his hire" and this spiritual aphorism may well be extended to render him worthy of support when in honest efforts to earn a livelihood he has been rendered incapable of further supporting himself and dependents.

This broad, just and humane principle is recognized in the laws under discussion, the trouble being that the burden is placed upon the equally unfortunate employer. Some large employers reduce this danger to well-defined limits by providing at their own expense life and accident insurance for their employees. And yet this is an injustice, since it is a surrender of something valuable by one for the benefit of another without the slightest return, except in escaping the operation of really unjust laws.

Under such circumstances, why should not the state provide for those rendered incapable of caring for themselves and those dependent on them? This, of course, extends to the dependents of those who lose their lives in the discharge of their duties as breadwinners.

If it is said that such a plan would impose a burden on the general tax-paying public for the benefit of a class the answer is that employers are not exempted, but rather harmed, by unavoidable accidents, that as taxpayers they are assessed a fair just share of the charge, and that the business they are engaged in conducting contributes, and that in a marked way, to the general prosperity of the country. Those who conduct such capital in business enterprises, such as manufacturing or construction, failings, take risks, and often's are failures from which owners of lands, houses, stocks and bonds are comparatively exempt.

The accumulations of wealth, the very support of human life depends upon labor. Since the dawn of civilization the great majority, acting under the managements of those who have accumulated something from the winnings of labor, have been "drawers of wood and drawers of water." While labor is chiefly dependent on capital for employment, all are dependent on labor for every necessary and comfort of life.

In view of all this, state industrial insurance would work no injustice, impose no heavy burdens. We pay liberal pensions to those patriotic veterans who risked their lives in the cause of their country, and to their surviving widows and infant children, why, then,

(1) We not aid those who have been operated, temporarily or permanently, in laboring, not only for their

own livelihood, but to increase the real wealth of the nation?—The American Contractor.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified as "general" under proper headings commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, A. H. Babcock. The building will cover an area of 32x62 feet and will contain ten small apartments with baths. The interior finish will be of pine throughout. The exterior of the building will be covered with shiplap, on the rear of the same for the owner will erect three flats which will cover an area of 45x60 feet. The plans for both buildings are complete and the architect is taking figures on the work.

San Francisco—Apartment house, 3 story and base, frame, \$15,000. Architects, C. M. and A. F. Rousseau, Monroeville Bldg., S. F. Owners, Rousseau Realty Co. The building will be 128x9 feet and will contain a store on the first floor and ten apartments arranged in suites of three rooms each on the upper floors. There will be connecting baths and wall beds. The exterior of the building will be covered with special rustic and brick veneer. The plans are complete and figures have been taken by the architect.

San Francisco—Apartment house, 3 story and base, frame, \$6,000. Architect, A. W. Smith, 1910 Broadway, Oakland. Owner, N. A. Truheck. The building will be 25x65 feet and has been designed to contain 6 apartments of two and three rooms each with bath. The interior trim will be of pine throughout. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 7 story and base, brick and steel, \$10,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Jesse Brown Estate. The building will be 65x85 feet and will contain in the neighborhood of 62 apartments arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The building will have a steel frame up to the third floor. The exterior will be faced with pressed brick and terra cotta. The work has been delayed somewhat by the death of the owner but will now proceed at once. The working drawings are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Milk River Project, Mont.

All bids received May 21 by the U. S. Reclamation Service for the construction of laterals, waste water ditches and structures on the first unit, Indian South Canal, Milk River project Mont., have been rejected.

Portland Cement.

All bids received at the office of the U. S. Reclamation Service, Denver, Colo., for furnishing 200,000 barrels of Portland cement have been rejected. The department concluded that satisfactory bids for a four years' supply could not be secured and that purchases would be made on an annual basis as in the past.

Reclamation Service Earth Work.

The contract for earth work and structures on the first eleven miles of the Dodson North Canal, Malta, Mont., has been awarded to J. E. Hilton, Billings, Mont., \$147,638 for schedules numbers 1, 2, 3, 4, and 5, and to John S. Penson, of Williston, N. D., at \$23,722.65 for schedule No. 6.

Garbage Crematories.

The contract for the construction of a garbage crematory at the Norfolk navy yard has been awarded to the Morse-Boulger Destructor Co., New York city, at \$6,785, and for a garbage crematory at Puget Sound and San Francisco to the Conley Co., Omaha, Neb., at \$5,750 and \$1,500 respectively.

Colorado River Indian School.

The contract for constructing 16-room office building, frame quarters, and sewer extension at the Colorado River Indian School, Ariz., has been awarded to John Clark, Denver, Cal., at \$1,319 for office, \$1,925 for quarters, and \$850 for water and sewer system.

Tobatchi Indian School.

The contract for the construction of a frame school house, frame quarters, and the installation of water and sewer extension at the school, Tolol in Indian School, N. Mex., for which work opened May 15, has been awarded to T. M. Hall, Farmington, N. Mex., at \$10,200 for the school building, \$6,510 for employee quarters, and \$1,250 for water and sewer system.

HALLS AND SOCIETY BUILDINGS.

Sacramento, Sacramento, Cal.—Lodge hall, 5 story and base, brick and steel. Cost not stated. Architects, Osborn & Brown, Sacramento. Owners, Sacramento Club. The preliminary plans only have been made for this building and details of the work are not obtainable at this time. The structure is intended to give Sacramento an athletic club second to none in the west. Organization work is now well under way and it is reported that construction will be undertaken this year. Complete details will be given of the building as the plans progress.

Palo Alto, Santa Clara Co., Cal.—Presbyterian home, 2 story and base, frame, \$14,000. Architect, William Binder, Rm. Bldg., San Jose. Owners, Presbyterian Home. The building will be similar in design to a large residence and will contain about 20 rooms and baths. The interior will be finished in pine and redwood with some oak floors. There will be a central heating system and a fire place. The exterior will be of the hard brick. The exterior will be covered with shipping and shingles. Plans are being prepared.

San Jose, Santa Clara Co., Cal.—Lodge hall, 5 story and base, brick and steel, \$75,000. Architects, Warren Skillings, Elias S. McKeigle, F. D. Wolfe and William Binder, associated. Rm. Bldg., San Jose. Owners, San Jose Elks' Hall Association. The building has been mentioned in these columns before. The working drawings are now nearly complete and the contracts will soon be let. The work is being handled through the office of Mr. Binder.

Mt. Angel, Ore.—Lodge hall, 2 story and base, brick, \$12,000. Architect, E. Kroneer, Worcester Bldg., Portland. Owners, Mt. Angel Masonic Hall Association. The building will contain a store on the first floor and lodge rooms on the second. The interior will be finished in pine and oak. There will be a central heating system. The exterior of the building will be faced with pressed brick. Plans are being prepared and a contract will be let as soon as figures can be taken.

HOSPITALS.

Los Angeles, Cal.—Hospital, 5 story and base, reinforced concrete, \$200,000. Architects, Garrett & Bixby, Currier Bldg., L. A. Owners, Methodist Hospital Association. The plan of the Hospital Association is to erect only a

part, the administration building, at the present time. The institution, when complete, will represent an expenditure of \$200,000. The convenience and equipment of hospitals of the most modern design will be incorporated in the new structure. Miss Lydia Alexander, 239 West 41st St., and J. C. Elliott, 131 West Jefferson St., are the directors of the Methodist Hospital building the new building project. The architects have but just started the preliminary plans.

Los Angeles, Cal.—Hospital, buildings, reinforced concrete. Cost not stated. Architects, Hunt and Barnes, Laughlin Bldg., L. A. Owner, Children's Hospital. This work has been mentioned here before. The plans which are now out for figures provide for a three story administration building 95x12 with a creosote wing 28x56, a two-story ward building 28x165 feet, a power house and a frame nurses' home. All of the buildings except the nurses' home will be of reinforced concrete.

HOTELS.

San Francisco.—Hotel, 7 story and base, brick and steel, \$75,000. Architects, Cunningham & Pollock, First National Bank Bldg., S. F. Owners, Sommer and Kaufman. The building will be erected on Lower Market street and has been designed for several stores on the first floor and hotel rooms above. There will be a partly enclosed frame with exterior walls of brick faced with pressed brick. About 27 percent of the rooms will have private baths. There will be steam heat and elevator service. Hot and cold running water will be provided for all rooms. The plans are complete and segregated figures are now being taken.

San Francisco.—Hotel, addition, 3 story brick. Cost not stated. Architect, W. H. Weeks, 251 Kearny St., S. F. Owner, Ames Lester. The addition will be made to a building at present two stories in height. The architect is at work on the details of the structure and particulars cannot be given at this time.

San Francisco.—Hotel, 7 story and base, brick and steel, \$70,000. Architects, William Crockett & Son, Philadel Bldg., S. F. Owner, R. D. McElroy. The building, which has been mentioned here before, will be erected south of Mission street. There will be several stores on the first floor besides the main hotel lobby. The upper floors will contain a large number of single rooms. There will be about 14 baths to the floor. The plans provide for steam heat, elevator service and running hot and cold water. The exterior of the building will be faced with pressed brick. Plans are now complete and figures are being taken.

Richmond, Contra Costa Co., Cal.—Hotel and stores, 3 story and base, brick and steel, \$20,000. Architect, O. O. Chasen, Philadel Bldg., S. F. Owner, Ralph Teherassee. The building will contain in the neighborhood of 32 rooms and baths on the upper floor, several stores and a moving picture theatre on the first floor and a billiard parlor and bowling alley in the basement. The exterior will be faced with pressed brick. Plans are nearly complete and figures are to be taken shortly.

Los Angeles, Cal.—Hotel, 12 story and base, Class A construction, \$750,000.

San Francisco—Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, East Bros. The building will contain 500 guest rooms with private bath and toilet for each. The interior finish will be of birch throughout. The main lobby will be 50x115 feet and two stories high with a mezzanine story, finished in marble and scagliola, with the floor, Cressian walnut trim and set glass ceiling. There will be a complete steel frame with exterior walls faced with glazed brick and terra cotta. Hollow tile will be used for the floors and partitions. There will be three passenger and one freight elevators. A complete power, lighting and refrigerating plant will be installed. Plans are nearly complete and figures will be called for shortly. The Llewellyn Iron Works have the contract for furnishing all steel.

San Francisco—Hotel, 7 story and base, brick and steel. Cost not stated. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Sharon Estate. The preliminary plans only have been prepared for this work and details of the construction can not be given at this time. The new structure will be erected at the southwest corner of Montgomery and Jesse streets. The construction will be class A throughout. Full particulars will be given as the plans progress.

Contracts Awarded.

Portland, Ore.—Hotel, 4 story and base, brick, \$65,000. Architect, A. C. Ewart, Portland. Owners, Wright Investment Co. Contractor, Antonio Telser, Portland. Contract price \$65,000.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Contracts Awarded.

Montana—Railroad construction, \$5,000,000. Engineering Dept., Chicago. Milwaukee and Puget Sound R. R. Co., White Bldg., Seattle. Owners, Chicago, Milwaukee and Puget Sound R. R. Co. Contractors, Winston Bros., Minneapolis. Minn., construction of 70 miles of roadbed. Twombly Bros., Wells-Fargo Bldg., Spokane, construction of 70 miles of roadbed. These two contracts include the boring of six tunnels, the longest of which is 1900 feet.

Goldbar, Wash.—Roundhouse, etc., frame and concrete construction. Cost not stated. Engineering Dept., Northern Pacific R. R. Co., Seattle. Owners, Northern Pacific R. R. Co. Contractor, H. Chase, 2404 1st avenue, Seattle. Contract price not stated. The work includes the construction of a roundhouse, storage shed, scrap bins and a water tower.

RESIDENCES.

San Francisco—Residences, 3 2-story and base, frame, \$2,000 and \$4,000 each. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwellings will each contain 7 rooms and baths. The interior finish will be of pine and redwood with some oak floors. There will be open fire places with tile and brick mantels. Pipes for a heating system will be installed. The exteriors of the three dwellings will be covered with cement plaster on metal lath, brick veneer and shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story

and base, frame, \$2,500. Architect none. Owner, J. M. Peters, 1919 Halboa Street, S. F. The dwelling will contain 7 rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect none. Owner, Bay Cities Home Bldg., Co., Merchants' Exchange Bldg., S. F. The house will contain 7 rooms and bath. There will be open fire places and tile mantels. The interior of the house will be finished in pine throughout. The exterior will be covered with rustic. Plans are in the hands of the owners and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, Theo. S. Boehm, 4419 19th St., S. F. Owner, Louis Heilmann. The house has been designed to contain 7 rooms and bath. The interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and brick or tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the owner will do the work under the Day Labor system.

Haywards, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,500. Architect, C. S. Schwartz, Van Dyke Bldg., Oakland. Owner, F. G. Brown. The dwelling has been designed for a nine room house with baths, sleeping porch and laundry. A garage will also be erected on the property. The interior finish of the house will be of pine, redwood and oak. There will be furnace heat and open fire places. The exterior will be covered with cement plaster on metal lath. Plans are complete and the architect is taking figures on the work.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, John Allen, 1225 84th avenue, Oakland. Owner, James Kelleher. The bungalow will contain five rooms and bath. The interior trim will be of pine throughout. There will be an open fire place in the living room with tile or brick mantel. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect none. Owner, E. B. Spiller, 2154 Ashby avenue, Berkeley. The dwelling will contain 8 rooms, bath and sleeping porch. There will be furnace heat and open fire places. The mantels will be of tile or brick. The interior finish will be of pine with oak floors in the principal rooms. The exterior of the house will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect none. Owners, Jespersen and Dippe, 278 54th street, Oakland. The bungalow has been designed for a five room house with bath. There will be pine trim, some oak floors, open fire places and tile mantels. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story

and base, frame, \$2,500. Architect none. Owner, K. M. Sheridan, 5440 Boulevard avenue, Oakland. The dwelling will contain 6 rooms and bath. The interior finish will be entirely of pine. There will be open fire places and the or brick mantels. The exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Piedmont, Alameda Co., Cal.—Residence, 3 story and base, frame, \$25,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, A. H. Breed. The dwelling will contain 12 rooms, laundry, baths, pergola, loggia, billiard room, sleeping porches and servants rooms. The interior will be finished in mahogany, oak, birch, pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR PIER.

(Bids close June 27.)

OFFICE of the State Board of Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal.

Sealed proposals or bids will be received at this office at or prior to 11 o'clock a. m. on Thursday, June 27, 1912, for furnishing materials and constructing Pier No. 28, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board April 16, 1912, and on file in this office, to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of fresh cut, close grained, first class Douglas yellow fir piles, merchantable yellow fir lumber, redwood lumber, Portland cement (which will be furnished the contractor by the Board), sand, crushed rock or gravel, reinforcing materials, castings, structural steel, rods, bolts, spikes, ear springs, rails and fastenings, asphalt paving, roofing and painters' materials, glass, window frames, etc. All material used in the structures will be subjected to a rigid examination and test, and if found defective, under size, unsuitable or not as specified will be condemned and must be removed from the work by the Contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal (Proposal No. 2 on bidding blank); said check to be made payable to the order of the Secretary of the Board as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid and the award of the contract, enter into a written contract to do said work according to the plans and specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate, with two or more sureties, to be approved by said Board and conditioned for the faithful performance by the Contractor of all the terms and conditions of said contract, nor will said bid be considered by the Board unless delivered to the Secretary, or to the Assistant Secretary, at the office of the Secretary at or prior to 11 o'clock a. m. on Thursday, June 27, 1912, at which time and place the bids will be opened. The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids. Plans and specifications of this work to be had at Room No. 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid, "Bid for Pier No. 28."

J. J. DWYER,

GEORGE M. ILL,

THOMAS S. WILLIAMS,

Board of State Harbor Commissioners.

A. V. SAPH,

Assistant State Engineer.

PROPOSALS FOR CEMENT.

(Bids close July 1.)

CEMENT—U. S. Engineer Office, Seattle, Wash.—Sealed proposals for furnishing 200,000 barrels of Portland cement will be received here until 12 m. July 1, 1912, and then publicly opened. Information on application. J. B. CAVANAUGH, major, engineers.

Firms dealing with certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated to the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Hotel—7 story and base, brick and steel, \$15,000. San Francisco. Architects, Cunningham & Pollock, First National Bank Bldg., S. F. Owners, Sommer and Kauffman. The building will be erected on lower Market street and has been designed for several stories on the first floor and hotel rooms above. There will be a partial steel frame with exterior walls of brick, faced with pressed brick. About 15 per cent of the rooms will have private baths. There will be steam heat and elevator service. Hot and cold running water will be provided for all rooms. The plans are complete and segregated figures are now being taken.

Hotel Addition—3 story brick. Cost not stated. San Francisco. Architect, W. H. Weeks, 251 Kearny St., S. F. Owner, Amos Lester. The addition will be made to a building at present two stories in height. The architect is at work on the details of the structure and particulars cannot be given as yet.

Apartment House—3 story and base, frame, \$8,000. San Francisco. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, N. A. Truebeck. The building will be 25x65 feet and has been designed to contain six apartments of two and three rooms each with bath. The interior trim will be of pine throughout. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the work will be done by Day Labor.

Apartment House—7 story and base, brick and steel, \$100,000. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Jesse Bryan Estate. The building will be 62x98 feet and will contain in the neighborhood of 62 apartments arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat, elevator service, wash and a vacuum cleaning system.

The building will have a steel frame up to the third floor. The exterior will be faced with pressed brick and terra cotta. The work has been delayed somewhat by the death of the owner, but will now proceed at once. The working drawings are complete and figures are being taken.

Offices—1 story concrete addition on roof, \$10,000. San Francisco. Architect, W. C. Hays, Foxcroft Bldg., S. F. The addition, which will be erected on the roof of the Foxcroft Bldg., will contain the offices of Architects Hays and John Galen Howard. Plans are now complete and figures are being taken.

Hotel—7 story and base, brick and steel. Cost not stated. San Francisco. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Sharon Estate. The preliminary plans only have been prepared for this work and details of the construction cannot be given at this time. The new structure will be erected at the southwest corner of Montgomery and Jesse streets. The

construction will be of a throughout. Full particulars will be given as the plans progress.

Apartment House—3 story and base, frame, \$10,000. San Francisco. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, A. H. Babcock. The building will cover an area of 7x8 62 feet and will contain ten small apartments with baths. The interior finish will be of pine throughout. The exterior of the building will be covered with shiplap. On the rear of the same lot the owner will erect three units which will cover an area of 14x50 feet. The plans for both buildings are complete and the architect is taking figures on the work.

Apartment House—3 story and base, frame, \$15,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be 21x69 feet and will contain a store on the first floor and ten apartments arranged in suites of three rooms each on the upper floors. There will be connecting baths and wall beds. The exterior of the building will be covered with special rustic and brick veneer. The plans are complete and figures have been taken by the architects.

Hotel—7 story and base, brick and steel, \$70,000. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, R. D. McElroy. The building, which has been mentioned here before, will be erected south of Mission street. There will be several stores on the first floor besides the main hotel lobby. The upper floors will contain a large number of single rooms. There will be about 14 baths to the floor. The plans provide for steam heat, elevator service and running hot and cold water. The exterior of the building will be faced with pressed brick. Plans are now complete and figures are being taken.

Warehouse—1 story and base, brick and steel, \$100,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Dr. Pischel. The building will be erected at the corner of 5th and Townsend streets and will cover a large ground area. The structure will be carried on a pile foundation. The exterior walls will be of brick. The floors of heavy mill construction. There will be metal window sash and frames and fire proof doors. The entire structure has been leased to Nathan Dohrman Co. The plans are complete and figures are being taken.

Residences—2, 2 story and base, frame, \$2,000 and \$1,000 each. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwellings will each contain 7 rooms and baths. The interior finish will be of pine and redwood with some oak floors. There will be open fire places with tile and brick mantels. Pipes for a heating system will be installed. The exteriors of the three dwellings will be covered with cement plaster on metal lath, brick veneer and shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame,

\$2,000. San Francisco. Architect, J. M. Owens, J. M. Owens, 126 Ballou St., S. F. The dwelling will be on a corner, rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Ray Cline, Home Bldg. Co., Merchants Exchange Bldg., S. F. The house will contain seven rooms and bath. There will be open fire places and tile mantels. The interior of the house will be finished in pine throughout. The exterior will be covered with rustic. Plans are in the hands of the owners and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. San Francisco. Architect, Theo. S. Boehm, 419 12th St. Owner, Louis Heilmann. The house has been designed to contain seven rooms and bath. The interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and brick or tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the owner will do the work under the Day Labor system.

Contracts Awarded.

Pier—Reinforced concrete, \$750,000. San Francisco. Engineer, Assistant State Engineer S. P. Perry Bldg., S. F. Owners, State of California. Contractor, Grant Smith Co., S. F. Contract price, \$517,650.

Building Contracts Awarded.

OAKLAND AND ALAMEDA COUNTY.

Residence—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, George Anderson, 270 College Ave., Berkeley. Owner, E W. Foss. The plans provide for a ten-room house with bath. The interior of the dwelling will be finished in pine, spruce and elm. The floors will be of oak in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$8,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Louis Engler, 2714 Benvenue Ave., Berkeley. The dwelling will contain 12 rooms, bath, sleeping porch and laundry. The interior will be finished in pine and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places with brick or tile mantels. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,200. Berkeley, Alameda Co., Cal. Architect, Olin S Grove, 2911 Telegraph Ave., Oakland. Owner, L C. Graff. The bungalow will contain in the neighborhood of six rooms and bath. The interior will be finished in pine and redwood. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with shingles. Plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architects, Moor Bros., Pacific Bldg., S. F. Owner, Thomas C. O'Brien. The dwelling has been designed for a seven-room house with bath. There will be pine trim throughout. The floors will be of oak in the principal rooms. There will be open fire places and tile mantels. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect, R. P. Merrill, Yosemite Theatre Bldg., Stockton. Owner, Mrs. Kerns. The dwelling has been designed for an 8-room house with bath, sleeping porch and laundry. The interior will be finished in pine with hardwood floors in the principal rooms. There will be a hot water heating system and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is preparing the plans.

Residence—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, Sidney B Newsum, Nevada Bank Bldg., S. F. Owner, George Rundle. The dwelling will contain seven rooms, bath and sleeping porch. The in-

terior will be finished in pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. The architect is taking figures on the work.

Residence—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner, Prof. Rundle. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The tile will be used also in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster. The architect has completed the plans and is now taking figures on the work.

Bungalow and Alteration Work—frame, \$10,000. Oakland, Cal. Architect, J. J. Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner, Mrs. Galpin. This work will include considerable landscape gardening and the addition of two wings to an old adobe ranch house. The bungalow will contain six or seven rooms and will be nicely finished. The exterior will be covered with cement plaster. The architect is preparing the plans.

Bungalow—1 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, Theo. Penn, 749 61st St., Oakland. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine and redwood with some oak floors. There will be open fire places and tile mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, J. F. Whalen, 1542 Broadway, Oakland. The dwelling will contain five rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,200. Oakland, Cal. Architect, R. B. Hotchkiss, Bacon Bldg., Oakland. Owner, C. T. Mason. The dwelling will contain six rooms, bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and brick mantels. The exterior of the building will be covered with shingles. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, M. L. Diggs, Sacramento. Owner, L. P. Diggs. The house has been designed for a seven-room house with bath and sleeping porch. The interior trim will be of pine with some elm panels. Oak floors will be used in the principal rooms. There will be open fire places with tile mantels. The exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

Bungalow—1 1/2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, C. A. Thelander, 292 11th St., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood throughout. There will be open fire places and tile or brick mantels. The

exterior of the bungalow will be covered with rustic. The work will be done by Day Labor.

Flat Alterations—2 story and base, frame, \$3,000, Oakland, Cal. Architect, Louis M. Upton, Mutual Bank Bldg., S. F. Owner, J. W. Roland. The building will be altered so as to contain two flats of five and six rooms each with baths. The interior finish will be of pine and redwood. The work will include new plumbing, plaster work and electric work. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, cost not stated, Oakland, Cal. Architect, Thomas Edwards, 45 Kearny St., S. F. Owner, George W. Puckham. The building will contain several stores on the first floor and a number of small apartments on the two upper floors. The interior will be finished in pine and redwood. There will be steam heat. Considerable tile and mosaic will be used. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and are now out for figures.

Residence—2 story and base, frame, \$2,500, Hayward, Alameda Co., Cal. Architect, C. S. Schwartz, Van Dyke Bldg., Hayward, Owner, F. B. Granger. The dwelling has been designed for a nine-room house with baths, sleeping porch and laundry. A garage will also be erected on the property. The interior finish of the house will be of pine, redwood and oak. There will be furnace heat and open fire places. The exterior will be covered with cement plaster on metal lath. Plans are complete and the architect is taking figures on the work.

Bungalow—1 story and base, frame, \$2,000, Alameda, Alameda Co., Cal. Architect, John Allen, 1225 84th Ave., Oakland, Owner, James Kelleher. The bungalow will contain five rooms and bath. The interior trim will be of pine throughout. There will be an open fire place in the living room with tile or brick mantel. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,000, Berkeley, Alameda Co., Cal. Architect, none. Owner, E. B. Spittler, 2154 Ashby Ave., Berkeley. The dwelling will contain eight rooms, bath and sleeping porch. There will be furnace heat and open fire places. The mantels will be of tile and brick. The interior finish will be of pine with oak floors in the principal rooms. The exterior of the house will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000, Oakland, Cal. Architect, none. Owners, Jespersen and Dippo, 278 54th St., Oakland. The bungalow has been designed for a five-room house with bath. There will be pine trim, some oak floors, open fire places and tile mantels. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500, Oakland, Cal. Architect, none. Owner, K. M. Sheridan, 5410 Boulevard Ave., Oakland. The dwelling will contain six rooms and bath. The interior finish will be entirely of pine. There

will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—3 story and base, frame, \$25,000, Piedmont, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, A. H. Breed. The dwelling will contain 12 rooms, laundry, baths, pergola, loggia, billiard room, sleeping porches and servants' room. The interior will be finished in mahogany, oak, birch, pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN JOSE & SANTA CLARA VALLEY

Bath House—1 story and base, reinforced concrete, \$85,000. San Jose, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose, Owners, City of San Jose. The architect has been commissioned to prepare plans for this work and drawings will be completed as rapidly as possible. The funds for the construction will come out of the recent bond issue voted for the improvement of Alum Rock Park. Details of the work will be given later.

Residence—2 story, attic and base, frame, \$75,000. Woodside, San Mateo Co., Cal. Architects, Pakevel & Green, 415 Montgomery St., S. F. Owner, Selma Cammerlain. The dwelling will be situated in the neighborhood of twenty rooms, six baths, sleeping porch and laundry. The interior will be finished in pine, redwood and hardwoods. The floors will be of hardwood, tile and brick. There will be a central heating system and open fire places. The mantels will be of tile, marble and brick. Tile will be used in the baths and kitchen. There will be a vacuum cleaning system. The exterior of the building will be covered with cement plaster. Plans are now complete and figures are being taken.

Chimney House—2 story and base, frame, \$14,000. Palo Alto, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose. Owners, Phi Gamma Delta. The building will be similar in design to a large residence and will contain about twenty rooms and baths. The interior will be finished in pine and redwood with some oak floors. There will be a central heating system and open fire places. The mantels will be of tile and brick. The exterior will be covered with ship-lap and shingles. Plans are being prepared.

Lodge Hall—5 story and base, brick and steel, \$75,000. San Jose, Santa Clara Co., Cal. Architects, Warren

Skilling, Chas. S. McKenzie, F. D. Wolfe and William Binder, associated, Rea Bldg., San Jose. Owners, San Jose Elks' Hall Association. The building has been mentioned in these columns before. The working drawings are now nearly complete and the contracts will soon be let. The work is being handled through the office of Mr. Binder.

Theatre and Stores—1 story and base, reinforced concrete, \$50,000. San Jose, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose. Owners, T. S. Montgomery and others. The building will cover a large area and is to be erected on First street south of San Antonio street. There will be several stores besides the theatre. The construction will be fire proof. The exterior of the building will be faced with cement plaster. Plans for the work are nearly complete and bids will be called for shortly.

Building Contracts Awarded.

Bonds to the amount of \$70,000 have been voted for a municipal pier and the above named engineers are now preparing plans for the same. Details of the construction are not obtainable at this time.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Mrs. Mary L. Smith. The building will be 55x150 feet and has been designed for a commercial garage. The front portion of the building will be occupied by two large sales rooms and the office. There will be a machine shop and storage space in the rear. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Large & La Cusse, Central Bldg., L. A. Owner, Hans Hendrickson. The building will cover an area of 61x77 feet and will contain four stores and two apartment suites on the ground floor, and 18 two-room suites on the upper floors. It will have plate glass fronts, pressed brick facing, fire escapes, cement floor in stores, pine finish and floors up stairs, private bath to each apartment and wall beds. The plans are complete and ready for figures.

Hospital Buildings—Reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Children's Hospital. This work has been mentioned here before. The plans, which are now out for figures, provide for a three-story administration building, 93x142 with a one-story wing 28x56, a two-story ward building 36x165 feet, a power house and a frame nurses' home. All of the buildings, except the nurses' home, will be of reinforced concrete.

School—3 story and base, brick and steel, \$250,000. Los Angeles, Cal. Architect, A. P. Rosenheim, H. W. Bellman Bldg., L. A. Owners, City of Los Angeles. This is the building for which Mr. Rosenheim was selected to prepare the plans last year. Working drawings are now nearly complete and figures will be called for shortly. The construction will be practically fire proof. The interior partitions will be of hollow tile. The stairways of reinforced concrete. The heating plant will be located in a separate building. The exterior of the school will be faced with ruffled brick.

Hotel—12 story and base, Class A construction, \$750,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Hart Bros. The building will contain 500 guest rooms with private bath and toilet for each. The interior finish will be of birch throughout. The main lobby will be 50x115 feet and two stories high with a mezzanine story, finished in marble and scagliola, with tile floor, Circassian walnut trim and art glass ceiling. There will be a complete steel frame with exterior walls faced with glazed brick and terra cotta. Hollow tile will be used for the floors and partitions. There will be three passenger and one freight elevators. A complete power, lighting and refrigerating plant will be installed. Plans are nearly complete and figures will be called for shortly. The Llewellyn Iron Works have the contract for furnishing all steel.

Hospital—3 story and base, reinforced concrete, \$300,000. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owners, Methodist Hospital Association. The plan of the Hospital Association is to erect only a

part, the administration building at the present time. The institution, when complete, will represent an expenditure of \$250,000. The convenience and equipment of hospitals of the most modern design will be incorporated in the new structure. Miss Lydia Alexander, 230 West 31st St., and J. C. Elliott, 421 West Jefferson St. are the directors of the Methodist Hospital handling the new building project. The architects have but just started the preliminary plans.

Apartment House—4 story and base-berick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Robert and Evelyn. The building will be 65x110 feet. There will be a large lobby, billiard room, amusement room and sun room on the first floor. The upper floors will be divided into 107 rooms, arranged in three, four and five room suites with private baths. There will be steam heat, elevators, individual dumb waiters, vacuum cleaners, wall beds and all other conveniences. The interior of the apartments will be finished in oak mahogany and walnut. The exterior of the building will be faced with ruffled brick. Plans are complete and figures are being taken.

Lofts—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Standard Fireproof Building Co. The building will have a complete steel frame with brick, certain walls, concrete and tile floors, metal window sash and frames. There will be elevator service and steam heat. The architects are now working out the details.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, W. F. Allen, Story Bldg., L. A. Owner, Mrs. L. J. R. Keller. The building will contain 12 suites, four of three rooms and eight of four rooms, all with private baths. There will be wall and disappearing beds, hot water heating system and vacuum cleaners. The exterior will be covered with rustic and shales. The plans are being prepared.

Apartment House—3 story and base-berick, \$25,000. Los Angeles, Cal. Architects, Garrett & Bixby, Central Bldg., L. A. Owner, E. C. Bowser. The building will be 48x110 feet. The plan provides for 80 rooms arranged in two and three room suites with baths and wall beds. There will be steam heat and a vacuum cleaning system. The interior trim will be of pine and oak. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles,

Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Miss Lillie M. Whiteside. The building will contain 39 rooms arranged in suites of two and three rooms each with connecting baths. The interior will be finished in pine. There will be hot and cold running water, wall beds and steam heat. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Contracts Awarded.

Garage—2 story and base, reinforced concrete, \$109,000. Los Angeles, Cal. Contractors, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, S. H. Van Saus. Contractor, Carl Leonard, H. W. Bellamy Bldg., L. A. Contract price not stated.

SEATTLE AND WASHINGTON.

Apartment House—3 story and base, brick, \$30,000. Seattle, Wash. Architect, E. E. Green, Central Bldg., Seattle. Owners' name withheld. The building will be erected on a corner and will contain 11 apartments of five rooms and bath each. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans will be complete within two weeks.

School—2 story and base, brick, \$65,000. Seattle, Wash. Architect, Edgar Blair, 912 4th Ave., Seattle. Owners, City of Seattle. The building has been designed for a 12-room school. There will be steam heat and a modern system of ventilation. The construction will be nearly fire proof. Bids will be received separately for the heating and ventilating, electric work and for the general contract. Bids will be opened on June 26th.

Contracts Awarded.

Factory—2 story and base, frame, \$55,000. Seattle, Wash. Architect, E. H. Wengert, care of the Smith Cannery Machine Co., Seattle. Owners, Smith Cannery Machine Co., Contractors, Rounds-Hurston Co., Globe Bldg., Seattle. Contract price, \$25,000.

Factory Buildings—2, 2 story and base, reinforced concrete. Cost not stated. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Fleishmann & Co. The following firms are low on the two units of the 132 factory group, which, when completed will cost \$250,000. (a) buildings H and J, the buildings E and G, Inlter Construction Co., Central Bldg., Seattle, to \$38,850, Puget Sound Lumber and Dredging Co. (b) \$15,997. No awards have been made.

Railroad Construction—\$5,000,000, Mount Airy, Engineering Dept., Chicago, Milwaukee and Puget Sound R. R. Co.,

White Bldg., Seattle. Owners, Chicago, Milwaukee and Puget Sound R. R. Co., Contractors, Winston Bros., Minneapolis, Minn., construction of 70 miles of roadbed. Twoby Bros., Wells-Fargo Bldg., Spokane, constructing 70 miles roadbed. These two contracts include the boring of six tunnels, the longest of which is 1900 feet.

Roundhouse, Etc.—Frame and concrete construction. Cost not stated. Goldbar, Wash. Engineering Dept., Northern Pacific R. R. Co., Seattle. Owners, Northern Pacific R. R. Co., Contractor, H. Chase, 214 1st Ave., Seattle. Contract price not stated. The work will include the construction of a roundhouse, storage shed, scrap bins and a water tower.

PORTLAND AND OREGON.

School Addition—2 story and base, brick. Cost not stated. Salem, Ore. Architects, Engineering Dept., Bureau of Indian Affairs, Washington, D. C. Owners, U. S. Government. Plans are on file at the office of the Indian Supply Depot, 268 Market St., S. F., or may be obtained at the school. Bids will be opened at Washington, D. C., on July 17th.

Lodge Hall—2 story and base, brick, \$12,000. Mt. Angel, Ore. Architect, E. Kroner, Worcester Bldg., Portland. Owners, Mt. Angel Masonic Hall Association. The building will contain a store on the first floor and lodge rooms on the second. The interior will be finished in pine and oak. There will be a central heating system. The exterior of the building will be faced with pressed brick. Plans are being prepared and a contract will be let as soon as figures can be taken.

Contracts Awarded.

Hotel—4 story and base, brick, \$65,000. Portland, Ore. Architect, A. C. Ewart, Portland. Owners, Wright Investment Co. Contractor, Antone Teller, Portland. Contract price, \$65,000.

TRADE PAPER ADVERTISING.

Its Value Recognized by the Advertising Experts of the Big Magazines.

A New and Mighty Adjunct to Distribution of Nationally Advertised Goods.

It has long been a truism among advertising managers that national advertising without national distribution is money wasted. The function of the great weeklies and monthlies published in the East has been to create consumer demand, and this they have demonstrated their power to do. The scattering of the article popularized, however, over the length and breadth of a country of 90 million people, so that the demand thus created could be met, has fallen to the duty of the sales managers of each manufacturer, and has been a task not easy.

One great national magazine saw the light in this matter two years ago, and has rendered a substantial service to all its clients by reaching the retail merchant in their behalf through the straightest and most logical route—the trade papers. "The Dr. Wiley magazine" takes space in dozens of trade papers on the same basis as any other advertiser, and puts forth strong appeals to retail merchants in behalf of all nationally advertised goods, with

special reference, naturally, to those exploited in its own columns.

Its latest series of such advertisements, the sixth in two years, consisted of three and four page announcements in 25 trade journals published the latter part of April and early in May. The advertisements were illustrated with hundreds of photo-engraved fac-similes of advertising the particular kind of service happily named "readvertising" by the publication. Every argument was made to the retail merchant to stimulate the stocking and pushing of the wares recommended by the great monthlies and weeklies.

A notable feature is that Good Housekeeping does not confine itself to the recommendation of the products of its own efforts exclusively, as might be anticipated. The publication is striving to enlist the co-operation of its conferees in going direct to the retail merchant on behalf of advertisers, and thus casts its advertisements partly with an eye to that point and partly from the less altruistic stand of rendering a direct super-service to its own patrons.

The movement is of unusual interest as an endorsement of the unique value of trade papers as channels of communication with the trade, given by the advertising department of a great New York publication. The manager of the department putting out these "readvertisements" made the following statement: "We believe thoroughly in trade papers as a means of reaching the people we are aiming at—the progressive and intelligent merchants. They are the men who take trade journals and they are recognizing more and more every day that nationally advertised products are almost self-selling over the counter, and in addition hold customers. Such products give satisfaction and create good will for the merchant who handles them. We do not regret a single dollar we have ever spent in trade paper space. It has repaid us indirectly many fold by preceding the salesmen of our advertisers and making national distribution easier for them. The trade papers are undoubtedly the cheapest and most authoritative means of getting at the right class of dealers."

CALIFORNIA LEADS AGAIN.

That enterprising spirit so pronounced among California business men is again in evidence through the Santa Cruz Portland Cement Co., who, realizing the unnecessary expense connected with bringing outside products into this market have, by utilizing our own natural resources, produced a White Cement which they claim is superior to any other brand of White Cement manufactured.

They substantiate this claim with tests and reports from consumers which are most flattering, and it appears that California has once more demonstrated her ability to lead in everything she tries.

This new epoch in western Cement history is of considerable moment as it marks the beginning of a new industry which will grow rapidly, for now that White Cement can be produced here at home, at a reasonable cost, it will no longer be considered a

luxury as heretofore, and will be used more freely for decorative purposes.

RESHING WORK AT VERDI.

VERDI (Nev.), June 7.—Five steam shovel outfits were received here Thursday for Chadwick and Sikes, contractors, who are working on the double track project between Lisbon and Verdi. This makes a total of nine steam shovels in use on the district under the supervision of these contractors. Several spurs have been installed for the storage of outfit cars and cars of material for the contractors.

Chadwick and Sikes is only one of the five contracting companies who are working between Poma and Verdi. The Utah Construction Company has the original contract for constructing the road, having sub-contracted to smaller concerns.

OFFICE BUILDINGS ARE TO BE ERECTED.

KLAMATH FALLS (Ore.), June 7.—Eds have just been received on several large office buildings to be constructed on Main street at once. The Melrose building of three stories will be of brick and stone. The Clisler-Stitts will be a two-story office structure. C. E. Riley and G. W. White will each put up a two-story office building. The buildings will cost in the aggregate \$150,000. Plans for other brick buildings are being prepared.

WAREHOUSES TO RAISE RATES.

The Railroad Commission rendered a decision last Thursday granting the application of a number of San Francisco warehouses to raise and equalize their rates. The application was made on behalf of the Metropolitan Warehouse Company, Larneson-Hibbeld Warehouse Company, A. P. Heise, Harbor Warehouse Company, Oriental Warehouse Company, Hissett Warehouse Company, South End Warehouse Company, E. C. Zeile, W. B. Sanborn, De Pue Warehouse Company and Danforth Warehouse Company.

There was no appearance in opposition to the request of the warehouse men and the evidence they presented was unopposed, although opportunity was offered for the presentation of protests. The rates put into effect are subject to complaint at any time on behalf of any interested party.

TURLOCK BUILDING \$16,515 FOR MAY.

TURLOCK, June 7.—A total of twelve building permits were issued by City Clerk Elmore during the month of May, just closed. The total value was \$16,915. Eight of the twelve permits were for residences ranging in value from \$1400 to \$2400.

COLORADO BREAKS LEVEES.

SAN BERNARDINO, June 7.—Thousands of acres of land on the Arizona side of the Colorado river across from old Fort Mojave, are under water as a result of the river overflowing and then bursting through the cotton Land company levee.

The Colorado levee, just below Fort Mojave, practically has been depopulated, the people fleeing to higher ground for safety.

The break in the levee caused the river to fall three feet at Needles, but the government weather bureau pre-

dicted that the crest of the flood would reach Needles until June 9.

HIGH RANCH SOLD.

MERCED, June 12.—The 108,000-acre Chowchilla ranch, located on both sides of the Chowchilla river at its junction with the San Joaquin, has been sold for \$2,000,000 to the Union Colonization Company. The deeds have been recorded in Merced and Madera counties, and \$500,000 has been paid as first installment.

The land will be subdivided into small tracts and sold to farmers. At least two and probably three or four towns will be built on the old cattle ranch.

Surveys have been completed on half the big tract and operations will be begun at once.

Surveyors are now busily engaged platting a townsite to be known as Chowchilla. This new town will be located on the Southern Pacific Railroad seventeen miles southwest of Merced, near the present station of Minner. The lands of the Chowchilla are suited to the growing of alfalfa, fruits, sweet potatoes, onions and all sorts of garden vegetables. Water for irrigation will be secured from pumping plants.

SMALL STEEL MILLS DISMANTLED.

NEW YORK, June 13.—The extent to which the American Sheet and Tinplate Company threw its small mills into the "scrap heap" after buying them up, was discussed in Wednesday's hearing of the Government's suit to dissolve the "steel trust." C. W. Bray, former president of the American Sheet and Tinplate Company, submitted memoranda of "mills dismantled after formation of the American Tinplate Company," showed that out of 121 plants assimilated, thirty-three were thrown in the scrap heap, sixty were moved to going plants, sixteen "used as shares" and twelve sold.

The Government wanted to know what value was given to the plants on the books of the company. Bray estimated that each mill was written off at about \$10,000.

NEW YORK CLEARING HOUSE COMMITTEE CLOSED SOLVENT BANKS.

NEW YORK, June 8.—Testimony intended to show how the power of the New York Clearing-house committee was used to force a solvent bank to the wall during the aftermath of the panic of 1907, with the result that the "fair reputation" of its president was "blasted" was presented today before the Pajo committee of the House of Representatives, which is investigating the so-called money trust.

The bank around which the testimony centered was the Oriental, organized in 1852, and one of the charter members of the Clearing-house Association, but it was testified that three other banks, the Bank of North America and the New Amsterdam National Bank, in both of which Charles W. Morse was interested, and the Mechanics' and Traders' similarly were compelled through the action of the clearing-house to close, although all proved to have been solvent.

NEW GOVERNMENT PUBLICATIONS.

Scenic Wonders.

The Department of the Interior has
begun the publication of a series of
profusely illustrated pamphlets de-
scriptive of the great parks in the West
and the natural wonders which they
inclose. Three numbers have been thus
issued, namely: (1) Geological His-
tory of the Yellowstone Park; (2)
Geological History of Crater Lake
National Park; (3) Geysers.

These are not technical treatises.
While they give much scientific in-
formation, it is not given in technical
terms. The purpose of the publication
is to popularize the parks, of which
they are now 14. The Superintendent of
Documents has these interesting and
ornamental pamphlets for sale at 10
cents each.

Government Standard for Cement.

Circular 33, Bureau of Standards,
Commerce and Labor Department,
issued May 1, 1912, has for title
"United States Government Specifi-
cation for Portland Cement." This spec-
ification is the result of a Government
inquiry by a board on which all Gov-
ernment departments were represented.
This board conferred with representa-
tives of unofficial consumers and man-
ufacturers and with special committees
of engineer societies. The specification
given in Circular 33 was unanimously
adopted by all and an executive order
issued April 20, 1912, it was directed
that all cement used in Government
work shall conform to this specification.
Circular 33 is sold by the Superintend-
ent of Documents at 10 cents a copy.

Federal Antitrust Decisions.

In 1907 the Department of Justice
published two volumes Federal Anti-
trust Decisions, 1890-1906. This year

Reversible Windows

Without Weights and Cords

Inside View

This window performs all the functions of a double hung window. Perfect ventilation. Each sash works independently. No rattle. Wind and rain proof. Does not interfere with curtains or shades; Reverses perfectly. Send for details and price list.

Here you have a double casement, where each sash is reversible. Can be worked as a single casement just as easily. This is the only single casement with reversible sash.

these two volumes have been reprinted, with two more, giving the trust cases to the present date, with tables of cases reported and cases cited and an index to the whole, making a set of four volumes, bound in buckram, and sold by the Superintendent of Documents at \$4 for the set.

Everglades of Florida.

A very complete collection of all the acts, reports, and other papers, State and National, relating to the Everglades and their reclamation, has been published by the Government as Senate Document 89, Sixty-second Congress, first session. Besides 208 pages of text, the document carries two folded maps and several plates and diagrams. Copies are for sale by the Superintendent of Documents, Washington, D. C. at 20 cents.

PACIFIC MAIL SHOWS DEFICIT IN ANNUAL STATEMENT.

The Pacific Mail Steamship Company's statement for the year shows a deficit although it is a decided gain over last year.

The total receipts for the year ending April 30th amounted to \$5,285,199, as compared with \$4,974,819 in the previous year. Expenses for the last year aggregate \$4,856,176, as compared with \$4,819,638, and net receipts amount to \$133,923, as compared with \$155,818. Depreciation and repairs amounted to \$152,105, as compared with \$154,453, and the balance leaves a deficit of \$19,882, as compared with a deficit of \$199,276.

The earnings of the Southern Pacific, owner of the Pacific Mail, show a decrease in gross and net for the period beginning July 1, 1911, and ending April 30th, as follows: Gross, \$109,951,894, as compared with \$111,529,780; net, \$53,437,398, as compared with \$56,237,332 in the previous year.

The Santa Fe's gross for the same period in 1911-1912 equaled \$59,869,954, as compared with \$50,419,659 in the corresponding period of the previous year; net, \$29,911,324, as compared with \$31,111,366.

FIRE DESTROYES PORTLAND FLOUR MILL.

PORTLAND (Or.), June 8.—Fire of unknown origin yesterday gutted the three upper stories of the New Crown Mills, a flour mill owned by Balfour, Guthrie & Co. The lower stories of the building, which is a reinforced concrete structure, and the warehouse, which contains nearly all the products of the mill, were not injured. The loss is estimated to be about \$100,000, fully covered by insurance.

TO CALL BOND ELECTION.

WILLOWS (Glenn Co.), June 8.—The Supervisors met yesterday and took up the matter of calling for the bond election to erect a new \$50,000 High School Building in this city. The date has not been officially fixed, but will probably be set for July 9th.

The Supervisors also called for bids for building two concrete bridges. One bridge is to be over Walker Creek, four miles south of Willows, and the other is one mile east of town. Each bridge will cost approximately \$2,000.

MIR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties.

Send for details.

Editorial Comment.

There seems to be little probability of passing the parcels post bill this session of congress as that body seems to be occupying most of its time doing petty politics and practicing fool economy where generosity is needed. It has attempted to tack on to a necessary appropriation bill a lot of changes in the army regulations that should have come up on separate measures. It has failed to make the appropriation for the steady increase of the navy and has cut the appropriation for extending the scope of the consular service where it has been most active and beneficial in securing trade for American manufactures in foreign countries. Now Mr. Berwick, of the Postal Progress League of California, declares positively that congress is preparing to pass a Logans bill with the purpose to select the parcels post measure in the interest of the express companies. The proposition is to refer the whole thing to a commission who are to inquire into the subject and report back. As if the congress was not already familiar enough with the subject to act on it, or that its committees did not have sufficient information.

It reminds one of Taft's tariff commission. Pass the whole thing up to the commission, let the express companies appoint the commission and let no one presume to question the procedure. That is representative government.

In the question of the benefit of a cheap parcels post there would seem that there could be little honest difference of opinion. It is demonstrated and a living example of great public benefit all over the world today. Yet here in free America, in the United States, are to be found people who clamor the maintenance of the exorbitant express companies who daily exact their charges from the public.

The express companies are powerful and active. It is the same old story of what is everybody's business is nobody's business and the people are slow to act. The cheap parcels post will come some day, but it will only be after a fight.

In a report of the general meeting of the Bombay Gas Company of thirty-four years ago one of the participants, who had shortly before attended an exhibition of the electric light, stated that this light was not one "which any man could put about his house and leave in the care of his servants. There could be no store of electricity, and the instant the engine ceased to work from any cause or accident all the lights would be gone." Another attendant at the meeting "was quite

ready to admit that at some distant day electric lights must become general; but it might be that at some remote period men might fly. * * *

All these things might be possible, but 'twee were a long way off."

Even the remote possibility of flying has been accomplished while lighting by electricity has become the chief source of artificial supply and has been for twenty years. A short retrospect often shows one in a striking manner how far we have gone in the field of industrial development.

In regard to the hydro electric development now in progress and the statistics already established some striking figures are presented of the centralized generation, transmission and distribution of electrical energy by a single company in California owning property and operating in thirty counties representing an area exceeding the combined area of the New England States except Maine. This system operates over a territory of 38,000 square miles, and distributes about 400,000,000 kilowatt-hours per year. It has very nearly 1200 miles of 60,000-volts, 60-cycle circuits, and about 400 miles more operating at less than 60,000 volts. Its ten hydraulic plants have an aggregate rated capacity of about 67,000 kilowatts, and its three steam plants have an aggregate rated capacity of a trifle more than this. The development of the electric service industry in central California is substantially the history of the growth of the State in population, agriculture, mining, and manufactures for the past fifteen years.

So far as California is concerned, Scotland stands where she stood. Had there been a few more in the convention like Governor Johnson, who stood for principle alone, there would have been a different tale to tell. Most of the delegates of the Eastern States seem to be so busy looking after their own petty little political fortunes that they have no time left to look after the interests of the people. Meanwhile the Special interests through their Chief lieutenant Elihu Root manipulate the steam roller and inspire terror in the piny souls of the bunch that have erstwhile shouted for the people in thunder tones. The bunch that have so long taken orders from the corporations haven't the backbone to call their souls their own. The example of Governor Johnson in winning his battles in California and the example of California has been lost on the convention. They have set still and let the bosses perpetrate one of the most open steals that was ever recorded in the history of politics and have offered no effective opposition.

Trained Engineers and Skilled Workmen Needed In Concrete Construction.

Failures at This Building Method Due to Bad Workmanship, not Faulty Design.

The collapsing of the reinforced concrete building in Indianapolis last winter, killing eight men and injuring twenty-one others and other similar accidents continue to bring forward for discussion the cause of failures in construction of reinforced concrete, says Building Progress.

At the outset we can adopt as a premise that it is inexperience and lack of intelligent supervision which is the most prolific cause of failure. This will be better understood by considering the following possibilities of failure from faulty design and faulty construction. Taking up first the possibility of failure from faulty design it can be broadly stated that there is less danger from this source than from faulty construction. There is nothing problematic about the strength of good concrete, or good concrete reinforced with steel, any more than there is about the strength of bricks or stone. The only trouble is, that in designing the architect must assume that the work will be well done, and the reinforcing properly placed, and thus only good, intelligent supervision will accomplish. If the work is improperly done, or poor materials lacking in strength are used, either through ignorance or carelessness, the designer's calculations will be brought to naught just the same as if sun-dried bricks were used instead of granite or wooden beams were substituted for steel girders.

Assuming that the materials used will be good, knowing their strength and allowing the usual factors of safety common to architectural and engineering design, there is nothing about the planning of an ordinary building which would overtax the ability of a good reinforced concrete engineer. Even if an error did creep into his calculations, the checking and rechecking which work of this character receives would reveal the defective design. If, indeed, good judgment would not detect the false proportions from previous experience with the same class of work. We may deem as improbable then, the likelihood of faulty design being the cause of reinforced concrete buildings collapsing.

It is in the construction end of the building, then, where the greatest responsibility lies, and where the greatest care, the utmost experience, the constant vigilance and skilled supervision are needed. Indeed, the very weakness which makes reinforced concrete an unknown quantity is the fact that one poor batch of concrete, or the misplacing of the reinforcing materials, might wreck disaster in the history of the structure. Unfortunately the impression has gone abroad that it requires only unskilled labor to erect a reinforced concrete building. Unfortunately, for that is not true it is only partly true.

It is quite true that the ordinary laborer can erect a concrete work while in a brick building high-priced bricklayers would be required. But the real difference comes in when the

personnel of the superintendents is considered. The man in charge of a bricklaying crew owes his position to his success in getting work out of his men. That is all that is required of him, for the materials are of such a nature that all they require is careful laying to develop their entire strength. Such a foreman would be absolutely worthless in charge of reinforced concrete work, his "hurry-up" methods are not conducive to the best results, and, unfortunately, when reinforced work is given to the ordinary contractor that is the kind of man usually in charge.

The superintendent in charge of reinforced concrete construction must be more than a labor driver. He must be, first and foremost, a trained engineer who understands not only cement concrete, steel, and the combination of the three, but likewise possesses a good knowledge of building in general, and has an intimate and first-hand knowledge of the strength of beams, the loads walls, floors and columns will carry, and has a keen perception and broad judgment to guide him in his work.

In short, reinforced concrete work is not common laborer's work, and the sooner that truth is realized the sooner will failures in this class of buildings cease. On the contrary reinforced concrete work is a highly specialized form of building, and requires more that the ordinary supervision to carry it successfully through. Instead of giving such work to the ordinary contractor it should be given to specialists and specialists only, for these are specialists in reinforced concrete construction. That is the point to remember.

Where the great mistake is made in the erection of buildings of reinforced

concrete is in giving the work to an ordinary mason contractor, believing he can do the work satisfactorily because it is mason's materials that are to be used. What the architects seem not to have grasped heretofore is that reinforced concrete work in engineering work, not mason work; that an engineer, not a workman, must have charge of the work if it is to be properly done, for the design and construction go hand in hand. The placing of the reinforcing rods in the walls, floors, columns and beams in even the best work is left to the superintendent to carry out properly.

In the erecting of steel framework for buildings the beams are all cut and punched at the shops, under direction of the structural engineer, or in accordance with plans prepared by him, and erected according to other drawings, in such a case every beam must be used in that place or it will not fit. Nothing is left to the judgment of the workman on the building. That is the exact method of building. In the case of reinforced concrete nothing can or will be in the exact place unless it is placed there under the careful supervision of an engineer who understands the need of being exact.

There will be fewer reinforced concrete failures in the future if architects will just keep that fact in mind. The success or failure of their plans and reputation depends more on the people entrusted with their work than in any other method of construction. To entrust the work to ordinary contractors, under the mistaken impression that concrete building is rough work anybody can do, is to invite failure in a double sense to the architect who designs a building that collapses.

SAN FRANCISCO CITY HALL PLANS ARE ACCEPTED.

Noteworthy Competition Ends With Selection Of Plans submitted By Architects Bakewell and Brown. Commission Envoles A Large Fortune.

With the selection of the plans of Architects Bakewell & Brown for the new \$1,000,000 City Hall ended the largest and most noteworthy architectural competition held on the Pacific Coast in years. The plans prepared by the above named architects received the unanimous approval of the jury at a late hour Thursday night and after that body had made a careful four days study of the competitive plans submitted by seventy-three of the best known architects in the city.

The plans of Architects Bakewell & Brown show an imposing and graceful structure designed in the classic style so well adapted to the American official building. The main portion of

the building will be four stories in height, as required by the schedule of competition, from the center of which will arise a great dome of beautiful proportions. The highest part of the dome will be 245 feet from the ground and will be topped by a heroic figure representing the Spirit of San Francisco. This central feature will have a diameter of approximately 130 feet on the first floor. The interior of the dome will be finished in stone. The extreme dimensions of the main portion of the building will give it a frontage of 390 feet and a depth of 273 feet.

The seventy-three sets of competitive plans were received by the Architectural Commission on June 15th and

the jury consisting of Walter Cook, New York, President of the American Institute of Architects, John Galen Howard, Frederick H. Meyer, John Field Jr., James Ralph Jr., Paul Bancroft and Daniel C. Fraser, began their deliberations on the following Monday. Twenty prizes besides the first prize were also awarded. The winning architects being mentioned in the official report of the jury which is printed below.

Official Report of Jury.

Honorable Board of Public Works,

Honorable and Dear Sirs:—

On Saturday, June 15th, 1912, the seventy-three designs submitted by the competitors in the San Francisco City Hall Competition were opened and numbered by the Consulting Architects, according to the provisions of the program.

On Monday, June 17th, the jury organized and proceeded with the examination of the drawings. The examination continued through Monday, Tuesday, Wednesday and Thursday. On Thursday, the design bearing No. 22, being in the opinion of the jury the best, was designated the first prize design. The envelope containing that number was then opened in accordance with the provisions of the program, by the Consulting Architects. This design was found to have been submitted by Messrs. Bakewell & Brown. The twenty competitors whose designs were adjudged best by the jury, after the first prize design, were those of:

John Baur, Bliss & Fawcett, Coates & Traver, L. B. Burton, Edward T. Foulkes, Ralph Warner Hart, William C. Hays, Lewis P. Hobart, George William Kellum, Milton Lichtenstein, Miller & Colmesnil, Wm. Mosser, O'Brien & Werner, William L.OPER, Righetti & Headman, Houghton Sawyer Shea & Lofquist, Ward & Blohm, Chas. Peter Weiss and N. L. Woollett.

We, the undersigned, therefore recommend that Messrs. Bakewell & Brown be employed as architects for the City Hall and that each of the above twenty architects receive the sum of One Thousand Dollars (\$1000) as provided for in the Program.

Yours respectfully,
WALTER COOK,
JOHN GALEN HOWARD,
JOHN FIELD, JR.,
FREDERICK H. MEYER,
JAMES RALPH JR.,
PAUL BANCROFT,
DANIEL C. FRASER.

The seventy-three sets of plans will be placed on public exhibition in the rooms of the Architectural Commission in the Bankers' Investment Bldg. on Market street, commencing today.

Both Arthur Brown, Jr. and John Bakewell, Jr., of the firm of Bakewell & Brown, are highly respected members of the architectural profession and are natives of California. Both were educated at the University of California and both finished their education in Europe at the Ecole des Beaux Arts. The firm has been established in San Francisco for a number of years, during which time they have engaged in a general practice and have designed a number of San Francisco's high class commercial buildings, and many elaborate country and city residences. During the last year the firm has carried out work in this city for the Regents of the University of California. The merits of their past work

and their design for the City Hall show that they possess the capabilities to carry such a large undertaking to a successful conclusion.

BIG NUMBER OF BIDDERS FOR FOLSOM SUPPLIES.

One hundred and ninety-three bids—the largest number on record for Folsom State Prison—were received last Saturday by the State Board of Prison Directors at Folsom. These bids are for contracts to supply the prison with food and other necessary material for the fiscal year, July 1, 1912, to July 1, 1913. The supplies to be furnished aggregate \$100,000.

The Prison Board was in session until Sunday morning at 2 o'clock, having convened at 9 o'clock Saturday morning. The thirty applications for paroles were heard. Twelve prisoners were ordered released under the parole regulations, six applications were laid over until some future time, seven were postponed for one year, and five were put over until the meeting in July.

Warden James A. Johnston announced the appointment of five guards. They are: C. G. Rippelee, James Simpson, E. E. Williamson, George Francis and W. L. Winthrop.

CARNEGIE GIFT OPPOSED BY UNION.
Local 1419 of the United Brotherhood of Carpenters and Joiners has sent to the Board of Supervisors the resolution which it adopted against the acceptance by the city of Andrew Carnegie's gift of \$750,000 for library purposes. The following language is contained in them: "There is no person whose name is more repugnant to fair-minded persons than that of Andrew Carnegie, whose vast fortune was accumulated at the expense of every rule of humanity. Thousands of persons in his employ having toiled long hours for a mere pittance, and on more than one occasion being assaulted and shot and a number killed for rebelling against the industrial slavery imposed upon them. We join in the protest against bringing shame and humiliation upon the fair name of San Francisco by having it share in the ill-gotten wealth of Andrew Carnegie to build him a monument."

FETE AT SANTA CRUZ.

Water Pageant and Carnival Planned for the Surf City.

Perhaps the most extensive and elaborate water pageant and carnival ever attempted on the Pacific Coast has been planned by Mr. Fred Swanton, for the summer resort city of Santa Cruz, commencing Saturday July 20th and ending in a blaze of fire works on Sunday, July 28th. Ever since the Casino at Santa Cruz closed last Fall, Swanton has been at work on his idea, with the result that all arrangements have been completed for a truly remarkable nine-day festival at the popular watering place.

Among the hundred features which have been prepared in order that the water pageant may go down in history as a remarkable success, are the following: A yacht regatta to which all of the yacht clubs of the Pacific Coast have been invited and which will be held under the auspices of the Corinthian Yacht Club of San Francisco; a series of motor-boat races on San Lorenzo river, along which reviewing

Just the Information We Need

WEBSTER'S NEW INTERNATIONAL

—THE MERRIAM WEBSTER

Every day in your talk and reading, on the street car, in the office, shop, and elsewhere, some new question is sure to come up. You need quick, accurate, encyclopedic, up-to-date information.

This NEW CREATION will answer all your questions with final authority. 400,000 Words Defined. 2700 Pages. 6000 Illustrations. Cost \$100.00. The only dictionary with the new divided page. A "Stroke of Genius."

Write for specimen pages, illustrations, etc. Mention this publication and we will send you a FREE set of pocket maps.

G. & C.
MERRIAM
CO.,
Springfield,
Mass.,
U. S. A.

stations garlanded with flowers and flags are now in process of construction; parades of decorated boats, corresponding to those used in New Orleans at Mardi Gras time; shell and small boat races; swimming contests and nightly displays of fireworks and flambéaux.

The presence, during the festivities, of several of the largest and finest vessels in the Pacific Squadron, has been assured. In addition there will be the usual opportunities for unsurpassed surf bathing, dancing every evening in the Casino; side-trips to the Big Trees and through the wonderful canyon connecting Santa Cruz with the Big Basin country, and other features.

The large and beautiful Hotel Casa del Rey, recently completed at an expenditure of a tremendous amount of money and energy, is arranging to take care of part of the immense crowd which promises to assemble at Santa Cruz during the nine days of the water pageant. The management of the big hostelry has assured the public that there will be no advance over their regular rates, which are unusually moderate considering the fact that every room in the immense building is an outside room and is flooded with daily sunshine. The Casa del Rey will accept advanced reservations from this date until the opening of the carnival. In addition to the accommodations offered by this Hotel, the Tent City at Santa Cruz is now in full bloom and there are many other, though smaller, hotels and boarding places which afford comfortable lodgings for a vast host.

The Southern Pacific Company, which maintains a fast and superior service between San Francisco, Los Angeles and tributary points to Santa Cruz, is arranging to make especially low rates to the Surf City and return, for the period commencing July 20th and ending July 28th.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "NOTICES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 5 story and base frame, \$75,000. Architect Henry C. Smith. Humboldt Bldg. S. F. Owner Mrs. Ida Schreder. The building has been designed to contain nine apartments arranged in suites of two and three rooms each with baths. The interior finish will be of pine and hardwoods. There will be steam heat and wall beds. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 5 story and base brick and steel. Cost not stated. Architects, Clinton, Day, Nevada Bank Bldg., S. F. Owner, Addison C. Kittredge. The building will be erected in the Fifth Ward District and will contain in the neighborhood of 60 apartments arranged in suites of two and three rooms with private baths. There will be wall beds, steam heat and elevator service. The exterior of the building will be faced with terra cotta. Plans are complete and the architect is taking figures on the construction.

San Francisco—Apartment house, 5 story and base reinforced concrete, \$20,000. Architects, O'Brien Bros., China Bldg., S. F. Owner, James E. Reiter. This building has been mentioned here before when the plans were first being prepared. The structure will cover an area of 6250 feet and will contain 27 apartments of three and four rooms each with private baths. There will be steam heat and wall beds. One electric elevator will be installed. The exterior of the building will be faced with cement plaster. Plans are complete and a contract will be awarded shortly.

Los Angeles, Cal.—Apartment house, 4 story and base brick. Cost not stated. Architects, Austin and Bonniell Wright and Callender Bldg., L. A. Owner, James N. Pittet. The building will be 60x150 feet and will contain 98 rooms arranged in two and three room apartments with connecting baths and wall beds. There will be brick trim, hardwood floor, cement flooring and steam heat. The exterior of the building will be faced with glazed brick. Plans are complete and bids are being taken.

Los Angeles, Cal.—Apartment house, 4 story and base brick and steel, \$17,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, M. Strickland. The building will contain 120 rooms arranged in suites of two and three rooms each with private baths and wall beds. There will be steam heat, elevator service and a room cleaning system. The interior finish will be of pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

San Francisco—Apartment house, 5 story and base brick and steel, \$25,000.

Architect, William Beck, 127 Montgomery Street, S. F. (Phone 1000). Will build. The building will cover a considerable amount of ground and be designed for steam heat, wall beds and modern apartment facilities and private rooms on the first floor. There will be wall beds and steam heat. Running water for each apartment for all apartments. The exterior of the building will be faced with pressed brick. The architect is completing the working drawings.

San Francisco—Apartment house, 6 story and base reinforced concrete, \$75,000. Architect, M. Mattanovich, Front Bldg. S. F. Owner, F. A. Meyers. The building has been mentioned in these columns before under another architect's name. There will be in the neighborhood of 80 apartments arranged in suites of two and three rooms each. There will be private baths, wall beds and steam heat and elevator service. The interior will be handsomely finished. The exterior of the building will probably be faced with cement plaster. Working drawings are now being prepared.

San Francisco—Apartment house, 5 story and base brick and steel. Cost not stated. Architects, Fitch and Knoll. Hearst Bldg. S. F. Owner, Louis Haas. The building will contain a store on the first floor and a number of two and three room apartments on the upper floors. There will be steam heat, wall beds and elevator service. The interior of the apartments will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

San Francisco—Apartment house, 6 story and base brick and steel. Cost not stated. Architect, William Corbett & Son, Union Bldg. S. F. The building will be erected at a corner and will contain in the neighborhood of 60 apartments arranged in suites of two and three rooms each. There will be wall beds, steam heat, elevator service and private baths. The exterior of the building will be faced with pressed brick. The architects are now preparing the plans.

Los Angeles, Cal.—Apartment houses, 2, 3 story and base brick. Cost not stated. Architects, California Real Estate & Building Co., Realty Bond Bldg., L. A. Owners, William Burn and C. A. Bryant. The plans for one of these buildings provide for several stories on the first floor and apartments above. The other structure will contain nothing but apartments. There will be steam heat and wall beds and wall beds. The exteriors will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 4 story and base brick and steel. Cost not stated. Architect, S. S. Tilden Norton, Tith Bldg., L. A. Owner, Harry E. Mohrhead. The building will be 60x100 feet and will contain 70 rooms arranged in 22 suites with wall beds and connecting baths. There

will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and the architect is now taking figures.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, Edelman and Barnett, Blanchard Bldg., L. A. Owner, Herman Cohn. The building will cover an area of 20x150 feet and has been designed to contain 92 two-room apartments all of which will have connecting baths and wall beds. There will be steam heat and elevators. The exterior of the building will be faced with enameled brick. Plans are now being prepared.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Alfred F. Priest, Fay Bldg., L. A. Owner, A. Nadler. The building will be 50x152 feet and will contain 70 rooms arranged in suites of two and three rooms each with private baths and wall beds. There will be steam heat. The exterior of the building will be faced with pressed brick. The architect is now preparing the working drawings.

Apartment House—6 story and base, reinforced concrete, \$75,000. San Francisco. Architect, M. Mattanovich, Pacific Bldg., S. F. Owner, F. A. Meyers. The building has been mentioned in these columns before under another architect's name. There will be in the neighborhood of 80 apartments arranged in suites of two and three rooms each. There will be private baths, wall beds, steam heat, and elevator service. The interior will be handsomely finished. The exterior of the building will probably be faced with cement plaster. Working drawings are now being prepared.

Apartment House—5 story and base, brick and steel. Cost not stated. San Francisco. Architects, Fitch & Knoll, Hearst Bldg., S. F. Owner, Louis Haas. The building will contain a store on the first floor and a number of two and three room apartments on the upper floors. There will be steam heat, wall beds and elevator service. The interior of the apartments will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Apartment House—6 story and base, brick and steel, \$10,000. San Francisco. Architects, William Corbett & Son, Phoenix Bldg., S. F. The building will be erected at a corner and will contain in the neighborhood of 60 apartments arranged in suites of two and three rooms each. There will be wall beds, steam heat, elevator service and private baths. The exterior of the building will be faced with pressed brick. The architects are now preparing the plans.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, Mrs. Anna M. Moore. The structure will cover an area of 60x100 feet. There will be about 70 rooms arranged in suites of two and three rooms each with connecting baths. There will be wall beds, steam heat and elevators. The interior will be handsomely finished. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

CHURCHES.

San Francisco—Church, 2-story and tower, brick, and frame construction. Cost not stated. Architects, Sica and Laquet, Bank of Italy Bldg., S. F. Owners, St. Vincent de Paul's Espinosa Church. The excavating and foundation work on this edifice has been completed. Plans are now out for figures on the balance of the work. The design is in the Mission style with the first and second stories faced with brick and the balance of the building covered with cement plaster on metal lath. The roof will be of tile. The interior will be handsomely finished in pine, hardwoods and ornamental plaster.

COURT HOUSES.

San Francisco—City and County Bldg., 1-story and base. Class A construction, \$150,000. Architects, Bakewell and Brown, 117 Montgomery St., S. F. Owners, City and County of San Francisco. A selection of the seventy-three sets of competitive plans received for this work has resulted in the selection of the above mentioned architects.

The plans of Architects Bakewell & Brown show an imposing and graceful structure designed in the classic style so well adapted to the American official building. The main portion of the building will be four stories in height, as required by the schedule of competition, from the center of which will raise a great dome of beautiful proportions. The highest part of the dome will be 245 feet from the ground and will be topped by a bronze figure representing the St. Spirit of San Francisco. This central feature will have a diameter of approximately 130 feet on the first floor. The interior of the dome will be finished in stone. The extreme dimensions of the main portion of the building will give it a frontage of 730 feet and a depth of 273 feet. A description of the materials which will enter into the construction of the building cannot be given at this time nor is it possible to say how the work will be handled.

FACTORIES & WAREHOUSES

San Francisco—Wherey 2-story and base, brick and steel, \$25,000. Architect, L. Mastropasqua, 550 Washington Street, S. F. Owner, Paul Aratti. The building will cover an area of 157,368 feet. The construction will be very heavy to carry the floor loads. There will be a large amount of steel work. The plans provide for a number of special features found only in this type of building such as large wood racks etc. The exterior will be faced with pressed brick. The architect is completing the working drawings.

Oakland, Cal.—Factory, 2-story and base, frame, \$3,000. Architect none. Owner, R. H. Grupp, 702 Lerida Avenue, Oakland. The building will be carried on a concrete foundation, the exterior being covered with corrugated iron. There will be modern plumbing and electric work. Plans are in the hands of the owner and the work will be done by Day Labor.

Portland, Ore.—Factory, height not stated, reinforced concrete or brick and steel. Cost not stated. Architects,

Dixie-Patterson and Beall, Portland owners, Ford Motor Car Co. The preliminary plans only for this building have been prepared and have been sent to Detroit for approval. At first but one building will be erected and a second next year. This is one of the three large buildings that are to be erected by the Ford Co. on the Pacific Coast. One will be erected in Seattle, one in Portland and the third in San Francisco. Details will be given later.

Seattle, Wash.—Factory, 3-story and base, reinforced concrete and steel, \$30,000. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. The big structure will cover a ground area of 57,051.50 feet. The plans have been approved by the owners and the architect has started work on the finished drawings. The building will be fireproof throughout. Work will be started by the first of September. The exterior of the building will be faced with cement plaster. More complete details will be given as the plans progress.

FIRE HOUSES AND JAILS.

San Francisco—Fire house, 2-story and base, brick. Cost not stated. Architectural Dept. City of San Francisco. Owners, City and County of San Francisco. The plans for the station which is to be erected at 12th Avenue and Geary Street are now complete and figures are being taken. Bids will be opened in accordance with the official proposal, which appears in another column of this issue, on June 26th.

Los Angeles, Cal.—Fire house, 2-story and base, brick. Cost not stated. Architect, Chief Building Inspector, J. J. Bancroft, L. A. Owners, City of Los Angeles. All bids received for this building, which is to be erected in Western Avenue near Second Street, have been rejected and the plans will be revised. As soon as the new plans are complete figures will again be called.

FLATS.

San Francisco—Flats, 2-story and base, frame, \$8,000 each. Architect, Frank S. Holland, 100 Haight Street, S. F. Owner's name withheld. Each of these buildings has been designed to contain two modern flats of four and five rooms each and one store. The interiors will be finished in pine throughout. The exteriors will be covered with ship-lap. The architect has completed the plans and figures are now being taken.

San Francisco—Flats, 2-story and base, frame, \$8,000. Architect, A. Petersen, 2722 San Bruno Ave., S. F. Owners, Mr. and Mrs. A. H. Petersen, 2511 Guerrero Street, S. F. The building will cover a considerable area and will contain six flats of four and five rooms each with bath. The interior finish will be of pine. The exterior of the building will be covered with rustic oak. The plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 2-story and base, frame, \$5,500. Architect, L. Mastropasqua, 550 Washington Street, S. F. Owner, E. Garibaldi. The building will contain four flats of four and five rooms each with bath. The interior finish will be of pine. There will be some oak floors. The exterior of the building will be covered with brick

veneer and ship-lap. The plans are complete and figures are being taken.

San Francisco—Flats and stores, 2-story and base, frame, \$20,000. Architect, Albert Schroedter, Foxcroft Bldg., S. F. Owner, Henry Eisenberg. The building will cover an area of 8941.2 feet. The plans provide for six stores on the first floor and four flats of four and five rooms each on the upper floor. The interior finish will be of pine throughout. The exterior of the building will be covered with special rustic and brick veneer. The plans are complete and the work will be done by Day Labor.

Stockton, San Joaquin Co., Cal.—Flats, 2-story and base, frame. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mr. Wilkes. The work will consist of the alteration of a large two-story frame dwelling into flats. There will be new plumbing, plastering, interior finish and electric wiring. The exterior of the present building will also be considerably changed. Plans for this work are now being prepared.

Flats—2-story and base, frame, \$8,000 each. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. Each of these buildings has been designed to contain two modern flats of four and five rooms and one store. The interiors will be finished in pine throughout. The exteriors will be covered with ship-lap. The architect has completed the plans and figures are now being taken.

Flats—1-story and base, frame, \$8,000. San Francisco. Architect, A. Petersen, 2722 San Bruno Ave., S. F. Owners, Mr. and Mrs. A. H. Petersen, 2511 Guerrero St., S. F. The building will cover a considerable area and will contain six flats of four and five rooms each with bath. The interior finish will be of pine. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Flats—1-story and base, frame, \$7,500. San Francisco. Architect, L. Mastropasqua, 550 Washington St., S. F. Owner, Eremigio Palma. The building will contain three flats of six and seven rooms each with baths. The interiors will be finished in pine and redwood. There will be open fire places and tile-mantels. The exterior of the house will be covered with brick veneer and ship-lap. Plans are complete and figures are being taken.

Flats—2-story and base, frame, \$5,500. San Francisco. Architect, L. Mastropasqua, 550 Washington St., S. F. Owner, E. Garibaldi. The building will contain four flats of four and five rooms each with bath. The interior finish will be of pine. There will be some oak floors. The exterior of the building will be covered with brick veneer and ship-lap. The plans are complete and figures are being taken.

Flats and Stores—2-story and base, frame, \$20,000. San Francisco. Architect, Albert Schroedter, Foxcroft Building, San Francisco. Owner, Henry Eisenberg. The building will cover an area of 8941.2 feet. The plans provide for six stores on the first floor and four flats of four and five rooms each on the upper floor. The interior finish will be of pine throughout. The exterior of the building will be covered with special rustic and brick veneer. The plans are complete and the work will be done by Day Labor.

San Francisco—Plans 3 story and base, frame, \$7,500. Architect, L. Masserman. No. Washington St., S. F. owner, Kronigke Palma. The building will contain three flats of six and seven rooms each with bath. The interiors will be finished in pine and plywood. There will be open fire places and tile mantels. The exterior of the house will be covered with brick veneer and shiplap. Plans are complete and figures are being taken.

GARAGES.

San Francisco—Garage, 2 story and base, reinforced concrete. Cost not stated. Architect, M. J. Lyons, 127 Montgomery street, S. F. Owners, Speedwell Motor Co. The building is being erected on leased ground and will cover an area of 10x113 feet. The first floor will be arranged for sales rooms and offices, the upper floor for storage space. There will be a machine shop and large storage tanks. The interior of the first floor will be handsomely finished in hardwoods and marble. The exterior of the building will be fac'd with cement plaster & terra cotta. Plans are complete and figures are being taken.

Los Angeles, Cal.—Garage, 1 story and base, brick. Cost not stated. Architects, Garrett and Bixby, Currier Bldg., L. A. Owner, Mrs. C. G. Castriano. The building will cover an area of 54x150 feet and has been designed for a commercial garage. There will be sales rooms, storage space and a machine shop. The interior will be finished in pine and hardwoods and tile. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings.

Coachella, Riverside Co., Cal.—Garage, 1 story and base, hollow tile. Cost not stated. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner, George Phelps. The building has been designed for a commercial garage. The floor will be of cement. There will be modern plumbing and electric work. The exterior will be of cement plaster. Plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Garage, 1 story and base, brick, \$20,000. Architect, none. Owner, H. F. Vollmer, care of the Union Realty Co., Realty Board Bldg., L. A. The building will be based as a commercial garage and will cover an area of 129x183 feet. There will be a cement and tile floor. The front portion of the building will be occupied by sales rooms and offices. The exterior of the building will be faced with pressed brick. Plans are complete and the building will be erected to completion by the Union Realty Co.

Los Angeles, Cal.—Garage, 2 story and base, brick, \$20,000. Architect, Chief Building Inspector J. J. Backus, L. A. Owners, City of Los Angeles. The building will be a two-story structure and will cover a ground area of 12,000 square feet. Besides the garage there will be considerable storage space and a machine shop. The floor on the first story will be of cement. The exterior of the building will be faced with pressed brick. Chief Inspector Backus has just started the plans.

GOVERNMENT WORK AND SUPPLIES.

The chief of the bureau of yards and docks, Navy Department, Washington, will open bids on July 6 for 3 2-ton four-motor electrically operated traveling cranes with 5 tons auxiliary hoist, 1 1-ton four-motor electrically operated traveling crane with 5-ton auxiliary hoist and 18 1-ton hand-operated traveling cranes, with trawley wires and supports, complete and ready for operation in certain buildings at the naval station, Pearl Harbor, Hawaii. The cranes will have a span of about 75 feet, ten of the hand cranes a span of about 10 feet, six a span of about 8 feet and two a span of about 20 feet. The contractor is required to deliver at Pearl Harbor the equipment to be erected by the Government under the superintendence of the contractor's engineer on runways furnished by the Government.

The following bids were received by the light house inspector, seventeenth district, Portland, Ore., for the construction of the Alki (Battery) Point light station, Wash.

J. W. Stanchfield, Seattle, Wash., \$24,500 and \$23,568, the latter price was accepted.

C. L. Houston, \$25,500 and \$23,600, Puget Sound Bridge and Dredging Co., \$27,145 and \$21,291.

Thomas H. Ryan, \$29,000 and \$23,779.

Bids will be called for at an early date by the purchasing officer, Isthmian Canal Commission, Washington, D. C., for furnishing the following material. Formal advertisement will appear in these columns as soon as available:

- 25 bars round spring steel
- 85 bars flat spring steel
- 100 bars carbon tool steel, hexagon.
- 252 bars carbon tool steel, octagon.
- 3 bars carbon tool steel, octagon, temper 3.
- 20 bars carbon tool steel, round
- 7 bars carbon tool steel, temper 1, round.
- 55 bars carbon tool steel, temper 2, round.
- 29 bars carbon tool steel, temper 2, square.
- 2 bars carbon tool steel, flat, temper 3.
- 542 sheet steel.
- 117 sheets steel
- 500 bars angle steel.
- 39 bars steel angles.
- 209 bars steel angles.
- 274 bars steel chambers.
- 141 bars I beams.
- 200 bars round cold rolled steel.
- 25,200 bars soft half round steel or merchant bar iron.
- 100 bars soft square steel.
- 850 sheets galvanized steel.

The engineering work of the United States for the irrigation of the arid lands of the West has been receiving the close attention of numerous foreign governments. During the past five years eminent scientists, engineers and agricultural experts from Germany, France, Russia, Italy, England, Austria, Central and South America and Australia have inspected many of the large irrigation projects. Within the week representatives who were sent by France and Germany have arrived and are now en route to the west. The French Government is represented by

M. Dabat, director general of waters and forests, and M. Naivet, assistant. The German visitors are the following engineers and experts: G. B. G. Fischer, Dr. Hillebrand, Waltraud Friederich von Wangelheim-Wake, and Herr Richter. The Reclamation Service has arranged an itinerary for the visitors, who will devote several months to touring the west.

HALLS AND SOCIETY BUILDINGS.

San Francisco—Lodge hall and stores, 2 story and base, brick. Cost not stated. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, W. H. Taylor. This work has been mentioned here before. The structure will contain a number of stores in one half of the first floor, auditorium and offices in the other half and lodge rooms, billiard rooms and meeting rooms on the second floor. The greater part of the building has been leased by the Loyal Order of Moose. The interior will be handsomely finished in hardwoods. The exterior will be faced with pressed brick and terra cotta. There will be a central heating system. Plans are complete and figures are being taken.

Oakland, Cal.—Lodge hall and stores, 3 story and base, brick, \$25,000. Architect, Clay N. Burrell, Central Bank Bldg., Oakland. Owners, Portuguese Society. The building will be 50x100 feet. The plans provide for three stores on the first floor, lodge rooms and dance hall on the second and offices and smaller meeting rooms on the third. There will be a central heating system. The interior will be finished in pine with some maple flooring. The exterior will be faced with pressed brick. The architect is now preparing the plans.

San Francisco—Armory, 1 story and base, Class A construction, \$500,000. Architect, State Architect Woodgett, Sacramento. Owners, State of California.

Bids as follows were opened for construction of Armory building to be erected in San Francisco:

General Construction—Lewis A. Hicks, S. F., except exterior marble, \$250,000; McLean & Peterson, S. F., all work, \$300,000; Caldwell & Co., all work, \$310,000; H. A. Klyce, all work, \$324,750; P. Roland, all work, \$369,000; Masonry, Clinton Fireproofing Co., S. F., \$197,897.

Heating and Ventilating—Kiernan & S. F., \$9,577; Whitman Lyman Co., S. F., \$9,577; Heating Co., \$8,450; General Eng. Co., S. F., \$9,515; J. L. O'Mara, \$77; Whitman Lyman Co., \$10,625; Robt. Dalziel, Jr., \$10,787.

Electric Wiring—Central Electrical Plumb. & Heat. Co., S. F., \$9,150; Standard Elec. Const. Co., \$10,248.

Carpentry—McSheehy Bros., Inc., S. F., \$10,625; Robt. Dalziel, Jr., \$10,787.

Metal Purring, Lathing and Plin.—Smith & Johnson, S. F., \$20,560; George MacGruer, \$26,300.

Plumbing, Sewering, Gas Fitting, Vacuum Cleaning—Robt. Dalziel Jr., S. F., \$9,297; Kiernan & O'Brien, \$10,125; "Central Elec. Plumb. & Heat. Co., \$10,650; Whitman Lyman Co., \$11,798; J. L. O'Mara, \$12,365.

A great many alternate bids were submitted, all of which are now under consideration. No award will be made for some time.

Los Angeles, Cal.—Memorial hall, 1

story and base, reinforced concrete, \$50,000. Architects, Hunt and Burns, Laughlin Bldg., L. A. Owners, Southwest Museum. This is one of several structures which will ultimately be erected by the Southwest Museum. The memorial hall will be 30x110 feet and will contain curator's room, work rooms, space for the mechanical equipment and a large public room. The construction will be of reinforced concrete throughout. The exterior of the building will be faced with cement plaster. Plans are now being prepared and will be ready for figures about September 1st.

Walla Walla, Wash.—Lodge hall, 5 story and base, brick and steel, cost not stated. Architect, R. H. Ulrich, Pacific Bldg., Seattle associated with Architect Carl L. Lind, Portland. Owners, Walla Walla Elks' Hall Association. Word has been received here that all bids for the construction of this building have been rejected. Plans will be revised and new figures will be called for shortly.

HOSPITALS.

Oakland, Cal.—Hospital, 2 story and base, brick or reinforced concrete, \$55,000. Architect, W. A. Matthews, 969 Broadway, Oakland. Owners, Merritt Hospital. The building will be designed for a nurse's home. The architect has just received the commission to prepare the plans and the details of the work can not be obtained at this time. The owners state that provision will be made to increase the height of the building from two to three stories.

Fresno, Fresno Co., Cal.—Hospital, 2 or 3 story and base, brick or concrete, \$35,000. Architects, Starbuck and Clark, Fresno. Owner, Dr. T. N. Sample. The building will be erected at the corner of Fortcamp and Alhreda streets and will be used as a sanitarium. The architects are working on the details drawings and particulars of the construction can not be given at this time.

HOTELS.

San Francisco—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architect, Ralph Warner Hart, Humboldt Bldg., S. F. Owners, Bellows Hotel. The building will be erected at a corner in the downtown district and will contain several stories on the first floor. The upper four stories will be subdivided into single rooms. There will be steam heat, elevator service and a number of baths on each floor. Running water has been provided for all rooms. The exterior of the building will probably be faced with cement plaster. Plans are complete.

San Francisco—Hotel alterations, 3 story and base, frame, \$15,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. This work will consist of the alteration of a large frame dwelling into a modern rooming house containing 38 rooms and a number of baths. There will be considerable new interior trim, new plumbing, plastering and electric work. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

San Francisco—Hotel addition, 8 story and base, Class A construction,

Cost not stated. Architect, George William Kellum, Crocker Bldg., S. F. Owners, Palace Hotel. This work has been reported as probable several times, but it is now understood that an entire floor has been leased to the Transportation Club, and that the owners want to start the work by fall. Details of the construction will be given as the plans progress.

San Francisco—Hotel, 6 story and base, brick and steel, \$10,000. Architects, Miller and Edmunds, Lick Bldg., S. F. Owner, Mrs. Annie M. Peason. The building, which is to be erected south of Market street, will cover a large ground area. The first floor will contain a number of stores besides the main lobby and office of the hotel. The upper floors will be sub-divided into 150 rooms and 50 baths. The mechanical equipment will include steam heat, elevator service, a vacuum cleaning plant and other modern conveniences. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Los Angeles, Cal.—Hotel, 1 story and base, brick, cost not stated. Architects, California Real Estate and Building Co., Realty Board Bldg., L. A. Owners, Hill Street Lot Co. The building will be 60x165 feet. The plans provide for two stories and the hotel lobby on the first floor and 110 guest rooms on the upper three floors. There will be forty baths, steam heat, two elevators and a vacuum cleaning system. The interior finish will be of

Roseburg, Ore.—Hotel, 5 story and base, brick and steel. Cost not stated. Architect, Earl A. Roberts, Portland. Owners, Provident Trust Co. The building will cover an area of 80x110 feet and will contain, besides the public lobby and offices, 120 guest rooms about 15 of which will have connecting baths. There will also be a large public dining room and several stores. There will be steam heat and elevator service. Running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans for this work will be complete by July 1st and figures will be taken.

LIBRARY.

Portland, Ore.—Library, 3 story and base, reinforced concrete and steel, \$500,000. Architects, Doyle, Patterson and Beach, Portland. Owners, City of Portland. This work has been mentioned here several times before. Plans are now complete and figures will be called for at once. The building will cover an area of 156x172 feet and will be of fireproof construction throughout. The design is in the classic style. Besides the usual rooms found in this type of buildings there will be a large auditorium seating 600 people. The interior finish will be of tile, marble and metal. The exterior will be faced with pressed brick and limestone.

Fresno, Fresno Co., Cal.—Hotel addition, 4 story and base, brick and steel, \$100,000. Architect, Ben. G. McDougall, Sheldon Bldg., S. F. Owner, Robert Kennedy, Sequoia Hotel, Fresno. This work will be in the nature of a large addition to the Sequoia Hotel and will include steam heat, electric work, a vacuum cleaning system and elevators. The plans are complete and bids are now being called.

Contracts Awarded.

Los Angeles, Cal.—Library, 1 story and base, reinforced concrete, \$33,000. Architects, Hunt and Burns, Laughlin Bldg., L. A. Owners, City of Los Angeles. Contractor, J. F. Atkinson, Story Bldg., L. A. Contract price, \$32,000.

POST OFFICES.

Los Angeles, Cal.—Post office, 1 story and base, brick. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner's name withheld. The building will be erected by a private individual and leased to the government. There will be considerable structural steel. The interior will be arranged for work space, private office and public room. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Fresno, Fresno Co., Cal.—Oil burners for postoffice. Cost not stated. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Bids for furnishing and installing an oil burning plant in this building will be received by the Supervising Architect at Washington D. C., up to and including July 15th. For further particulars address James Knox Taylor or the Custodian of the building, Fresno.

Contracts Awarded.

Alameda, Alameda Co., Cal.—Post office, 2 story and base, brick and stone, \$100,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Contractors, William V. Murray Engineering and Construction Co., Helena, Montana. Contract price \$100,500.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Contracts Awarded.

San Francisco—Car shops, 2 story and base, reinforced concrete, \$210,000. Architect, City Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, F. Rolandi Co., S. F. Contract price \$210,000.

RESIDENCES.

San Francisco—Residences, 3 2-story and base, frame, \$3,000 each. Architect, Thomas Hoehn, 4119 19th avenue, S. F. Owner, Louis Hellmann, 1231 Jones street, S. F. These dwellings have been designed to contain 7 rooms each with baths. The interior finish will be of pine and redwood with some oak floors. There will be open fire places and brick and tile mantels. The tile will be used in the bath and kitchen. The exterior of the houses will be covered with cement plaster, shingles and brick veneer. Plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$10,000. Architect, John Ralston Hamilton, Kohl Bldg., S. F. Owner Clara S. Hamilton. The dwelling will contain 8 rooms, baths and sleeping porch. The interior finish will be of pine and hardwoods with oak doors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of

tile. Tile will also be used in the baths. The exterior of the house will be covered with cement plaster on metal lath. A contract will be let at once.

San Francisco—Residence, 2 story and base, frame, \$5,500. Architect none. Owner, F. F. Ralston, 132 Commonwealth avenue, S. E. The dwelling has been designed for an 8 room house with bath, sleeping porch and laundry. The interior finish will be largely of pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Bungalow, 1 story and base, frame, \$2,000. Architect none. Owners, Homeland Building Co., Western Metropolis Bank Bldg. The bungalow will contain 6 rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior will be covered with shingles. Plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$3,000. Architect none. Owner, Yngve, 130 Alpine street, S. E. The dwelling will contain 7 rooms and bath. The interior finish will be of pine and redwood with oak floors in the living rooms and den. There will be open fire places and brick mantels.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect none. Owners, Francis and William Smith, 32 Harrington St., S. E. The dwelling will contain 7 rooms and bath. The interior trim will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, reinforced concrete, \$5,500. Architect, L. Mastropasqua, 580 Washington street, S. E. Owner, C. Bellanca. The dwelling will contain 8 rooms, bath and garage. The design is in the true Italian style. The interior finish will be of pine. There will be open fire places and tile mantels. The exterior will be faced with artificial stone. Plans have been placed in the hands of the owner and the work is being done by Day Labor.

San Francisco—Residence, 2 story, attic and base, frame and brick, \$29,000. Architect, Frank S. Holland, 100 Haight street, S. F. Owner's name withheld. The dwelling will be erected in the Presidio Terrace District and will contain 11 rooms, two baths, 2 sleeping porches, a garage and laundry. The interior will be finished in pine, redwood and hardwoods. The floors will be of oak in all principal rooms. There will be a hot water heating system and a Ruid heater. Plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, \$1,000. Architect none. Owner, Thomas Seabell, 262 14th avenue, S. F. The dwelling has been designed for a 7 room house with bath. The interior finish will be of pine. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, William H. Wharf, 1801 Melendence, 2 story and base, frame, \$3,000, via street, Berkeley. Owner, Dr. John S. Marshall. The dwelling has been designed for a seven room house with bath and three sleeping porches. The interior trim will be of pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 1/2 story and base, frame, \$1,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, P. Holt. The dwelling has been designed to contain nine rooms, two baths and sleeping porches. The interior will be finished in pine with some elm panels. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantel will be of tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$7,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Walter J. Vane. The dwelling will contain seven rooms and baths. The interior will be handsomely finished in oak and white enamel. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect none. Owner, H. C. Ffrang, 5525 Taft avenue, Oakland. The bungalow will contain 6 rooms and bath. The interior will be entirely finished in pine and redwood. There will be some oak floors. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow 1 story and base, frame, \$2,000. Architect none. Owners, Jespersen and Dippo, 878 34th street, Oakland. The dwelling has been designed for a 6 room house with bath. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$1,500. Architect, W. H. Ratcliff Jr., First National Bank Bldg., Berkeley. Owner, Mr. Ingaizale. The dwelling will contain 7 rooms, bath and sleeping porch. The interior will be finished in pine, redwood and hardwoods. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,500. Architect none. Owners, Conservative Building and Investment Co., 68 Post street, S. F. The dwelling will contain 7 rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile or brick mantels.

The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Stockton, San Joaquin Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Frank Tucker. The dwelling will contain 6 rooms and bath. The interior trim will be of pine. There will be open fire places with brick mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Colusa, Colusa Co., Cal.—Residence, 2 story and base, frame, \$10,000. Architects, Parker and Kenyon, 244 Kearny street, S. F. Owner, John Campbell. The dwelling has been designed for a handsome country home and will contain 9 rooms, baths, sleeping porches and laundry. The interior will be finished in hardwoods with oak floors throughout. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will be used in the baths. The exterior of the dwelling will be covered with shingles. Plans are now being prepared.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect none. Owners, Francis and William Smith, 32 Harrington St., S. F. The dwelling will contain 7 rooms and bath. The interior trim will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect none. Owners, J. C. Purcell, 526 Presidio avenue, S. F. The dwellings will each contain 6 rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exteriors will be covered with shiplap or rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Bungalow, 1 story and base, frame, \$2,000. Architect none. Owners, E. Imbeck, 156 Alpine street, S. F. The dwelling has been designed for a 7 room house with bath. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Residences—3, 2 story and base, frame, \$3,000 each. San Francisco. Architect, Thomas Hochst, 4119 19th Ave., S. F. Owner, Louis Hellmann, 1234 Jones St., S. F. These dwellings have been designed to contain seven rooms each with baths. The interior finish will be of pine and redwood with some oak floors. There will be open fire places and brick and tile mantels. Tile will be used in the baths and kitchens. The exteriors of the houses will be covered with cement plaster, shingles and brick veneer. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$10,000. San Francisco. Architect, John Balston Hamilton, Kobi Bldg., S. F. Owner, Clara S. Hamilton. The dwelling will contain eight rooms, baths and sleeping porch. The interior finish will be of pine and hard-

woods with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. Tile will also be used in the baths. The exterior of the house will be covered with cement plaster on metal lath. A contract will be let at once.

Residence—2 story and base, frame, \$5,500. San Francisco. Architect, none. Owner, F. E. Halston, 132 Commonwealth Ave., S. E. The dwelling has been designed for an eight-room house with bath, sleeping porch and laundry. The interior finish will be largely of pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustle. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, Homeland Building Co., Western Metropolitan Bank Bldg., S. E. The bungalow will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Nygve, 120 Alpine St., S. E. The dwelling will contain seven rooms and bath. The interior finish will be of pine and redwood with oak floors in the living rooms and den. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster on metal lath and brick veneer. Plans are complete and the work will be done by Day Labor.

SCHOOLS.

Dubuque, Tulare Co., Cal.—School, 1 story and base, brick, \$40,000. Architect, Parker and Kenyon, 244 Kearny St., S. E. Owners, Dubuque School District. The building has been mentioned here before when the architects were first commissioned to prepare plans for the work. The design is in the form of a letter X, the arrangement providing for eight class rooms and assembly hall. There will be a plenum system of heating. The exterior of the building will be faced with pressed brick. Plans are complete and figures for the construction will be opened on July 15th. Plans can be secured from either the architects or from the Secretary of the School Board.

Tacoma, Wash.—School, 3 story and base, reinforced concrete, \$170,000. Architects, Heath and Gore, National Realty Bldg., Tacoma. Owners, City of Tacoma. The building will be known as the Central School and has been designed to contain 14 class rooms, assembly hall, manual training rooms and science departments. The construction will be fireproof. The mechanical equipment will be complete in every detail. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

Hatfield Park, Los Angeles Co., Cal.—School, 1 story and base, brick, \$20,000. Architects, Tuttle and Hopkins,

Delta Bldg., L. A. Owners, Vinland School District. Contractors, Anderson and Murdoch, Glendale, general construction. Contract price, \$12,018.

Los Angeles, Cal.—School, 1 story and base, brick, \$25,000. Architect, George E. Costigan, California Bldg., L. A. Owners, City of Los Angeles. Contractors, Gavanan McCallahan Co., Union Oil Bldg., L. A. Contract price, \$20,877.

Residence—2.2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, J. S. Purcell, 856 Presidio Ave., S. E. The dwellings will each contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exteriors will be covered with shiplap or rustle. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, Francis and William Smith, 32 Harrington St., S. E. The dwelling will contain seven rooms and bath. The interior trim will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the house will be covered with rustle. Plans are complete and the work will be done by Day Labor.

SEWERS, STREET WORK AND WATER SYSTEMS.

San Francisco—Laying and hauling pipe. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. E. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on July 1st for the hauling and laying of a large amount of high pressure water pipe in connection with the High Pressure Salt Water Fire System. Plans and specifications may be had at the City Engineer's office.

STORES AND OFFICES.

San Francisco—Stores and offices, 5 story and base, reinforced concrete. Cost not stated. Architect, E. P. Antonovich, 322 Kearny St., S. E. Owner, F. A. Hihn. At first this building was to be only one story high but since several leases have been signed and the plans have been changed to provide for four additional stories. There will be a steam heating system and elevator service. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

San Francisco—Stores and billiard hall, 2 story and base, steel and brick, \$30,000. Architect, Frank S. Holland, 100 Haight St., S. E. Owner's name withheld. The building will cover an area of 57x100 feet. The first floor will contain a large restaurant, the basement a bakery and the second floor will be occupied by a handsomely finished billiard hall. There will be finished in paneled hardwoods, tiled floors and art glass. The exterior will be faced with glazed brick. Plans are now nearly complete.

San Francisco—Stores and lofts, 2 story and base, brick, \$20,000. Architects, Reid Bros., California-Pacific Bldg., S. E. Owner, Elsie Drexler. The building will be erected in the wholesale district and has been designed for stores on the first floor and two

loft lots above. There will be a freight elevator. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco—Stores, 1 story and base, brick and steel, \$25,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. E. Owners, Bankers' Investment Co. The building will cover an area of 75x155 feet. There will be nine stores. The interiors will be finished in pine and oak. There will be large display windows. The exterior of the building will be faced with pressed brick and terra cotta. The architect is preparing the plans.

San Francisco—Office building heating system. Cost not stated. Architect, Benj. G. McRongall, Sheldon Bldg., S. E. Owners, Standard Oil Co. The architect has revised the plans for the heating system of this ten-story building and now new figures are being taken from the same contractors who previously figured the work.

Oakland, Cal.—Stores and offices, 7 or 8 story and base, Class A construction, \$100,000. Architects, Woodlett and Wollett, Newhall Bldg., S. E. Owner, Mrs. Mary E. Moody. The building will be erected at the Northeast corner of San Pablo and 20th streets. There will be a number of stores on the first floor and a large number of modern offices on the upper floors. There will be steam heat, elevator service and all other modern improvements. The interior trim will be largely of metal. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared and work will be started this fall.

Oakland, Wash.—Small brick building. **Los Angeles, Cal.**—Stores, 2 story and base, reinforced concrete, \$25,000. Engineers, Mayberry and Parker, Pacific Electric Bldg., L. A. Owners, Los Angeles Gas and Electric Co. The building will be 54x126 and will be erected at the works of the company on East Seventh street. The work will be under the direction of C. A. Luckenbach, Supt. of Construction, 645 South Hill St., L. A.

Los Angeles, Cal.—Stores and offices, 8 story and base. Class A construction. Cost not stated. Architects, Morgan-Walls and Morgan, Arch. Bldg., L. A. Owner, Bilirke. This building has been mentioned here before. The structure will be 101x126 feet. There will be nine stores on the first floor and 14 large ledge rooms and offices on each of the upper floors. There will be three passenger elevators. The building will be heated by steam. The interior trim will be of metal. The exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

Los Angeles, Cal.—Stores and offices, height not determined. Class A construction, \$100,000. Architects, William Curlett and Son, Pichen Bldg., S. E. Owners, Merchants Fireproof Bldg. Co. The building will be erected at the northeast corner of Sixth and Spring streets. There will be a complete steel frame construction and will extend to the full height limit permitted by ordinance. The basement and first story will be occupied by the Merchants' National Bank and the upper stories will contain offices. Complete details of the building will be given later.

Seattle, Wash.—Stores and offices, 6

story and base. Class A construction, \$500,000. Architect, William Kingsley, Empire Bldg., Seattle. Owners, Times Publishing Co. The preliminary plans for the building have been completed and approved by the owners. The plans show a structure of 80x136 feet with a complete steel frame and exterior walls of terra cotta. The construction will be fireproof with floors and roof of concrete and iron stairways throughout. There will be the floors and hollow tile partitions. There will be four elevators. Working drawings will be completed as soon as possible.

SEALED PROPOSALS.

PROPOSALS FOR LAMP STANDARDS. (Bids close July 1.)

LAMP STANDARDS AND BRACKETS—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 3 o'clock p. m. on the 1st day of July, 1912, and then opened, for furnishing lamp standards and brackets that may be required for various buildings under control of the Treasury Department, in accordance with the drawings and specifications, copies of which may be had at this office, at the discretion of the supervising architect, JAMES KNOX TAYLOR, Supervising Architect.

The construction of Truck Company

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, \$15,000. San Francisco, Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Dora Schroeder. The building has been designed to contain nine apartments arranged in suites of two and three rooms each with baths. The interior finish will be of pine and hardwoods. There will be steam heat and wall beds. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

Apartment House—5 story and base, brick and steel. Cost not stated. San Francisco, Architect, Clinton Day, Nevada Bank Bldg., S. F. Owner, Addison C. Kithridge. The building will be erected in the Fifty Nava District and will contain in the neighborhood of 60 apartments arranged in suites of two and three rooms with private baths. There will be wall beds, steam heat and elevator service. The exterior of the building will be faced with terra cotta. Plans are complete and the architect is taking figures on the construction.

Apartment House—5 story and base, reinforced concrete, \$30,000. San Francisco, Architects, Clinton Bros., Clunie Bldg., S. F. Owner, James E. Reiter. This building has been mentioned here before as the plans were first being prepared. The structure will cover an area of 62x50 feet and will contain 27 apartments of three and four rooms each with private baths. There will be steam heat and wall beds. One electric elevator will be installed. The exterior of the building will be faced with cement plaster. Plans are com-

and Engine House No. 46, 12th avenue and Geary street.

PROPOSALS FOR ROAD WORK. (Bids close July 9.)

PURSUANT to an order of the Board of Supervisors of Fresno County, California, notice is hereby given that said Board will receive sealed bids up to the hour of 10 a. m. of July 9th, 1912, for the construction of a county road, commencing on the county line between Fresno and Monterey counties near the center of section 21, T. 22 S., R. 14 E., M. D. B. & M., and running thence in a northerly direction, approximately 9 1/2 miles to a junction with the Warthan Canyon road in the southeast quarter of section 20, T. 21 S., R. 14 E., M. D. B. & M., and more particularly described as the Coalings-Parkfield road; together with culverts, bridges, turn-outs, etc., all in accordance with profile, maps, plans and specifications prepared by the County Surveyor, heretofore adopted by the Board of Supervisors and now on file in the office of the Clerk of said Board; and which may be inspected and examined at any time by any one interested.

The Board reserves the right to reject any and all bids.

D. M. BARNWELL, Clerk.

plete and a contract will be awarded shortly.

Apartment House—3 story and base, brick and steel, \$30,000. San Francisco, Architect, William Beasley, 127 Montgomery St., S. F. Owner's name withheld. The building will cover a considerable ground area and has been designed for stores on the first floor and modern apartments of two and three rooms on the floors above. There will be wall beds and steam heat. Running water has been provided for all apartments. The exterior of the building will be faced with pressed brick. The architect is completing the working drawings.

Bungalow—1 story and base, frame, \$2,000. San Francisco, Architect, none. Owner, E. Imbeck, 168 Alpine St., S. F. The dwelling has been designed for a seven-room house with bath. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Church—2 story and tower, brick and frame construction. Cost not stated. San Francisco, Architects, Shea & Lofquist, Bank of Italy Bldg., S. F. Owners, St. Vincent de Paul's Episcopal Church. The excavating and foundation work on this edifice have been completed. Plans are now out for figures for the balance of the work. The design is in the Mission style with the first and second stories faced with brick and the balance of the building covered with cement plaster on metal lath. The roof will be of tile. The interior will be handsomely finished in pine, hardwoods and ornamental plaster.

Fire House—2 story and base, brick, cost not stated. San Francisco, Architectural Dept., City of San Francisco, Owners, City and County of San Francisco. The plans for the station which is to be erected at 12th avenue and Geary street are now complete and figures are being taken. Bids will be opened, in accordance with the official proposal, which appears in another column of this issue, on June 26th.

Garage—2 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, H. J. Lyons, 125 Montgomery St., S. F. Owners, Speedwell Motor Co. The building is to be erected on leased ground and will cover an area of 40x113 feet. The first floor will be arranged for sales rooms and offices, the upper floor for storage space. There will be a machine shop and large storage tanks. The interior of the first floor will be handsomely finished in hardwoods and marble. The exterior of the building will be faced with cement plaster or terra cotta. Plans are complete and figures are being taken.

City and County Building—1 story and base. Class A construction, \$1,500,000. San Francisco, Architects, Bakewell & Brown, 117 Montgomery St., S. F. Owners, City and County of San Francisco. A selection of the 73 sets of competitive plans received for this work has resulted in the selection of the above mentioned architects. The plans of Architects Bakewell & Brown show an imposing and graceful structure designed in the classic style so well adapted to the American official building. The main portion of the building will be four stories in height, as required by the schedule of requirements, from the center of which will rise a great dome of beautiful proportions. The highest part of the dome will be 245 feet from the ground and will be topped by a heroic figure representing the spirit of San Francisco. This central feature will have a diameter of approximately 120 feet on the first floor. The interior of the dome will be finished in stone. The extreme dimensions of the main portion of the building will give it a frontage of 390 feet and a depth of 273 feet. A description of the materials which will enter into the construction of the building cannot be given at this time nor is it possible to say how the work will be handled.

Lodge Hall and Stores—2 story and base, brick. Cost not stated. San Francisco, Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, W. H. Taylor. This work has been mentioned here before. The structure will contain a number of stores in one half of the first floor, auditorium and offices in the other half and lodge rooms, billiard rooms and meeting rooms on the second floor. The greater part of the building has been leased by the Loyal Order of Moose. The interior will be handsomely finished in hardwoods. The exterior will be faced with pressed brick and terra cotta. There will be a central heating system. Plans are complete and figures are being taken.

Hotel—6 story and base, brick and steel, \$110,000. San Francisco, Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Mrs. Annie M. Faxon. The building, which is to be erected south of Market street, will cover a large ground area. The first floor will contain a number of stores besides the main lobby and office of the hotel. The upper floors will be subdivided into 130

rooms and 50 baths. The mechanical equipment will include steam heat, elevator service, a vacuum cleaning plant and other modern conveniences. The exterior of the building will be faced with pressed brick. Plans are now being prepared. The interior will be finished in pine, mahogany and white enamel. The exterior of the building will be faced with pressed brick.

Hotel Addition—8 story and base, class A construction. Cost not stated. San Francisco, Architect, George Willson, 100 Haight St., S. F. Owner, Palace Hotel. This work has been reported as probable several times, but it is now understood that an entire floor has been leased to the Transportation Club, and that the owners want to start the work by fall. Details of the construction will be given as the plans progress.

Hotel Alterations—2 story and base, frame, \$11,000. San Francisco, Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. This work will consist of the alteration of a large frame dwelling into a modern frame house containing 38 rooms and a number of baths. There will be considerable new interior trim, new plumbing, plastering and electric work. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Hotel—5 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owners, Fehlow Estate. The building will be erected at a corner in the downtown district and will contain several stories on the first floor. The upper four stories will be divided into single rooms. There will be steam heat, elevator service and a number of baths on each floor. Running water has been provided for all rooms. The exterior of the building will probably be faced with cement plaster. Plans are complete.

Laying and Hauling Pipe—Cost not stated. San Francisco, Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on July 1st for the hauling and laying of a large amount of high pressure water pipe in connection with the High Pressure Salt Water Fire System. Plans and specifications may be had at the City Engineer's office.

Office Building—Heating system. Cost not stated. San Francisco, Architect, Benj. G. McDougall, Shelden Bldg., S. F. Owners, Standard Oil Co. The architect has revised the plans for the heating system of this ten story building and now new figures are being taken from the same contractors who previously figured the work.

Residence—2 story and base, reinforced concrete, \$55,000. San Francisco, Architect, L. Mastropasqua, 580 Washington St., S. F. Owner, C. Bellanca. The dwelling will contain eight rooms, bath and garage. The design is in the true Italian style. The interior finish will be of pine. There will be open fire places and tile mantels. The exterior will be faced with artificial stone. Plans have been placed in the hands of the owner and the work is being done by Day Labor.

Residence—2 story, attic and base, frame and brick, \$20,000. San Francisco, Architect, Frank S. Holland,

100 Haight St., S. F. Owner's name withheld. The dwelling will be erected in the Presidio Terrace district and will contain 11 rooms, 2 baths, 2 sleeping porches, a garage and a laundry. The interior will be finished in pine, redwood and hardwoods. The floors will be of oak in all principal rooms. There will be a hot water heating system and a Kunk heater. There will be open fire places and cobble stone mantels. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with kiln-dried brick veneer. Plans are complete and figures are being taken.

Residence—2 story and base, frame, \$10,000. San Francisco, Architect, none. Owner, Thomas Seabie, 362 14th Ave., S. F. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Stores and Offices—5 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, E. P. Antonovich, 323 Kearny St., S. F. Owner, F. A. Hahn. At first this building was to be only one story high, but since several leases have been signed and the plans have been changed to provide for four additional stories. There will be a steam heating system and elevator service. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

Stores and Billiard Hall—2 story and base, steel and brick, \$30,000. San Francisco, Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. The building will cover an area of 57x130 feet. The first floor will contain a large restaurant, the basement a bakery, and the second floor will be occupied by a handsomely finished billiard hall. There will be a complete steel frame. The interior will be finished in paneled hardwoods, tile floors and art glass. The exterior will be faced with glazed brick. Plans are now nearly complete.

Stores and Lofts—2 story and base, brick, \$20,000. San Francisco, Architects, Reid Bros., California-Pacific Bldg., S. F. Owner, Elsie Drexler. The building will be erected in the wholesale district and has been designed for stores on the first floor and two light lofts above. There will be a freight elevator. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Stores—1 story and base, brick and steel, \$25,000. San Francisco, Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Bankers Investment Co. The building will cover an area of 75x155 feet. There will be nine stores. The interiors will be finished in pine and oak. There will be large display windows. The exterior of the building will be faced with pressed brick and terra cotta. The architect is preparing the plans.

Stores—1 story and base, Class A construction, \$150,000. Oakland, Cal. Architects, Woodlett and Woodlett, 5x Wall Bldg., S. F. Owner, Mrs. Mary E. Moody. The building will be erected at the northeast corner of San Pablo and 29th streets. There will be a number of stores on the first

floor and a large number of modern offices on the upper floors. There will be steam heat, elevator service and all other modern improvements. The interior trim will be largely of metal. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared and work will be started this fall.

Winery—2 story and base, brick and steel, \$15,000. San Francisco. Architect, L. Mostropasqua, 580 Washington St., S. F. Owner, Paul Aratta. The building will cover an area of 15,500 feet. The construction will be very heavy to carry the floor loads. There will be a large amount of steel used. The plans provide for a number of special features found only in large wineries, such as large wooden racks, etc. The exterior will be faced with pressed brick. The architect is completing the working drawings.

Contracts Awarded.

Car Barns—2 story and base, reinforced concrete and steel, \$130,000. San Francisco. Architect, City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, F. Rolandi, S. F. Contract price, \$130,000.

OAKLAND AND ALAMEDA COUNTY.

Factory—2 story and base, frame, \$3,000, Oakland, Cal. Architect, none. Owner, R. H. Gripp, 702 Lerida Ave., Oakland. The building will be carried on a concrete foundation, the exterior being covered with corrugated iron. There will be modern plumbing and electric work. Plans are in the hands of the owner and the work will be done by Day Labor.

Lodge Hall and Stores—2 story and base, brick, \$28,000, Oakland, Cal. Architect, Clay N. Burrell, Central Bank Bldg., Oakland. Owners, Portuguese Society. The building will be 2x100 feet. The plans provide for three stores on the first floor, lodge rooms and dance hall on the second and offices and smaller meeting rooms on the third. There will be a central heating system. The interior will be finished in pine with some maple flooring. The exterior will be faced with pressed brick. The architect is now preparing the plans.

Residence—2 story and base, frame, \$3,000, Berkeley, Alameda Co., Cal. Architect, William H. Ward, 1041 Milvia St., Berkeley. Owner, Dr. John S. Marshall. The dwelling has been designed for a seven-room house with bath and three sleeping porches. The interior trim will be of pine and redwood. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Bungalow—1½ story and base, frame, \$5,500, Oakland, Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, F. Holt. The dwelling has been designed to contain nine rooms, two baths and sleeping porches. The interior will be finished in pine with some elm panels. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, \$7,000, Oakland, Cal. Architect, A. W. Smith, 1610 Broadway, Oakland. Owner, Walter J. Vane. The dwelling will contain seven rooms and baths. The interior will be handsomely finished in oak and white enamel. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500, Oakland, Cal. Architect, none. Owner, H. C. Pfingst, 5525 Taft Ave., Oakland. The bungalow will contain 6 rooms and bath. The interior will be finished in pine and redwood. There will be some oak floors. There will be open fire places and tile mantels. The

exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000, Oakland, Cal. Architect, none. Owners, Jespersen and Topp, 278 1/2 St. St., Oakland. The dwelling has been designed for a six room house with tile throughout. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,500, Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Mr. Inganlshe. The dwelling will contain seven rooms, bath and sleeping porch. The interior will be finished in pine, redwood and hardwoods. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,500, Oakland, Cal. Architect, none. Owners, Conservative Building and Investment Co., 68 Post St., S. F. The dwelling will contain seven rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

ARCHITECT'S CERTIFICATE.

SANTA CLARA COUNTY.

Win. D. Shea has filed his certificate of architecture for Santa Clara County. Filed June 18, 1912.

ANNOUNCEMENT

The Board of Public Works of the City of Los Angeles, realizing that active construction on the Los Angeles Aqueduct is nearing completion, has authorized the organization of a Sales Department for the purpose of disposing of all excess material and equipment. While large quantities will not be available until the work is over, varying amounts will be released from time to time and either sold at nearest railroad siding or at Receiving Yard, Corner Slauson and Compton avenues.

Material to be sold includes steam and electric power shovels, mules, horses, wagons of all kinds and sizes, electrical equipment, drills, drill steel and sharpeners, compressors, air receivers, pumps, boilers, locomotives, both steam and electric, rail of all sizes, riveted pipe, casing, black pipe, forges, blowers, gas engines, hoists, tunnel and dirt carts, concrete mixers and buggies, lathes, drill presses, steam hammers, machine shop equipment, etc., besides quantities of small tools of every size and description.

Correspondence or personal visits invited regarding any or all items in quantity or otherwise. If article wanted are not yet available, record will be kept and notification made as soon as same are released.

All communications should be addressed to E. W. BANNISTER, Sales Engineer, 1108 Central Building, Los Angeles, Cal.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, A. W. Ross and Mrs. Frances Zeln. to prepare the plans and the details of the work can not be obtained at this time. The owners state that provision will be made to increase the height of the building from two to three stories.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Garrett & Dixon, Currier Bldg., L. A. Owner, Mrs. C. G. Cistrucchio. The building will cover an area of 51x150 feet and has been designed for a commercial garage. There will be sales rooms, storage space and a machine shop. The interior will be finished in pine and hardwoods and tile. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings.

Garage—1 story and base, hollow tile. Cost not stated. Concordia, Riverside Co., Cal. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner, George Phelps. The building has been designed for a commercial garage. The floor will be of cement. There will be modern plumbing and electric work. The exterior will be of cement plaster. Plans are complete and the work will be done by Day Labor.

Garage—1 story and base, brick. \$26,000. Los Angeles, Cal. Architect, none. Owner, H. F. Volmer, care of the Union Realty Trng. Realty Board Bldg., L. A. The building will be located as a commercial garage and will cover an area of 129x182 feet. There will be a cement and tile floor. The front portion of the building will be occupied by sales rooms and offices. The exterior of the building will be faced with pressed brick. Plans are complete and the building will be carried to completion.

Hotel—1 story and base, brick. Cost

not stated. Los Angeles, Cal. Architects, California Real Estate and Building Co., Realty Board Bldg., L. A. Owners, Hill Street Lot Co. The building will be 69x163 feet. The plans provide for two stories and the hotel lobby on the first floor and 110 guest rooms on the upper three floors. There will be forty baths, steam heat, two elevators and a vacuum cleaning system. The interior finish will be of pine, mahogany and white enamel. The exterior of the building will be faced with pressed brick.

Memorial Hall—1 story and base, reinforced concrete, \$50,000. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Southwest Museum. This is one of several structures which will ultimately be erected by the Southwest Museum. The memorial hall will be 36x119 feet and will contain curators' room, work rooms, space for the mechanical equipment and a large public room. The construction will be of reinforced concrete throughout. The exterior of the building will be faced with cement plaster. Plans are now being prepared and will be ready for figures about September 1st.

Stores and Offices—8 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Willis & Morgan, Story Bldg., L. A. Owner, Hill-Ke. This building has been mentioned here before. The structure will be 104x120 feet. There will be nine stories on the first floor and fourteen large lodge rooms and offices on each of the upper floors. There will be three passenger elevators. The building will be heated by steam. The

interior trim will be of metal. The exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

Stores and Offices—Height not determined. Class A construction, \$1,000,000. Los Angeles, Cal. Architects, William Curlett & Son, Duchan Bldg., S. F. Owners, Merchants' Fireproof Building Co. The building will be erected at the northeast corner of Sixth and Spring streets. This will be a complete steel frame construction extending to the full height limit permitted by ordinance. The basement and first story will be occupied by the Merchants' National Bank and the upper stories will contain offices. Complete details of the building will be given later.

Offices—2 story and base, reinforced concrete, \$35,000. Los Angeles, Cal. Engineers, Mayberry and Parker, Pacific Electric Bldg., L. A. Owners, Los Angeles Gas and Electric Co. The building will be 45x136 and will be erected at the works of the company on East Seventh street. The work will be under the direction of C. A. Luckenbach, Supt. of Construction, 645 South Hill St., L. A.

Contracts Awarded.

School—1 story and base, brick, \$25,000. Los Angeles, Cal. Architect, George F. Costerian, California Bldg., L. A. Owners, City of Los Angeles. Contractors, Gavanag-McCutcheon Co., Union Oil Bldg., L. A. Contract price, \$20,877.

SEATTLE AND WASHINGTON.

Factory—3 story and base, reinforced concrete and steel, \$100,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. The big structure will cover a ground area of 355x150 feet. The plans have been approved by the owners and the architect has started work on the finished drawings. The building will be fire proof throughout. Work will be started by the 1st of September. The exterior of the building will be faced with cement plaster. More complete details will be given as the plans progress.

Lodge Hall—5 story and base, brick and steel. Cost not stated. Walla Walla, Wash. Architect, R. H. Ullrich, Pacific Bldg., Seattle, associated with Architect Carl L. Lind, Portland. Owners, Walla Walla Elks' Hall Association. Word has been received here that all bids for the construction of this building have been rejected. Plans will be revised and new figures will be called for shortly.

School—3 story and base, reinforced concrete, \$150,000. Tacoma, Wash. Architects, Heath & Gore, National Realty Bldg., Tacoma. Owners, City of Tacoma. The building will be known as the Central School and has been

Reversible Windows

Without Weights and Cords

Inside View

This window performs all the functions of a double hung window. Perfect ventilation. Each sash works independently. No rattle. Wind and rain proof. Does not interfere with curtains or shades; Reverses perfectly. Send for details and price list.

Here you have a double casement, where each sash is reversible. Can be worked as a single casement just as easily. This is the only single casement with reversible sash.

designed to contain 14 class rooms, assembly hall, manual training rooms and science departments. The construction will be fire proof. The mechanical equipment will be complete in every detail. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Stores and Offices—5 story and base. Class A construction. \$500,000. Seattle, Wash. Architect, William Kinnesley, Empire Bldg., Seattle. Owners, Times Publishing Co. The preliminary plans for the building have been completed and approved by the owners. The plans show a structure of 50x196 feet with a complete steel frame and exterior walls of terra cotta. The construction will be fireproof with floors and roof of concrete and iron stairways throughout. There will be tile floors and hollow tile partitions. There will be four elevators. Working drawings will be completed as soon as possible.

Stores, Offices and Museum—7 story and base. Class A construction. \$500,000. Seattle, Wash. Architect, William Kinnesley, Empire Bldg., Seattle. Owners, Washington State Art Association. This work has been mentioned here before. The architect states that the excavating will be started by July and that the balance of the plans will be complete by the time that the excavating work is finished.

PORTLAND AND OREGON.

Factory—Eight not stated, reinforced concrete or brick and steel. Cost not stated. Portland, Ore. Architects, Doyle, Patterson & Beach, Portland. Owners, Ford Motor Car Co. The preliminary plans only for this building have been prepared and have been sent to Detroit for approval. At first but one building will be erected and a second next year. This is one of three large buildings that are to be erected by the Ford Co on the Pacific Coast. One will be erected in Seattle, one in Portland and the third in San Francisco. Details will be given later.

Hotel—5 story and base, brick and steel. Cost not stated. Roseburg, Ore. Architect, Earl A. Roberts, Portland. Owners, Provident Trust Co. The building will be 50x110 feet and will contain, besides the public lobby and offices, 120 guest rooms, about 10 of which will have connecting baths. There will also be a large public dining room and several stores. There will be steam heat and elevator service. Running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans for this work will be complete by July 1st and figures will be taken.

Library—3 story and base, reinforced concrete and steel, \$500,000. Portland, Ore. Architects, Doyle, Patterson & Beach, Portland. Owners, City of Portland. This work has been mentioned here several times before. Plans are now complete and figures will be called for at once. The building will cover an area of 156x152 feet and will be of fire proof construction throughout. The design is in the classic style. Besides the usual rooms found in this type of buildings, there will be a large auditorium seating 500 people. The interior finish will be of tile, marble and metal. The exterior will be faced with pressed brick and limestone.

MR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out dated.

The Simplex is manufactured in 49 different varieties.

Send for details.
